That is sort of true eh? The N5HHH would sound like a "T" and then "ERROR"
if sent really quickly! :)

Why should you manually have to look up managers? Humm. Firstly, if they have a manager, they usually say so when on the air, even during a contest. Ask the guy and then you know for sure. Jot it down in the log for future reference. He might tell you that they are direct only. Secondly, even if a station is in a common country, it doesn't mean he participates in his buro system. Germans must pay membership or they don't get cards. U.S. Amateurs are a bit spoiled in this regard. Most stations are direct or buro and don't use a manager. How many of these are you working who need a manager routing? Just curious.

The easiest way to solve your problem is to simply ask the dx op how he prefers to qsl.

Looks like Hans is the only one to venture an answer, and you're right Hans, the "KG1" was used in Iceland by personnel on the NATO base up until influential members of the Reykjavik Radio Club lobbied their government that the prefix was an insult to Icelandic sovereignty. An amendment to the SOFA agreement required NATO personnel to obtain "TF" call signs for amateur radio operations. The plan backfired when NATO base personnel began operating the base club station 24/7 and handing out "TF" confirmations to the tune of several hundred a week. The anger went so far that NATO personnel were banned from attending meetings of the Reykjavik Radio Club in downtown Reykjavik. We were met at the door and told to get out, that we were not welcome. Why? Because the Icelandics, I.E. Reykjavik Radio Club wanted to keep Iceland a rare DX contact on the air, and that could not occur with us sending out hundreds of QSL cards a week, confirming a "TF" contact. The Reykjavik Radio Club wanted all ham

radio operations from the NATO base to cease totally. However, the U.S. State Department, realizing ham radio was a morale factor for NATO personnel, struck a compromise with the Icelandic government. Henceforth, NATO personnel would use their home country call signs, followed by a /TF, or "portable TF." Reykjavik Radio Club members (Icelandics) were still not happy and retaliated by voting a permanent ban on all foreigners from meetings of the Reykjavik Radio Club and prohibiting any Icelandic from engaging in domestic communication with resident foreign stations. Don't ask me how such a ban worked. I have no idea, but I know of at least one Icelandic who defied it, and Igmar Yohonasson (sp), president of the Reykjavik Radio Club, had the guy's ticket revoked in 72 hours. So much for international ham radio friendship in the Land of Ice, Fire, and Snow.

You did, based upon DXCC rules, claim my operation was illegal. But
you have been wrong on so many counts that you really don't recall
what you've said anymore.

Tell us again how a military commander cannot authorize amateur operations.

Nope. Try again. I claimed that your operation was illegal. I also claimed that your operation was no good for DXCC credit.

Izzat right?

> Tell us again how a military commander cannot authorize amateur
> operations.

Let's say you work as a weatherman for an airlift command post. Let's assume that the commander is a Colonel. You work directly for him. Would you believe that he is authorized to grant you permission to operate on the ham bands from your overseas post of assignment? Do you think it is necessary for such authorization to be in writing? Would you have nagging doubts about permission issued by such an individual given that he is not in charge of U.S. forces in the country? It wouldn't surprise me in the least if your "commander"--you know, the guy who supposedly told you it was okay for you to spray RF in the ham bands from Somalia--would respond, "The hell I did!" if quizzed by anyone on whether he ever gave you the go-ahead.

11. Q: W6ELProp prediction parameters

Newsgroup: rec.radio.amateur.dx
Date: 2003-01-01 21:43:50 UTC
From: Bjorn Henrik Vangstein <vangstein@bluezone.no>
Message-ID: <1041456660.83850@a217-118-32-43.bluecom.no>
Source record: 11245

I'm using the fine W6ELProp software to make condx predictions on HF. But I'm not quite sure on the prediction parameter settings. Some help would be very welcome:

1) Minimum radiation angle:
The program is very sensitive to this setting. My antenna is a vertical high up and the main lobe has an theoretivcal elevation angle equal to 16 degrees. But if I limit the usable modes to 16 degrees or higher the propagation predictions turn out very bad! What is the practical lower limit here? 10 degrees? Or even lower?

2) Noise bandwith:
Should I set this equal to my receiver bandwith (500 Hz on CW)?

3) Transmitter power:
I expected that the predictions should be sensitive to the transmitting power used. Why isn't this a prediction parameter?

Guess my call WA2ISE would have a CW friendly suffix.

Or you could pound out "whiskey bravo nine november mary echo" in CW. :-)

The main advantage of on of those calls (BHH for example..mine) was that I got dang good at CW...real quick. And so did those trying to copy my hand keying of KN8BHH.

Thats not such a bad call. My old TO Keyer will send that automatically when the 'ratio' adjustment isn't set correctly and I spill beer on the paddle.

Dave, you are still under the assumption that a military commander
cannot authorize amateur operations. Now you wrongly assume that a
Colonel cannot be a commander, whereas Steve saw a commander under
every pair of butter bars.

Do I need to start counting cadence so you won't trip over your own
bootlaces?

Naw, too late. Just dust yourself off and keep going.

Brian

17. FYI: QSL Mail Lists & E-mail sources

> worldwide have computer and internet right next to their radio?

Internet access, no, but in contesting now, a computer is hard to do without. My computer is as much essential to my operations as is my hf rig.

> I am sure that at any given time, of all amateurs currently opearting on
> HF bands not more than 10% are connected to internet. And many many have
> not internet access at all.

I don't know how many have computers. But when a computer is less than the price of a hf rig, it shouldn't be too hard to get one. Most (all?) of the software will run on 486 machines and possibly even 386 machines. And especially when a person is contesting, if they are trying to finess it, they need something to look up who is where.

> If I am in the contest and I hear station K2G CQing, if I am multiplier

No, I haven't assumed that at all. I pointed out that someone can be
directly in charge of you and still not be the commander who can
authorize amateur radio operation in a country. It doesn't matter
much. You didn't get written permission from anyone at all.

> Do I need to start counting cadence so you won't trip over your own

You can count all the cadence you like. I'm no longer in the military
and I'm wearing moccasins.

How many times must I tell you before it sinks in:

1) The DXCC desk (with advice from the DXAC) is the final arbiter on
what is accepted for DXCC credit.

2) (a separate issue) You have no proof of permission to operate from
Somalia at all *punto* unquote

Now, what was it that you were sure I told you?

Dave K8MN

I wonder if Ed is still over there doing his work or whatever it was he was doing. Or was he actually ordered out of the country as well.
I just heard he was ordered off the radio and the station taken down.

Craig

I think you have.

I pointed out that someone can be
> directly in charge of you and still not be the commander who can
> authorize amateur radio operation in a country.

A commander has ucmj authority to courts martial and/or non-judicial
punishment. I'm fully aware of what a commander is.

And a commander has the authority to give permission to a subordinate
to operate amateur radio in Somalia, a fact which you said was wrong
wrong wrong.

Apparently you're still missing the point.

It doesn't matter
> much. You didn't get written permission from anyone at all.

I can tell. Too much time and distance to discern what a commander is
or is not.

You claimed that my operation from Somalia was illegal based upon DXCC acceptance/nonacceptance. You continue to amend your statements as I call you to the carpet for each inaccuracy.

You're learning, but only slowly.

...if one assumes that two lines on the ARRL web page are the sum total
of knowledge and information on the subject.

> Apparently you're still missing the point.

You don't have a point. You have no commander willing to stick his neck
out and say that he gave you permission to operate. You have no
paperwork stating that you had permission to operate.

I don't need to recognize a commander. I've had proper written
permission every place I've operated. Each operation was credited for
DXCC.

You, on the other hand...

Then you have little knowledge of the really stupid things that the
Five Tubeless Tyres (used to be The Seven Dwarfs) have done in the
field of serious telecommunication.

Of course, most hams have no concept of what the FCC does outside of
ham radio....

Nothing personal, OM....

Hi,

Thanks Ted for this useful information.

But apart from the adress of Amateur Achievement does it exist an URL
at which this award desk publishes some more information about these
awards or others ?

During my days in professional broadcasting, it never ceased to
amaze me how virtually all ham radio operators believed the
sole function of the FCC was to regulate ham radio. Those of us
who worked professionally in communications, as well as holding
ham tickets, found this amusing!

Kevin Williams

As I've said before, it's 1,000 times more information than you had
when you said that a military commander couldn't authorize any such
thing.

> > Apparently you're still missing the point.
>
> You don't have a point. You have no commander willing to stick his neck

When I operated I had permission. I'm no longer there. My commander
is no longer there. I no longer sign "portable T5."

What more do you want?

You were never in a situation where a commander had the authority to authorize amateur operations. You have no experience in such matters. You even went so far as to say that commanders cannot authorize any amateur authorizations.

It was me who has provided you with such an education.

I see you talking about the DXCC desk again. I don't see you mention
any other "authority."

> > You're learning, but only slowly.
>
> Don't just stand there mumbling to yourself, DO something.

I have no proof that I was authorized to drive equipment up to 5 tons, motorboats up to 27 feet, etc. But I did. And it was legal.

Oh gosh, now what?

Are you going to give me a retroactive no-ops citation?

32. P5 and K1B

Newsgroup: rec.radio.amateur.dx

Is it too soon to think my P5 card may have not made it? He has mine and has had it since Oct 1, 2002. Just wondering if all the other SSB cards from Ed have been received yet.

Has anyone NOT yet received their SSB cards for K1B yet? I haven't gotten mine, and think that I probably didn't send enough money to "buy" a QSL card from them for our QSOs on 10 and 15m.

Thanks

Don't cast aspersions like that. The manager for Ed has leaned over backwards to assist all of us. I know of no one who has NOT received a card for a valid contact that has not received his/her card whether they sent in ANYTHING with their QSL or not. You owe an apology to everyone who has been associated with the endeavor.

I have no problem with Ed... In fact he actually took the time to QSO even with a pile-up... I was the one trying to hurry so more people had a chance to work him... Nope, no problem there..

NOW, if you had read the post carefully, you would have seen that the problem has been with K1B... Statements on this NG previously have been that the SSB cards were slow in coming and that is was probably a mistake to use a manager in Russia. (Even the K1B group sort of admitted that on their website). There was also word that if you didn't send 2 IRCs, you may not get their card..... I repeat.... "I probably didn't send enough money to "buy" a QSL card...".

Apologies for mis-reading your post. Since I wasn't interested in the K1B operation, I'm not aware of any problems associated there. You may not have sent enough to pay for one, or your contribution may have been detoured. But most everyone tries.

Why not? CW is supposed to be a lot of fun, and by first converting
all the Q-signals to longhand, then converting them to phonetic
alphabet, you can make your fun last even longer. With all that fun
practice, you'll be up to 50baud in no time.

CW cards no problem, but very few that I know have received SSB cards from
K1B.
I'm still waiting after seven months.

This is appalling for a DXpedition.
I included USD$2 for my 6m QSO and in a separate post included an IRC for HF
QSOs.
What a waste of time, effort and money... and who's to say resending another
will result in any luck too?

Bah humbug to YT1AD

I hear Canadian and Latin American Stations working JA/HL/YB/DU Dx at 2130Z but nothing is heard in SE USA until about 2220Z. Today I heard these stations:

HL5FUA 5/9 at 2235Z working FM5AN.
YB1A 5/9+10 at 2240Z
Also heard JO1DZA 5/9, JA7EYR 5/7. I have also heard YB1AI about this same time. I still don't hear XV, XW that have been heard in Texas.(no gray line on these right now)

Please stay on until 2230Z (I know its tome to go to work there) and please listen up. Those of us with beams can make it through the BC QRM.

73 Dave K4JRB

W 5 T I T currently has 3 cards waiting for he to claim at the buro.
Anyone can access the on line llokup. SAhe just needs to send sase's or
a little cash to the buro at Box 2591, Claremore , OK 74018-2591 to get
them.

42. A question of Propagation

Newsgroup: rec.radio.amateur.dx
Date: 2003-01-04 16:41:35 UTC
From: lombryt@hotmail.com
Message-ID: <db35a0c.0301040841.110e6d8@posting.google.com>
Source record: 11126

Hi,

Here is an information that will probably interest the casual amateur wishing to work DX stations, older ones who can no moe worked over 220-250 DXCC or new SWL in quest of technical informations about propagation.
The advanced hams should know this fact.

For years I wonder why from Europe I could not hear the Western US coast when I heard quite well NJ and sometimes the midwest. At other occasions I could hear ZL and VK on mornings using the grayline but no more one or two hours later, at last when I could hear YLs in PY I could not more listen to UA0 stations.

But the problem was still worst in the lower bands. When bands are fully opened up to 29.9 Mhz, the lower one, 7 Mhz and below can stay close.

I never understand why how all that worked until yesterday.

Discussing with ON4LDU, Alain Bartz, him with his excellent knowledge of radio, me with my astronomy background, we tested various setup in the famous propagation simulation software W6EL. Then I understand what the matter in clicking on various bands and verifying the related MUF vs the solar index (or sunspot number) and K-indice.
For detail about these parameters see on my website,
http://www.astrosurf.com/lombry/qsl-perturbation.htm

In fact we observed the opening in the propagation during a few days. First the tops bands open to UA0, then JA, ZL, ZS, PY, US east, US west...). We tried to call a JA when the opening was on VK, unsuccessful. We tried to call a VK when the sun was near PY, No VK worked. But when the Sun rised on VK we could worked them, etc, etc. So we had a confirmation that the opinings follow striclty the sun position over the earth and it was really stupid to try to make e.g. many JA wheh you hard several VK. Confirm the fact with W6EL software, but it is 100% sure that your can hear both simultaneously.

For the lower bands W6EL confirmed us that the solar flux and K indices have to reach high values. If all the world (clicking any position on the world map) display a MUF of 29.9 there are few chance to work on lower bands but when the world display everywhere 7 Mhz or a lower value you can be sure to work all the world on the 40m and below, what we also experimented using a simple Cushcraft vertical R7.

This is this way and using others "tricks" we worked very easily ST0F recently. We said to each another than we listen/worked him in less

that 5 days. We get the QSO the 3d day, in SSB without waiting more than a few minuts.

By way of conclusion, remember that working DX is also a question of smart, intelligence and surely not a question of chance.
The propagation turns clockwize from UA0 to VK, ZS, PY, US west coast to end in the Pacific. If you respect this simple rule you will understand much more easily how to work such or such DX.

But this is not the only "trick" to work DX stations. They are several others.
To read my other posts or on my website.

Hope this helps

Thierry

43. DXing in knowing hams practicies

Newsgroup: rec.radio.amateur.dx
Date: 2003-01-04 16:56:32 UTC
From: lombryt@hotmail.com
Message-ID: <db35a0c.0301040856.2cdaf92b@posting.google.com>
Source record: 11127

Hi,

How to work a rare DX when you have difficulties to get a QSO during a pile-up ?
Your quest may last a few days or even weeks if you work as QRP or using a poor antenna system.

A trick, complementary to studying the propagation conditions, is to understand the way hams work on the air, on what frequencies, at what time.
More than once I observed that many hams worked always on the same frequencies (at 0.1 Mhz near) and in a range of 2 hrs, e.g. mostly between 0930-1100z.

With the objective to worked several specific DX, clusters offer a great and appreciated assistance.
Recently I had to work ST0F, one of the rare Africaner I had not loggued yet.

Searching on the EA4 cluster database trough a connexion via DX4WIN (a little publicity for his author), I found that this amateur, ST0F, worked usually on specific frequencies (e.g. 21210 kHz or so) and often at a specific time of the day (near 10z).

Ok, go ahead !
I was there on the sked and in less than 1-2 minuts I had the QSO confirmed.
I never had a so rare DX so fast...
My friend using a poor antenna and working in SSB was even able to get his QSO confirmed before another friend living near using a 2 kW and a beam...
How proud we were... But we knew the practices of the DX station, not our neighboor... A excellent lesson to remember !
DXing is a pleasure but can become a torture when the DX does not hear you. This way, preparing your QSO in knowing the remote station pratices can greatly improve your scores (and reduce your stress too).

Hope this helps

I am not wrong. You said you couldn't operate in Vietnam. Maybe too much happy smoke or maybe you just bootlegged. Probably hear a different story tomorrow anyway.

Here's the quote:

"There was no amateur radio operation permitted by the military in Vietnam. I know of two legal stations, both operated by American civilians during my time in country. My military commander did not have the authority to permit me to operate on the ham bands. I don't have any written permission either."

No, it is assuredly with indication. You are without any indication
that you ever had permission to operate from T5.

My commander had the authority. His decision was that I couldn't
operate.
Don Riebhoff was operating legally right across town at the same time I
was in country. He used to run phone patches for Ambassador Bunker.

I did no petitioning, Brian. I made application. Vietnam had a
government. I still couldn't operate.

And I had no written permission and did no operating in the ham bands.
My commander advised that he could not grant permission. I was in the
military and had to accept his word. Yet Don Riebhoff, a civilian,
operated legally right across town from me.

So I broke no regs, no laws, did no bootlegging, had no QSOs. Now, back
to your situation...

So, 1) you were not in a situation where your commander had the
authority to authorize amateur operations, and 2) you have no
experience in such matters.

You accepted your commander's word.

No, Cecil, he didn't. Your commander had no decision to make, had no
authority to rescind a standing rule. He simply told you what the
rule was. The rule was, you said, ~no military pers can operate
amateur radio in Vietnam."

> Don Riebhoff was operating legally right across town at the same time I
> was in country. He used to run phone patches for Ambassador Bunker.

I can see the deep scarring that has caused. Must be why you found a
new career in the State Department.

> > > You have no experience in such matters.

Its just that you say different things on different days and cannot
remember contradicting statements. I just wondered who you were
yesterday. Who will you be tomorrow?

> > > > It was me who has provided you with such an education.

David, there is no "authority" listed in the above document, other
than the DXCC. Reading it again won't make it magically appear. You
go be embarassed.

I'd be embarrassed if I were either of you! What an incredible clutter of
unuseful drivel!

Beware! The Celestial rrap/rradx Emperor may banish you both to the Big
Grumpy Place and you will have to perform square dances with Steve Robenson
and Len Anderson.

Did I have a choice? Doesn't matter, does it? I did not break laws or regs, did no bootlegging, had no QSOs.

Now, back to your scenario.

Care to answer the questions I posed?

This is surprising. Bruce (the manager) has been exceptionally
prompt
about getting these out. You might want to drop him some email and
see what he knows. I sent mine on September 23 and received a
response on September 28. Fastest turnaround I've ever had on
any card.

Ropes and Ladders? Whatever are you talking about?

Did you scale the walls of the former American Embassy in Mog and see
me operating?

No, I didn't say that. I said that seeing another being allowed to
operate in Vietnam and you denied operation in Vietnam has caused deep
scarring.

All that happened before you ever heard of me.

> > > > > You have no experience in such matters.

You said that military personnel weren't allowed to operate in
Vietnam, but civilians were.

If you were a military person, why did you apply?

Who did you make your application to?

> > > > > > You even went so far as to say that commanders cannot authorize any

It's not "my way." Perhaps if the government of Vietnam had allowed
you to operate amateur radio there you wouldn't be so emotionally
scarred.

But look on the bright side. You saw a civilian state department pers
who was allowed to operate amateur radio and you made a career out of
it.

The statement only looks complex at first, Brian. It isn't. You've apparently read the item marked "1)". If you'll look at the item marked "2) (a separate issue)", you might find the key. That issue covers your lack of documentation.
There is no documentation of licensing for your supposed operation by any licensing authority whatsoever anywhere on the planet. In other words, anyone who questions whether you were authorized to operate is told to take your word for it. That doesn't wash anywhere.

While I was attached to the FCC Field Enforcement Office in San Francisco, I got an emergency assignment to attend a local meeting of a telephone industry rate and accounting practices committee that by charter required an FCC representative - the regular member having taken sick suddenly.

There I was, with a group of high-powered interstate telephone accounting professionals...who were amazed to find out that the FCC regulated radio communications and had field enforcement agents to do so.

I apparently knew more about their end of the business than they knew about mine.

I didn't see him operate. He died in a car wreck in Spain in the '80s.
I didn't. I knew him and liked him.

No, I didn't say "civilians were". A couple of civilians were
successful in obtaining licenses. Don Riebhoff was one. Chester XV5AC
was another.

Apparently not so scarred as to begin bootlegging while claiming that I
had official permission to operate.

> But look on the bright side. You saw a civilian state department pers
> who was allowed to operate amateur radio and you made a career out of
> it.

I didn't see anyone else operate. I didn't state the op worked for the
"state department" (the words are capitalized, Brian) and I didn't go to
work for the Department of State for about fourteen years afterward. I
was so scarred that I played music and sold electronic components. Hate
to spoil a peachy theory.

In early March the operators for the second Ducie operation will leave Gambier Island in French Polynesia via boat for Pitcairn and then Ducie.

The organizer, JA1BK, indicates that several more operators will be welcome, particularly one who is CW competent. Some phone and RTTY experience will be helpful.

Interested and experienced operators can contact Stu, WA2MOE at wa2moe@firstinter.net with a brief outline of experience. Dates and other details will then be provided.

Ya missed the point.... morse code is the language or coding scheme that you would be sending the callsign.... you would be sending the morse code over a CW. Not necessarily interchangeable. One is a language/coding scheme and the other is a method of radio transmission.

> way to differentiate.

A bit late, but maybe still usefull.

PP-PY prefixes are only given to A and B class hams.
Class C hams have the PU prefix. Class D (VHF only) use the
ZZ prefix.

The Brazilian Oceanic Islands all use 0 (zero) after the
prefix, and the first letter of name of the island...e.g.:
Fernando de Noronha PY0F, PU0F
St. Peter and S. Paul Rocks are PY0S, PU0S
Trindade is PY0T, PU0T
Martim Vaz is PY0M, PU0M
Rocas Atoll is PY0R and PU0R

You woni¿½t probably hear Rocas, Martim Vaz or St. Peter & St.
Paul with their "regular" callsigns for they are
uninhabited. You would hear them just in DXpeditions, and
then, The callsigns could be almost anything.

The amateur service rules (as defined by ANATEL's norm
31/94) specify 3 types of callsigns. The "normal" ones, are
those in the PP-PY range, as stated by AC6V.
The eventual callsigns are those effective in a specified
period of time, eg for contest, expeditions and
comemmorative (is this spelled OK?) events, and are in the
ZV-ZY range.
Last, the special callsigns would use the unallocated
prefixes.

The ITU allocated the PPA-PYZ range to Brazil (thanks to
AC6V links). The ANATEL (our equivalent of US' FCC) uses the
2 letter + 1 number (0-9) prefix scheme.

well, 73s for U all.

Even in Brazil the call signs don't follow the area number. Last August PV2UKE (special station from the Esperanto World Congress) was operating from Fortaleza (Area 7). Why the local authorities didn't allocated a call sign with the area 7 prefix nobody knows... Unless the rules changed in Brazil and any prefix and number is valid for any area in the country.

88. Tivoli Audio Henry Kloss Radio One or CCRadio Plus?

Newsgroup: rec.radio.amateur.dx
Date: 2003-01-11 21:40:41 UTC
From: Larry Dawson <ldawson.lnk@ispi.net>
Message-ID: <ldawson.lnk-E7CEE8.15403711012003@ip-157.206.13.13.bluetelegraph.com>
Source record: 11072

Does anyone have experience with either the Tivoli Audio Henry Kloss Radio or the CCRadio Plus from C. Crane? I need a radio that will tune in, at nigh,t WGN 720-AM out of Chicago, IL and KIOS-FM out of Omaha, NE. I live in Lincoln, NE. I have tried many different radios with little success. My Sony Super Radios II and III are pretty much worthless on AM but do a reasonable job out of doors with FM. Of course I want indoor reception. The Radio Shack answer to the Super Radio was a waste. My Sony ICF 7600 short wave is real inconsistent on AM and ok on FM after midnight. The radio that has been the most consistent for me is my Aiwa CD boombox! I have tried all of these with their wip antennas, a long wire that I have running outside, and a Terk AM Advantage table top loop antenna. This one has proven to be the most helpful, but it isn't consistent. My Terk AM-FM Q powered table top radio does an excellent job on my FM stereo tuner, but didn't help any of the portables. I'm not looking for portable, just something under $200.00 that will allow me to listen to the stations I mentioned. I've rambled enough, can anyone offer suggestions or an opinion on the Tivoli or Crane? Thanks for the information.

Judging from what you have said about previous experiences I don't think
you're going to have much luck with AM. The CC Crane job is an
excellent receiver on AM but no radio is going to compensate for normal
fading and 'skip' reception on AM. Sounds like you've been the route
already trying different antennas.
As for FM, thats a totally different topic. I suspect if you had a
proper outdoor FM antenna, even a cheapo Radio Shack one, your FM
reception would be greatly improved on any radio. You could clip it to
the whip antenna and still get some improvement but a radio with an
external FM antenna jack would obviously be better.

Good luck,
Bill

Hi,

Is there some OM who prepare a DXpedition to Antarctica to record the next total eclipse of the Sun (in November) and make some QSO from there ?

If you plan an astronomy trip see http://www.astronomicaltours.net

If you prefer a shorter trip (< 5 weeks) see here http://www.icstars.com/AstronomicalTours/Antarctica2/Index.html

Amateur Radio Newsline™ Report 1326 – January 10, 2003

Amateur Radio Newsline report number 1326 with a release date of Friday, January 10, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio gets two new satellites and the F-C-C tells a radio club that it wont get involved in an internal club dispute. The details on Amateur Radio Newsline report number 1326 coming your way right now.

(Billboard Cart Here)

**
HAM RADIO IN SPACE: RUBIN-2 / SAFIR-M IN ORBIT

Two new ham radio satellites are in space. One is from Germany and the other from Saudi Arabia. Q-News Graham Kemp, VK4BB, has the details has the details on a German payload called SAFIR-M:

--
Audio Only Report. No text available. Hear it in MP3 at
http://www.arnewsline.org
--

More information is available i on the SAFIR-M website http://amend.gmxhome.de But be advised that it is in the German language. There is no English translation provided. (ANS, Q-News)

**

HAM RADIO IN SPACE: SAUDISAT 1C ALSO IN ORBIT

The other new satellite is called SaudiSat 3. Its also known as SaudiSat One C and now as SO-50 – its ham radio designation.

As it name implies, this is the third in the unique SaudiSat series. It was also on board the same Russian launcher that orbited SAFIR-M.

Accordiing to AMSAT North America, this latest bird in the SaudiSat series comes by way of the Space Research Institute of the King Abdulaziz City for Science and Technology. For ham radio operation it carries what amounts to closed but available on-demand cross-band F-M repeater. The input uplink is on 145.85 MHz. The output channel is 436.775 at 250 milliwats into a quarter wave antenna.

And like a growing number of terrestrial repeaters, this orbital one requitres use of an access tone. In the case of SaudiSat, that tone frequency is 67.0 Hertz.

And there is one other similarity to closed terrestrial repeaters. SaudiSat-1C also requires that a designated control operator activate it on each pass so that it can be used by the general ham radio community. (ANS)

**

THE 5 MEGS EXPERIMENT: ARRL SAYS ITS WAITING FOR A NEW BAND

The ARRL is out of the 5 Mhz experiment and is now hoping for for the creation of a new ham band. Amateur Radio Nerwsline’s Norm Seeley, KI7UP, has the rest of the story:

--
The ARRL has permitted its WA2XSY experimental license for 5 Mhz to expire on January 1st. The League says that it is now pinning its hopes on the FCC to establish a new ham band in that spectrum but admits that it is facing some stiff opposition.

An ARRL bulletin says that starting in January 1999, 15 Amateur Radio clubs and individual hams took part in the 5-Mhz experimental operation that basically concluded in 2002. Through these operations the ARRL says that it obtained sufficient information to justify its petition for creation of the new band.

Last May, the FCC proposed going along with the ARRL's request to create a new domestic secondary High Frequency allocation from 5.25 to 5.4 Mhz. But in August the National Telecommunications and Information Administration requested that the Commission not go forward with the proposal. The NTIA says that several government agencies with allocations in the proposed spectrum had expressed reservations about sharing the spectrum with hams.

But the ARRL is still very hopeful the new band can be created. In fact, it has been working with the government to resolve the impasse. Meantime, the FCC has yet to act on the 5 Mhz request.

For the Amateur Radio Newsline, I’m, Norm Seeley, KI7UP.

--

The ARRL says that the new allocation at 5 MHz is an urgent priority for Amateur Radfo. It says such an allocation would enhance emergency communication activities by filling a propagation gap that exists between the 80 and 40 meter bands. In the meantime, experimental operations on 5 MHz continue on a limited basis in the United Kingdom and in Canada. (ARRL)

**

RESCUE RADIO FOLLOW-UP: THE GUAM SUPER TYPHOON

Guam continues to recover from the super typhoon which hit last month. Amateur Radio Newsline’s David Black, KB4KCH, has the latest:

--
By far, the best source of information during and after the December 8th super typhoon that hit Guam has been Duncan Campbell, KF6ILA. Campbell lived through the storm and reported on it and the welfare of Guam’s ham radio community through his postings to the QRZ.om website. In his latest report Campbell says

that the focus has shifted to recovery from the giant storm.

Campbell says that utility services are slowly being restored. As his report was filed about 30 percent of the island had both electricity and water. He says that the electrical restoration is hampered by a lack of transformers on the island. A shipment is expected shortly.

More signs of recovery Schools were slated to re-open on January 6th. Three schools which are too damaged to reopen. These students will be bused to other schools which are open.

As to ham radio on the island. As reported earlier all of Guam's radio amateurs are safe. There was s damage to some homes due to windows being blown out but no homes were destroyed. And two members of the Marianas Amateur Radio Club radio reportedly rode out the storm in their boat moored in the harbor.

Campbell says that a pair of Guam's more senior hams were not able to get their antennas down in time. He explains that the younger operators usually take care of them before a typhoon when there is notice. This time the typhoon was being reported as missing Guam by 100 miles up to 12 hours prior to landfall. So their antennas were still up when the typhoon hit. Needless to say the antennas and towers were destroyed.

Having talked to these two, Campbell reports that they do not know when, if ever, they will be able to replace their antennas. But help may be on the way. The Marianas Amateur Radio Club is already in discussions to install some wire dipoles for the high frequencies and some copper J-Poles for 2 meters at their homes.

Finally, Campbell says that the Red Cross, Salvation Army and FEMA are doing an outstanding job here on the island. Though he hears that the national news outlets are not covering this disaster, he wants the world of Amateur Radio to know that Guam is not being neglected..

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to Campbell, the Army field hospitals he reported having been flown in have now shut down and the medical professionals have now returned home. The hospitals have been stabilized with power and water, and the damage occurred has been patched, though final repairs are still months away. (KF6ILA, ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W5MCC New Orleans VHF Club 2 meter net heard Monday nights on their 146.86 MHz repeater.

(5 sec pause here)

**
ENFORCEMENT: ITS NOT OUR BUSINESS

If you are having a personal disagreement with a member of your radio club, don't bring it to the FCC. That's the message sent by the regulatory agency to a Texas group where it says that it will not iget involved. The agency's Daryl Duckworth, N-N-Zero-W, explains:

--
Duckworth:"The complaint of the Texas Soputhmost Amateur Radio Club concerning actions by a former trustee was dismissed. The club was told that the matter was Civil and best handled by the local courts."
--

By way of background in January of 2002 the San Benito, Texas, based filed a complaint with the FCC. It requested that the Commission issue a Cease and Desist Order to Thomas A. Tanner directing him to stop unauthorized operation of the club repeater. It also wanted him to remove his personal equipment from club property and discontinue unauthorized use of other club equipment.

But says the FCC says that setteling what amounts to interpersonal disputes is not within is jurisdiction or purview. Rather its a civil matter and not one that the Commission does not plan to pursue any further. (FCC, RAIN)

**

ENFORCEMENT: NO MUSIC ON 2 METERS

The FCC has told an California ham that he could face some strong punitive action. This, following allegations that he transmitted music in the two meter band.

The warning comes in a December 12th letter to Mark T. Sprague, KF6WAF of Antioch. In it the regulatory agency says that monitoring information indicates that on numerous occasions in October and November of 2002 that Sprague transmitted music on 146.415 MHz simplex and also failed to properly identify his station. The FCC says that direction finding bearings led them directly to Sprague's home.

The agency tells Sprague that these charges are violations of Sections 97.113 and 97.119 of the Amateur Service Rules. It adds that he could be subject to license revocation and suspension proceedings, as well as a monetary forfeiture or fine. (FCC)

**

ENFORCEMENT: STAY OFF 20 METERS

One last chance to straighten out your act or we we act against your ham license. Thats the jist of a warning from the FCC to a Michigan ham. Amateur Radio Newsline's Mert Garlick, N6AWE, takes an in-deoth look:

--
The threat of stern enforcement action comes in the form of a letter to to Michael E. Guernsey Sr., ND8V, of Parchment Michigan. Its from FCC rules

enforcer Riley Hollingsworth, K4ZDH. In it, Hollingsworth says that his agency continues to receive complaints of Guernsey's alleged appropriation of certain frequencies and interference to certain operators who attempt to use them. Among the frequencies mentioned in Hollingsworth's letter are 14.262 and 14.275 Mhz – both in the 20 meter band.

And the FCC notes that this is not the first time that it has taken up enforcement issues to Guernsey. Hollingsworth letter reminds ND8V that the agency has contacted him before regarding such incidents. Specifically on November 14, 2000 and May 20, 2002. And after the November 2000 incident Guernsey's authority to operate below 30 MHz was removed for a period of nine months.

And says Hollingsworth, he is not going to warn Guernsey again. He tells ND8V that if it writes to him another time it will be to notify him that the FCC is taking punitive action. Hollingsworth says that future incidents of such operation -- even a single incident -- will result in a fine being issued and revocation proceedings against Guernsey's ham radio license being initiated. That says the FCC, is the way that it is.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE.

--

Meantime, Hollingsworth has taken one step to defuse the overall problem. He has told Guernsey to stay off of the 20 Meter Amateur Band until the issues surrounding the allegations of his operation are resolved. (FCC)

**

ENFORCEMENT: HAM JAILED FOR SPYING STILL HOLDS HAM TICKET

A ham who is serving a life sentence for espionage still has his ticket. This even though he will probably never be permitted near a piece of ham gear again. Amateur Radio Newsline's Kenn Locke, N8PJN, tells us why:

--
Remember Robert Hanssen the former F-B-I agent convicted last year of spying? If you do, you will also recall that he held the Amateur Radio service call sign K-9-Q-V-L.

Well guess what. He still does.

Contrary to what many hams thought would happen, the FCC has not acted to revoke his Amateur Service licenses. The reason? Most likely nobody has bothered to ask it to.

While Hanssen may have been one of the highest profile cases in 2002, the charges against him did not involve prosecution by the FCC. It was a matter for the Department of Justice and Federal Prosecutors. As such, its very unlikely that anyone in either agency sat down to write a letter to their counterparts at the FCC asking them to cancel Hanssen's ham radio license.

The bottom line: Unless someone files a formal request, the chances are that Robert P. Hanssen will remain as K9QVL until his ticket expires. Maybe longer if he decides to try to renew it from his cell in the Federal Penitentiary where he will probably live out the rest of his natural life.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN.

--

Thanks Ken. (ARNewsline™)

**

REPEATER LISTINGS: ARRL SEEKS REPEATER LISTINGS FROM COORDINATORS

This note to frequency coordinators. The deadline for this year's submissions of listing for the 2003 ARRL Repeater Directory is Friday, February 7, 2003. As has been the case for many years, the ARRL only accepts listings from recognized frequency coordinators unless no coordinator exists in a specific region. For more information on how to list repeaters please contact Brennan Price, N4QX, at ARRL headquarters. His e-mail is n4qx@arrl.org. (Repeater Owners Remailer)

**

ARRL: LICENSE RENEWAL AND OTHER SERVICES TO NONMEMBERS

The ARRL is now providing F-C-C Amateur Radio license renewals, address changes and other license modification services to nonmembers. For a $12 fee, the League will renew a nonmember's Amateur Radio ticket within 90 days of expiration, file an application to change address or name or request issuance of a new sequential call sign.

For several years, the ARRL has been handling renewals, address and name changes and modifications free of charge for members. Nommembers were directed to the FCC's free Internet or hard-copy application options or to other providers of such services. (ARRL)

**

GOOD INFORMATION SOURCE: NEW RFR WEB SITE

Our friends over at the CGC Communicator report that RF Safety Solutions has a new web site dealing with that very subject.

As its name implies, RF Safety Solutions is a company that provides consulting for those concerned with human exposure to RF signals. It was founded in 2002 by Richard Strickland who is a well-known expert in the field of RF safety and who has developed RF safety programs and conducted training for a number of major wireless communications companies and broadcasters

The RF Safety Solutions web site covers RF safety reporting, safety programs and training. There is also a good overview of what RF radiation really is. Its really one of the best thought out places to learn about R-F safety. Look for it in cyberspace at www.rfsafetysolutions.com. (CGC)

**

NAMES IN THE NEWS: CHANGES AT THE CGC COMMUNICATOR

And speaking about the CGC Communicator, word of a major change at that broadcast industry publication. Editor - Publisher Bob Gonsett, W6VR, has announced that Steve Blodgett, W7RNA,
has assumed the helm as Letters Editor.

Formerlly WA7GFV, Steve Blodgett is well known to broadcasters nationwide. He holds an Adcanced class Amateur Radio license and has been actively engaged in broadcasting operations and engineering for nearly 35 years, with stations in Montana, Arizona, and California. For 14 years he worked as the Chief Engineer and Radio Engineering Manager with the late Gene Autry’s Golden West Broadcasters in Los Angeles. He also used to operate an on-line bullrtin board for Chapter 47 of the Society of Broadcast Engineers and served as chairman of the Southern California Frequency Coordinating Committe. Thats the group which handles broasdcast remote pick-up recommendations.

In making the announcement, Gonsett says that having Blodgett on board will allow him more time to concentrate on CGC's consultant radio engineering practice along with frequency and spectral monitoring services. It will also permit W6VR time to to pursue a number of new opportunities as well. (CGC)

**

FREE STUFF: WABA DIRECTORY ON THWE WEB

The Diamond DX Club reports that the new WABA or Worked Antarctic Bases Award Directory for 2003 is now available for free downloading. Its in Portable Document Format on the club's web site at www.ddxc.net. The new version includes a 12-page revised Antarctic bases listing with the latest corrections and a new column for Islands on the Air reference numbers. It also sports a a new section containing historical notes. Again that URL is www.ddxc.net. (Diamond DX Club)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

CHANGING OF THE GUARD: GRONK RADIO NETWORK FOUNDEER - SK

One of the pioneers of repeater interlinking has died. This, with word that Gary Belda, K6ENS, has become a silent key

According to a report from Bruce and Melanie Forestal -- thats WB6ARE and K5QQA -- Gary Belda was one of the principals behind the Gronk Radio Network. Gronk

is one of the oldest 440 intertied remote base systems in the South-Westen United States and stretches the most of the Calidornia coastline.

As one of its archetects, Gary Belda among the berst liked hams in the world of F-M and repeaters. He worked in the two-way radio industry for Advanced Electronics for many years before leaving to join the field of traffic control systems. He was an expert in the aera of two-way radio and always willing to lend a hand on a ham radio repeater project.

Belda died in whats described as an unfortunate accident possibly related to antenna work. No other details are available at this time. A memorial service was held for him on Thursday, January 9th, at the First United Methodist Church in Redondo Beach California. (W6KGB)

**

ON THE AIR: COMMEMORATING HISTORY

History is coming to the ham bands. This, with word from UT5UKY that special event station EM60USB will be active from January 23rd through February 2nd to commemorate the 60th anniversary of the Battle of Stalingrad.

The Battle of Stalingrad was one of the decisive World War II Russian victories. It stopped the German army’s southern advance and turned the tide of the war.

Now, 60 years later, ham radio will be an integral part of the commemoration of that historic event. And if you get to work EM6-0USB you are advised to QSL to UT5UKY either direct, or through the bureau. (UT5UKY)

**

INTERNATIONAL-CHINA: RADIO MAG LIFT TRAIN RUNS JAN 1

The world's first magnetic levitation or mag-lift passenger train began running in Shanghai China on January 1st. The radio controlled train reached 312 miles per hour in testing. In regular service it will carry passengers and freight at a top speed above 250 miles per hour between Pudong International Airport and Shanghai's financial district. The distance is 30 miles an the trip will take mere 7 minutes -- not even enough time to make a quick cell phone call. (Technology Online)

**

PROPAGATON ASSISTANCE: C6AFP BEACON MOVING

Steve Rutledge, N4JQQ, says that he plans to move the C6AFP beacon on 50.062 Mhz in the near future. It is currently located at Treasure Cay, Great Abaco, Bahamas in grid FL-16. It will be going to a new home on Green Turtle Cay, Bahamas which is about five miles away. This is another island, same grid. C6AGN has agreed to let Steve put the beacon up at his QTH. (VHF Reflector)

**

CONTESTING: LINDHOLM TO CQ WWW VHF CONTEST

Turning to on the air operations. Word that John Lindholm, W1XX is the new Director for the CQ World Wide VHF Contest. Lindholm replaces Gene Zimmerman, W3ZZ, who left to take over writing the World Above 50 Mhz column for QST magazine. (VHF Reflector)

**

DX

In DX, DK9GG and DJ4KW will be active as V31GW and V31YN from Belize until February 25th. On February 8th they will be joined by DL2SWW and DG2TM. The four plan to operate from NA-073 on the 21st through the 23rd of February. QSL direct to each operators home call. (DL2VFR)

And K9YNF reports that he will be active as K9YNF slash HR9 from Roatan Island. This, from January 11th to the 18th. He will operate SSB only on 14.260, 18.128, 24.950, 28.460 and 28.560 Mhz. This, plus or minus a kew kilohertz to compensate for any Q-R-M. QSL via his home call -- either direct or via the bureau. (425 DX)

**

THAT FINAL ITEM: DOGGIE TALK AND THE IG NOBEL AWARDS

And finally this week, word that an inter-species communications device has received special recognition. Amateur Radio Newsline’s producer Bill Pasternak, WA6ITF, has more:

--
No, we are not kidding. An inter-species communications apparatus -- as in a dog-to-person translator -- is one of the winners of the 2002 Ig Nobel Awards.

What are the Ig Noble awards you ask? They are a spoof of the famed Nobel Awards ceremony and are given annually at Harvard University to recognize achievements that cannot or should not ever be reproduced.

Winners are selected by a secret committee from thousands of nominations. Actual Nobel Laureates present the Ig Nobel’s at a
ceremony where the winners are hailed with cheers and a flurry of paper airplanes. And if a recipient feels insulted or slighted by the award, it is withdrawn.

For 2002 those victorious included the people behind the definitive study on bellybutton lint and an inquiry into what arouses ostriches. But by far the dog to person translator was one of the most popular. Its works by listening to the tone of a dog's bark converting that data into an interpretation of the dogs mood.

The device is already on the market in Japan. An English language version called Bow-Wow-Lingual -- nope -- we are now kidding -- Bow-Wow-Lingual -- It may be on the market here in the U-S-A in about a year. And we thought that you’d want to know.

For the Amateur Radio Newsline, with my dog Daisy, I’m Bill Pasternak, WA6ITF.

--

Hmmmm. If it happens, we wonder what breed will be honored with an Ig Nobel for being the first to dog to get a ham radio license and make DXCC.

More about the Ig Nobel awards is in cyberspace at http://www.improb.com/ig/ig-top.html (Science Frontiers)

Wes Stewart <n7ws@#arrl.net> said :

>|but very few that I know have received SSB cards from
>|K1B.
>|I'm still waiting after seven months.
>
>Me too except I didn't send until Nov, thinking that I wouldn't
>overload them.

I got mine after a wait of about 7-8 months and all the information was entered correctly. HOWEVER--what really surprised the heck out of me was that the card was filled in BY HAND, and the QSL filler-outer's handwriting looks like the hand was nearly ready to drop off! I'm extremely surprised that they didn't use a logging program to verify and print labels for this operation.

I also think that using a Russian address for such a major operation was insane. The DX-pedition was multi-national, so I don't see how it would have hurt to use a postal system that's not as widely reknowned for corruption and theft. There must be one stateside manager who would have been willing to take this operation on.

Wasn't lucky enough to work Ed, so I can't speak to the P5 part of your comment.

Mind you, it took a LOT longer for me to get a card from PW0T than from K1B (SSB), and that was using a very reliable manager here in the US, so anything's possible. Not to slag Steve in any way--he's swamped handling numerous Big Guns' cards.

Amateur Radio Newsline™ Report 1327 – January 17, 2003

Amateur Radio Newsline report number 1327 with a release date of Friday, January 17, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian telecommunications regulators oppose the Amateur Radio fix for 40 meters and hams on Fiji provide aid in the wake of cyclone Ami. These stories are first on Amateur Radio Newsline report number 1327 coming your way right now!

(Billboard Cart Here)

**

SPECTRUM ISSUES: AUSTRALIAN REGULATORS FAVOR 40 METER STATUS QUO

A disagreement over the future of the 40 meter band between Australia’s national amateur radio society and that nations telecommunications regulators. The Australian Communications Authority -- the A.C.A. favors the status quo. The Wireless Institute of Australia says its time for a change. From Brisbane, Q-News Graham Kemp, VK4BB, picks up the story:

--

The 7 MHz issue. Currently A.C.A. is against the motion at WRC 2003 -- which is of course at variance with the current allocation in Australia. At present the A.C.A. are steadfast in their opposition to the motion notwithstanding numerous attempts at lobbying them. The WIA position is in support of the IARU motion and WIA will continue to lobby A.C.A. to support the full 300 kHz allocation at 7 MHz on a world wide basis.

WIA President Ernie has asked: "If anyone can think of any additional justification that we can provide to A.C.A. to make them change their minds please let the A.C.A. Liaison Committee know and we will try and push the matter with A.C.A. again".

--

What impact the A.C.A.’s stand will have on the outcome of WRC 2003 cannot be assessed at this time.

**

RESCUE RADIO: CYCLONE AMI HITS FIJI

A Cyclone named Ami has torn across parts of Fiji, destroying homes and unleashing floods across northern islands. And it appears that once aghain, Amateur Radio has come to the rescue, It all happened on January 14th. Amateur Radio Newsline’s Jim Meachen, ZL2BHF, has what we know so far.

--
Packing sustained winds in excess of 90 miles per hour and gusts of 125 miles an hour, the Cyclone Ami whipped up mountainous seas, cut communications and left the tourist hub of Labasa, on the main northern island of Vanua Levu, under four feet of water. All normal lines of communications with Vanua Levu were cut at about 17:00 GMT as the storm approached. Vanua Levu is where a quarter of Fiji's 800,000 people live.

According to news reports, emergency officials did manage to restore partial communications with Labasa and the town of Savusavu late on Tuesday using Amateur Radios circuits. Over them they learned that Labasa was under four feet of water after a nearby river overfload its banks. Also that there had been extensive damage throughout the area.

But even these communications efforts were hampered by extensive flooding. Also, the extent of the involvement of hams is still unclear since news reports did not give the names or call signs of the operators handling the emergency operations.

Here in New Zealand the government has already sent an air force surveillance plane to assess damage. Another aircraft was scheduled to arrive in Fiji the same day and, carrying aid experts and some relief supplies.

For the Amateur Radio Newsline, I’m Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand.

--

The cyclone is the second to hit the South Pacific in as many weeks. Thousands of inhabitants of a remote part of the Solomon Islands chain northwest of Fiji survived powerful Cyclone Zoe, which hammered the area with 190 mph winds.

**

RESCUE RADIO: HAMS AID IN WAKE OF TYPHOON ZOE

And speaking of Cyclone Zoe, ham radio is helping in recovery efforts following that storm after it hit the Solomon Islands a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England has more:

--

Students and graduates of the Solomon Islands Amateur Radio Training School have been on the air from the capital Honiara in the wake of Cyclone Zoe.

The storm hit the islands of Tikopia and Anuta in the Solomon's remote Temotu Province last week. The amateurs are volunteers at the National Disaster Management Organisation and are providing assistance to the staff of three at NDMO HQ during the current state of disaster in the Solomons.

Using donated equipment received last year fromoverseas amateurs and CB operators, the first on the air was Moffet, H44MD. He was told that three 100-watt HF transceivers were donated by an American amateur and sent by air mail three weeks before the cyclone.

--

As we go to air, reports say that the Solomon Island radio school graduates are still providing post cyclone aid. (GB2RS)

**

COMMUNICATIONS LAW: BIG BROADCAST TOWER WIN IN NH

Back here in the United States, a big tower case win for a broadcaster could have a trickle-down effedt for ham radio. This, after the New Hampshire Supreme Court has rejectes a city's zoning ordinance limiting the height of new communication towers to 42 feet. It says that regulation conflicts with federal law.

The ruling clears the way for Koor Communication Inc. to obtain local construction permits to begin constructing broadcast towers for WQTH-AM in Lebanon, New Hampshire. According to Radio World Online, Koor Communications first filed for variances to the ordinance in 1999 seeking to construct four antennas to the height of 266 feet in accordance with its FCC license and Construction Permit. The broadcaster's attorneys argued that Lebanon's restrictions effectively prohibited the construction of new radio stations.

Koor Communication lost several lower court decisions. This lead to the appeal to the state's highest court. That court has now said the lower court findings were incorrect and it reversed their rulings. (CGC Commuinicator, RW-ONLINE)

ARRL: BOARD IS MEETING

The American Radio Relay League’s Board of Directors is holding its first meeting of 2003 as this newscast goes to air. For a full wrap-up on what actions the Diirectors might take, go to the news pages on the ARRL website. Its easy to find at www.arrl.org. (ARRL)

**

ENFORCEMENT: HAM JAILED FOR SPYING FOLLOW-UP

Two interesting follow-ups to last weeks story on convicted spy Robert Hanssen, K9QVL. The first came in a note from the FCC which takes issue with our account.

It says and we quote: “the assertion that we need a complaint to pull Hansen's ticket or anyone else's ticket is dead wrong.” Endquote.

But thats all the spokesman says. No other information was provided.

The other item is even more interesting. After the story ran, we began getting reports that Hanssen's call had been deleted. We went over and checked the FCC's database. It was still there. It was also on the Buckmaster websire, but ther was a surrprise when you inputted the K9QVL call over on QRZ.com. It came back stating that the K9QVL listing was no longer in the QRZed database. (ARNewsline™)

**

ENFORCEMENT: FCC RESCINDS ND8V WARNING LETTER

The FCC has canceled its recent warning letter issued to Michael Gurnsey, ND8V, and has told the Parchment Michigan ham he can resume operation on the 20 meter band.

As reported last week, the agency's Riley Hollingswoth, K4ZDH, had written a very sternly worded letter to Gurnsey. It stated that it would initiate stern punitive action against him if it received any more complaints that he was appropriating certain frequencies on the 20 meter band. It also told him to stay off 2o meters until the issue could be resolved.

But on January 3rd the Hollingsworth wrote to ND8V once again. This time it told Gurnsey that he could disregard the warning letter and resume 20 meter operation. It also went on to thank him for his cooperation in resolving the matter. No further information was provided by the FCC. (FCC)

**

ENFORCEMENT: NY HAM FACING REVOCATION

The FCC has written to a New York city area ham telling him he may face license revocation proceedings. The Commission's Daryl Duckworth, NN0W, explains:

--
Duckworth: "A Warning Notice and Notice of Intention to Designate a Revocation and Suspension Proceeding was issued to Alexander Sandbrand N2NNU for operation outside of his Technician class priveleges on numerous occasions and after warnings."
--

Sandbrand lives in Yonkers New York. That's a few miles due North of Manhattan. Back on August 17th of 2001 the FCC issued Sabndbrand a first Warning Notice regarding operation outside of his license privileges. The Commission says it now has information indicating that at least nine times since his receipt of that initial warning that Sandbrand operated out of band.

And in a related item, the ARRL Letter reports that Sandbrand called FCC rulers enforcer Riley Hollingsworth after receiving the first Warning Notice. He reportedly complained that it wasn't fair that he had to pass additional examination elements to operate on High Frequency phone. Hollingsworth supposedly told Sandbrand that if he wants to operate on H-F, he has to take the test like everybody else. (FCC, ARRL Letter)

**

RADIO LAW: TEEN ARRESTED AND CHARGED IN DIREC TV CASE

A 19-year-old college has been taken into custody on charges that he pilfered information about a new security system used by satellite broadcaster Direc TV and distributed it over the Internet. FBI agents in Los Angeles say that they arrested Igor Serebryany and have charged him with stealing information related to DirecTV's latest access cards. These are the access cards Direc TV uses to regulate what services its subscribers will receive.

According to several news reports, Serebryany who is identified as a University of Chicago student, allegedly took the information from a Los Angeles area law firm that was doing legal work for Direc TV. He ithen is supposed to have distributed it to web sites dedicated to the hacking of DirecTV's security systems.

According to the criminal complaint against Serebryany, DirecTV spent more than $25 million developing the high security "Period 4" card. This, after the three previous versions had been successfully hacked by pirates. Serebryany faces up to 10 years in prison, a fine, or both, if convicted. (Published news reports)

**

RADIO LAW: FCC SIMPLIFIES FILING PROCEEDURES WITH ECFS EXPRESS

The Federal Communications Commission has launched ECFS Express. This is a simplified version of its Electronic Comment Filing System or ECFS.

According to an FCC news release, ECFS Express is designed specifically with the consumer in mind. The FCC claims that it is easy to use, focuses on topics rather than docket numbers, and requires minimal input by consumers seeking to participate in the Commission’s public rulemaking process. People wishing to comment simply click on a topic, fill in their personal information, write their comments and hit “send.”

To access ECFS Express, users need only click on the “File Comments” logo found on the front page of the FCC’s Web site at www.fcc.gov The original version of the Electronic Comment Filing System, which includes all docketed Commission proceedings is still at the FCC website as well. (FCC)

**

COMMUNICATIONS LAW: A WARNING TO DOMAIN NAME SELLERS

A warning to Internet domain-name sellers. Keep better track of your customers or Congress will be forced to step in.

The warning comes from California Representative Howard Berman. He claims that domain-name sellers have an obligation to keep accurate records of their customers to ensure they can be contacted if they are improperly using trademarked names or engaging in other illegal activity.

According to Berman. Internet users must provide a contact name, address and other information when they buy a domain name. But the Congressman says that few name sellers run checks to make sure that the contact information is

accurate. Berman says that this lax oversight allows scam artists and cybersquatters looking to sell domain names to their rightful owners or others to hide their true identities. This he says, provides a barrier for law-enforcement officials investigating such crimes.

Berman says that he would like to see all the top-level domains start to implement these types of checks on their systems. He also warns that if self regulation does not work that Congress may have to step in. (Published news reports)

THE WAR ON TERRORISM: NYC REBUILDS WITH A NEW TV TOWER IN NEW JERSEY

A broadcast tower almost a half mile high to replace the structure lost when terrorists felled New York's World Trade Center could rise across the Hudson river in New Jersey. This, as an alliance made up of eleven broadcasters release a report as to why they favor proposed site in Bayonne over one in Jersey City. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
In a 17-page letter to New Jersey's environmental commissioner, the broadcasting alliance says the new tower would restore quality television reception for about three quarters of a million people in the metropolitan area. This is especially important to the regions poor and elderly who cannot afford to pay for cable or satellite reception. And the alliance called the Bayonne site far superior in terms of size, security, environmental concerns, cost and construction timetables.

And the groups president, Edward Grebow said the $200 million project would also be a boon to construction workers in the region. He also noted that the city of Bayonne wants to make the tower a central element in plan to transform the location into an area of offices, homes, stores and marinas. In addition to its television antenna system, the alliance suggests that the structure might also be used for scientific studies. This could include long term investigations into weather, climate and air pollution.

If constructed the new tower would not only become the world's tallest free-standing structure. It would also be the worlds tallest broadcast tower built at near sea level. For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

While New Jersey has the support of the regions broadcasts, other locations are still believed to be under consideration by local politicians and community leaders. (ARNewsline™ from listener reports)

**

EMERGING TECHNOLOGY: GENERATING ELECTRICITY WITH HOT AIR

Meantime, another would-be tallest man-made structure could soon be towering over the Australian outback. This, as part of a plan to capitalize on the global push for greater use of renewable energy.

By 2006, the Australian power company EnviroMission Ltd hopes to build a 3,300 foot high solar tower in southwest New South Wales state. The 200 megawatt solar generating station will cost nearly $563 million dallars to build and will be the width to a football field.

The technology behind its operation is very simple. The sun heats air under the tower’s glass roof. As the hot air rises, a powerful updraft is also created by the tower that allows air to be continually sucked through 32 turbines, which spin to generate power.

EnviroMission hopes to begin construction on the solar tower before the end of the year. It says that it plans on generating enough electricity to supply 200,000 homes around the beginning of 2006.

Currently, the world's tallest free-standing structure is the Canadian National Tower in Toronto. Its about 1650 feet high. (W8HDU)

**

CHANGING OF THE GUARD: DON MACKAY, ZL3RW - S.K.

The changing of the guard in Amateur Radio continues. This, with word that NZART Honorary Life Member and Past President Don Mackay, ZL3RW has passed away.

MacKay died at his home in Christchurch on January 14th after a long illness. Among his many accomplishments was his work in the introduction of Amateur service repeaters to New Zealand. This, at a time when that nations Post Office was opposed to such operation.

ZL3RW used his experience in emergency communications to sway the agencys decision in favor of permitting repeater operation. For many years it was this aspect of Amateur Radio that ensured their continuation.

Don MacKay is survived by his sister Margaret. A service in celebration of his life was held Saturday January 18th in the city of Christchurch. (NZART)

**

HAM RADIO IN SPACE: NO PACKET TO THE ISS
Packet users are being requested to not send e-mail messages to the all ham crew on board the International Space Station at this time. This, according to the AMSAT News Sercice which reports that they are not answering e-mail, and are realkly not expected to do so in the near future. No specific reason was given, but according to news reopprts the current all ham crew is very busy with many non ham radio related on-orbit duties. (ARISS)
**

HAM RADIO IN SPACE: ISS ALABAMA EXHIBIT FEATURES HAM RADIO
Ham radio will play a part as the City of Mobile, Alabama is hosts a four month exhibit of the International Space Station. This at the new Science Exploreum building.

The exhibit consists of a full scale mockup of the main parts of the ISS along with other aspects of living and working in space. According to N4UXY the Mobile Amateur Radio Club " W4IAX " will host a ham radio station that will attempt to talk to the real space station durinvg the exposition. The club also plans to demonstrate other aspects of the Amateur radio to an expected 80,000 visitors.

The show began on January 9th and ends on April 5th. More information is on the web at www.exploreum.net (N4UXY)
**

CONTESTS: 2003 WINTER 6 METERS CONTEST

The 2003 winter 6 meter contest is will commence at 2300 U-T-C on Friday February 7th and conclude at 03:00 U-T-C on Saturday February 8th. The rules are very simple. Each in-country QSO is worth one point. Out of country contacts score as two points. Hawaii and Alaska count as separate nations in this one.

Scoreing is total Q-S-O points multiuplied by the number of grid squares worked. Entries go by e-mail to w4wrl@aol.com before March 15th. They can also be sent snail-mail to Wayne Lewis, 3338 South Cashur Drive, Florence, South Carolina, 29501. (VHF Reflector)

**

DX

In D-X, PA3GIO will be active as ZK2GI from Niue from about the 18th to 26th of January. He will operate SSB only with 100 watts and a dipole antenna. If you work him, Q-S-L as directed on the air.

Also, KM1E is active from the Bahamas as C6AGN. He’s on 160 through 6 meters from now through the 4th of March.

And lastly, some good news about famed D-X’er Ron Wright ZL1AMO who suffered collapsed lungs in late November. According to Judy Rausch, AA7UC, of the International D-X Network, Wright returned to his home on January 13th to complete his recocery. (AA7UC, INDEXA)

**

THAT FINAL ITEM: CELEBRATING A NEW LICENSE CLASS

And finally, a big success for a big operating event celebrating a new license. That’s the word out of the United Kingdom as reports on the first ever Foundation Class Q-S-O party begin to filter in. Again to England and GB2RS news presenter Jeramy Boot, G4NJH:.

--
The M3 'QSO Party' on 40 metres on the 1st of January was a huge success with hundreds of newly-licensed M3 amateurs and their friends wanting to take part. Richard Jolliffe, G3ZGC, said: "I planned just to join in but when I switched on there were two M3s looking for a net controller. So as one of the Newbury club's Foundation Licence instructors I volunteered.

The pile-up was certainly the largest I have ever heard and I had to go to letters in the suffix and ask for M3 Alfa stations and work through the alphabet. In two hours I worked 112. At least half as many again were 'gotaways'."

Richard added, "What was very noticeable was that the standard of operating was fantastic by the M3s. It was noticeable how appreciative most of them were at having passed their exams. Many messages of thanks were passed to their local clubs. An excellent event."

Douglas Nixon, M3BKC, was one of the numerous Foundation Licensees joining in the fun. He said, "Richard did a splendid job as net controller during the hectic conditions that followed at times during the next two hours. Roger, G4RUW, also from Newbury, took over at 1200, followed by John, G4TSN, from Nottingham. Many thanks to all concerned."

Jeramy Boot, G4NJH
--

Obviously, the concepts behind the U-K Foundation Class license are rock solid and it is most likely the way other nations will go as they seek too increase participation in the hobby. (GB2RS)

**

For the technician class license -- a no code is available.
Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

For the other classes of license - see URL:

Most people's problems with the code stem from trying to learn it too fast without sufficient drilling before they move on to each new letter. The average person needs about 30 hours of study and practice on the code to hit 5 wpm. Now this is an average. Some will take longer and some will take less.

Dee Flint, N8UZE

GANA $$$$$ Y DIVIERTETE
Comments: LA HONESTIDAD ES LA MADRE DE LA VERDAD
(Est&#65533; en idioma Castellano al principio y en Ingl&#65533;s al final).
: : NO voy a tratar de convencer a nadie de que haga lo que no quiere hacer pero s&#65533; les puedo decir que si se decide a participar, as&#65533; como usted habr&#65533; muchos y le puedo asegurar que el sistema funcionar&#65533; y le dar&#65533; m&#65533;s de una alegr&#65533;a. Pru&#65533;belo, perder&#65533; poco por intentarlo y a lo mejor gana m&#65533;s de lo que se pueda imaginar.
: : Navegando en los grupos de noticias me encontr&#65533; con este art&#65533;culo y decid&#65533; probarlo, ya que puede producir grandes resultados con una inversi&#65533;n inicial de s&#65533;lo &#65533;SEIS DOLARES! : : Al principio lo le&#65533; con escepticismo, y pens&#65533;: "debe ser una estafa", pero como a todos, me gan&#65533; la curiosidad.
: : El art&#65533;culo dice que si env&#65533;o un billete de un d&#65533;lar a cada una de las personas en esta lista, suprimo entonces al primero y me coloco en el &#65533;ltimo lugar, para luego colocar esta informaci&#65533;n en 200 pizarrones, boletines o grupos de noticias (existen m&#65533;s de 30,000). Eso es todo.
: : Lo coment&#65533; con algunas personas y despu&#65533;s de escuchar variadas opiniones, decid&#65533; probarlo. He gastado m&#65533;s que eso en billetes de loter&#65533;a, as&#65533; que no ten&#65533;a mucho que perder. Seis d&#65533;lares y unas estampillas postales. Val&#65533;a la pena intentarlo. Y &#65533;adivinen qu&#65533; pas&#65533;? &#65533;en una semana comenc&#65533; a recibir dinero!. No pod&#65533;a creerlo. Supuse que acabar&#65533;a pronto, y me content&#65533; con la idea de haber recuperado mi inversi&#65533;n inicial. (Ya para entonces me hab&#65533;a arrepentido). Pero continu&#65533; llegando. Para la primera semana, recib&#65533; $25.00, para la segunda, casi $1,000.00. Para la tercer, $10,000.00 y contin&#65533;a llegando. Esta es la cuarta semana, y ya llevo casi $42,000.00. Ciertamente vali&#65533; la pena la m&#65533;sera inversi&#65533;n. Perm&#65533;teme explicarte c&#65533;mo funciona, y lo m&#65533;s importante, por qu&#65533; funciona. Antes que nada, aseg&#65533;rate de hacer una copia de esto para que puedas tener la informaci&#65533;n completa cada que la necesites. Te prometo que si sigues las instrucciones al pie de la letra, en unas semanas tendr&#65533;s m&#65533;s dinero del que creiste posible, haciendo algo sumamente sencillo. : : Una sugerencia: lee todo el contenido cuidadosamente, luego act&#65533;a sin perder un minuto &#65533;Vale la pena! Es perfectamente legal, NO es una estafa, NO es indecente, tiene un riesgo m&#65533;nimo, REALMENTE FUNCIONA, y s&#65533;lo requiere una inversi&#65533;n inicial de $6.00. Si te apegas a las instrucciones exactamente, recibir&#65533;s un total aproximado de $50,000.00 DOLARES en un m&#65533;ximo de dos meses, provenientes de todo el mundo. &#65533;Te das cuenta de que cada d&#65533;a hay aproximadamente 50,000 usuarios m&#65533;s de internet? Gente honrada, &#65533;ntegra y con sue&#65533;os, como nosotros, que tendr&#65533;n acceso a esta carta como t&#65533; y como yo, y estar&#65533;n dispuestos a intentarlo. &#65533;Pueden invertir seis d&#65533;lares, unos timbres postales y un poco de tu tiempo? &#65533;Ya lo creo! A&#65533;n en el peor de los casos, que nadie enviara el dinero, no se perder&#65533;a gran cosa. Pero seamos realistas, &#65533;cu&#65533;les son las posibilidades de que eso suceda, cuando hay tanta gente honrada y decente

navegando en internet?

: : POR FAVOR RECUERDA. ESTE PROGRAMA TIENE ÉXITO GRACIAS A LA HONESTIDAD Y A LA INTEGRIDAD DE SUS PARTICIPANTES.
: : PASO # 1) Consigue seis billetes de un dólar cada uno, y envuélvelos en papel de color oscuro o periódico para prevenir su robo. Mételos a los sobres con un pequeño mensaje, tu nombre y tu domicilio. Esto es legal. Si así lo deseas, confírmalo con tu oficina de correos o con las leyes que regulan las loterías y juegos de azar. Yo lo hice, y ambas me confirmaron que es correcto.
: : PASO # 2) Sella bien los sobres y envíalos a las siguientes personas:
: : 1) Chris Adkins : : 127 Cupsaw Dr. : : Ringwood, New Jersey 07456 : : U.S.A.
: : 2) Kim Kerslake : : 1 Hill Street : : Richmond 7002 : : Nueva Zelandia
: : 3) Irene Becerra : : P.O. Box 82110 : : Waco, Texas 76798
: : 4) M. Barradas : : Apartado de Correos 39-183 : : México, D.F., 15620 : : MEXICO
: : 5) Juan Pablo Baldiviezo : : Casilla Nº 5792 : : Santa Cruz de la Sierra : : Bolivia
: : 6) E. Vivas : : Chaparral 1, 1-2 : : Madrid 28033 : : España
: : PASO # 3). Ahora elimina el primer nombre de la lista de modo que el 2 se convierte en 1, el 3 en 2, etc., y coloca el tuyo con tu domicilio en el número 6
: : PASO # 4) Si así lo deseas, cambia lo que consideres necesario, pero trata de mantener este documento lo más apegado posible al original. Ahora colócalo en 200 sitios para anunciarlo durante tu navegación en la web. Entre más sitios lo anuncies, mayor será tu ganancia. Guarda una copia de estos pasos para ti, y cada que necesites dinero, úsalo una y otra vez. : : RECUERDA. ESTE PROGRAMA CONTINUA TENIENDO ÉXITO GRACIAS A LA HONESTIDAD E INTEGRIDAD DE SUS PARTICIPANTES Y EL APEGO ESTRICTO A LAS INSTRUCCICONES. No desearías que alguien te estafara, ¿verdad? No hagas a otro lo que no quieras que te hagan a ti. De este modo el programa continuará, y el dinero que tantos otros han recibido, llegará también hasta ti, como una consecuencia. Cada que alguien baja esta carta de internet y le da seguimiento, tu nombre subirá geométricamente en la lista, ¡multiplicado cada vez por 200! y todos los que invertimos, recuperamos nuestra inversión.
: : Sugerencia: Guarda todas las notas que te envíen con el dinero, así como los domicilios. Esto verifica que estás prestando un servicio.
: : INSTRUCCIONES PARA DIFUNDIR ESTA INFORMACIÓN:
: : PASO # 1) No necesitas mecanografiar esta carta, basta con colocar el cursor al inicio, arrastrarlo hasta el final y utilizar el comando "copiar" de tu menú "edición". Esto bajará la información a la memoria de tu computadora (ordenador).
: : PASO # 2) Abre un archivo nuevo en tu block de notas, colócate al inicio del mismo, y usa el comando "paste" del menú edición. Esto colocará una copia en tu archivo para que puedas modificar la numeración de la lista y colocar tus datos al final.
: : PASO # 3) Salva este archivo como ".txt" para que puedas recurrir a él cada que quieras insertarlo en algún sitio.

: : PASO # 4) Usa Netscape o Internet Explorer y busca diferentes foros para colocar esta informaci�n: Grupos de Noticias, anuncios clasificados, salas de "chateo", pizarras de intercambio, foros de discusi�n o cualquier otro sitio donde consideres que puede tener difusi�n. (se calcula que hay cerca de un mill�n y que esta cantidad se duplica cada tres meses)
: : PASO # 5) Coloca la informaci�n en estos foros acudiendo a tu archivo, seleccionando todo su contenido, y con los comandos "copiar" y "pegar" del men� "edici�n". En el area "asunto" dale el encabezado que t� quieras, �ste ser� el que llame la atenci�n y lleve a m�s personas a enterarse, y reg�stralo. �felicidades! Este fue el primero. Recuerda, entre m�s te anuncies, m�s dinero recibir�s, pero se requiere un m�nimo de 200 sitios. Eso es todo. En unos d�as empezar�s a recibir dinero de todo el mundo. Quiz�s hasta desear�s rentar un apartado postal por la gran cantidad de correo que recibir�s. Si quieres permanecer an�nimo, puedes usar otro nombre, s�lo aseg�rate de que los domicilios son correctos y que el cartero har� la entrega. : : Todo en esta vida es causal (no casual). Esta informaci�n lleg� a ti para hacer realidad un sue�o. Empieza ahora mismo, juega limpio, y pronto llegar� a ti la recompensa, adem�s de un mont�n de nuevos amigos.
: : ����BUENA SUERTE A TODOS Y GRACIAS POR SU TIEMPO!!!! ----------
---

EARNS $$$$$ AND you ENTERTAIN YOU
Comments: THE UPRIGHTNESS IS THE MOTHER OF THE TRUTH (Is in Spanish language at the beginning and in English to the end).
: : I am not going to treat to convince nobody that he do what does not want to do but yes I am able them to say that if decides to participate, as well as you there will be many and I can assure it that the system will function and more than one happiness will give it. Test it, will lose little by trying it and to the best earns more than what can imagine.
: : Sailing in the groups of news I found me with this article and I decided to test it, since can produce large results with an intial investment of only �SIX DOLARES!
: : At the beginning I read it with skepticism, and I thought: "should be a swindle", but as to all, the curiosity gained me.
: : The article says that if shipment a bill of a dollar to each one of the persons in this list, I suppress then to the first one and I place me in the last place, to then place this information in 200 pizarrones, bulletins or groups of news (exist more than 30,000). That is all.
: : I commented It with some persons and after listening various opinions, I decided to test it. I have spent more than that in bills of lottery, so did not have a great deal that to lose. Six dollars and some postal postage stamps. Was worth while to try it. And �they guess passed what? In a week I began to receive money! It could not believe it. I supposed that would finish soon, and I pleased myself with the idea if there it is recuperated my intial investment. (Already by then had repented). But continued arriving. For the first week, I received $25.00, for the second, almost $1,000.00. For the third, $10,000.00 and continues arriving. This it is the

quarter week, and already I carry almost $42,000.00. Certainly was worth while the m�sera investment. Perm�teme to explain you how functions, and it more important, why functions. Above all, you assure you to do a copy of this so that can have the complete information each that need it. I promise you that if you follow the instructions to the foot of the letter, in some weeks will have more money of the one that believed possible, doing something extremely simple. : : A suggestion: reads all the content carefully, then acts without losing a minute �Is worth while! It is perfectly legal, is NOT a swindle, is NOT indecent, has a most minimum risk, REALLY FUNCTIONS, and only requires an intial investment of $6.00. If yourself apegas to the instructions exactly, you will receive an approximate total of $50,000.00 DOLARES in a maximum of two months, originating of the entire world. You give yourself account that each day there are approximatel y 50,000 users more than internet? Integral, honest people and with dreams, as us, that they will have access to this letter as you and as I, and they will be willing to try it. They can invest six dollars, some postal bells and a little your time? Already I create it! Still in the most worse one of the cases, that did nobody send the money, himself not great thing would be lost. But we be realists, �which are the possibilities that that happen, when there is so much decent and honest people sailing in internet?
: : PLEASE REMEMBERS. THIS PROGRAM IS SUCCESSFUL THANKS TO THE UPRIGHTNESS AND TO THE INTEGRITY OF ITS PARTICIPANTS.
: : STEP # 1) Obtains six bills of a dollar each one, and you wrap them in dark or periodic paper of color to prevent its robbery. You put them to the envelopes with a small message, your name and your residence. This is legal. If thus you desire it, confirm it with your office of mail or with the laws that regulate the lotteries and play of chance. I did it, and both confirmed me that it is correct.
: : STEP # 2) Seals well the envelopes and env�alos to the following persons:
: : 1) Chris Adkins: : 127 Cupsaw Dr. : : Ringwood, New Jersey 07456: : OR. S. TO.
: : 2) Kim Kerslake: : 1 Hill Street: : Richmond 7002: : New Zelandia
: : 3) Irene Becerra: : P OR. Box 82110: : Waco, Texas 76798
: : 4) M. Barradas: : Section of Mail 39-183: : Mexico, D F., 15620: : MEXICO
: : 5) Juan Pablo Baldiviezo: : Booth N° 5792: : Holy Cross of the Saw: : Bolivia
: : 6) E. Vivas: : Chaparral 1, 1-2: : Madrid 28033: : Spain
: : STEP # 3). Now it eliminates the first name of the list so that the 2 becomes 1, the 3 in 2, etc., and places yours with your residence in the number 6
: : STEP # 4) If thus you desire it, changes what consider necessary, but tries to maintain this document it more attached possible to the original one. Now you place it in 200 places to announce it during your navigation in the web. Among more places announce it, greater will be your profit. It keeps a copy of these steps for you, and each that need money, use it time and again.
: : REMEMBERS. THIS CONTINUOUS PROGRAM BEING SUCCESSFUL THANKS TO THE

UPRIGHTNESS AND INTEGRITY OF ITS PARTICIPANTS AND THE APEGO STRICT TO THE INSTRUCCICONES.
You would not desire that someone swindled yourself, ¿truth? Do not do to another what do not want that they do yourself to you. In this way the program will continue, and the money that so many other have received, will arrive also to you, as a consequence. Each that someone it lowers this letter of internet and gives it seguimiento, your name will rise geom¿tricamente in the list, ¿multiplied each time for 200! and all the ones that invest, we recuperate our investment. : : Suggestion: Guard all the notes that send you with the money, as well as the residences. This it verifies that you are lending a service. : : INSTRUCTIONS TO DIFFUSE THIS INFORMATION:
: : STEP # 1) do Not you need mecanografiar this letter, suffices with placing the cursor to the start, to drag it to the end and to utilize the command "to copy" of your menu "edition". This will descend the information to the memory of your computer (ordenador).
: : STEP # 2) Opens a new file in your block of notes, you place you to the start of the same one, and uses the command "paste" of the menu edition. This it will place a copy in your file so that can modify the numbering of the list and to place your data to the end.
: : STEP # 3) Saves this file as ".txt" so that can resort him each that want to insert it in some place.
: : STEP # 4) Uses Netscape or Internet Explorer and different search forums to place this information: Groups of News, announcements classified, rooms of "chateo", shales of exchange, forums of discussion or any another place where consider that it can have diffusion. (it is calculated that there is near a million and that this quantity is duplicated each three months)
: : STEP # 5) Places the information in these forums responding to your file, selecting all its content, and with the commands "to copy" and "to hit" of the menu "edition". In the area "matter" you give him the headline that you want, this will be the one that call the attention and carry to more persons to be informed, and register it. Happinesses! This was the first one. It remembers, among more announce you, more money will receive, but a minimum of 200 places is required. That is all. In some days you will begin to receive money of the entire world. Quiz¿s until you will desire rentar a postal section by the great quantity of mail that will receive. If you want to remain anonymous, can use another name, only assure you that the residences are correct and that the mailman will do the delivery.
: : All in this life is causal (not coincidental). This information arrived at you to do reality a dream. It begins right now, plays clean, and prompt will arrive at you the reward, besides a pile again friends.
: : ¿¿¿¿BUENA LUCK TO ALL AND THANKS BY ITS TIME!

On January 10, 2003 I sent Roman, RZ3AA, an e-mail asking about the cards and green stamps that I had sent to him. For whatever it may be worth, here is his reply that I received on January 22.

Dear Sir (Madam)!
I'm awfully sorry, but today, on 21th of January 2003, I still haven't your card.
You may try to send another one to PO BOX 2059,Moscow,101000,RUSSIA.
To send your K1B card back to you I need one SAE and one newtype IRC for every 2 K1B QSLs. One QSL confirms only 4 SSB QSO .
Also you may send QSL via bureau. I will answer 100%. Please, don't worry, maybe it takes a little bit much time that you were waiting for, but anyway you will receive your K1B card.
73,Roman RZ3AA.

I just passed my code test at 5 wpm for a Canadian basic licence, and for study I downloaded the W1AW audio files. Also, the programe, Winmorse.exe is really helpful, because you can cut a block of text (say from an online newspaper), and it will turn it into code. I found that practising at 6 or 7 wpm helpful to prepare for 5 wpm. Also, convert the cipher groups from the old ARRL code practise book into code--cipher groups are random letters and numbers, so you can't guess the next letter. In the same book, there is a list of common words and endings, such as "the" "with" "ing" "tion" etc., that are helpful to learn as complete sounds.

Nothing beats practise.

NuMorse Pro from http://www.Nu-Ware.com does all that and much more. As well as a selection of different training courses it will generate QSOs and add QSB/QRN for extra realism.

Why reply to my personal e-mail only, when you can have the whole world see what a nice character you are? Let's see... I don't hear "hawaii on that much more do i"? I guess it must be due to the AA0MZ killing them off with a humorous and satiric website. After all, humor is the best weapon against humorless pansies.

> and by the way get an american name

I don't think so. However, feel free to get together with your Klan buddies, don a hood and reminisce about the good old times when all them niggers, commies, women and foreigners knew better than to piss off a "real" American like you.

And now to recognize your efforts in self-spotting:

http://www.qsl.net/aa0mz/febcrab.htm

And by the way, learn the English grammar. It seems that the more a person appears "patriotic", the more illiterate he is. I wonder why.

I found the best way to learn morse was to listen to letters at 15wpm with
enough spacing to slow the total wpm to a speed at which I could take then
as I progressed shorten the timing between the letters. Four or five months
at 20mins a day got me to approx 15 wpm.
THEN I got a key out and started sending...

Few points. Before you get your shorts so far up your butt that you
stop breathing......

First off, the web site says:

"This page is meant to be humorous and fun. It isn't meant to imply
that someone is a bad person, bad operator.....". So maybe you
need to borrow or rent a sense of humor.

Second, when I look in my cluster node database, which
contains most of the spots from the last couple years, I find that of
the 401 times you were spotted, you spotted yourself 136 times.
So 34% of the time that we see your call on the cluster, it's
compliments of you. Which probably is borderline obnoxious.....
And I'm sure that qualifies you as a Genuine Cluster Crab.

If you are 'DX', as you imply, you only need call CQ, and everybody
else will take care of the cluster stuff, so maybe you aren't as 'DX'
as you think you are.......

A few people still see the DX cluster system as a resource that
should be used with a certain amount of diligence. Others don't
comprehend the scope of the cluster system, and how clogged
up it can get with totally useless information.

The good news is this. You are a DX Cluster Crab, but you
are NOT a DX Cluster Monkey. I searched the DX Cluster
Monkey database at The DX Cluster Monkey Zoo:

http://kh2d.net/dxmonkey.cfm?ref=un

and you weren't in it. Congratulations.

Lighten up and enjoy life, you'll be around longer. And stop
spotting yourself. KH6 isn't even DX on a slow day.......

73, Jim KH2D

I like taking texts, such as a computer version of "My Utmost for His Highest," and running it through code. Good practise.

I worked IS0KEB (whose QTH is listed as Sardinia) back
in October of 2002. I tried to QSL him direct, but the card came
all the way back to me with a stamp saying the address was
incorrect. I also tried sending email, but that bounced too
because his mailbox is full.

Does anyone have any information about him and his correct
address?

Thanks,

Steve WQ5N

P4ORH, Bob, worked from Aruba using 28.460 on Jan 24th. He was on 10m on Jan 26th generally around 28.456 1730 UTC at least until 1830 UTC (info from DX Summit search)

This was a group of guys which included K4AVQ, Alan from MN. K4AVQ is the listed QSL mgr for the group. They used several call including US homecalls/P4. I talked with him a week ago and they expect 1000's of QSL's. Better send a SASE and be right about the call and time.

Amateur Radio Newsline™ Report 1328 - January 24, 2003

Amateur Radio Newsline report number 1328 with a release date of Friday, January 24, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Wildfires rage in Australia, an FCC official says the agency is excited about P-L-C and the past becomes today at Cape Cod. These stories and more follow on Amateur Radio Newsline report number 1328 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS HELP IN FIRE COMMUNICATIONS IN VK3 WIKLDFIRE

Hams in down-under are hard at work assisting in emergency communications as widfire rage in several Australian states. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest:

--
Audio report only. No text. Hear it at www.arnewsline.org
--

(Q-News)

**

RESCUE RADIO: REPEATER APPEARS LOST IN VK1 WILDFIRE

Meantime there is some good news regarding hams living in and around the city of Canberra. They are all reportedly O-K, but one of their local repeaters may have been lost in a widlfire thats has been sweeping the area. Phil Longworth VK1ZPL who is the WICEN Coordinator Canberra:

--

Longworth: "We have a couple of repeaters around town. One which is actually located at the NASA site down at Cape Mc Villa. We haven't heard it since Saturday. The scouts cannot get close to there because they have lost a lot of infrastructure. So we are assuming that we have probably suffered some damage."

--

The repeater being referred to is VK1RAC. So far radio operators have not been called in the Canberra area because there have be no major failures in the nations telecommunications system. But hams are standing by even though they may have to do without one major repeater.

(Q-News)

**

RESCUE RADIO: US HAMS NOT NEEDED IN MEXICAN QUAKE

Mexico's telecommunications system is working properly following a major earthquake and communications assistance from the United States is not needed. The quake hit in Nortth-West Mexicio. It registered 7.6 on the Richter scale, toppled dozens of homes, killed at least 24 people and injuring at about 175. And while telephone service in several remote areas was knocked out for a time, the Mexican government got it quickly restored. Also, Mexico's own ham radio community has decasdes of experience making outside aid not necessary in many cases.

Here in the United States, Gordon West, WB6NOA, has been monitoring the situation from his home in Costa Mesa Claifornia. Thats about 150 miles North of where the quake hit. And hes been taklking to hams in the area and confirms that United States hams going to assist are just not needed:

--

West: "In communiocating with the maritime mobile operators near Manzinello Mexico, many ofd the mariners rowed ashore and asked whether or not their ham radio gear on 40 meters might help relay messages back to the U.S.A. The villagers on shore evidently indicated that their communications were still up, and, that while they apreciated the boaters going ashore to ask for relays, none were needed.

The mariners did indicate that they felt a slight tidal movement. That was reported the following morning on many of the Baja maritime mobile nets."

--

West says that immediately after the quake hit he began monitoring the various frequencies known to be usaed by Mexican hams for emergencies on 40 and 75 meters. West says that not a signal on the air indicated any apparent need for mutual communications aid from the United States. Don. (ARNewsline™)

**

SPECTRUM ALLOCATIONS: FCC ON WRC-03 PROPOSALS

Back here in the U-S, an ARRL Bulletin says that the FCC is seeking comments on draft recommendations the World Radiocommunication Conference Advisory Committee adopted January 8th. Amateur Radio Newsline's Ken Locke, N8PJN, has more details:

--

The FCC's International Bureau says that based on its initial review of the recommendations, it tentatively concludes that it can generally

support the proposals recommended by the W-R-C 03 Advisory Committee. And if adopted, United States delegations will use the proposals at bilateral, regional and international meetings.

One agenda item of interest to hams involves examining the adequacy of the frequency allocations for High Frequency broadcasting in the vicinity of 4 to 10 MHz. The FCC also has draft proposals developed by Executive Branch agencies, and the agency is requesting comments on those as well.

The Public Notice was released January 15th. The deadline for comments is January 31st. Complete texts of draft proposals are available via the FCC's WRC 03 Web site. You reach it from a link at www.fcc.gov.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

Comments may be filed via e-mail to wrc03@fcc.gov. You can also submit them by mail the Office of the Secretary, Federal Communications Commission, 445 12th Street, SW, Washington, DC 20554. (ARRL)

EMERGING TECHNOLOGY: PLC MAY BE COMING TO THE USA

P-L-C could be coming to the United States -- but not right away. This according to a top official at the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

P-L-C stands for Powerline Communications and the idea is to use the same wires that bring electricity to your home as a pathway for high-speed Internet access. And as previously reported, in nations where P-L-C has been evaluated or approved it has caused moderate to severe degradation to a good portion of the electromagnetic spectrum. In fact,. several nations have decided against implementing P-L-C even though it holds the promise of becoming a less expensive alternative to cable modems and D-S-L telephone lines as a way to get broadband service.

And the FCC appears to be optimistic about P-L-C. On Wednesday January 15th, Edmond Thomas, chief of the Federal Communications Commission's Office of Engineering and Technology said companies developing the

technology have overcome many hurdles in the past year.

The FCC has been studying P-L-C technology for several months and Thomas says that the agency will pay more attention to it this year. He notes that there are no regulations that prohibit the technology, but the agency is concerned that Internet data transmissions carried over power lines could radiate signals inside and outside the home that could cause interference.

And Thomas indicates that the widespread introduction of Powerline Communications wont happen very soon. He says that the FCC wants to be certain P-L-C is not going to cause problems to your TV. And that's certainly good news for all communications services including Amateur Radio.

Reporting from Los Angeles, I'm Bruce Tennant, K6PZW.

--

Obviously this is an emerging technology that can impact negatively on ham radio and will have to be watched. (Published reports)

**

ENFORCEMENT: FCC CANCELS EXPERIMENTAL LICENSE WC2XZV

The FCC has cancelled an experimental license to California company because the agency says its being used for other purposes. According to the CGC Communicator, the FCC cancelled experimental authorization of WC2XZV after Enforcement Bureau monitoring confirmed the operation.

In a short letter dated January 17th, the Commission stated that the California station's emissions were not in compliance with the terms of its experimental radio license. But a story on recnet.com says a lot more. It says that that there were published reports of an alleged pirate station operating in the Antelope Valley area prior to the experimental license grant. The station was operating on 104.7 MHz and identifying as Frequency Radio with its website at www.1047.fm A check of the website makes no mention of the experimental license or the FCC action to cancel it. Acopy of the FCC's letter is posted in cyberspace at www.recnet.com/fcc/wc2xzv_cancel.pdf (CGC Communicator)

**
NAMES IN THE NEWS: MITNICK FREE TO REJOIN THE WWW

Former computer hacker Kevin David Mitnick, N6NHG, has completed his probation and is now free to once again use a computer and surf the web. After being released from prison three years ago on probation, the Mitnick had been barred from contact with computers until last year. He was not allowed to access the Internet until this his probation ended Monday January 20th.

But simply roaming the web may not what Mitnick has in mind. Since his release he has turned his efforts to becoming a consultant on computer

and Internet security issues. He hosted a radio program on Los Angeles talk station KFI, has written a book and has even testified before a congressional committee on ways to make computing more secure.

Only a few weeks ago the FCC agreed to permit him to renew his Amateur Radio license. The Administrative Law Judge hearing the case said that Mitnick was rehabilitated and would likely adhere to all of the agency's rules. And in a recent interview with the Los Angeles Times newspaper, Mitnick said - quote : "The truth is, I learned my lesson."

Kevin Mitnick, N6NHG, also learned a lot about computers and the world-wide-web from his days of hacking. Now he appears to want to use this knowledge for the benefit of all in society. (ARNewline™ from published news stories)

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO

The most trusted man in America has lent his name and callsign in support of the hobby. This as retired CBS newsman Walter Cronkite, KB2GSD, tells the story of hobby's public service efforts to the non-ham public in a new ARRL produced video titled Amateur Radio Today.

Cronkite narrates the program from his office in New York City from a script developed by Alan Kaul, W6RCL. Kaul is the West Coast Producer of NBC Nightly News and a former anchor here on Amateur Radio Newsline.

Amateur Radio Today was directed by Dave Bell, W6AQ, who is responsible for many ham radio films including the all-time classic "The Hams Wide World." Bell, Kaul, Bill Baker, W1BKR, of PBS and Bill Pasternak, WA6ITF served the co-producers. The show was edited at Suite Sixteen Post in Burbank California with Keith Glispie, WA6TFD, at the controls of the all digital Quantel Edit Box. But its really Walter Cronkite that takes you on a fast-paced six minute trip into the very soul of ham radio.

The only legitimate authorized source of Amateur Radio Today is the American Radio Relay League which holds the copyright. It will be available on video CD in the very near future and -- eventually -- VHS tape. Visit www.arrl.org/catalog and order item number 8861 (ARRL, ARNewsline™)

**

HAM RADIO VIDEO: WRTC 2002 VIDEO NOW AVAILABLE

Another video is aleady being called the best ham radio sports show ever to hit the street. This with the announcement that the official video of the Amateur Radio Olympics 2002 is now available on DVD and VHS.

The world premier was held in Helsinki Finland on January 18th before an overflow crowd at the Contest Club Finland meeting. Unlike previous

ham radio videos, this one is produced from a 100% "pro-sports" perspective.

In order to capture as much of the action as possible, three camera crews taped as many teams and events as they could during the actual 24 hour competition. Supporting all this great footage are high-end 3D graphics, scoreboards, top-ten boxes, team profiles, and everything else that you might expect when watching a professional sports event on television. And the production is even narrated by one of ESPN's top sportscasters

The program's total running time is 60 minutes. The DVD version contains lots of extra features like full score breakdowns for each team, continental line-ups, competitor rulebook, and even all the past W-R-T-C scores dating back to 1990.

If you've ever wanted to watch the worlds top radiosports teams in action, now is your chance. Copies are available for a nominal fee from the website: http://home1.pacific.net.sg/~jamesb (WRTC)

**

RESCUE RADIO: FISHING BOAT CREW DISAPPEARS BUT CELL PHONE TURNS UP IN INDONESIA

A strange story from Taipei. A mobile telephone belonging to the missing chief engineer of a ship found abandoned off Australia has been used to make more than 80 calls from Indonesia. Australian police said they are baffled by the discovery of a fishing boat full of rotting fish and its lifeboats in tact, but no crew. News reports say that the boat was found drifting off the remote northwest Australian coast. The phone calls from Indonesia add to the mystery of what happened to the missing crew. (PacificRimOnline)

**

COMMUNICATIONS MAGAZINES: POPTRONICS CEASES PUBLIC ATION

Popular Electronics -- better known as Poptronics Magazine is the latest hobby electronics publication to fail. This with the announcement that its publisher Gernsback Publications is no longer in operation.

Gernsback was in the publishing business for 94 years. The January 2003 issue was the last. Negotiations are reportedly under way to provide an alternative publication to Popular Electronics current subscribers. (W8HDU)

**

HAM LICENSING HELP: OH-KY-IN OFFERING HAM CLASSES

If you live in Ohio, Kentucky or Indiana and have a friend wanting to become a ham, this is for you. The OH-KY-IN Amateur Radio Society will offer ham radio license classes in the Cincinnati, Ohio area. Training

is scheduled to begin on Thursday evening, February 20th.. Training will cover Technician through Extra grades along with Morse instruction to 5 words per minute. At the conclusion of the ten week course, Amateur exams will be offered. More information is in cyberspace at www.ohkyin.com. (OK-KY-IN release)

**

WITH THE HANDI HAMS: THE CALIFORNIA CAMP

The Handi Hams California Radio Camp is the week of March 2 through 9th. This years special guest speakers include Bob Zeida N1BLF, Gordon West WB6NOA and Bill Pasternak WA6ITF.

Also, those of you contacting camp special event station W0EQO will be eligable for a special QSL. More information about the camp and the station is on the web at www.handiham.org (HandiHams)

CONVENTIONS AMD HAMFESTS: THE MIAMI TROPICAL HAMBOREE

The 2003 convention seasons gets off to a bang the 1st weekend in February. Thats when the 43rd annual Tropical Hamboree and ARRL Florida State Convention will be held in at the Fair Expo Center in Miami Florida.

The Tropical Hamboree is truly a fun filled convention with loads of new and used radio gear for sale along with a host of terrific programs and top notch speakers.

The hours of operation are 9 am to 5 pm Saturday February 1st and 9 am to 4 pm on Sunday the 2nd. For everything you might want to know about this years Tropical Hamboree take your web browswer over to www.hamboree.org (Tropical Hamboree)

**

HAM RADIO ASSISTS: THE MIAMI MARATHON

Another activity scheduled for the same weekend in the same place is the 2003 Miami Marathon. Sponsored by Toyota and The National Diabeties Association, the Miami Marathon is a 26 mile foot race starting at the famed Coconut Grove, across Biscayne Bay, to Miami Beach and back again

to Miami.

The date for this event is Sunday February 2nd. Ben Nemser WA4DZS, owner of Nemal International Electronics is coordinating the amateur radio communications. His assistant, all the way from New York City is none other than that well-known 'marathon man', and former ARRL 1st Vice President Steve Mendelsohn, W2ML.

With two major events involving ham radio the same weekend, its going to be a major challenge for the South Florida ham community. Its also looks to be a very memorable weekend in Miami as well. (Tropical Hamboree)

**

TECHNOLOGY: EIGHTY ONE MILLION PEOPLE WATCH FREE TV

According to the National Association of Broadcasters, approximately eighty-one million television sets in the U.S. receive programming exclusively from free, over-the-air TV stations. In comments filed with the Federal Communications Commission, the NAB noted that while the total number of television sets in the U.S. is 267 million that more than three out of every ten TV sets relies exclusively on "free TV" for programming. This means that the TV set is not hooked up to cable, satellite or any other subscription TV service.

Other figures noted by the NAB say that twenty-five percent of all cable and satellite homes have at least one TV set in the household that receives signals solely from free TV. Also, 24 percent of African-American and 32 percent of Hispanic households rely exclusively on free TV for their television viewing.

The National Association of Broadcasters analysis was provided to the FCC as part of the Commission's "Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming." The N-A-B says that its comments demonstrate the considerable extent to which consumers still depend on over-the-air broadcast television signals. (NAB)

**

INTERNATIONAL - IARU

On the international scene, the Radio Society of Great Britain passes along word that the national amateur radio societies of Cameroon and Macau have been admitted to the International Amateur Radio Union. A-R-T-J in Cameroon was formed in 1998 and has 14 members, seven of whom are licensed. Macau's ARM was founded in 1992 and now has 85 members. Both societies were inducted as of last December the 9th. (RSGB)

**

ON THE AIR: AO-40 QSO PARTY

The operating period for the first AO-40 QSO Party has been extended to 4 days in order to give more operating windows to Amateur stations world wide. The QSO Party will begin at 0000 UTC on the 24th of January and conclude at 2400 UTC on January 27th. Currently stations from over 30 countries have indicated their intention to participate in this years event. (ANS)

**

DX

In DX, a team of operators that includes SM0BSO, SM0LQB and SM1TDE will operate from the QTH of JW5E on Spetsbergen between February 24th and March 1st. Look for them on 160 through 2 meters running CW, SSB, RTTY as well as SSTV and other soundcard modes. QSL to each operators home call direct or via the bureau. (GB2RS)

**

THAT FINAL ITEM: SPANNING THE ATLANTIC

And finally this week, the story of history being celebrated. Of the earliest days of radio being commemorated by the people of the 21st century. And those who were there said it was like the past catching up with the future on a cold day at Cape Cod Massachusetts.

The event was the 100th celebration of the first ever radio transmission from the United States being received in Europe. It was made by radio pioneer Guglielmo Marconi in 1903. And it was his daughter, Princess Elettra Marconi, who lent her voice to begin the 100th anniversary celebration of the first trans-atlantic radio message. A message that probably sounded something like this:

--
Audio Here
--

That sound was supplied by Bob Doherty, K1VV. He along with members of the Marconi Radio Club and Marconi Cape Cod Memorial Radio Club were the people behind KM1CC. That was the on-the-air celebration of the two club's namesake making the first wireless transmission to Europe. And quite an affair it was.

Princess Elettera Marconi began the festivities in a brief contact with Ken Bowersox, KD5KBP. That's Commander Ken Bowersox on board the International Space Station. A bit later, Bowersox spoke with Cape Cod area school children who asked questions about life on-orbit. Both contacts were made possible by ARISS -- Amateur Radio on board the International Space Station.

The January 18, 1903 contact by Guglielmo Marconi used an early form of hand sent code to span the Atlantic. A short time later Marconi predicted that mans voice would eventually span the globe using wireless. Now, precisely a hundred years later on a frigid January 18, 2003. Marconi's daughter returned to near the scene of that first

contact and got to speak to a man in space. If he were alive today, Guglielmo Marconi would justly be proud. (K1VV)

Both of the cards I've received from him had the following address
stamped on the envelope:

JURAJ SIPOSS
93013 TRHOVA HRADSKA 550
SLOVAK REP.

That being said, I still think either address would work. Most of
the information appears to be the same; just rearranged and perhaps
using different abbreviations.

SENEGAL, 6W. Norbert, F6AXX is QRV as 6W7/F6AXX until February 7. He is using CW on 20, 17, 15, 12 and 10 meters. QSL to home call.

SIERRA LEONE, 9L. Zbig, SP7BTB is QRV as 9L1BTB. Lately he has been QRV on 160, 80, 20, 12 and 6 meters. QSL to home call.

TAJIKISTAN, EY. Nodir, EY8MM has been QRV on 80 meters around 0200 and 1300z. He has also been active on 160 meters around 1700 to 2200z.

SVALBARD, JW. JW0HU is active on 160 to 15 meters, including the newer bands, at various times of the day. QSL via SP3WVL.

JOHNSTON ISLAND, KH3. A group of DXers are QRV as AH3D until February 4. Activity is on 160 to 6 meters, including the newer bands, using CW, SSB and RTTY. QSL via OH2BH.

MOUNT ATHOS, SV/A. Monk Apollo has been QRV on 40 meters CW around 1900z and 20 meter CW around 1000z.

CENTRAL KIRIBATI, T31. Mike, KM9D is QRV as T31MY from Canton Island, IOTA OC-043, until late February. QSL via OM2SA.

PITCAIRN ISLAND, VP6. Ed, W2SN is scheduled to be QRV as VP6EM on February 4 from 1700 to 2359z on 20, 15 and 10 meters SSB, depending on propagation. QSL to home call.

FALKLAND ISLANDS, VP8. Mark, VP8CSA is QRV until February 11. QSL via DL1SDN.

BURKINA FASO, XT. Dani, XT2ATI has been QRV on 40 meters around 2000z and 20 meters around 2200z. QSL via EA4YK.

THIS WEEKEND ON THE RADIO. The Ten-Ten International Winter Phone QSO Party, North American Phone Sprint, XE International RTTY Contest, Classic Exchange, Spartan CW Sprint and the Delaware, Minnesota, New Hampshire and Vermont QSO Parties will certainly keep contesters busy this weekend. Please see February QST, page 103 and the WA7BNM contest website for details.

I think you will have to tune the thing every time you
change the band. It may not be very convenient to use
if you like jumping from one frequency to another on
different bands.

Such artificial 'grounds' work by cancelling (or rather:
compansating) inductive or capacitive reactances of
available grounds (like water pipes, etc.).

I'm not sure it will make a big difference for _receiving_
signals, though.

73, Piotr

|Both of the cards I've received from him had the following address
|stamped on the envelope:
|
| JURAJ SIPOSS
| 93013 TRHOVA HRADSKA 550
| SLOVAK REP.
|
|That being said, I still think either address would work. Most of
|the information appears to be the same; just rearranged and perhaps
|using different abbreviations.

Thanks,

I've received cards from him for FO0MOT/A and ZK2MO but I never paid
attention to the return address before. Can't seem to get the A35
card. It and the T3 are for 80 meters so I really want them.

Dimitris- this beast is tuned WHILE TRANSMITTING, for maximum current on the rf ground current meter, and like most meters, has much greater sensitivity at higher frequencies. MFJ's web page should have the manual for this (and other products of theirs). from what mine does , the "c" position of the inductor, seems to max with the capacitance control, the hightr freqs will be more like "F", or "G" to tune with the capacatance control . and dont grab the "ground" insulator, or wire to your counterpoise , as it can become a "VERY SHOCKING EXPERIENCE" !! Jim NN7K

Last October I noticed that from the East Coast the best opening to the Pacific occurs at the same time as the 20 meter band opens to Europe. I got into the VK/ZL Oceania Contest and when the band opened to Europe at 0500Z VK's and ZLs became hard to work. Regular contesters such as VK5GN could be worked but many pointed their beam away from the East Coast and although many were heard those of us on the East and SE Coast had a hard time making contacts. We get an all night opening (from 0400Z) to Oceania during our summer but during the winter our openings are short and we do not get the same long opening the West Coast gets on 20.

The past couple of days I have observed both P29VMS and AH3D working Europe from 0500 to the close here at 0630 to 0700Z. At 0600 both peaked with AH3D S9+20 and P29VMS at S7.
I do not need either but it seems the operational habits I noticed last October have continued with these latest operations. I heard a number of IOTA types in W4 calling P29 but he continued to work Europe. AH3D told the world that they were going to try to work Europe but its unfortunate that their usual weak 20 meter signals peak up while they concentrate on Europe. Even the VK gang seem to be left out as I heard numerous VKs try to call AH3D on his frequency. Two or three even started rag chewing there. I also heard a KP4 and FY5 calling at 0630Z but there were told to QRX.

I think the polite thing to do is work the stations when the propagation is there. This does not distract from the plan of working a particular area of the world as they are often disadvantaged.
I find the number one cause of calling out of turn is due to an area being left out when the band is open.

Just my two cents worth!
Dave K4JRB

Amateur Radio Newsline™ Report 1329 - January 31, 2003

==========

A NOTE TO THOSE WHO ONLY "READ" AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the "spoken word." It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

The Newsline Production Team

==========

Amateur Radio Newsline report number 1329 with a release date of Friday, January 31, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio assiastance continues at the Australian wildfires and the ARRL asks the FCC to go slow on spectrum reorganization. Find out the details on Amateur Radio Newsline report number 1329 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: AUSTRALIAN FIRES FOLLOW-UP

Amateur Radio is still supporting firefighting efforts in Australia. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest.

--

--
vk1zpl audio
--

That's the voice of Phil Longdon VK1ZPL WICEN - ACT Coordinator speaking from Canberra.

As these Wildfires, or as we "downunder" call them "Bushfires" raced through South Eastern Australia they came dreadfully close to the Deep Space Network antennas at the NASA's site at Tidbinbilla. Here four giant antennas including Deep Space Station 43 - a 230-foot steerable antenna - the largest in the Southern Hemisphere are located.

The world famous Mount Stromlo Observatory west of Canberra was totally incinerated by the fires - a nearly $12 million loss.

Luckily for the Amateur Population, their main repeater was spared.

--

"The VK1 Black Hill repeater: Well if the hill wasn't black before it is now. It will be two to three weeks before they can gain access to the site, all the coaxial cables on the mast have been melted or damaged in some way.

A contractor for the tracking station will be removing and replacing them. Unfortunately these VK1 cables are not part of the contractors work, VK1 hams intend to try and get a price from the contractor to install their cables as they do the work for the tracking station. The equipment in the hut appears to be undamaged however will need to be checked out".

--

And the current scene in VK1 Phil?

--
Audio Here
--

Further South from Phil in VK3, The number of radio amateurs involved in providing communications assistance during the three week long fire disaster in north-east Victoria is growing DAILY, with two separate and distinct activities taking place.

WICEN Victoria has radio operators at three Incident Control Centres and two airbases in the north-east, while Red Cross is using its RECOM data communications system.

WICEN Victoria State Coordinator, John Kerr VK3BAF expects the provision of radio operators to the Department of Sustainability and Environment in the north-east could continue for at least another two weeks.

Additionally, John Kerr VK3BAF said, "WICEN has now been requested by the Victoria Police to be on a much higher level of standby to provide point to point communications should other radio or telephone networks fail".

--

"WICEN Victoria has now set up a statewide HF-radio network using the 40 and 80 meter bands. 3.6 and 7.075 MHz +/- QRM with 'W' abbreviated callsigns. Operators at Corryong will use callsigns 'WIC', Mt Beauty

'WIB,' etc. and net control AWI to the designated listening post on each band.

Schedule times are 0700 and 2000 hrs for 80 meters, 0900 and 1800 hrs for 40 meters with a continuous listening watch at all other times, especially on the hour up to three minutes past".

--

In other activity, the Australian Red Cross National Registration and Inquiry System is using three teams of radio amateurs at three entres - Eskdale, Bright and Omeo registering thousands of people who have been displaced.

A Red Cross WICEN communications system known as RECOM relies on radio amateurs in the field to transmit to a State Inquiry Centre the registration details of emergency evacuees.

This information is transmitted by radio amateurs at the Red Cross registration centres using laptop computers linked to amateur radio transceivers using PACTOR II.

WICEN Victoria's Division 4 Region 4 Coordinator, Peter Weeks VK3YZP reported late 29 January that currently there are 12 radio amateurs in the field - ten at Incident Control Centres, and two at airbases for fire bombing radio traffic. WICEN has been sourcing radio amateurs for the airbases who have aircraft experience.

Peter VK3YZP stresses that no radio amateur should enter the Alpine region without being assigned by WICEN Victoria, authorised by the other authorities, have been properly equipped with clothing, and provided an entry escort.

Reporting from Brisbane Australia, Im Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.

--

Meantime, Phil Longdon, VK1ZPL reports that Australia's Wireless Institute Civic Emergency Network or is providing operators at the Yarralumla Shire Fire Control Center. Longworth says that WICEN is supplying a total of ten operators with others on standby if needed. (VK1 WICEN, WIA Victoria and QNEWS)

**

REGULATORY: ARRL ASKS FCC TO GO SLOW

The ARRL has registered mixed feelings about the FCC's Spectrum Policy Task Force Report issued last November. In comments filed this week, the League called the report a positive first step in developing a comprehensive spectrum management approach but stopped short of endorsing it as presented.

In a bulletin to its members the ARRL says that the report fails to address the needs and goals of the Amateur Service. It also says that the report's orientation toward commercial services makes it not wholly applicable to the Amateur Radio which cannot pay for spectrum access.

And says the ARRL there's not been enough time to study the report's recommendations thoroughly, much less deploy them immediately. The League urged the FCC to not abandon longstanding allocation policies that are based on engineering.

But the ARRL reaction is not entirely negative. It says that it was encouraged that the FCC had worked to involve all portions of the telecommunications industry in developing a spectrum policy. And the ARRL has asked the FCC to consider greater use of "negotiated rulemaking" to expedite allocation decisions. (ARRL)

**

RADIO LAW: GOVERNMENT TOLD IT CANNOT RECLAIM FREQUENCIES

The United States Supreme Court has ordered the Federal government to return billions of dollars worth of unused wireless licenses to NextWave Telecom Inc.. This, as the court tells the government that it cannot take back what has been bought, even if it was not paid for.

Nextwave had defaulted on payment for the licenees it purchased at auction and the FCC had moved to reclain the bandspace. Nextwave went to litigation to stop the government seizure.

It all ended on Monday January 27th. At that time Justice Anthony Scalia, writing for the court, said the Commission could not justify intervening in the bankruptcy proceeding to take the licenses by claiming a regulatory motive.

The spectrum has been hanging limbo during the protracted court battle. (Published reports)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world Xerox Amateur Radio Club repeater -- WD6CZH -- serving El Segundo California.

(5 sec pause here)

**

ENFORCEMENT: COORDINATED REPEATER VS. COORDINATED REPEATER

Two coordinated repeaters in the North-East have squared off over the use of a repeater pair. And if the FCC does decide to try to solve this one, it may need the wisdom of a King Solomon. Bill Pasternak, WA6ITF, has more:

--

Connecticuts Northville Amateur Radio Association's NA1RA machine is coordinated by the Connecticut Spectrum Management Association. This is a relatively new repeater coordinator that was formed a few years after the failure of the Tri-State Amateur Repeater Council. Tri-State was the group used to serve parts of New York, New Jersey and Connecticut.

And now Northville has complained to the FCC about interference to its NA1RA operation coming from the W2KGY repeater. This is a system operated by the West Point Military Academy Amateur Radio Club at West Point New York. But unlike most cases where one repeater is coordinated and the other is not, W2KGY holds coordination from UNYREPCO -- The Upper New York Repeater Council.

When one repeater is coordinated and the other is not, the answer is simple. The uncoordinated repeater bears the majority of responsibility to clear up interference to the coordinated machine. But in this case, both machines appear to hold legitimate coordination but from different adjoining coordinators. In other words, at least at this writing, both repeaters appear to be on the same channel pair becasuse a coordinator says thats where each respective systems should be.

So far, the only action by the FCC has been to send out an information gathering letter to UNYREPCO. UNYREPCO has responded and a copy of that response has been forwarded to the Northville group for its reply along with a recommendation that
a response from the Connecticut Spectrum Management Association be included as well. Only after digesting that response is the FCC likely to render a decision as to whether or not it will get involved. Well let you know what the agency decides.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

In the past, on verification that all systems in a dispute held bona fide assignments from a recognized frequency coordinator the FCC has opted to stand aside and permit the coordinators solve any disagreements that might arise. (FCC)

**

ENFORCEMENT: HAM WHO OPERATED UNLICENSED STATION TURNS IN LICENSE

A Berkely Michigan ham has submitted his license to the FCC for cancellation after being accused of operating an unlicensed transmitter in the FM broadcast band. According to the W5YI Report, Thomas Brothers, may not reapply for another Amateur Radio license for the next five years. He was also fined $10,000 after direction finding and an inspection of his premisis found the transmitter on 88.3 Mhz in the F-M band. (W5YI)

**

ENFORCEMENT: OPERATION BEFORE LICENSE ARIVES BRINGS SET ASIDE

The FCC has set aside of General Class license of John Gregory, W3ATE, of Lake Placid, Florida. This, for operation outside of his Technician class license privileges prior to recieving his General class license grant.

According to the regulatory agency at various times in 2002 Gregory apparently checked into a net on 14.300 MHz while still licensed as a Technician. He was issued Warning Notices regarding this matter on May 6 and June 6, 2002 but letters were returned to the FCC marked unclaimed.

Now the FCC has issued another notice to Gregory that gave him 20 days to explain his actions. If he fails to respond the FCC says that his General class application will be dismissed. (FCC)

**

ENFORCEMENT: UNLICENSED OUT OF BAND WARNING

Ten radio operators, eight of whom are hams have been sent warning notices by the FCC. This, regarding their alleged operation on 26.555 and 25.540 MHz.

In each case the warning letter recipient was told that operation of radio transmitting equipment on these frequencies without a license is a violation of Section 301 of the Communications Act . As such he could be subject to a fine or imprisonment if he continues on the air. Fines normally range from $7,500 to $10,000. (FCC)

**

NAMES IN THE NEWS: AA6JR NAMED TO HEAD ARRL PR COMMITTEE

On a much more positive note, word that Jeff Reinhardt, AA6JR, of Agoura Hills, California, has appointed by ARRL President Jim Haynie, W5JBP, as 2003 chairman of the League's Public Relations Committee. Reinhardt, who was recently elercted Mayor of Agoura Hills is also Public Information Coordinator for the ARRL Santa Barbara Section and Public Information Officer for his local club. (ARRL)

**

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO - FOLLOW-UP

This word to those who are wanting to obtain a copy of the new ARRL ham video "Amateur Radio Today." Please remember that the American Radio Relay League holds the legal and intellectual copyright to this program and that it is the one and only official, legitimate source for the new show. No other individual or group has been authorized to distribute it -- be it free or for a charge.

The ARRL plans to make Ham Radio Today available on both Video C-D and VHS tape. To get on the list for a copy please take your web browser to www.arrl.org/catalog and follow the instructions to order item number

8861. (ARRL)

**

HAM RADIO TRAINING: OMARC IN NEW JERSEY

OMARC - New Jersey's Oceam Monmouth Amateur Radio Club is sponsoring ham radio training classes again this winter. The sessions begin Tuesday, March 18th 2003 and run through the end of May. Classes will be held at the InfoAge Center OMARC Diana site, building 9116 on Marconi Road, in Wall Township. All classes will be begin promptly at 6:30p.m., each Tuesday night. For information on the clsees, ham radio testing and directions visit www.qsl.net/n2mo (OMARC)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION IN LAS VEGAS

The annual National Association of Broadcasters Ham Radio Reception will take place during the NAB Convention on Wednesday April 9. The reception venue is the Hilton Hotel adjacent to the Las Vegas Convention Center.

Again this year the reception is co-hosted by CQ Magazine and Kenwood Communications and runs from 6 to 8 PM. This gives anyone planning to attend ample time to see one another yet ending early enough so that people can enjoy a night on the town or grab a flight nome.

More information on the Ham Radio Reception will be posted at www.cq-amateur-radio.com. Information about the convention and on-line registration is at www.nab.org/conventions (CQ)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE WEB: NEW BUG SLOWS DOWN THE WWW

If you had problems surfing the World-Wide-Web last weekend you were not alone. A fast-spreading worm-like infection called Slamm SQL is being blamed for dramatically slowing down Internet traffic, interfering with Web browsing and delaying e-mail delivery. Bruce Tennant, K6PZW takes a look at what happened:

--
Agencies assigned to monitor the Internet say that the latest bug hit on

Saturday, January 25th. That's when at least 40,000 infected computers were found to be transmitting a flood of data that was disrupting hundreds of thousands of other servers worldwide.

The virus-like attack, which began about 12:30 a.m. EST, sought out vulnerable computers on the Internet to infect using a known flaw in popular database software from Microsoft Corp. According to the Computer Associates Virus Information Center, the SQL Slamme worm exploits a buffer overrun security vulnerability in Microsoft SQL Server 2000 and the Microsoft Desktop Engine 2000. The worm scans randomly generated I P addresses for vulnerable systems and sends out numerous packets, which may effectively cause a denial of service attack on the infected network. That translates into a lot of useless data clogging the Internet and causing it to bog down.

The only good thing about this worm -- if there can be anything good -- is that it does not go after home computers unless they happen to be running Microsoft SQL Server as an operating system. Also, this worm does not infect files and does not send any e-mail out. It exists only in the memory of the successfully exploited system. The downside is that there is no file based anti-virus signature available to detect this worm.

Monitors reported significant slowdowns, although recovery efforts appeared to be succeeding. A spokesman for Microsoft Corp. confirmed that Internet congestion was interfering with administrators trying to download the crucial software patch that Microsoft made available to protect vulnerable computers. The spokesman said that the congestion was also preventing consumers from contacting Microsoft over the Internet to unlock the anti-piracy features of its latest products.

According to a statement from Bill Murray of the Federal Bureau of Investigations National Infrastructure Protection Center, the overall Internet began to normalize by early Monday the 27th. And while everyone from on-line publishers in the United States to a telephone company in Finland seemed to be hit by the latest worm the world's largest Internet provider, America Online, reported no problems with any aspect of its service.

For the Amateur Radio Newsline, I'm Bruce Ternnant, K6PZW, in Los Angeles.

--

A check of our own statistics shows that Amateur Radio Newsline was not badly affected by the worm. Comparing downloads to the previous weekend we saw no significant change. (ARNewsline™ from published reports)

**

EMERGING TECHNOLOGY: PORTABLE PEOPLE METERS ARE WATCHING YOU

Media ratings company Arbitron has released some initial ratings results for its new television, cable and radio audience measurement system that it calls the Portable People Meter or P-P-M. The Portable People Meter has been undergoing U.S. market trials within the Philadelphia market since December of 2000. The PPM is pager-sized and is carried by consumers. It automatically detects inaudible codes that TV and radio broadcasters as well as cable networks embed in the audio portion of their programming using encoders provided by Arbitron. (TV Technology)

**

HAM RADIO IN SPACE: AMSAT PRESENTS THE FUTURE

Slow Scan TV and a possible plasma cloud experiment were among possible future projects discussed at a recent meeting of the Amateur Radio on the International Space Station or ARISS International Team. According to the ARRL Letter, the group included representatives from ARISS partner countries, their national ham radio societies and several national AMSAT groups.

Among other experiments discussed was a slow-scan television system camera that could be launched later this year. It would allow school groups to see as well as hear the astronauts during ARISS contacts.

Also discussed were a number of other future possibilities. These ranged from crossband operation from VHF to 10 meters using PSK-31 and a full-duplex voice repeater to comparing the performance of various solar arrays and even conducting a plasma cloud experiment. No details were available on what that might entail but plans are well under way to activate a 70-centimeter station from the I-S-S. (ARRL, ARISS, CQ)

**

RADIO IN SPACE: EDUCATOR ASTRONAUT RECRUITMENT PROGRAM

The National Aeronautics and Space Administration says that recruitment is currently underway for the Educator Astronaut Program. Applicants must be teachers who are U.S. citizens, certified to instruct Kindergarden through 12th grade with a minimum three years in-classroom teaching experience within the past four years. They must also hold at least a bachelor's degree in physical science, biological science, engineering or mathematics, or an education degree with a concentration in physical science, biological science, engineering or mathematics. An Amateur Radio license is not required. Applications are being accepted through April 30th. More information and the application package is available at http://edspace.nasa.gov. (NASA)

**

INTERNATIONAL - ISRAEL: TREES REMEMBER 911

Hagal International reports that the Israel Amateur Radio Club will plant one hundred and nineteen trees in that nations Silent Keys' Forest. These trees are in memory of the ham radio operators who lost their lives in the September 11th 2001 terrorist atacks in New York

City, Washington D-C and Pennsylvania.

Hagal International is the English language on-line edition of the Israel Amateur Radio Club's monthly magazine. It can be found in cyberspace at www.iarc.org. The planting of trees in rememberence is a tradition among people of the Jewish faith. (Hagal International)

**

INTERNATIONAL - UK: CLUB GETS LOTTERY FUNDING

Now how's this for getting money for club projects. The Telford and District Amateur Radio Society in Great Britain has received confirmation of receiving U-K National Lottery funding to the tune of 2,908 Pounds. This, for its Foundation and Intermediate class Amateur Radio licence training programes.

The monies will cover the purchase of training materials, room rental expensse, equipment, tools and everything else needed to do the job properly. Currently, 16 beginners are undergoing training at the home of G3JKX on weekends. The club is also a certified examination center and offers all levels of Morse and written testing. (RSGB)

**

DX

In D-X, word that Marti Laine, OH2BH, and several of his friends will be active from Johnston Island through February 5th. Laine made the destination of his latest D-X adventure public on a stop over for lunch with some friends in Los Angeles on Friday January 24th. The multi-member team will operate the High Frequency bands plus 6 meters on SSB, CW and RTTY. Q-S-L direct to OH2BH. (Various)

And the second DX'pedition to Ducie Island is scheduled to begin on March 8th and last about a week. According to the C-Q website, the new operation will include nine operators from five countries, with stations on all bands from 160 through6 meters plus the AO-40 satellite, on CW, SSB and RTTY. The callsign will be VP6DI2. Yes, that's a number two at the end, not a zee or zed. Very apropos don't you think. (CQ)

Lastly, word that IV3NCC is active portable A 4 from Oman for a the next several months. Look for him on the usual frequencies on the High Frequency bands and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BE PREPARED

And finally this week, as the world grows more tense with each passing day, it is important for ham radio communicators to be prepared for any eventuality. Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He says that the first step is to form a Community Emergency Response Team:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd will be back next week with some ideas on how you can personally be ready to cope with any emergency or disaster in your area. (KC5FM)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Hi,

And vice versa. I can list you dozen of similar cases, when DX stations work
W stations and forget totally the European amateurs...
Like you I disapprove such attitudes, but such is life, sometime far away
from the awaited ham-spirit... ;-(

Just take a look at a day/light world map and you will find that 40/80/160 m
have a window of propagation to Europe of 3 hours a day at max and a lot
less on top band. It's pathetic to hear US-stations complaining about them
working EU when all they have to do is to wait 2 hours until sunrise in EU
and then have a go at them for the next 6-8 hours or so.

Just my 0.02 ï¿œ.

You selectively quote the original post and excluded among other
things:

"AH3D told the world that they were going to try to work Europe but
its unfortunate that their usual weak 20 meter signals peak up while
they concentrate on Europe."

What does 40/80/160 propagation have to do with these comments?

A lot. 20m is just the same: Completely dead for 12 hours a day over here at this time of the year and an opening to the Pacific of 2 hours at max, unless you are running stacked monobanders. They cannot be worked from Europe unless you have a big setup and that is mainly due to their operating procedures that has them concentrate on the US.

And the observation "that their usual weak 20 meter signals peak up while they concentrate on Europe" is plain wrong. Most of the time they cannot be heard in Europe at all. And you are not trying to tell me that with propagation to KH3 from EU these opening times are identical to US-openings, are you? Please verify my observation by looking at oh2aq.kolumbus.com where you will find that the US on every band has a lot more time to work them than EU.

Complaints from the US about insufficient propagation to KH3 is ridiculous. Just take a look at the path: Plain North or South via either pole from Europe; that's as tough as it gets on any band.

However, I agree that it's pathetic to ask for EU on 40 when it's bright daylight over here. That's what they did yesterday and it left me shaking my heads with pity for the US gang, who probably thought that the climate produced some unforeseen problems on the operators' end ;-)

|
|I quite agree. The Pacific is by far the most difficult part of the
|world for Europeans to reach.
|
|Many DX-peditions routinely work the USA to the exclusion of
|everything else .... because they like collecting $$$$$$, which are
|not forthcoming so plentifully from other parts of the world!

From the ARRL web site:

"The three-man team will operate from the KJ6BZ site using the call
sign AH3D and, McClenny said, will do its best to clean up demand for
KH3 for Europe, on the low bands and on 30, 17 and 12 meters."

Two of three operators are Finns and the QSLing is to Finland.

Where is the pro-USA bias?

I've had two qsos confirmed one in Aug 01 and the other Sept 02. I think
that I used OM6TX as his manager.

Qrz,com confirms this and that was updated March last year.

Good luck

|If you would take the trouble to read what I said, you would see that
|I was not referring to AH3D.

I read what you said:

"I quite agree. The Pacific is by far the most difficult part of the
world for Europeans to reach."

Since the original post was about AH3D and all the whining has been
about them not working Europe, my comments were appropriate.

For you to infer that the reason is money is inappropriate.

These are big-time DXers. If they don't know the propagation, I sure can't help them. I had to stand patiently by on 80 meters with my sun rising while they worked W6. But it's their operation, so I stood by until they called for W7. Worked them on one call.

Thierry,

I was just pointing out a problem I have seen now for some time on 20. I agree there are other problems such as the JA's who go to T88 or some other rare one and then work JA's through the NA and EU opening. Same for the many US GI's who operated from the Pacific over the years who were only interested in getting patches home rather than work the deserving (mainly Europe).

I say work all comers and try to work disadvantaged areas when possible.

Peter,

My comments were concentrated on 20 where during the winter we get short openings to parts of Oceania. I have no problem with trying to work Europe on low bands as we usually hear say AH3 from 0300 to 1100 on 40 with signals peaking at 0500 and 1000Z. So far they have only worked a few West Coast on 160 and 80..their SSB sigs were ESP on 75 in SE USA.

I hear complaints from Europe on stations in SE Asia (3W, XW etc) working North America. Its the same there as you describe. The ops usually know they only have a short opening to USA
whereas Europe is in for 6 to 8 hours or more. SE Asia is extremely hard to work from Atlanta.
on 20 to 10. On low bands its near impossible. I fimally got A51 on 40 last year and finally heard XW (4/4 LP) but so far no QSO. 80 and 160 maybe once every 20 years!

Yep. Sad, isn't it? But I have good news for you US-guys: AH3D has been on
80 and 160 and everyone with a dipole from any part of the US could work
them. Here in Europe our window of opportunity is limited to not more than 3
hours a day altogether, unless you have really good antennas and/or live in
the vicinity of the polar circle. Which is the reason for my original
posting. Summed up I was just saying that a) the path is a lot easier for the
US and b) there is *always* one band you can work them on. And that's not
true for EU. Agreed?

> |And the observation "that their usual weak 20 meter signals peak up

Yep. They still did. Which is OK, they are the DX.

> |And you are not trying to tell me that
> |with propagation to KH3 from EU these opening times are identical to

> No, never said anything of the sort.

That's what context sensitive quoting is about. I was referring to the
original poster who said something to the effect that they peaked in his
location around the time they worked Europe. That statement implies
identical times of propagation to the Pacific for both Europe and the

Eastern part of the US. Which is not quite true as I have tried to explain.

> |Complaints from the US about insufficient propagation to KH3 is ridiculous.

Well, I bet you would have lots of Europeans stand by when VU4 or VU7
appear on the band. They are rare entities, just as KH3. And you would be
just as put off by EUs telling you that it's just as hard to work them for
us as it is for you. It simply is not.

I am not challenging you on that one, however, please be aware of the fact
that OH propagationwise is, well, a little different from the rest of EU.
They are Top-DXers for sure, but they do not make EU happy, at least not in
CW. Maybe it's just the propagation, which *really* was lousy (and we will
see more of that in the years to come), but I had hoped for a little more
flexibility in looking at possible openings for EU.

Mind you, 80 was actually the only band I have heard them at all and I spend
most of the last couple of days working from home and keeping the radio
within reach and an eye on the cluster.

Oh well, there's always the last day - brought me luck with VK9M and KH5K.
Apart from that, worked HH as #297 yesterday, so I won't complain ;-)

No kidding!

Has been pretty simple to work them from Oregon.
Nice 10M opening today ... Martti was 40 over here.
Already worked them on that band, but did work 'em
on 12, 15, 17 and 20 today (big grin).

Propagation "is what it is".
Some paths are easy, some are hard.
Figuring out how to work 'em is what DXing is all about.

Congratulations. Interesting, I just checked my log and only have HH
worked and confirmed on 20 meters. An easier path from here than KH3
but if they aren't on, how can you work them. Besides, I have to
contend with W4's, the US equivalent of I's <g>.

Ain't that the truth.

It's funny to see how one's own deception can be tricked by looking at statistics of most wanted, planned expeditions and this HH is the perfect example. It's a location everyone is familiar with, at least from a geographical point of view, but in terms of ham radio that's just a blank spot, particularly when you do CW only, so I was really happy to finally catch DL7CM over there. As a matter of fact, I haven't heard *any* HH in CW within the last 5 years, so actually this is quite a rare one, but ranks well below T33, VK0M, KH1, all of which could be worked in CW.

I guess it's time for Roger and Nigel to go there ;-)

With pasta and pizza as good? I doubt that ;-)

That's quite allright. I just had to pick on someone in this matter and you turned out to be the perfect victim, because you addressed a common problem in perception about propagation from/to various parts of the world. No offence.

And still no luck on the KH3. Oh well...

>rare one and then work JA's through the NA and EU opening.

That's SOP for the guys from JA. They go ANYWHERE and concentrate
on working JA's. But it's not a 'problem'. Anybody who packs their ham
junk up and puts it on a plane to go play radio can 'work' anybody
they damn well please. JA's who go on vacation don't 'owe' anybody
a contact on the radio, regardless of where they go. I've seen a
hundred JA's go to Guam, set up a station at a hotel, and work nothing
but JA's all weekend. That's what they want to do, they paid for it,
more power to them. The main reason they do it is because it's much
easier for them to speak Japanese than to speak English.

There has never been, and never will be, any expedition anywhere that
makes everybody happy.

NA whines when the DX is working JA.
JA whines when the DX is working EU.
SA whines when the DX is working Asia.
EU whines. Period. All the time.

The 'problem' is not who the DX is working or not working. The problem
is that hams are whiners, and the ones who collect post cards whine
the loudest....

The 'problem' with EU is easy to explain. We have developed a system
by which DXpeditions are measured, and it's a very simple system, even
though it's a very poor indicator of the success of the DXpedition. We

simply look at total QSO's. So everybody who goes to Good Grief Reef
wants to come home with a bigger total Q number than the last guys
did. And if your main concern is filling up the log as quickly as
possible, and you've ever run a pileup before, you forget about
Europe.

The DXpeditions guys don't have a 'problem' working Europe.
Europe has a problem being worked......

I remember many weekends during the All Asian contest that I couldn't
work Japan because the band was open to Europe (and louder than JA)
and even when I called CQ JA, EU wouldn't stop calling long enuff for
me to work any JA's. Personally, I got so tired of the bad manners
from EU the last few years that I was in Guam that I'd turn the radio
off if 20 meters was open to Europe. It wouldn't be hard for me to

imagine the regular DXpedition guys doing the same......

Europe, wake up. It ain't about $$$, it ain't about racial prejudice,
it ain't about lack of propagation knowledge. It's about BAD MANNERS
on the radio....

73, Jim KH2D

224. K1B SSB card INFO!!!

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-03 12:44:46 UTC
From: Zlatko Feric <zlatko.feric@sb.hinet.hr>
Message-ID: <b1lo63hmn1@garrison.globalnet.hr>
Source record: 10958

From The Ohio/Penn DX PacketCluster
DX Bulletin No. 597:

K1B QSL UPDATE/CHANGE. Roman Thomas, RZ3AA (K1B, K5K, 3D2CI etc.), reports, "I completely understand the problems that many of you are having getting the SSB K1B QSL cards. I feel bad for each of you who have still not received your QSL card. Unfortunately the mail situation in my country certainly has room for improvement. In hindsight it was probably not a good choice to use a Russian QSL address." Roman explains he processed more than 3000 direct QSL requests that were returned direct and has received more than 1000 bureau QSL cards that have all been sent back via the bureau. However, he has received about 300 direct QSL card requests which were already opened and were missing IRCs or postage money, these have been answered via the bureau. Also, he has received at least 200 E-mail requests asking for status on specific cards which never arrived. Roman suspects many more card requests were lost somewhere in the mail system. To date, Roman still receives about 20 direct requests per week, all being returned direct. If you would like to pick up a K1B SSB QSL card in person, Roman will be at Dayton this year and he is prepared to hand out cards there. Watch for an announcement. --- OR -- Due to Roman's mail situation a new QSL route has been announced. If you worked K1B using "SSB ONLY", QSL requests can now be sent to K4YL (ex-W4SMG) to the following address: Stephen M. Grose, P.O.Box 183, Flat Rock, North Carolina 28731-0183. Please include the following:
Your QSL Card indicating Time in GMT, Date, Band, Mode and Report.
A Self Addressed Envelope (SAE) with all necessary addressing information (USA send SASE).
One Green Stamp (preferred) or One Large IRC is accepted.
Please make sure the envelope contains the three items shown above. "NO" Bureau cards will be accepted. Please send Bureau cards via Roman, RZ3AA, via the Russian Bureau. All cards will be processed in the order they are received. PLEASE send ONLY SSB cards. Depending on the demand, some delay might result if additional cards have to be printed. All CW and Digital requests are to be sent to Hrane, YT1AD. Any questions can be E-mailed to Stephen, K4YL at: K4YL@Highstream.net

Bit of a long shot this one:

Does anyone have the QSL routes for the following stations please:

6O0DX 6th Aug 1980
G3MUV/CE0 11th Sept 1981

I've just recently got back into DX'ing and could do with these cards! G3MUV does not appear in the UK callbook but I was hoping he may have a QSL manager.

Thanks and 73
John G4IRN.

The recent tragedy brought to mind a QSO I had some years ago. Not particularly DX; only about 1000 miles on two meters, but definitely a "rare one."

I don't maintain much of a web site so there aren't any links, but you QSL collectors might be interested in seeing the QSL card.

http://users.triconet.org/wesandlinda/W5LFL_1.jpg

http://users.triconet.org/wesandlinda/W5LFL_2.jpg

Sometime after the flight I was also lucky enough to meet Owen in person when he came to Tucson for a scientific meeting.

Hi John:

These are very old contacts. I can find no information on G3MUV as far back as 1997.
There was a 6o0x operating last year with a qsl manager of DJ6SI, but its a long shot that is the station your looking for. Also it think that 6o0 may not be good for DXCC at this time. (no legal operation from the area)

Yugoslavia's Parliament has voted to formally abolish that nation and replace it with a new country called Serbia and Montenegro. The YU/YT prefixes will continued to be used and the new named country considered to be a single entity. No change in DXCC status. For details go to: http://www.arrl.org and scroll down to IN BRIEFS. It is the last item under that topic.

To: CADXA@LISTSERV.TEMPE.GOV

ARRL Bulletin

Pacific Division Director Jim Maxwell, W6CF, SK

NEWINGTON, CT, Feb 7, 2003--Pacific Division Director Jim Maxwell, W6CF,
died February 6 at his home in Redwood Estates, California. He was 69 years
old.

Maxwell joined the ARRL Board of Directors in 1994 after being elected
Pacific Division Vice Director; he became Director in January 2000. Pacific
Division Vice Director Bob Vallio, W6RGG, takes over immediately as
Director; ARRL President Jim Haynie, W5JBP, will appoint a new Vice
Director. Maxwell, a Life Member of the League, also previously served as
Santa Clara Valley Section Manager.

"Jim Maxwell was a gentle giant of a man," Haynie said. "He was one of the
best assets Amateur Radio could have in a leadership position."

David Sumner, K1ZZ, ARRL Chief Executive Officer said, "Jim Maxwell was one
of the most brilliant people I have ever had the privilege to know. He was
also one of the most unselfish and one of the most modest. Putting them all
together, he was truly in a class by himself. To say he will be missed is a
gross understatement; it would not surprise me to learn that there is one
less star in the sky with Jim's passing."

In addition to serving in a leadership role, Maxwell generously supported
ARRL with contributions to the ARRL Diamond Club, ARRL Foundation and other
ARRL programs.

Maxwell was an avid DXer--belonging to many DX and contest clubs and
organizations, including the Northern California Contest Club. In

addition,
he was an accredited ARRL Volunteer Examiner. Maxwell served as an
ARRL
Emergency Coordinator from October 1991 to March 1999 and he was a
member
of the ARRL DX Advisory Committee from April 1988 through 1994.
Maxwell
previously held the call W6CUF.

His interest in radio and electronics history was well known, with
Maxwell
and his wife Trudy, KC6NAX, both helping to spearhead archiving
efforts at
ARRL Headquarters, cataloging documents from the early years of ARRL.

"He was quite an archivist and vociferous about collecting historical
items," said ARRL Field and Education Services Manager Rosalie White,
K1STO. "Everything from old ARRL documents to club newsletters. He
also has
an extensive collection of Hiram Percy Maxim memorabilia." Maxwell
wrote a
7-page retrospective on Amateur Radio covering 125 years for the
January
2000 issue of QST.

White added that, along with his devotion to Amateur Radio in its many
facets, Jim's special sense of humor will be sorely missed. Recently,
Maxwell wrote a humorous piece on growing crops of Wouff Hongs for the
ARRL
Web site.

Many of Jim's colleagues and friends have sent in thoughts and
remembrances
to ARRL HQ:

* "Personally, I respected Jim Maxwell more than anyone else I
have
ever worked with in amateur radio. He was one of the brightest and yet
most
unassuming people I have ever worked with. I will miss him dearly." --
Andy
Oppel, N6AJO, East Bay (CA) Section Manager.

Maxwell, then W6CUF, in 1952 after winning the 1951 Sweepstakes
as
an 18-year-old newcomer to the contest. His overall high score of 1064
QSOs
and a sweep was a new record. He used a homebrew VFO-6V6-parallel 807
transmitter, Collins 75A-2 receiver, 80-meter long-wire, 40-meter
ground
plane, and 4-element 20-meter rotary beam and operated the full 40
hours in

his winning effort from W6BJU.

* "Jim contributed to ARRL and Amateur Radio in many ways during his
long career. He brought a vast storehouse of knowledge and a gift for
analysis to every task, large and small. Above all, he knew just when to
lighten things up with his keen sense of humor. He'll be missed." -- Mark
Wilson, K1RO, ARRL Chief Operating Officer.

* "I have known Jim for about 30 years or so. He was my Vice Director
from 1994-2000 and we had a very close relationship, which helped me
immensely as a Director. While he was Vice Director he served on many Board
committees. I and we in Amateur Radio have lost a real friend and
colleague." -- Brad Wyatt, K6WR, former Pacific Division Director.

* "Jim's guidance was always appreciated in my work with the Volunteer
Resources Committee, which he chaired through 2002. He and I often
consulted on matters within and outside his division and his insights were
always helpful." -- Brennan Price, N4QX, ARRL Product Review Editor.

* "Jim had a caring interest in amateur radio and was very well versed
in its history. He was ready to listen and give advice as he saw the
situation. It is understood he had a garage "library" of many old books
about electronics and amateur radio. He will be missed." -- Len Gwinn,
WA6KLK, San Francisco Section Manager.

* "Jim and I go back a long way. I worked with him when he was a SCM and I
took over as SCM from him.To me, he was one of the most knowledgeable
people on the history of amateur radio as well as other scientific areas.He
always had time to listen and was willing to help out. His talks on amateur
radio were heard by thousands at club meetings and conventions." -- Jettie
Hill, W6RFF, Sacramento Valley (CA) Section Manager.

Professionally, Maxwell held doctoral degrees in aeronautical engineering
and biomechanics. He retired from the Lockheed Missiles and Space
Corporation as a technical consultant in 1992 and from Scitor Corporation
in 1998.

Information on memorial services was unavailable at press time.

Hi,

Most than probably, 1 GS and an enveloppe.
I try to keep my remaining IRC for Europe. But in the future I will only use
GS.

None that I know of -- but John Seney WD1V is the Mac Ham Software Guru
Try an E-Mail to him wd1v@amsat.org

With Mac you can use MS PowerPoint or Print Shop as I did.
AC6V's InkJet Card. Select an image (I used PowerPoint or PrintShop), visit
a paper supplier and choose heavy stock with the preferred color. Get
samples and see if they will go thru your printer. Print image on one side.
On the reverse side print the QSL data -- call, time, RST, etc. Print
several images per sheet. Trim to size with a paper cutter. This is OK for a
few cards, but will take you broke as inkjet cards take a lot of ink. For
economical quantity, take an inkjet master, then Xerox several on a sheet,
cut to size. Or use a Laser printer. Really best to Laser print or Xerox
them as inkjet will smear and run when wet. See sample

Amateur Radio Newsline™ Report 1330 - February 7, 2003

++
+++

A NOTE ABOUT WHAT YOU ARE ABOUT TO READ

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would strongly urge you to listen to the audio version this week. Our service is best described as "audio intensive" and all Amateur Radio Newsline (tm) scripts are specifically written for the "spoken word." Because of this there is no way to convey in print the emotion of what you "hear" when you listen rather than read.

Candidly, you are really missing what Amateur Radio Newsline is really all about by only reading it. The newscast is recorded each week by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP downloadable MP3 files or dial-in telephone.

Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

Amateur Radio Newsline report number 1330 with a release date of Friday, February 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The space shuttle Columbia falls from the sky and all on-board are lost. Three were radio amateurs. More on the tragedy and the search for answers comes your way right now:

(Billboard Cart Here)

**

HAM RADIO IN SPACE: HAM RADIO OPERATORS LOST IN COLUMBIA TRAGEDY

Three ham radio operators were among the seven member crew of the space shuttle Columbia who were killed when the orbiter broke up during re-entry over Texas on Saturday February 1st. Amateur Radio Nesline's Norm Seeley, KI7UP, has the details:

--
President Bush Audio: Audio only report. Hear it at
http://www.arnewsline.org
--

Those were the words of President George W. Bush expressing the grief of the world on learning that that the spaceship Columbia had fallen from the sky. That it's crew of seven astronasuts was lost.

On board was a 7 member crew that included three ham radio operators. Killed in there tragedy were Mission Commander Rick Husband, and Pilot William McCool. Also lost were Mission Specialists Michael Anderson, David Brown KC5ZTC, Laurel Clark, KC5ZSU, Kalpana Chawla, KD5ESI and Israeli Payload Specialist Ilan Ramon. Ramon was a well-known Israeli Air Force pilot became the first man from his country to fly in space.

Columbia was at an altitude of about 203,000 feet over north-central Texas and traveling at 12,500 mph, when Mission Control lost all contact and tracking data. It was about 9 a.m Eastern time. That was almost the same moment when residents in the Dallas area reported hearing a gigantic sonic boom. The loudest anyone had ever heard. Witnesses who looked up reported seeing a bright flash followed by smoke plumes streaking across the sky. Several people grabbed their home video cameras and caught the tragedy. Tape shows debris appearing to break off into separate balls of light and falling back to Earth.

What actually happened is still very much unclear. The shuttle is essentially a glider during the hour-long decent from orbit. It is covered by some 20,000 thermal tiles to protect against temperatures as high as 3,000 degrees.

The space agency is already looking at a liftoff incident where a part of the center fuel tank's foam insulation broke away and impacted one of the Columbia's wings. NASA saus that just before it disintegrated Columbia experienced an abnormal rise in temperature and wind resistance. That forced the shuttle's automatic pilot to make rapid changes to its flight path. Some experts say that this is possible evidence that some heat-protection tiles were missing or damaged.

Administration officials said there was no immediate indication of terrorism but accounts from those on the ground have lead to speculation of a explosion somewhere on board the orbiter. Others say the abnormally high sound level was the result of multiple pieces of Columbia all breaking the sound barrier at slightly different times and creating an ongoing sonic boom.

Debris from Columbia fell along Northern Texas and into Louisiana. NASA declared an emergency after losing contact with the crew and sent search teams to the Dallas-Fort Worth area. It also warned people to stay well clear of any debris field they might encounter because of chemical contamination from the very toxic fuel. But that was easier said than done. Residents of the town of Nacogdoches say they found bits of metal strewn all across the city and a local dentist reported that a metal

bracket about a foot long crashed through his office roof.

STS-107 was NASA's 144th shuttle mission.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

On January 28th, 1986, the space shuttle Challenger exploded shortly after liftoff but in 42 years of U.S. human space flight, there had never been an accident during the descent to Earth or landing until now. NASA has grounded all of its space shuttles, but there's no word yet that the Columbia tragedy will affect the current Expedition 7 crew's future aboard the International Space Station. (ARNewsline™ from published news reports)

**

HAM RADIO IN SPACE: TEXAS HAMS ASSIST IN SHUTTLE DEBRIS HUNT

Amateur Radio played a signifigant role in the debris recovery efforts after Columbia broke up over Texas. Amateur Radio Newsline's David Black, KB4KCH, has that part of the story.

--
A family member gets a close-up view to the tragedy. One of the Columbia's heat protective tiles was found near my nephew's college dorm in north central Texas. My newphew took a picture of it, which you can see on the Amateur Radio Newsline website. While the tile survived re-entry, the Columbia did not.

Within hours of the accident, Amateur Radio Emergency Service volunteers with the Nacogdoches Amateur Radio Club began helping Emergency Management officials and NASA teams in locating and cataloging debris falling from the shuttle.

Tim Lewallen, KD5ING, is the Public Information Officer for the Nacogdoches Amateur Radio Club. He says the hams worked in tandem with students from a local college's Geographical Information Systems lab. Together, they surveyed the city and county looking for shuttle debris. When any was located it was photographed and its exact position determined using a G-P-S. The data was later downloaded into a database that will be superimposed over terrain maps. Local officials say debris was found in nearly 2,000 sites, including some 1,200 places in Nacogdoches County.

As we go to air, well over 12,000 pieces of Columbia had been found, from as far west as New Mexico eastward into Louisiana. NASA hopes the position of the debris field will give it some insight into what caused Columbia to disintegrate.

Reporting for the Amateur Radio Newsline, I',m David Black, KB4KCH.

--

Lewallan says that the entire effort was coordinated by the ARES group. He adds that ARES volunteers were also directed to coordinates given by NASA that the space agency believed might contain missing parts of the Columbia. The recovery and cataloging effort went on for several days. (Nacogdoches Amateur Radio Club via KD5ING)

**

HAM RADIO IN SPACE: AMSAT MOURNS COLUMBIA LOSS

Its no secret that Amateur Radio and the space program have had a very close association since the very first Orbiting Satellite Carrying Amateur Radio or OSCAR was launched back on December 12th 1961. It was carried into space by a United States built Thor Agena launch vehicle from Vandenberg Air Force Base in California. OSCAR 1 was a tiny 4.5 kg package that made only 312 orbits before re-entering the Earths atmosphere. But it set the stage for four decades of ham radio in space. A lot of it took place from the space shuttles including Columbia. In fact it was from Columbia that ham radio's first man in space, Owen Garriott, W5LFL, talked to a senator and a king:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

And so it was when news of the Columbia's demise began to settle in that the representatives of AMSAT groups from around the world began paying their respects. Perhapps none was more poignant than the words of AMSAT North America President Robin Haighton, VE3FRH. His statement is read by Amateur Radio Newsline's Newsline's Henry Feinberg, K2SSQ:

--

"It is with great sadness that I have learnt of the Columbia disaster. AMSAT has always been a strong supporter of the Shuttle program and of ARISS. We have had many interactions with the astronauts who have fearlessly ridden the shuttle into space. Currently several are AMSAT members and supporters.

On this sad occasion on behalf of the Board of Directors, Officers and Members of AMSAT, I wish to send our deep sympathy to the families, relatives and friends of those who undertook this Columbia mission. Their understanding of the risks taken on this and other missions did not prevent them from performing at the highest level, and, unfortunately paying the ultimate price.

To our friends at NASA, we at AMSAT send our understanding and our sympathy,
knowing that the exploration of space and carrying out important experiments
for the benefit of humanity will continue to be your mission."

--

AMSAT France, AMSAT Germany, AMSAT Itlaly, AMSAT Sri Lanka and other AMSAT groups the world over also offered words of condolence an consolation.

Frank H. Bauer, KA3HDO, the Chairman of ARISS International issued a statement that read in part -- and we quote: "This is a difficult time for all of us. Let's work together to keep the torch of space travel alive in the hearts and spirits of humans worldwide. And most importantly, please keep the astronauts, their family and friends in your thoughts and prayers." (AMSAT-NA, ARISS, others)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4BBB Radio Amateurs Club of Knoxville repeater serving Knoxville Tennessee.

(5 sec pause here)

**
RESCUE RADIO: TENNESSEE HAMS HELP AFTER TORNADO

The January 8th issue of the Knoxville News-Sentinel tells the story of Sheila Tailent, KB4G, and how she came to the rescue after a tornado ripped through Morgan County Tennessee. Tailent is the state ARES coordinator realized a need to provide reliable communications following the storm. Thanks to her efforts, within 15 minutes after the twister struck hams with emergency communications gear were on their way.

According to the News-Sentinel, for the next 48 hours ham radio volunteers relayed communications among police departments, firefighters, rescue squads, demolition units, repair crews the Red Cross and many others. The article says that dozens of radio amateurs worked around the clock with many taking vacation days from work and donating the time to the community.

The newspaper says that a conservative estimate of the value of the communications provided free of charge by hams to Morgan County could be upward of $80,000. (W5YI Report)

**

RESCUE RADIO: BE PREPARED - PART 2

The Columbia tragedy and the Morgan County tornado are two incidents that again bring home just how important it is for ham radio operators to be prepared. The ARES members in Nacogdoches Texas had no idea that their training would involve them in trying to find out why a space shuttle fell from the sky. But thats excatly the role that they played -- and continue to play.

Last Week, Lloyd Colston, KC5FM, was here to explain the importance of emergency preparedness. Now says Colston, its time for some personal

preparations:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He will be back from time to time with other tips on how hams can be ready for any emergency that may come their way. (KC5FM)

**

RADIO LAW: FCC AND NTIA TO IMPROVE FREQUENCY COORDINATION

The FCC and the Commerce Department's National Telecommunications and Information Administration have signed a new Memorandum of Understanding on spectrum coordination. According to the C-G-C Communicator, the agreement calls for the FCC to responsible for non-federal frequency users such as broadcast, commercial, public safety and even Amateur Radio. The N-T-I-A will hold responsibility for all federal government users. The full document is on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230835A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: FCC REALLOCATES SPECTRUM FOR NEW WIRELESS SERVICES

Also from the C-G-C Communicator word that the FCC has reallocated 30 megahertz of spectrum from the 2 GHz Mobile Satellite Service to fixed and mobile services. The purpose is to provide frequencies for a variety of new wireless applications. The Commission is seeking comments on potential uses of an additional 15 megahertz of spectrum previously identified for new wireless services. It also wants comments on increased flexibility in the Unlicensed Personal Communications Service band. This too is on the web. You will find it at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230754A1.doc (CGC Communicator)

**

CONVENTIONS AND HAMFESTS: SUPERFEST 2003

A-E-S has gotten it's Superfest 2003 registration form online. The Superfest takes place April 4th and 5th at Amateur Electronic Supply in Milwaukee. To register take your web browser to www.aesham.com and take the link to the Superfest menu. If you need help or have any questions, please contact Molly Schreiber at A-E-S. Her e-mail is molly@aesham.com (AES)

**

HAMFESTS AND CONVENTIONS: RADIOFEST IN SEASIDE CALIFORNIA

The Naval Postgraduate School Amateur Radio Club will host RadioFest 2003 on Saturday, February 22nd. This is a West Coast hamfest and will be held at the General Stilwell Community Center in Seaside, California. The show includes a flea market, vendor booths, demonstrations, license exams, door prizes and more. Among the forum presenters scheduled are Leslie Ragghianti from the 911 Emergency Communications Center, Jeff Orr, K-G-6-K-C-O, discussing "Echo Link" along with Don Carlson , KQ6FM, and Glenn Thomas, WB6W discussing ARES. Sound interesting? For more information go to the web at www.radiofest.org (W6FVI)

**

RADIO MEETINGS: SCADS IN SEAL BEACH CALIFORNIA

Also in the Golden State the Southern California Area DXer's shortwave listeners monthly meeting takes place on Saturday February 15th from noon to 4:00 p.m. Pacific time. The venue is the F&M Bank Community Room in Seal Beach California. This months subject is Radio Communication Listening Worldwide. For more information e-mail Bill Fisher at billfishernow@netzero.net (SCADS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**
THE FUTURE: HOW TO MAKE HAM RADIO MORE KID FRIENDLY

"How to Make Ham Radio More Kid Friendly" is the topic that Amateur Radio Newsline has chosen for this years Ham Radio Town Meeting and we are looking for some younger hams who might want to take part.

The Town Meeting is held each May at the Dayton Hamvention. This years Hamvention theme is the "Year of the Young" and planners tell us that the three day show will focus on the young ham and on bringing 12 to 18 year olds into amateur radio.

Its no secret that recruiting youngsters into the hobby is getting harder and harder. Keeping most of them is all but impossible. There is organized sports. There are those numerous after school activities. And lets not forget the lure of the World Wide Web with its license free ham-radio like chat rooms. All of this makes it a real challenge to get youngsters licensed and keep them interested.

Obviously the old ways of recruiting young people no longer work. So we are going to take two hours and give you the chance to come up with some new ways.

If you are a young ham planning to attend Hamvention 2003 and would like 10 minutes to present your ideas, drop us an e-mail. We will go through what you send us and some of you might be invited to be a part of our all-star panel.

The best way to contact us is by e-mail. Mark your note Town Meeting and send it to newsline@arnewsline.org. (ARNewsline™)

**

ON THE WEB: REPEATER LINKING POWERPOINT PRESENTATION

If you are into repeater linking, this one is for you. Kevin Custer, W3KKC, reports over the VHF Reflector on a new Repeater Linking presentation using Microsoft's Power Point Presentation format. It was produced by Douglas Otoupal, N5HYD, is 131 kilobytes in and available at http://www.repeater-builder.com/rbtip/pdfindex.html. (VHF Reflector)

**

INTERNATIONAL - GREECE: NEW VHF/UHF ONLY LICENSE CLASS

The V-H-F Reflector says that Greece now has its own, entry level VHF only license. The new ticket use the prefix SW1 through SW9 with priveleges on 2 meters and above. SV1 through SV9 prefixes indicate Greek stations that have full High Frequency operating privileges. (VHF REflector)

**

INTERNATIONAL - GERMANY: DEUTSCHE WELLE DROPPING NORTH AMERICAN SERVICE

Germany's premiere shortwave station says that transmissions to North America will soon cease. This with confirmation by Margot Forbes of the broadcaster Deutsche Welle that it will be terminating the long running service at the end of March.

Up until now, there have been several claims made by various sources that Deutsche Welle would be shutting down its broadcasts to North America this spring. The station would not deny or confirm this directly until now.

According to Forbes, the stations budget has been slashed time and time again by the German Government. Forbes says that maintaining shortwave transmissions are particularly expensive and the decision has been made to cancel operation on some frequencies. This includes the very popular transmissions to North America

Forbes says that there are no plans yet for a replacement service. but says there is the possibility of somthing being worked out using satellite delivery or over the Internet. (shortwavedxing.com)

**

PROPAGATION: SA 100 MICROWATT 7 MHZ BEACON HERARD IN USA

And a possible record for a high frequency beacon transmitter. Over the last 4 months, an extremely low power beacon transmitter has been operating from the QTH of ZS1J at Plettenberg Bay, South Africa. The measured power output of the 7.029 MHz transmissions is 100 microwatts and reception reports from all over South Africa, up to 1100 kilometers, have been received. But the big surpriose came on Tuesday January 29th. Bill Diggens, WA8LXJ, in West Union Ohio made a positive identification of the beacon transmiutter.

Diggens gave it a Readability 2, Signal strength 1 and tone T 9. He also made a tape recording of the signal received and played it back to amazed South African amateurs on the daily, split frequency net. A newt that can be found 7.095 and 7.177 MHz in the 40 meter band. (ZS6AKV)

**

DX

In DX, PS7AB says that Mexiana Island will be on the air May 21st through the 25th. Five operators will activate Mexiana on 40 through 10 meters on SSB only. Mexiana is considered the most wanted Islands on the Air group in all of South America. More information is on the web at http://www.mexianaisland2003.hpg.com.br (Press release)

**

THAT FINAL ITEM: HAM RADIO AND THE SPACESHIP COLUMBIA

And finally this week, we like many other Amateur Radio operators around the world felt a special loss following the Columbia space shuttle disaster. As we already mentioned, three of the astronauts on board were licensed Amateur Radio operators. And Amateur Radio has had close ties to the space program, to the astronauts, and to the ill-fated Columbia since the very early days of shuttle flights.

It was on board the Columbia during the STS-9 mission in November of 1983 that Dr. Owen Garriott, W5LFL, became the first person ever to operate a ham radio station from space. In case you have forgotten, this is how that historic contact sounded:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org

--

That QSO marked the first time that astronauts could communicate directly with people on Earth. And they did it without going through the normal NASA's communications channels.

In 1990, NASA, the ARRL and AMSAT formed SAREX -- The Shuttle Amateur Radio Experiment. This was a program to schedule regular contacts between school students and the astronauts on-orbit using Amateur Radio. Astronauts were encouraged to obtain Amateur Radio licenses. Many did and they used them to talk with kids in schools the world over. A lot of those contacts took place from the mid-deck of the spaceship

Columbia.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

In addition to the SAREX contacts, astronauts were encouraged to spend some of their free time making random contacts with hams on Earth. Open contacts they were called and they became a new form of radiosport. A kind of contest with radio amateurs everywhere vying to be the first in the city or neighborhood to talk to a ham radio operator in space.

Then Russia entered the realm of ham radio on-orbit. Amateur Radio gear was installed on its MIR space station and talking with cosmonauts soon became almost commonplace. Who can forget British astronaut Helen Sharman when she visited the MIR and took to the airwaves using ham radio.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

SAREX has now given weay to ARISS -- Amateur Radio on the International Space Station. But it all had to have a beginning and from its earliest days on-orbit until it disintegrated in the sky above Texas the space ship Columbia and ham radio have shared history together. Now the Columbia is now gone, but the world of Amateur Radio will never, ever forget it or the seven human beings who were on it when it met its firey demise. (From the combined thoughts of the worlds radio amateurs as posted to various Internet remailers, by e-mail and numerous other sources.)

I have also contacted several stations from PA during the PA contest. But signals were
not very strong.

FUN

Try DX in FM and AM mode. For AM call around 29.000 - 29.100 Mhz
For FM 29.300 - 29.600 (be carefull, don't call on repeaters QRG)
For funzy modes such as MFSK, Hell, Throb25... Try either on 28.080 or 28.120
Theses modes are funny to use and it is easy to be QRV with a freeware and a soundcard.

Help wanted

This is the first bulletin. I have not many informations...
If you have some info, tips, etc. Please send me a mail at :
<<< f5sld@yahoo.fr >>>
I will appreciated a lot any help.
You can subscribe to the 10 meters E-group at :
http://uk.groups.yahoo.com/group/10m

73's good DX on Ten !

253. Question on coax cable I don't understand.

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-09 19:16:48 UTC
From: daveem@webtv.net
Message-ID: <4856-3E46A920-4@storefull-2135.public.lawson.webtv.net>
Source record: 10987

I have a question about antennas and coax that I have never found a good answer for, and I am going to ask this question once more, in the hope that some one can please explane the concept to me in simple terms.

I don't understand how some coax is labled 50 or 75 ohms? at what point between the transmitter and antenna does one measure this resistance, what is this resistance from, and shouldn't it change with the length of the coax?

Thanks in advance,
Dave

Actually, it isn't resistance, it's impedance. Here's a way to visualize it:

If you take a piece of 50 ohm cable that is infinitely long (with no losses) and apply 50 volts of DC to it, a current of one amp will flow. Simple Ohm's law. To the DC source, it "looks" like a 50 ohm resistor.

In the real world, a 50 ohm cable with a 50 ohm antenna also "looks" like a 50 ohm resistor, but only at the frequency where the antenna really IS 50 ohms, not at other frequencies. In that case, all the energy sent down the cable is absorbed and radiated by the antenna. If you changed the antenna to something else such as 75 ohms, then the voltage to current ratio would be wrong when it reaches the antenna and some of the energy would be reflected instead of radiated.

There is a lot more to this, but that should help you understand the basics.

This message was best posted at rec.radio.amateur.antenna but I'll answer here anyway.

The value that you call resistance isn't a real resistance at all. (There is real resistance in the conductors of a transmission line, but that's not what I will discuss)

If you recall Ohm's law, the value a resistance can be calculated if the voltage across it and the current through it are known. Ohm's law deals with real resistances but the formula can be used to describe the impedance of a transmission line in the same fashion.

A coax line of "unit length" has a certain inductance due to the length of wire and a certain capacitance between the center conductor and the shield. These values are often given as capacitance and inductance per foot, but the length can be anything and the ratio between them does not change.

If these two quantities are known then the "characteristic impedance" (Zc) can be found from:

$Zc = (L / C) ^ 0.5$

Zc is given in Ohms because like a regular resistor, if the voltage across the terminals of the line is known, then the current in the line is also known. It should be noted that the voltage is assumed to be that of a traveling wave, not a standing wave. On a line with no loss, the voltage everywhere on the line is constant, as is the current.

The difference between 50 a 70 Ohm cable is that all other things constant, the center conductor in the 70 Ohm cable is smaller. This has very little effect on the inductance per length but it does reduce the capacitance between conductors. from the formula for Zc you can see that smaller C equals greater Zc.

Dave,

As stated in other responses the 50 or 75 ohms is not a physical resistance. It is a measured of the self capacitance of the coax and the self inductance of the same cable.

It is easy to visualize that the inner conductor of a coax and the shield of the coax make up two plates of a capacitor; hence the self capacitance. In the coax specifications it is normally listed as so many pico-farads per foot.

Also, every wire has a self inductance that is based on how long is the wire and how thick is the wire. This is also specified in nano-henries per foot.

These two properties, inductance and capacitance, establish the characteristic impedance of the cable by the relationship:

Zo = SQRT[L/C] : which is the 'Ohms' you are questioning.

So, a 50 ohm cable has one set of L and C, while a 75 ohm cable has different values for L and C.

You can't measure it directly between the transmitter and the antenna.

Why doesn't it vary with length is a great question! Remember your Algebra. If you divide Inductance per foot by Capacitance per foot the distance term [per foot] cancels. So you are left with 'nano-henries per pico-farad' which has the dimensions of 'Ohms Squared'

I just wanted to thank every one for attempting to simplify my question about coax and resistance. I guess this is a bit more complex than I realized, and I still couldn't follow all that was written, but let me ask you if it appears that I at least understand the general principal in spite of my mathematical limitations.

From what I understand, inductors and capacitors booth present resistance to an RF or AC signal called reactance, and when the two are combined in the right proportions, they can fully or partly cancel each other out depending on their values, so when dealing with coax, because their proportions remain constant, their impedance also remains constant regardless of the length.

Assuming I have this first part correct, I am wondering do antennas also represent an impedance similar to the coax.
Thanks, Dave

Re: Question on coax cable I don't understand.

Dave,
As stated in other responses the 50 or 75 ohms is not a physical resistance. It is a measured of the self capacitance of the coax and the self inductance of the same cable.
It is easy to visualize that the inner conductor of a coax and the shield of the coax make up two plates of a capacitor; hence the self capacitance. In the coax specifications it is normally listed as so many pico-farads per foot.
Also, every wire has a self inductance that is based on how long is the wire and how thick is the wire. This is also specified in nano-henries per foot.
These two properties, inductance and capacitance, establish the characteristic impedance of the cable by the relationship:

Zo = SQRT[L/C] :

which is the 'Ohms' you are questioning.
So, a 50 ohm cable has one set of L and C, while a 75 ohm cable has different values for L and C.
You can't measure it directly between the transmitter and the antenna.
Why doesn't it vary with length is a great question! Remember your Algebra. If you divide Inductance per foot by Capacitance per foot the distance term [per foot] cancels. So you are left with 'nano-henries per pico-farad' which has the dimensions of 'Ohms Squared'

|I just wanted to thank every one for attempting to simplify my question
|about coax and resistance. I guess this is a bit more complex than I
|realized, and I still couldn't follow all that was written, but let me
|ask you if it appears that I at least understand the general principal
|in spite of my mathematical limitations.
|
|From what I understand, inductors and capacitors booth present
|resistance to an RF or AC signal called reactance, and when the two are
|combined in the right proportions, they can fully or partly cancel each
|other out depending on their values, so when dealing with coax, because
|their proportions remain constant, their impedance also remains constant
|regardless of the length.
|
|Assuming I have this first part correct, I am wondering do antennas also
|represent an impedance similar to the coax.
|Thanks, Dave

Yes. Take for example a wire dipole fed in the middle. In free space
at its resonant frequency, the *impedance* is very close to 72 Ohms.
Yet if you connect your Ohmmeter across the terminals, you will
measure an open circuit.

As an (good) approximation, the dipole appears to be a series resonant
RLC circuit. That means there are a resistor an inductor and a
capacitor all connected in series.

It's pretty easy to visualize that there is inductance associated with
the wire, it is after all a long length of wire. The capacitor is
less easy to visualize but it is the capacitance between the halves of
the wire.

Even less easy to visualize is the resistor. There is a resistance
due to the finite conductivity of the wire but this is typically very
small. Going back to the Ohmmeter we measured an open circuit, yet I
said the impedance was 72 Ohms. Where does this come from?

Considering just the reactive parts for the moment (the inductance and
capacitance) you should know that perfect reactances
are--well--perfect, they store energy in either a magnetic or electric
field, but don't dissipate any of it. When the inductive (+) and
capacitive (-) reactances are equal, the circuit is said to be
resonant.

If the R in the RLC is zero then some energy introduced at this resonant frequency will be passed back and forth from the electric field in the capacitor to the magnetic field in the inductor and this will go on forever since no energy is lost. If no energy is lost, then a generator (the transmitter) doesn't have to supply any additional energy after the first instant to maintain this oscillation (transfer of energy between fields). Clearly this isn't what we are after. We want to generate lots of energy and radiate all of it.

Remembering that our inductor and capacitor are physically large (*distributed* over a large area) some of the energy in the electric and magnetic fields "leaks" out to space. To maintain the oscillation the transmitter must supply this "lost" or "radiated" energy. In our RLC circuit, only the "R" part can dissipate energy, so since we are obviously losing energy to space, there must be an associated resistance involved that accounts for this loss. We call this the "radiation resistance." Once again, this is an "apparent" resistance that follows Ohm's law in that the ratio of voltage to current equals 72.

This is the impedance of our dipole.

Here is something that has me confused. if the coax and antenna can be looked at like a reactive load, then if I pulled the coax off of my antenna at the feed point, could the coax alone also work like a 50 ohm load?
Dave

Great question Dave! In fact it is the basic question you would be asked to answer if you took a college level transmission lines course.

If your transmission line is very very very long, hundreds of miles, we use 'infinitely long', it would look like a perfect 50 ohm load. Of course, since it's not connected to an antenna there would be a problem trying to talk to anyone <grin>.

For practical transmission lines it would look like a complex impedance depending upon it's electrical length. The values could be anything between an open circuit to a short circuit and anything in between.

Practical transmission lines that have aged or become lossy are less sensitive to this phenomena because the losses in the line become so large they 'fake' out your transmitter.

Dave,

Antennas are much more complex to analyze or make models to describe what happens.

That said, all antennas, resonant and non resonant, can be thought of as a combination of distributed inductance, distributed capacitance, true lossy resistors, a radiation resistance, mutual inductance's, mutual capacitances, independent sources [coax connections], dependent sources [voltages and currents induced by the independent source], etc.

As mentioned in another response to your question a simple dipole contains distribute L and C and real and radiation resistances. When the reactance of the L and C have the same magnitude the antenna is by definition 'Resonant'. When operated of off resonance a little bit the VSWR increases. When operated quite a bit off resonance the antenna performs very poorly.

Not necessarily.

|When operated quite a bit off resonance the antenna

Again, not necessarily. Many antennas are far from resonant and yet
offer superior performance, particularly if they are longer than 1/2
wavelength for center-fed radiators or 1/4 wavelength for monopoles.

Another example would be the driven element of my 20 meter Yagi which
is purposefully resonant at 14.47 MHz (19.3 +j0). At the desired
match frequency of 14.175 MHz the Z is 24.5 -j24.25 (50 Ohm SWR =
2.6). With an inductive stub of +j50 across the feedpoint, the Z =
48.5 -j1 (SWR = 1.04)

Wes, if you read the original post you would be aware that the questions are being asked by someone just getting interested in radio, transmission lines and antennas.

I can make just about anything radiate! I've done it for years on USAF Re-entry vehicles where I had design responsibilities; Chief Engineer MK21 Re-entry Vehicle, Chief Engineer Peacekeeper RS, Chief Engineer MK21 Radar System redesign, etc...

The answer was predicated on the premise of 'when in Rome ... '. Teach to the level of the student. Lead to further questions.

His question dealt with the distribution of L and C in antenna systems: are they similar for an antenna?

The answer is YES!! But, performance will vary.

When Dave is ready for his next question I'll freely let you answer it since you are so well qualified!!

I hope you are an effective teacher.

I'm going to make a few points here and then take Walt's remarks about
this being off topic to heart. I knew this from the get go and said
in my first reply:

"This message was best posted at rec.radio.amateur.antenna but I'll
answer here anyway."

So, yes I'm familiar with the source of the questions and I've tried
to keep it to a beginner's level. Heretofore this hasn't seemed to
bother you, as you clearly stated, "As mentioned in another response
to your question...", and then when on to repeat what I had already
stated, as if it was new.

While you did not quote the material that you are now upset about, the
fact is that you made blanket statements which are false and I offered
examples that prove it so.

As to whether I am an effective teacher, I don't know, but let me
quote from something that's been on my on my home page for a number of
years:

"While I am far from a "new ham", for several years I taught beginning ham radio courses at the local community college, so I take a special interest in things directed to beginners. I believe it is imperative that beginners should not be misled, as bad advice is just like a bad habit; it is hard to overcome."

This was in response to a misleading article, directed to beginners, that appeared in QST.

I am reminded of something that happened to me when I was a beginner in another field, photography. I took an "adult education" course given at a local high school. The teacher was excellent and well known in the field. He knew all the big guys, Eisentatd, Avedon, Penn, etc. and was a stringer for Life magazine.

I was already pretty good in the darkroom so when he said one night that we would be developing with Dektol at such-and-such temperature and so-and-so minutes I was puzzled. I knew that the time was way too short. So I asked, howcome X minutes instead of the correct Y minutes.

He replied, "Oh, I've boosted the developer since the high school classes are too short to allow for the longer times." So from that day forward, I couldn't make myself believe anything he told me.

And that's why I have a problem with folks that mislead beginners.

I will leave this topic now and return to r.r.a.a.

It seems that the more questions you guys have helped me with, the more questions I have, LOL. I really do appreciate the help and the simplified answers. I can't ask questions to my text books.

Now I am now wondering, why would a straight piece of coax minus the antenna need to be many miles long in order to operate as a 50 load, shouldn't the coax present the same impedance regardless of its length if coax is like an LC circuit?

While I have bombarded you guys with all my questions about coax, my mind is now racing with questions about inductors.

I was wondering if an inductor generates the same amount of heat as a resistor would, if it was used to blocks the exact same amount of current flowing in a circuit?

I understand that the size of a resistor VS an inductor would have some effect on the over all operating temperature, but all things being equal, would the temperature be the same?

A pure inductor (no resistance - only reactance XL) does not dissipate heat.
It's power is reactive power not true power.

If an inductor has resistance -- the power dissipated will be I squared R.
For true power, apparent power and reactive power -- see URL:
http://www.tpub.com/neets/book2/4i.htm

For the rundown on inductors -- see
URL:http://www.tpub.com/neets/book2/index.htm

What I was wondering is how much "advice" you can give somebody
about a piece of coax ?

This "discussion" is way past the advice stage and the guy who asked
the original question is problem gone with the wind.

You guys are doing what you normally do - you are trying to impress
each other with your technical knowledge. And the DX newsgroup is
the wrong place to do that. So the best advice I've seen so far is to
go back to the antenna forum.....

Well Dave, now I'm wondering why you are wondering things like that.

There are two sides to amateur radio. The technical side, and the practical side.

It never hurts to have a little technical knowledge, but in reality, the practical side of ham radio is just as, if not more, important. And every time you find 10 hams, you'll find six of them who try to impress you with their non-existant technical knowledge.

You can discuss dipoles and the technical aspect of them until hell freezes over, or you can go put one up in a tree and see if it works.

Let me ask you this. How many miles of coax are you planning on running around the neighborhood to see if it works as an antenna ?

If the answer to that question is none, then the answer to your question is what difference does it make.....

Hi Jim,

What drove me to ask these questions is a fascination I have with
electronics.
Even though I took a basic electronics in High school, acquired a
technician ticket, and work as a TV repairman, I don't really have much
understanding about RF and LC principles. Most of the time when I pick
up a text book to do a little research on a subject, I often walk away
feeling more confused, so being able to ask questions here is a nice
alternative.
Dave

Personally, I've always had problems with theoretical discussions myself, Dave.

If one of the guys from the antenna newsgroup told me it takes 18.6 miles of coax cable (with no antenna on the other end) to make a 50 ohm load, I still wouldn't believe it until somebody rolled out 18.6 miles of cable and showed me.

Most of the little I know about antennas and coax I've learned out in the back yard up in a tree, not from a book........

My apologies, the RIT and XIT do still work, they are just not
displayed when the 8 is up.

Could there be a problem in the display decoding circuitry or
something?

Bad caps on the display board were a very common problem with that
radio. Icom used to have troubleshooting on their web site, but
they've removed all the old radios. Drop their support guys an email,
they are very helpful.

Amateur Radio Newsline™ Report 1331 - February 14, 2003

Amateur Radio Newsline report number 1331 with a release date of Friday, February 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The terrorism warning level goes up in the United States and ham radio operators should be prepared. The details on Amateur Radio Newsline report number 1331 coming your way right now.

(Billboard Cart Here)

**

THE WAR ON TERROR: NATION GOES COLOR ORANGE: HAMS SHOULD BE ALERT

Homeland Security Secretary Tom Ridge says every American must be vigilant. This as the Bush administration raises the nations terror alert from Code Yellow to Code Orange and says this represents the most significant warning since the Sept. 11, 2001 attacks. Among those best equipped to assist the nation in fighting terror are its ham radio operators. Amateur Radio Newsline's David Black, KB4KCH takes a look at how hams can prepare themselves and how they can help:

--
The government isn't minimizing the threat. Officials expects more attacks against the United States and its allies in coming days. The only thing they can't do is predict when and where an attack will occur.

Federal officials recommended that Americans should take basic disaster preparation steps. This includes maintaining a three day stockpile of food and water. They also recommended obtaining duct tape and plastic sheeting to seal a house in the event of a chemical or biological attack or disaster. They also say to have some sort of emergency radio receiver. One that can operate for days without being plugged into a power outlet is best. This will be the primary way the government talks to you should the unthinkable happen.

How can ham radio operators help? Start by making sure that your ham gear works. Especially your hand held and mobile radios. If you only have one battery pack for your H-T, go out and buy one or two more. Or even better, get a case that lets you use alkaline batteries that are widely available. If the power goes out, you can't recharge Ni-Cads or NiM-H cells. But you can operate for a number of hours with Alkaline batteries. So have several sets of these on hand -- at least enough to get you through 72 hours of non-stop operation.

If you are a trained communicator active with an ARES or other emergency communications group, be sure to let the chain of command know where you will be. Give them a list of phone numbers where you can be reached 24 hours a day -- 7 days a week. Better yet, get a pager and give its number only to the person who will be calling you. That way if that pager goes
off, you know it's for real.

What about looking out for terrorism in your own community? Do it. Observe and report.

If you see something that looks out of the ordinary or suspicious, call the police. Remember that old adage about better to be safe than sorry. While it's not likely you'll encounter a real live terrorist cell, it's not out of the question, either. And that's where your radio, your local repeater and its autopatch come in.

Even if you don't own a cellular telephone, your hand held or mobile radio is your emergency lifeline. If you have access to an autopatch equipped repeater its a lot better than a cell phone. Cellular phones are known for not being reliable in many areas. With a ham repeater, if you can hear it, the chances are it will hear you. And even if there's no autopatch, another amateur can relay your message to authorities.

What about on the air? What are the chances that a terrorist cell might take to the airwaves on your favorite band? Not very likely but again not impossible, either. Terrorists tend to try to blend in with the background. Setting up a communications network on even an underutilized band like 6 meters would be like waiving a red flag in front of a bull. Hams are very protective of their spectrum and are not afraid to go after those on a band illegally.

It's far more likely that a terror group would set up shop on license free public frequencies than on 2 meter F-M or 20 meter sideband. And it's a pretty good guess that government monitors are keeping a close ear on F-R-S, MURS, Class D CB and the frequencies nearby to each service.

What if you hear something that seems suspicious? There are three letters to remember: F-B-I. The agency set up a website and dial-in tip line immediately following the September 11th attacks. Both are still in service.

The website U-R-L is www1.ifccfbi.gov and it puts you only a link away from filing a report. Just click on the words "Report Terrorist Activity."

And this word to hams who have never handled emergency communications. If you hear a net going on, don't break in to ask if you can help. The chances are that you cannot. You can do more good by listening and learning procedures. Better yet, go to the ARRL's website and sign up for one of their Emergency Communications Training Classes. With the stark new reality of terrorism on our homeland soil, it should be incumbent on every ham regardless of age or license class to become

skilled in emergency communications techniques. It might be you who's called on to save a life.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham, Alabama.

--

The bottom line. As the Office of Homeland Security has said, every American must be vigilant. In retrospect, all of our lives could depend on it. Hams can sign up for emergency communications training at the ARRL website -- www.arrl.org. (ARNewsline™)

**

ENFORCEMENT: HAM FINED $12000 FOR MULTIPLE VIOLATIONS

A ham has been fined $12,000 for violation of the Amateur Service Rules. We have this report:.

--

Its one of the largest fines ever assessed for ham radio rules violations and its been handed to Scott E. Kamm, the license holder of amateur radio station N0UGN. And it comes after the Federal Communications Commission finds Kamm apparently responsible for causing intentional interference, broadcasting music and failing to identify with his station by its FCC assigned call.

Kamm's story goes back to December 9, 2002. In response to complaints of continuing interference on 146 point 31 MHz, an agent of the Commission's Kansas City Field Office began monitoring. At approximately 7:00 P.M., the agent observed a very strong signal on the frequency. It was reportedly made up of music, sound effects and unmodulated carriers. No station identification was transmitted. More important. These transmissions were interfering with existing communications that were in progress between other amateur stations.

Using radio direction finding the agent determined the source of these interfering signal to be Kamm's residence in near-by Waterbury, Nebraska. The FCC says that Kamm has two addresses that they know of. One in Sioux City, Iowa and the other in Waterbury where they traced the interference as coming from.

The scenario repeated itself a day later on December 10th. This time the agent entered the premises and inspected Kamm's station. The agent found an amateur radio transmitter capable of operating on 146.31 MHz but Kamm stated that no transmissions were made from his station. That he used the radio to receive only. Kamm also asserted that no one else operated the station.

But the FCC is not buying that story. It says that the Amateur Service Rules state that no ham shall willfully or maliciously interfere with -- or cause interference to -- any other radio communication or signal.

Also amateur stations are prohibited from transmitting music using and that they must identify at the end of each communication or at least every 10 minutes.

And, based on the evidence before it, the FCC says that it finds that Scott E. Kamm did willfully and repeatedly violate the Amateur Service Rules by causing intentional interference, broadcasting music and failing to identify. He is being fined $7000 for the interference, $4000 for transmitting the music and $1000 for failing to identify.

In Blair Alper, KA9SEQ, reporting for the Amateur Radio Newsline.

--

Kamm was given the customary thirty days to pay up or file an appeal. (FCC)

(5 sec pause here)

**

ENFORCEMENT: UNLICENSED RADIO BROADCASTER SENTENCED TO 18 MONTHS PROBATION

The FCC has announced that Benjamin Leroy Carter has been sentenced to 18 months probation. This, following his conviction on seven counts of unlicensed radio operation.

The conviction and subsequent sentencing is the result of an investigation that began in February of 1999. The Commission's Tampa Florida Office says that it received complaints from residents and broadcasters in the Orlando, Florida area of interference to the reception of licensed radio broadcast stations. Carter, who also went by the name of Malik Copafeel Abdul, pled guilty to seven counts of unlicensed radio operation in November of 2002. He also agreed to forfeit all equipment used in connection with the station.

The FCC says that 4 months of the sentence will be served as home confinement. In addition, Carter will be required to perform 50 hours of community service. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231068A1.doc (FCC, CGC Communicator)

**

RESCUE RADIO: NEW CLASS OF FIELD DAY STATION

Amateur Radio's premiere emergency preparedness operating event is changing. This with word that the annual ARRL Field Day will gain another entry class for 2003.

Called Class F, these will be Amateur Radio stations which are set up and operate from emergency operations centers, or EOC's. ARRL says that the change renews the emphasis of Field Day's 1933 origins as an emergency preparedness exercise as opposed to a routine contest. (ARRL)

**

RESCUE RADIO: A NEW CB SIDEBAND EMERGENCY CHANNEL

Doug Schwinn N0LAY, reports over the QRZ.com website that the Michiana Emergency Monitoring Group is promoting an iniative to have C-B channel 39 designated as an additional frequency to be used and monitored during emergencies. This in addition to the existing C-B channel 9.

The reason? Schwinn, who also holds the call KDZ0430 says that he joined in the effort because of the mountainous region of Colorado where he lives. He says that he would likely be heard using lower sideband on C-B Channel 39 than A-M on Channel 9 during an emergency situation. He also notes that a spokesperson for the group stated in an article in Popular Communications that this is part of an effort to restore and legitimize the Citizen Band Service. (N0LAY via Internet)

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN COLUMBIA DEBRIS RECOVERY ENDS

Ham radio communications assistance in finding parts from the fallen space shuttle Columbia has wound down. According to several Internet reports, February 12th was the last day hams were to be called out to provide communications in the recovery effort.

During the height of the recovery, activities being conducted over the W5NAC repeater in Nacogdoches Texas could be monitored using Echolink's EDU_NET conference. Rick Hambly, W2GPS, says that there was a very active effort by RACES and SKYWARN to aid NASA and government agencies like the FBI with the identification, G-P-S location, cataloging and recovery of space shuttle Columbia components.

As previously reported, the Columbia was at 203,000 feet when it disintegrated plummeted back to Earth. All seven Astronauts on board were killed. Three of the 7 were licensed radio amateurs but no ham radio gear was carried on that ill-fated flight. (VHF Reflector, W2GPS, others)

**

REMEMBERING COLUMBIA: HAM CREATES ON-LINE MEMORIAL

A former Amateur Radio Newsline Young Ham of the Year ward recipient has created a lasting Internet tribute to the space shuttle Columbia.

The memorial website was created by Kevin Boudreaux, N5XMH, of Orlando Florida. Boudreaux, who grew up just outside New Orleans was the recipient of our 1993 "Young Ham of the Year Award" for his organizing Amateur Radio emergency communications following a devastating hurricane.

Today Boudreaux is a Manager with the Hilton Hotels and a professional website designer. He tells Amateur Radio Newsline that he was so personally touched by the Columbia tragedy that he created this memorial website to the shuttle and its crew.

The webpages he has created are filled with facts about the orbiter and its mission along with photos and short biographies of its STS-107 crew. Kevin also provides links to other Columbia memorial websites along with the complete statement of President George W. Bush when he sadly went on the air to let the world know that the Columbia was lost.

Kevin was only 14 when he went out to help his community in time of disaster. He was 15 when he received the "Young Ham of the Year Award" and his dedication has never stopped.

You can view his web tribute to the fallen Columbia and its crew at www.sscolumbiamemorial.com or www.columbia7memorial.com (ARNewsline™)

**

RADIO LAW: ALLEGED PAY TV INFO THIEF PLEADS NOT GUILTY

A 19-year-old University of Chicago student has pleaded not guuilty to federal charges of stealing plans for security systems used by satellite broadcaster Direc TV and distributing them freely on the Internet. Igor Serebryany is accused of stealing information related to Direc TV's latest access cards and then posting the priporotity information to websites dedicated to the hacking of the companys security systems

As previously reported, the theft allegedly took place while Serebryany was working at the Los Angeles office of a law firm that represents Direc TV. He was indicted by a federal grand jury last month on three felony counts of theft of trade secrets and faces a maximum sentence of 10 years in prison if convicted on all charges. (Published news reports)

**

CONVENTIONS AND HAMNFESTS: CHARLOTTE NC IN MARCH

March 8th and 9th are the dates of this years Charlotte North Carolina Hamfest and Computer Fair. The venue is the Charlotte Merchandise Mart on Independence Blvd. Doors open 8:30 a.m. both days with talk in on the 145.29 Mhz repeater. This years featured forum speaker is FCC chief rules enforcer Riley Hollingsworth, K4ZDH. More information is in cyberspace at www.w4bfb.org/Hamfest.html (Press release)

**
RESCUE RADIO: HAM RADIO IN TV DOCUMENTARY

Ham radio is part of a soon to be shown documentary produced for the Discovery Channel. Joe Moell, K0OV, has the details:

--
Members of the Hospital Disaster Support Communications System of Orange County, California have been included in tapeings for a new documentary series on the Discovery Channel. "Critical Rescue," a series of programs featuring rescue workers and those who support them, made its debut on February 6.

A team from New Dominion Pictures spent a half-day with HDSCS last August. They interviewed founder and leader April Moell, WA6OPS, and taped reenactments of ham communications that took place on April 23, 2002. On that day, hams were awaiting their assignments for one of the four large-scale disaster drills in Orange County each year. At 8:10 AM, a 6000-ton mile-long freight train struck a standing Metrolink double-decker commuter train at a crossing in Placentia, causing three deaths and over 200 injuries. The drill was immediately cancelled, and as rescuers converged on the train crash scene, area hospitals braced for the wounded passengers.

As Net Control, WA6OPS quickly deployed hams to the 14 hospitals most likely to receive victims. There they handled countless messages, verifying victim dispatch and patient counts, providing information for inquiring victim families, and communicating with hams supporting the Red Cross. Within some hospitals, HDSCS provided direct links to handle messages between triage areas, Emergency Departments, and Command Posts.

Additional HDSCS operators participating in the reenactments were Sam Creason K6EW, Cheryl Simpson KD6MWZ, Ralph Swanson WB6JBI, and David Mofford W7KTS. It is not known how much of the HDSCS footage will appear in the edited program.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, "Fateful Journey" will air 8 and 11 PM Eastern and Pacific times on Thursday February 20th, and again at 2 PM Eastern and Pacific on Saturday February 22nd. (ARNewsline™, K0OV)

ARRL PACIFIC DIVISION DIRECTOR JIM MAXWELL, W6CF, SK

ARRL Pacific Division Director Jim Maxwell, W6CF, has died. The 69 year old Maxewll passed away on Thursday February 6th at his home in Redwood Estates, California. The cause of his death has not been announced.

Maxwell, who became a Director in January 2000, joined the ARRL Board in 1994 after being elected Pacific Division Vice Director. He also served as an ARRL Emergency Coordinator from October 1991 to March 1999.

An avid DXer, Jim Maxwell belonged to mumerous DX clubs, contest clubs and organizations. This included the famed Northern California Contest Club. He also served as a member of the ARRL DX Advisory Committee from April 1988 through 1994 and was an accredited Volunteer Examiner.

Professionally, Maxwell held doctoral degrees in aeronautical engineering and biomechanics. He retired from the Lockheed Missiles and Space Corporation as a technical consultant in 1992 and from Scitor Corporation in 1998.

Pacific Division Vice Director Bob Vallio, W6RGG, takes over immediately as Director. ARRL President Jim Haynie, W5JBP, will appoint a new Vice Director in the coming days. Maxwell previously held the call W6CUF. (ARRL)

HAM RADIO IN SPACE: ISS PACKET RETURN DELAYED FURTHER

When will the packet system on the International space station come back on? Nobody is quite sure but ARISS International Chairman Frank Bauer, KA3HDO says that his group has been working with its colleagues in NASA and Russia's Energia to get it operational again. Unfortunately, so far they have only been successful in getting it turned on for about one orbit.

Bauer says that several factors are impeding the packet startup. First, the progress vehicle docked with ISS and the crew is currently unpacking and stowing about a ton of supplies and equipment. Also, the crew is working with their mission control counterparts on schedule changes that have occurred due to the Columbia accident.

Given these items its apparent that this crew is not as engaged in ham radio the way the last ISS Expedition crew was. And because of this the packet system may be off for a bit longer. (ANS)

**

CONTESTING: ARRL SAYS BEACONET IS OK

ARRL Contest Branch Manager Dan Henderson, N1ND, says that BEACONet does not violate any contesting rules. According to Henderson, after additional review the ARRL has come to believe that BEACONet is similar to an automated CQ'ing system. That it only facilitates the

solicitation of contacts and as such it seems to comply with the letter and spirit of the contest rules. (VHF Reflector)

**

DX

In DX we take to the sky this week. This with word that Wayne Estes, W9AE, plans to operate the Amsat Oscar 40 satellite as FG slash W9AE from the island of Guadeloupe. The tentative plan is for Wayne to start operation at 2300 U-T-C on February 21, 22, 25, and 26 for windows to the Americas and the Pacific. Also listen for him on Sunday February 23 from 1500 to 2000 UTC for a satellite window to Europe and central Asia. Exact operating times will depend on the RUDAK schedule and Wayne's vacation activities. If you work him, QSL to Wayne Estes, 18673 W. Meadow Lane, Mundelein IL 60060, U.S.A. (ANS)

And Hagal International reports that Israeli amateur operator Dov Gavish, 4Z4DX is the first ham in the world to completely confirm DXCC using electronic QSL's. Although still not recognised by the DXCC, electronic QSL'ing is gaining ground in the DX community. (Hagal International)

Also, the ARRL's new Logbook of the World secure electronic contact-confirmation system took a major leap toward public release in January. This, with several weeks of limited tesrting of the concept. (ARRL)

**

THAT FINAL ITEM: TURN AROUND IS FAIR PLAY

And finally this week, we have all heard the expression "turn around is fair play. And one person who has just found that out is former computer hacker turned on-line security expert Kevin Mitnick, N6NHG. That's because Mitnick's new company website has been -- well -- hacked. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the story:

--

The ham who holds the honor of being the world's best-known computer hacker suffered the indignity of having hackers break into his new security consulting company's Web site -- twice. But news reports say that Kevin Mitnick, N6NHG, simply shrugged off the incidents as amusing and not serious enough for him to call authorities to investigate.

As I said, two electronic break-in's have taken place. The first was on January 30th. In that one a hacker calling himself "BugBear" added a page to Mitnick's corporate website that read "Welcome back to freedom, Mr. Kevin." This is probably a reference to Mitnick's probation which ended ten days earlier on January 20th. During his probation Mitnick was barred from accessing the Internet and this hack may have been more of a welcome home -- in this case -- home being the World Wide Web.

The latest incident took place over the weekend of February 8th and 9th and was more of an on-line job application than a hack. In this case a hacker in Texas broke in and asked Mitnick to hire him as the company's security officer.

Mitnick says that the hackers apparently exploited separate flaws in Microsoft's Internet server software. He says that the person responsible for the company's Web site failed to install patches available from Microsoft.

In neither instance did hackers vandalize the Website. One said in e-mail that he didn't do damage out of respect for Mitnick.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Mitnick's new organization is called Defensive Thinking and is located in Los Angeles. A company spokesman said that no customer information was released nor was there any danger of information being compromised. (Published news stories)

303. Dx Ops should know USA Sub Bands

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-16 06:29:33 UTC
From: thompson@mindspring.com
Message-ID: <b2napu$j51$1@slb9.atl.mindspring.net>
Source record: 10937

I have noticed several DX ops operating with USA calls on frequencies outside the USA voice sub bands. The most recent is KJ1C/KH6 who was working JA's on both 18.110 and 24.930. Not only was he in violation of FCC regulations for out of band use but he never did ID in English while I listened. Another FCC violation. Hawaii must use USA sub bands except for being able to use 7075 to 7100 for SSB on 40. The lower limit of the 12 and 17 meter SSB sub bands is 24.930 and 18.110. All sidebands must be within the band and even with Upper Sideband you cannot work on the band edge.

I hear South and Central American hams operating in the USA below 14.150 on 20 SSB on occasion, too.

Operators risk losing their FCC license for being in violation of the rules. Please follow the rules.

73 Dave K4JRB

Dave, I think you're preaching to the choir here. Not to many JA's
read this newsgroup, I'd bet. Remember, it's the same FCC that
gave him the license they should never have given him that isn't
enforcing any of the rules that apply to that license.

Write your congressman and ask him why the FCC continues to
issue U.S. amateur licenses to foreign nationals that never have
resided in the U.S. and never will. Ask him why KJ1C took the
U.S. license exam at McDonalds in Tokyo, and it was administered
by three foriegn nationals who are VEs.

But you lost me on that English ID rule. I've been licensed for over
20 years, and I don't remember ever seeing that rule. And how would
I ID in English on CW anyway ? Point us to the paragraph in part 97
with the English ID rule please.....

73, Jim KH2D

For phone emission, check out the FCC part 97.119 (Station Identification)
which states:

(2) By a phone emission in the English language. Use of a standard phonetic
alphabet as an aid for correct station identification is encouraged.

Hmmm, interesting post.

I was stationed in Japan, 1990-1993, and was active in the local military amateur radio club, the Tokyo International Amateur Radio Club, and the local Japanese amateur radio club.

I was somewhat surprised to find a few Japanese with US callsigns. Most of them were in businesses that required them to do extensive travel in the US; some had lived in the US for their companies. I don't recall the origin of their licenses -- but -- the US club ran VE testing and we had two Japanese pass the test for US tickets.

I haven't studied the regulations but it would seem that the frequencies you can use are determined, not by the callsign you are using, but by your location. For example, while in Japan, I was issued a Japanese license. I used that callsign and operated within the Japanese bands -- I never even

thought of using my US callsign and operating in the US bands while in Japan -- there are differences between the US and Japanese allocations on several bands.

Because of the international nature of shortwave propagation, it would not be unusual to hear stations from other countries operating, say, phone in a US CW band if that band is a phone band in their country and they are operating in their country -- their signal would not stop at the border.

However, using a US callsign, and operating outside the US allocations seems to be a clear violation and should be reported. Let the FCC and the callsign holder sort it out.
--

Regards,
Joe S.

Probably objects to the fact that a foreign national who has no
resident status in the United States, didn't even take his test in the
United States, is able to get a US Amateur Radio license so easily and
under questionable testing conditions.

How would YOU feel if I were to get a UK Amateur Radio license under
similar conditions? Would YOU feel comfortable being accused of
xenophobia if you objected?

My objection is that it's not fair to the people in the U.S. who
volunteer as examiners, put their license at risk, and make
themselves liable for criminal prosecution if they 'mess up' on
a testing session.

U.S. licensing exams, given by foriegn nationals, in foreign
countries, aren't subject to the same liability as U.S. VE's.

A lot of U.S. VE's have quit the VE program because of it.

The Federal Communications Commission is supposed to issue
licenses to people in the U.S. who want to use amateur radio.
They aren't tasked with handing out U.S. licenses and vanity
calls as souvenirs or world radio passports. Just as they are
not tasked with give a broadcast license with the call WJA
to an FM radio station in Tokyo because the FM station thinks
it would look Kewl on their QSL card.

I have no problem with anybody (foreign or not) who is really
in the U.S. getting a U.S. license. I have a problem with people
taking U.S. license exams in Tokyo, given by 3 JA's who live
in Tokyo, and obtaining a U.S. license just for the sake of having
a Kewl U.S. Vanity call.

If KJ1C, who is really JI1CYX, and who really lives in Japan
wanted to operate in Hawaii, we have reciprocal provisions
that allow him to turn on the radio and go at it as JI1CYX/KH6,
no paperwork, no U.S. license required. Instead, because it's
Kewl to have a U.S. vanity call (even if you'll only use it for
two days in your lifetime), he lied on his 610 form by giving
an address in Florida where he didn't really live (and maybe

has never even visited). That program was specifically put into place in an effort to save work (and tax payers $) at the FCC.

In KJ1C's case, he obviously has so little respect for his U.S. license that he didn't even bother to learn the U.S. band plan.

The people who work at the FCC, who process 610 forms, the offices they work in, and the computers and electricty they work with are all paid for by U.S. tax payers (me).

If Mr. Shinichi Ota really lived in Florida, again, I have no problem with him getting a U.S. amateur license. But he doesn't. He just wanted a Kewl U.S. Vanity Call that matched his JA call to use on vacation if he ever went.

The other problem I have with U.S. licenses being issued based on "testing sessions" all over the world is the fact that the licenses are obtained to be used as "World Radio Passports".

If Mr. Shinichi Ota arrived at some carribean island and presented his Japanese ham license, he would be told "Sorry, we don't have any reciprocal agreement with Japan". So instead he presents his BOGUS U.S. license, and is welcomed with open arms. It's not the U.S. taxpayers responsibility to overcome the fact that Japan isn't good at making agreements with other countries.

The U.S. has a VERY poor system in place, and it's being abused on a world wide basis. Unfortunatly, nobody at the FCC seems to care enuff to do anything about it.

W5YI or the ARRL make their six bucks every time somebody takes a test in Tokyo, so they sure don't want to stop the program.

So does that mean that Mr. Shinichi Ota is a kewl dude and since the system is hosed up, it's OK for him to abuse it? I guess he's about as kewl as the thousands of other JA's with bogus U.S. calls, and as kewl as Martti Lane with his AH3 call. I'm SURE Martti was really living on Johnston Island when he got that call too.....

Has nothing to do with "Xenophobia" or September 11th, Walt. It has to do with "right and wrong" - a concept that few people in the world seem to understand anymore.

Would you have any objections to British exams being given in
Tokyo to a group of people that can't read or undertand English
but still, somehow, manage to pass the test ?

Do you have a problem with hams who live in Britain who are
uninclined to go thru the British testing proceedure so they go
to McDonalds in London and buy a U.S. license for six bucks so
they can trade it for a U.K. license ?

A knowledge of English for a U.S. amateur examination is a
prerequisite, because the test question are in English.

What I'm trying to explain to you, Walter, is that it would smell
kinda fishy if I took the written drivers license exam in Tokyo
and passed it because I can't read Japanese..... Get it ?

|That pales into insignificance, when compared with the estimated
|750,000 so-called "asylum seekers" and other illegal immigrants who
|are all currently being supported as uninvited guests of the British
|taxpayers. (me)

And that pales compared to the millions of illegal aliens in this country. I live 100 Km from the US-Mexico border and it isn't even safe to travel to one of our national parks that is along the border.

A few months ago a park ranger was gunned down by Mexicans, but when law-abiding US citizens take up arms to protect themselves along the border, the media accuse them of being "xenophobic." A reasonably well-balanced story at:

http://www.tucsonweekly.com/tw/2002-12-19/feat.html

Our hospitals are going broke because they too are required by the federal government to care for anyone who walks in the door. Our president, when he was Governor of Texas, tried to get the federal government to pay for this alien problem. Now that he is president, it's not a problem anymore.

Pretty soon we'll give them all the vote (we already have the Spanish language ballots) and (staying on topic) a ham ticket too. Of course, like most epidemics, this is a self-limiting problem. Someday the last taxpayer will die and they'll all go somewhere else.

With all due respect, Wes, this is bullshit. The fact that a park ranger was gunned down "by Mexicans" does not mean that all Mexican immigrants, legal or illegal are murderers. The vast majority are hard working individuals who are simply trying to find better life for themselves and their families. As a matter of fact, if all the illegals were deported tomorrow, the US economy would collapse the same day. You really think the lazy-ass cousin-marrying trailer trash Billy Bob would take a $5 an hour apple-picking job in Yakima, WA?

Crime, including murder and drug trafficking, is not a national characteristic of any people, nation or race. Increased crime rate along the US-Mexico borders is simply a result of the "war on drugs" that we have been soooo successfully waging for decades now. Legalize narcotics and crime rate is cut by 75%. Of course, considering that this country is run by religious fanatics such as Bush and Ashcroft, that's not happening any time soon, is it? After all, gotta keep the masses busy while their rich cronies steal our money wholesale.

> Our hospitals are going broke because they too are required by the

The US health care system is hardly in trouble due to the illegal immigrants. If you really believe that, maybe you shouldn't be opening any e-mail from Nigeria.

The menial, low-paying, dead-end jobs are open to anyone. Come and get it - it's not reserved for Mexicans. If there were no jobs, there would

be no immigrants. The biggest welfare frauds and abusers are American citizens, not immigrants, btw.

It's sad that anyone should fall for this illegal immigrant propaganda, while by far the biggest crimes are being perpetrated on Wall Street and Washington DC. I'm sure Bush Jr. has the solution for your and any other problem: tax cut for the rich. Oh, and getting rid of Saddam.

|With all due respect, Wes, this is bullshit. The fact that a park ranger
|was gunned down "by Mexicans" does not mean that all Mexican immigrants,
|legal or illegal are murderers.

With all due respect, Zoran, I didn't imply that they were. But I
happen to think it unconscionable that a citizen of this country
cannot visit one of his national parks without fearing harm from
invaders from a foreign country. Maybe your experience makes you feel
otherwise, but not I.

I'm with the female park ranger recently quoted in the local newspaper
who said that her personal opinion was that there should be troops on
the border and guard towers every 25 yards. This little "Smokey the
Bear" is wearing body armor, packs a sidearm, carries an M-16 and riot
shotgun in her truck while she shows the visitors the way around the
park.

|The vast majority are hard working
|individuals who are simply trying to find better life for themselves and
|their families.

This used to be true. I grew up here, went to high school in a
predominately minority neighborhood, lived part time on a ranch on the
border where illegals came through often. Oh, and I was married for
16 years to a Mexican-American (as they were called in those days) and
after my parents divorced, my father married a Mexican national, so
I'm *very* aware of the situation and far from a racist or xenophobe
as you might be trying to imply.

Today, you are simply wrong.

|As a matter of fact, if all the illegals were deported
|tomorrow, the US economy would collapse the same day. You really think
|the lazy-ass cousin-marrying trailer trash Billy Bob would take a $5 an
|hour apple-picking job in Yakima, WA?

No, but he will take a higher paying job, which is what those "poor
family farmers" (who live in multimillion $ mansions) would have to
pay if they didn't have the steady stream of illegals keeping the wage
scale down. And if I have to pay 50 cents more for a plate of tacos
at my favorite Mexican joint because they have to hire a citizen to
wash dishes, so be it.

|
|Crime, including murder and drug trafficking, is not a national
|characteristic of any people, nation or race.

All the drug runners that are killing people along the AZ border seem
to have brown faces.

|Increased crime rate along
|the US-Mexico borders is simply a result of the "war on drugs" that we
|have been soooo successfully waging for decades now. Legalize narcotics
|and crime rate is cut by 75%.

I couldn't agree with you more on this point.

|The US health care system is hardly in trouble due to the illegal
|immigrants. If you really believe that, maybe you shouldn't be opening
|any e-mail from Nigeria.

I'm talking a local issue. The fact is that Tucson and Pima County,
with a population of 900,000, are down to one trauma center. The
others have closed because of the costs of caring for illegals. When
19 of them riding in one vehicle get hurt while running from the cops,
they all get helicopter rides to the hospital, on my dime. The
offical, publicly-stated, policy of the federal government (Border
Patrol) is to *not* arrest them until (if even then) after they are
released from medical care. This is so the feds are not responsible
for the medical costs. I *am not* making this up.

|citizens, not immigrants, btw.

I have a friend (a fellow ham) who happens to be Morman (I'm not) and even though they are advanced in years, he and his wife were sent on a service mission to Eagle Pass, TX for a year. This place is on the Rio Grande with a bridge to Mexico. He reports that there is a birthing center right at the end of the US side of the bridge. Pregnant women wait until they are in labor, rush across the bridge and deliver a new US citizen. While there they begin the paperwork to start receiving welfare benefits for the new citizen.

The same thing happens in Nogales, AZ. We also have our state legislature working on a bill to deal with the lawsuits brought by Mexican citizens who were threatened with having their kidney dialysis terminated. Guess who pays for this, Pilgrim?

|It's sad that anyone should fall for this illegal immigrant propaganda,

So your point is that since there are other crooks we should just ignore this problem? How about you helping me out with my property tax bill? Just send your check to my address at qrz.com.

Maybe you'll be the last living taxpayer.

Agreed, I'm sad about it too. While I admire President Bush in most ways, he is totally ignoring the underlying cause of all the turmoil in the middle east. Fix the Palestinian problem and the terrorist issue will go away. The political pressures on him *not* to fix it must be enormous.

I'm not suspicious of "all foreigners," I simply feel that a US
callsign should be provided to amateur radio operators who are legal
residents of the US. Then again, I don't think that illegal aliens in
our country should be entitled to welfare, public education or any
other of the benefits that legal residents and citizens of this
country pay for and are often denied when they need them. The way I
see it, if I want a UK callsign, then I should make some effort to
establish residency within the UK. The way you make it sound, I don't
even have to produce proof that I'm aware of, much less familiar with,
the rules and regulations governing Amateur operators in the UK...

I know that's the posturing of some of them, but I don't believe it.
There has been a lot of wrongdoing on both sides, but I do believe a
settlement is possible. The Jews and Arabs lived together in that area
for centuries before and it can be done again.

We're not going to settle it on this newsgroup but it can be done.

No, I'm not "wrong", we are just looking at the same problem and pointing out the parts each of us think is most important. All of the parts are contributing: The "Israeli" problem, the "Palestinian" problem, the "Saudi" problem and others. I perhaps oversimplified it in my previous post and I apologize for that.

It may seem odd to you, but it seems to be the rule, rather than the
exception, in the case of reciprocal licenses. I've usually gotten
the information, one way or another, but it's sometimes not easy. And
with CEPT and IARP it's very easy to have a license that's valid,
and no copy of the appropriate rules (and even harder to get that
information in a language you understand).

At least in the UK, you're given a copy of the rules (in English), and
it's updated at renewal time. But if you're using CEPT, you can easily
have no clue. I know of a couple of people who tried 146.52 in the UK
and wondered why they got no answer. In some other places, you just get a
band listing, and for other places, you get nothing, and the rules are
difficult to find.

I've not yet managed to find a copy of the regulations for 3D2, and my
license for 3D2QS is good for another 9 years. They didn't even have
a copy for me at the office that issued the license.

BTW, I have a UK license, M0BPI, on the basis of my US license, and the document has a disclaimer suggesting that it NOT be used as the basis for a further reciprocal license. However, the RSGB and RA both stated that I could use it for CEPT operation in third countries. Which I did, before the US bought into the scheme.

Gee, this discussion really went off the rails.

But tell me, why can't you operate USB on the lower band edge?
No RF emissions should be below the band edge.

Note, that M0BPI is granted on the basis of my US license. If I'd
taken the Morse Test (I did take the RAE), then apparently I could
have gotten one without the qualification. I had M1AVX solely on the
basis of the RAE pass, and it didn't have that qualification.

Also, there's no requirement that the other licensing agency has to
follow the RA's recommendation, either. And, on a more sinister note,
the qualification is printed on the standard form in an area that's
normally blank. It'd be easy to make a copy and lose that paragraph.

Actually, 100 pounds is about 160USD, and a colour license is 112
pounds (about $180. USD). A B&W license is 37.50 pounds, and you can
listen to the radio for free. For that, you get reasonably good
quality TV programming (and GREAT radio programming) with no
commercials.

On the other hand, the hassle that you get if you don't pay for a TV
license, even if you don't have a TV, is excessive.

IIRC it's closer to $175. Still a fair amount of money.

That said, I know people who spend $100 *every month* for the privilege of watching TV.

Myself, I spent the $100 putting up a decent antenna & tell Charter Cable where to go with their chunk of RG-6<grin>.

Larry,

I received an email from Carlin, AB6WQ, stating that had sent to 3B9FR by regular mail and got a card back in 2 weeks. He suggested using Air Mail enevelopes so that it does not look like something from the USA. He went on to say "make it Stealthy". I replyed to him and asked his meaning of "Stealthy" but no reply as of yet. Perhaps you know.

My other problem was not receiving a card from EP3SMH. He suggested sending this registered. I emailed EP3SMH in order to be sure I am in his log before spending the money for registered mail, but have received no reply.

Steve, KF2TI, is also having problems with EP3SMH mail and I will email him when I have some info. If you have any other suggestions, please let me know.

I run an ICOM 746.

If I operate on 14150.000 kHZ USB then my transmitted USB spectrum
extends to approximately 14152.800 kHz.

My LSB is suppressed 50 dB, page 84 of the 746 manual, so I'm running
LSB QRP with a bandwidth extending to approximately 14147.2 kHz.

For example; If my USB is S9, my LSB is S1 AND IT'S OUT OF BAND!!!

Because you can't guarantee that your radio is good enough to insure that there isn't any emission below the band edge. So it is unwise to take the risk.

|
|Under the USA regulations, what is the permitted maximum level of
|*any* out-of-band spurious emissions?

From:

http://www.arrl.org/FandES/field/regulations/news/part97/d-305.html#307

(a) No amateur station transmission shall occupy more bandwidth than
necessary for the information rate and emission type being
transmitted, in accordance with good amateur practice.

(b) Emissions resulting from modulation must be confined to the band
or segment available to the control operator. Emissions outside the
necessary bandwidth must not cause splatter or keyclick interference
to operations on adjacent frequencies.

(c) All spurious emissions from a station transmitter must be reduced
to the greatest extent practicable. If any spurious emission,
including chassis or power line radiation, causes harmful interference
to the reception of another radio station, the licensee of the
interfering amateur station is required to take steps to eliminate the
interference, in accordance with good engineering practice.

(d) The mean power of any spurious emission from a station transmitter
or external RF power amplifier transmitting on a frequency below 30
MHz must not exceed 50 mW and must be at least 40 dB below the mean
power of the fundamental emission. For a transmitter of mean power
less than 5 W, the attenuation must be at least 30 dB. A transmitter
built before April 15, 1977, or first marketed before January 1, 1978,
is exempt from this requirement.

353. Is the suppressed sideband a 'Spurious Emission'?

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-21 18:59:13 UTC
From: Dave Shrader <david.shrader@attbi.com>
Message-ID: <3E5676EA.9C148A4F@attbi.com>
Source record: 10887
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.antenna

[Excuse the off topic on the antenna group but it has an active readership and I'm looking for an answer.]

Background: A station is operating in the USA on 14150.00 kHz USB and the suppressed sideband, LSB at -50dBc, is detected with a bandwidth to 14147.2 kHz.

Let me ask a question and hope a legal eagle can answer it!!

Since the values of sideband suppression and spurious emissions are specified differently are they different entities in a legal sense?

Years ago I had a friend receive an 'OO' citation that his signals were out of band. He claims he was operating on 3999.0 LSB. That's correct he was advised, and your suppressed USB signal is out of band!

"Spurious Emission" is defined in Part 2 of the FCC regulations (Frequency Allocations and Radio Treaty Matters; General Rules and Regulations) as:

"Emission on a frequency or frequencies which are outside the necessary bandwidth and the level of which may be reduced without affecting the corresponding transmission of information. Spurious emissions include harmonic emissions, parasitic emissions, intermodulation products and frequency conversion products, but exclude out-of-band emissions."

So "spurious emissions" would presumably include carrier suppression only if the allocated bandwidth included only one sideband. Amateurs are allowed to transmit both sidebands if desired, so the suppressed sideband would be within the allocated bandwidth and by this definition wouldn't be "spurious emission".

Interestingly, a modulation product falling outside the band isn't a "spurious emission" either - it's an "Out-of-band Emission", defined as:

"Emission on a frequency or frequencies immediately outside the necessary bandwidth which results from the modulation process, but excluding spurious emissions."

Fun, huh?

Roy Lewallen, W7EL

Disclaimer: I'm not a lawyer. My interperetations may or may not be correct.

Brother Dave:
Let me make one correction, as an OO., We do not issue citations. We do send advisories to amateurs that they may have a problem, or may be in violation. This is sent to the amateur so he/she may take corrective action. It is not reported to the FCC. It is part of amateurs helping amateurs. While an OO is required to take a test on the regulations prior to appointment, he/she is not an enforcer.

Enforcement is the sole purview of the FCC.

Amateur radio equipment is set to read the sideband frequency not the carrier frequency. The actual carrier frequency of a 3999.0 LSB signal is at 4000.5 (Assuming 1.kHz offset) and the upper sideband above that.

That being said, if I observed no signals above the band edge, I would move on.

Without knowing what the reporting OO observed, I can't comment on why your friend received an OO advisory.

Given that he did receive a notice it is likely the OO had reason to believe he had a problem, and was informing him so corrective action could be taken. Legality dos not enter the picture, as the OO has no legal powers as stated earlier.

If your carrier is at 3.999 MHz and your LSB signal
is lower than that carrier frequency (by definition),
why would you be out of band?

Fred,
I don't know about your radio, but on mine, the
frequency display shows the carrier frequency. If
my display showed 3.999.00 Mhz, my LSB signal would
be out of band. As a matter of fact, I don't think
I've ever seen a commercially made amateur transciever
that didn't display the 'carrier' frequency.

Fred is incorrect and Doc is absolutely correct!

Most, in fact I believe all, commercially manufactured amateur radio SSB transmitters indicate the
transmitted carrier frequency on their readout/dial.

[Yaesu, Icom, Kenwood, JRD, Collins, Heathkit, Hallicrafters, TMC, Swan, Atlas, etc. all do so.]

No way. You can prove that by tuning to WWV, at say 10 MHz, while in SSB
mode. It will tune in at 10.0000 in USB or LSB mode.

Wrong.

Proof: When I tune WWV on my TS-870 at say 15.000 MHz and switch
between LSB & USB the dial still reads 15.00000 and the audio is
perfectly readable.

Since it is a transceiver, the transmitter would be tuned identically,
thus the readout is of the suppressed carrier frequency.

On CW, (with this radio anyway) the frequency displayed is that of the
actual emitted frequency. On rigs that generate CW using an audio
tone into the balanced modulator and don't use software correction,
this would not be the case; the emitted frequency would be the dial
reading +/- the audio frequency.

I hope you're not issuing OO reports using this belief.

My response, while I incorrectly stated "all amateur radio equipment "is incorrect. My statement that if I observed nothing above the band edge I would move on was the operative statement.

The receiver I am using at the moment for casual listening requires the offset (Yupiteru MVT-7100).

Your vitriolic response toward a group of your fellow amateurs ,that serve only to aid you, is somewhat surprising. I am sorry that you feel that way, however nothing I say would sway your opinion. Thank you for your response.

Walt:

You missed Roy's point. BY DEFINITION, from the FCC, out of band emissions are considered differently than spurious emissions. Why make the peculiar distinction? Because rule enforcement is different for the two cases. Spurious emissions are anticipated to be equipment malfunctions, while out-of-band emissions are typically operator malfunctions.

If you disagree with these definitions, contact the FCC at www.fcc.gov/ . I'm sure they would like to hear from you.

At least I was not the only one. I thought I had a solid QSO (my call sign clearly exchanged), but I am not in the log. I have not asked for a card, although I could certainly use one. The frequency was a madhouse and I can see how this can easily happen.

Cecil,
Because the 'normal' SSB signal has a 3 Khz width,
so 3 Khz +3999.0 Khz = 4002Khz. Right? As odd as it
sounds, LSB is on the top side of the carrier (higher
in frequency).

But !! Just like you, they're entitled to their opinion. The value of
that opinion of course lies in the amount of fact contained therein.
Thankfully in OO reports, as in newsgroup postings, we are allowed to
make that determination for ourselves.

Huh? LSB is above the carrier in frequency? It sounds odd because it's
not true.

Roy Lewallen, W7EL

Walt et al,
Tell me if this sounds familiar. You listen to someone talking at 3.850 Khz on LSB. As you increase frequency, you hear that person's voice going higher pitched until you 'loose' him somewhere around 3.853 Khz or so. Isn't that correct? On the other hand, if that person were using USB, then you could go lower in frequency, his voice would go higher pitched, and you'd loose him around 3.847 Khz, right? So you tell me which 'side' of the carrier frequency that USB and LSB is on. Hmmm?
'Doc

PS - Or did 'they' label them wrong on my radio?

Huh? Why do they call it the "lower" sideband if it is
really the "upper" sideband?

Exactly! If you increase the frequency and the person's voice
gets higher, it is getting farther away from the center frequency,
i.e. the voice band frequencies are lower than the center frequency.

I too wish to see the new information at the top of the message!

That said, the definition of USB, as I recall, speaks of a frequency translation, without inversion, of the base band signal. The energy in an USB signal is (mostly) at higher (larger) frequencies than the nominal (perhaps absent) carrier frequency. 73, Mac N8TT

True indeed!

As you know, the several hundred year old theory of the Fourier
Integral/Transform
and/or Fourier Series, provides us with the understanding of USB and LSB.

Fourier frequency analysis of a real time signal f(t) results in a frequency
domain companion view
of a signal expressed as a frequency function F(f), which spans all possible
frequencies of support
for f(t) from negative infinity through zero up to positive infinite
frequency.

For "real" voice signals, the baseband spectrum emitted by the human larynx,
voicebox and mouth
itself intrinsically has both an upper and a lower sideband located in
frequency symetrically about zero
frequency. The LSB is always lower in numerical value than the USB. This
relationship does not
change with modulation.

When viewed in the frequency domain, the "real" human voice signal spectrum
is centered on a "carrier"
frequency of zero [0.0 Hz] Hertz and extends over the "audible" range in the
"positive" frequencies which
is its' Upper Side Band. and also over the "negative" frequencies which is
its' Lower Side Band. [e.g.
baseband voice intrinsically has two sidebands which extends over the
frequency range of say

(-3400 Hz, +3400 Hz) which we simply label as (LSB - 0.0Hz - USB)].

As you pointed out in your post above, when the voice baseband with its' intrinsic [LSB - 0.0 - USB]
frequency structure is modulated upon a sinusoidal carrier of frequency fc, the effect on the spectrum F
is simply translation(s) of the existing spectrum [for a "real" carrier both up and down] which moves or
"slides" the zero [0.0 Hz] center or baseband carrier to the new "center" frequency fc. The relationship
of LSB to USB remains the same. e.g. the voice LSB is always numerically less than or lower than the
USB region when expressed in numerical frequency. Negative frequencies being less than positive ones.

Cecil,
You're right! But which 'side' of the 'center'
frequency are you on, as the voice gets higher
pitched? If you did the same thing on the opposite
side of the 'center' frequency while in the same
mode, the pitch deepens and drops off quite rapidly.
That tells me that the majority of the signal is on
the 'high pitched' side, right? Thank you for proving
my point.

RE: Below

If the statement below the line is true, then SSB gear is made differently now than when I was an active amateur (40+ years ago). If calibrated right, the tx VFO always indicated the frequency of the suppressed carrier.

The RF spectrum containing the active sideband was defined by chosing either USB or LSB at the tx, and the response limits of the sideband filter in the tx.

But in any case that spectrum would have to begin closer than 1kHz to the suppressed carrier if the recovered modulation was have tolerable fidelity. Good mechanical filters got down to within a few hundred hertz of the suppressed carrier, IIRC.

> Our receivers say you are wrong...

The *single* sideband filtering in your high quality LSB/USB receiver can make the situation confusing. Things are being hidden from you and your ears due to the steep filtering of the place where the unwanted sideband would be if it were there (that would otherwise be plainly audible).

The overall 'apperance' of the local spectrum is much more obvious if you use a simple, old, non-sideband filtered, BFO-type shortwave receiver.

Once upon a time, Xmit IF was done at 9 MHz and then converted to various bands. Conversion down inverts the spectrum and turns the 9 MHz USB Xmit IF into Ham Band LSB. Started with minimzing curcuit complexity and then tradition takes it from there.

Back in the good ol' sixties the 9.000 MHz was a nice IF to generate phase canceled carrier suppression signals. A 5.00 MHz local oscillator provides two mixing frequencies. One on 80 meters and the second on 20 meters. The two most popular SSB bands in the 60s.

The down conversion provided LSB and the up conversion provided USB!

Amazing when it works out that way <grin>

Once uppon a time we had 9 mcs carrier generators for ssb. We used surplus ARC-5 aircraft transmitters as a VFO. TWO MOST popular bands were 75 and 20. Subtrace 5 mhz from 9 and there was 75. ADD 5 mhz to 9 and you had 20. The side bands were translated. So there is the rest of the story why 75 was LSB and 20 was USB in general! Sparks W4EAS

And I believe that is true (it was a violation). Reference 97.307(a) and 97.307(b).

97.307(a) No amateur station transmission shall occupy more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice.

So, being SSB, it would be against good amateur practice to transmit a second sideband, albeit at a (hopefully) much reduced level of at least 40 dB.

97.307(b) Emissions resulting from modulation must be confined to the band or segment available to the control operator. Emissions outside the necessary bandwidth must not cause splatter or keyclick interference to operations on adjacent frequencies.

Now, if the operators dial indicated 3.999 MHz, this is the frequency of where the carrier would be if it were not suppressed. So, for example, if the gentleman was speaking into the microphone and had a voice frequency of 1500 Hz, his lower sideband would be at 3.9975 MHz (3.999 MHz - 1500 Hz) and his upper sideband would be at 4.0005 MHz (3.999 MHz + 1500 Hz), clearly "out of band".

Since most modern transceivers have an audio response (mic circuitry) of about 300 to 3000 Hz, I recommend always staying at least 3 KHz away from band edges.

WOW! When did they start making radios that shows the sideband frequency instead of the (suppressed) carrier frequency? Both of my Kenwoods show where the carrier would be (520S - old technology, 690S - new technology). How does your radio calulate where the sideband really is in relation to the carrier? Sideband freqeuncy is determined by carrier frequency + modulation frequency for USB and carrier freqeuncy - modulation freqeuncy for LSB). Therefore, the sideband frequency changes for each persons voice freqeuncies...my bassy voice might have the sideband 800 Hz away from the carrier frequency and my wife's voice may put the sideband 2000 Hz away from the carrier frequency (especially when she's cussing me out).

IIRC, my old TenTec Argosy II with the digital display shows the proper frequency when using the 'proper' sideband, but shows an offset frequency (3kHz ?) when using the 'opposite' (from the usual) sideband. Of course, the digital display in this case was an afterthought to the original design and was also a very 'minimal' design.

> + + +

In principle, the undesired sideband should be "infinitely suppressed". But realistically this is not to be expected. In a good design, 50 to 60 dB of elimination of frequencies that are more than 300 Hz beyond the "suppressed" carrier frequency is a goal for a high quality SSB signal. Many high quality rigs are OK for this.

In addition, a total absence of splatter created by power amplifiers is also not possible. One common problem is the desire to get the absolute max output, in the (mistaken) belief that it somehow helps us to "get through" (it does not). But if these emissions are at least 40 dB (in a 3 kHz band) below the desired sideband (in a 3 kHz band), that should be good enough to satisfy the intention of the regulations.

FCC knows all about "perfection" and does not require it, especially from Amateurs. The ARRL Handbook shows FCC requirements for spurious emissions: it is not necessary to greatly exceed these requirments.

Stations that are allowed to operate, for instance below 14150, should be sure that their upper sideband is 40 dB suppressed above 14150, etc.

Some observers may be a little too nitpicky with respect to both of these requirements. If a station is close to the band edge but is following the guidelines that I am suggesting, that operator is in "reasonable" compliance and should be left alone.

In other words, imperfections are a way of life, and unnecessary harassment is not needed or helpful.

Scott,

To be perfecrly fair, I believe he was thinking of an old 1940s 1950s radio that did not have an SSB position. To listen to upper sideband, you would have switched to CW, tuned slightly above the frequency (not that you could have read the dial that accurately), and then diddled to BFO frequency. BTW every radio I have owned, except one, will cause a pitch change when swithing between SSB and CW. The exception is a Yaesu, where the pitch stays the same, but the displayed frequency changes so that it always displays the carrier frequency - very useful for working cross mode.

> frequencies above 9 MHz?

Because in the "old days" modulation was done at 9 MHz and then mixed up/down
to the desired frequency. Mixing down to 7 or 3.5 or 1.9 caused an inversion
so you got the LSB.

Innit?

397. Index of Newsgroup threads?

> 40 dB.

So who's transmitting a second sideband? As long as the suppressed second sideband meets the 60dB or whatever the hell it is suppression, one is perfectly safe to transmit LSB on 4.000 MHz. Your logic would dictate that no transmitter anywhere in the physical world is allowed to transmit since all real world transmitters emit some sort of a harmonic frequency ("more bandwidth than necessary" per your interpretation). So, according to you, SSB should not be used at all, period. The rule above regulates the *bandwidth*, not the legal frequency range.

> 97.307(b) Emissions resulting from modulation must be confined to the
> band or segment available to the control operator. Emissions outside
> the necessary bandwidth must not cause splatter or keyclick interference
> to operations on adjacent frequencies.

Suppressed sideband does not equal splatter or keyclick. These regulations are intended to regulate and prevent faulty and technically substandard emissions, not technically sound and correct emissions.

> Now, if the operators dial indicated 3.999 MHz, this is the frequency of
> where the carrier would be if it were not suppressed. So, for example,

> MHz - 1500 Hz) and his upper sideband would be at 4.0005 MHz (3.999 MHz
> + 1500 Hz), clearly "out of band".

There is no upper sideband in his transmission, legally speaking, as long as it meets the suppression standard.

> Since most modern transceivers have an audio response (mic circuitry) of
> about 300 to 3000 Hz, I recommend always staying at least 3 KHz away
> from band edges.

How do you feel about harmonic radiation that meets the -60dB standard? After all, if you copy a station at S9+60 on his xmit frequency, you'll copy him S9 on his first harmonic. Should he shut down immediately until he can violate the laws of physics and produce an infinite suppression of the first harmonic?

It sure would be nice if we could GET RID of this disfunctional
tradition, and standardize on one or the other sideband!

My 1000D can remember to select USB or LSB automatically, based
on band, but it CAN'T change the IF Shift automatically from LSB
position to USB position; so I have to do that manually, every time.
What a pain! What about you 756 ProII guys: Can that rig remember
and auto-select a different IF shift for each band, or for USB vs. LSB?

Yeah, I know: We had to adjust EVERYTHING manually on the old
tube sets. And we walked to school in the snow, uphill both ways, etc.

>and you had 20.

Right.

>The side bands were translated.

No, the sidebands remained the *same*

9MHz USB + 5MHz VFO = 14MHz USB

9MHz USB - 5MHz VFO = 4MHz *USB*

If you don't believe that, replace "9MHz USB" with 9.001MHz (the result
of a 1kHz tone input).

To make the sidebands invert, you'd need to have used a 5MHz SSB
generator and a 9MHz VFO - but history didn't happen that way.

The conclusion is that the band/sideband convention was *already* in
place when the 9MHz phasing exciters appeared... so the true history is
even more mysterious.

**

RESCUE RADIO: THE NORTH-EASTER OF 2003

Snow plowing crews struggled to clear roads and airport runways on Tuesday February 18th. This after one of the worst storms in decades buried parts of the United States eastern states in 2 to 4 feet of snow. And in some areas ham radio was called out as we hear in this report:

--
Snowdrifts were piled high from the Ohio Valley to New England, mudslides and floods wreaked havoc in the southern Appalachians, and layers of ice snapped trees and power lines. At least 47 deaths had been blamed on the storm since it charged out of the mid-West Plains states over the previous weekend. Schools were closed from West Virginia to Connecticut and more than 250,000 homes and businesses lost power and telephone service. Enter ham radio.

During the height of the storm on the 17th, two communications emergencies were declared by the Federal Communications Commission in conjunction with the ARRL. The first was in Virginia to protect amateur emergency communications on 3.947 and 7.243 Mhz -- plus or minus 3 Khz. Also included were 145.430 MHz and 146.880 MHz repeaters in Richmond, the 147.360 MHz machine near Chesterfield and the 146.760 Mhz repeater serving Williamsburg at times when each was handling emergency traffic. It was only in effect for a few hours and terminated at 19:00 hours UTC the same day.

The second communications emergency was declared for Kentucky. Former ARRL President George Wilson, W4OYI, lives in the city of Owensboro. He says that his area recieved about 2 inches of glare ice and quite a bit of sleet on top of it.

But the big problem was in Fayetteville near the city of Lexington. Again the problem was mainly ice related and radio amateurs were ordered to keep from using repeaters on 146.760 Mhz, 147.165 and 444.125, MHz unless they were specifically taking part in the handling of emergency traffic

Further to the North, Bob Josuwait, WA3PZO tells ARNewsline™ that Montgomery County in suburban Philadelphia Pennsylvania had about 20 inches of snow. Montgomery County RACES was activated at 1800 on Sunday, February 16 th.

Bob Lees, W3ZQN, is Montgomery County RACES Radio Officer. He reports that members with four wheel drive vehicles were told to help, as possible, by providing transportation for essential hospital and nursing home workers within the county.

The Radio Officer sent an alert via the pagers carried by over 50 members, convened a net on the county two meter repeater and began making phone calls to determine specific needs.
RACES responded or attempted to respond to 17 different requests for transportation services until about 10 P.M. local on February 17th. A total of 21 people were transported by six different drivers in their personal vehicles. Each vehicle was in constant contact with net control by radio as they traveled.

Lees says that six hams acted as net control stations from their homes. Another 14 who did not have four wheel drive vehicles checked into a net called at noon on February 17th. Each operator indicated that they were monitoring and could possibly help in other jobs if requested. In all it was a good job done by RACES and ARES in the face of one of the worst North-Easter’s of the past hundred years.

For the Amateur Radio Newsline, I’m Blair Alper, KA9SEQ.
--

For the region as a whole, it was the worst snowstorm since the blizzard of 1996. In that one at least 80 deaths were blamed on the weather.
(ARNewsline™, ARRL, WA3PZO, W4OYI, VHF Reflector, Repeater Owners Remailer, published news reports.)

**

INTRUDERS: DRUG RUNNERS ALONG THE VK COASTLINE

What appear to be illegal drug runners have taken to the ham bands along the Australian coastline. Q-News Graham Kemp, VK4BB and Chris Wright, VK2UW, have the latest details:

--

“14.044 daily at 08:30 U-S-B are "Big Voice" -- must be thee HQ Stn.. and "Low Voice" Supply Boat ?? On the 23rd January "Big Voice" was joined by another Big Voice -- signal 59+ -- also in the same direction...

The N.T.News carried an article about the "roadside drug distribution points in Western Australia. Maybe these two 'Big Voices' are running the distribution points and the 'smaller Voice' keeps up the supply to the Distributors ??

There was a video report on Darwin TV picturing an 'abandoned' Chinese Fishing Boat along the West Aust. Coast tied up to the Shore. No Crew and No Cargo. And there are some Indonesian Voices 'Hopping' in on the Frequency when it is not in use. Maybe they have a part to play in the business?

If my bearing of 250 degrees and VK6XW bearing of 360 degrees were used, they would cross in the vicinity of Broome.
--

According to Q-News, Australian hams are being encouraged to report anything they hear to the nations Intruder Watch Coordinator. (Q-News)

**

HAM RADIO IN SPACE: JAPAN ARISS CONTACT TO THE ISS

Ham radio contacts with the International Space Station continue. One of the latest took place on Tuesday February 18th when 8N3HES at the Hirano Elementary School in Kobe Japan succeeded in connecting its students with the ISS crew using Amateur Radio curcuits. One of the first questions answered had to do with ecology. How do you dump your garbage in space?

--
CONTACT AUDIO
--

That recording was made by JN1GKZ and you can only hear the I-S-S side of the contact. And some of the questions brought more information than many needed to know like when one student asked: “How do you take a bath in space?

--
CONTACT AUDIO HERE
--

This is the 3rd ARISS School contact with a school in Japan. To see a list of questions and herar all of the answers you only need to take your web browser over to the JN1GKZ website. You will find it at: http://www.qsl.net/jn1gkz/sound/ariss/8n3hes.htm (ARNewsline™ with sound from JN1GKZ))

ENFORCEMENT: PIRATES CANNOT EVER HOLD RADIO LICENSES

Pirate radio operators cannot ever get licenses to operate a legitimate radio station. So says a court of appeals. Amateur Radio Newsline’s Ken Locke, N8PJN, has more:

--

A United States appeals court has upheld as constitutional a law that bans a pirate broadcaster from ever obtaining a license for a low-power FM radio

station. In fact, it bars a current or former pirate broadcaster from even being involved with a station.

In its action, the full court reversed a ruling last year by a three-judge panel of a court that had struck the law down. By a 7 to 1 vote it ruled the law and the government regulations implementing it do not violate free speech rights under the First Amendment.

Back in 2001 Congress mandated that the FCC adopt rules to ban anyone who had been a pirate broadcaster or currently was broadcasting illegally from obtaining a license for a new low-power station. The appeals court appears to have taken this one step further in banning any affiliation bu current or former pirates with a legitimate FCC licensed broadcast operation.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting.

--

Thanks Ken. (FCC)

**

ENFORCEMENT: NO TWO METER SETS FOR HUNTING SEASON

The FCC has written to the manager of a Radio Shack store to warn against selling ham gear to unlicensed persons.

The letter went to Dennis Wilfong who manages the Radio Shack at the Valley point Shopping Center in Elkins West Virginia. In it the FCC says that it has information indicating that numerous individuals are purchasing Amateur radio Service Two-Meter radio units from that store for use during hunting season and the purchasers are using them without the required license.

But thats not all. The FCC says that those purchasing the radios are either not being told that the units require a license, or are being misinformed as to the licensing requirements.

The FCC tells Wilfong that he should advise purchasers of Amateur Radio transmitting equipment that unlicensed radio operation is a violation of Section 301 of the Communications Act. That using the transceivers without first obtaining an Amateur Service license may result in a monetary fine of $7,500 to $10,000. (FCC)

**

ENFORCEMENT: FLORIDA UPGRADE SET ASIDE

John S. Gregory, W3ATE, of Lake Worth Florida has had his General class upgrade set aside. This, based on complaints about the operation of his station on frequencies not authorized by his Technician class license.

According to the FCC, at various times in 2002 Gregory apparently checked into a net on 14.300 Mhz while still a Technician class license holder. He was issued two warning letters but the FCC says that both were returned as unclaimed. (FCC, W5YI Report)

**

ENFORCEMENT: FCC ISSUES A RASH OF FINES

Hams are not the only ones hearing from the FCC. The Commission is continuing to flex its enforcement muscle by issuing a number of monetary forfeitures. Here are some recent examples courtesy of the CGC Communicator:

How about $2,500 to a telephone company for failing to exhibit prescribed tower painting. Or $4,000 to a CATV operator for failing to retransmit the EAS required monthly test.

But those are small in compariason to a $10,000 fine issued to a communications operator for failing to exhibit prescribed obstruction lighting on its antenna structure. Another $10,000 was issued to to an FM pirate while a $15,000 fine was issued to to an AM radio station for failing to maintain operational E-A-S equipment, and for failing to enclose the station's antenna tower within an effective locked fence. The whole story is in cyberspacve at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030204.ht (CGC Communicator)

**

RADIO POLITICS: ARRL TRYING AGAIN WITH SPECTRUM PROTECTION ACT

If at first you don’t succeed, try try again may be an old addage, but it applies in the case of te 2003 Amateur Radio Spectrum Protection Act. This is a bill that has been introduced in the US House of Representatives by Michael Bilirakis of Florida.

According to the ARRL. Bilirakis filed the latest version of the bill, HR 713, on February 12th. It has been referred to the House Committee on Energy and Commerce. Like its predecessor, HR 713 is aimed at ensuring the availability of spectrum to Amateur Radio operators. It would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides equivalent replacement spectrum elsewhere.

The previous version of the Spectrum Protection Act attracted more than 50 cosponsors. An effort will be made to encourage additional House members to sign onto HR 713 as cosponsors. Additional details are on the web at www.arrl.org. (ARRL)

**

RADIO LAW: HAM PETITIONS TO KEEP EQUIPMENT ASALES DATE ON FILE

Dale Reich, K8AD, of Seville Ohio, has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name, address, telephone number and any future information. This, when selling a radio that required licensing under the current FCC rules.

Accordiong to an ARRL bulletin, the information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that any retail vendor would be able to ask local police for an investigation if the retailer suspected the radios were not going to be used in compliance with the

law.

Included in the petition is a requirement for "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was a needed tool for local law enforcement.

The full text of Reich's petitions is available on the FCC Web site. Search for petition number RM-1064. Comments are due no later than February 28th. (K8AD, ARRL Letter)

**

HAM RADIO ENTERTAINMENT: WRTC 2002 VIDEO NOW AVAILABLE IN THE USA

The World Radiosport Team Championship 2002 video had its United States premiere on Wednesday, February 5th. This, before a standing-room-only crowd in Washington state hosted by the Western Washington DX Club.

With photography by James Brooks, 9V1YC, and Dave Bell, W6AQ, the video covers WRTC 2002 from the perspective of a professional sporting event. The show begins with the arrival of competitors from more than 30 countries. It then takes the viewer behind the scenes for the various pre-competition activities and into the actual competition.

The video is available on VHS tape and DVD with extra material on the DVD. You can place your order on-line at http://home1.pacific.net.sg/~jamesb (WRTC)

**

CONVENTIONS AND CONFERENCES: SEVHFS IN HUNTSVILLE IN APRIL

If you have been trying to register on-line for the upcoming Southeastern VHF Society conference and getting a reply of no such website, try again. It will work the way its supposed to.

The problem was caused by an Internet Service Provider outage at the most inoportune time. The repair: Everything was moved to different server but that took a few days to accomplish. And now that its all back up and collecting bits and bytes in cyberspace, you will want to visit www.sevhfs.org for the latest conference update. This includes word that Steve Kostro, N2CEI of Down East Microwave Incorporated will be hosdting a surface mount soldering class on the opening Friday morning of the gathering.

The when and the where? This is the 7th Annual Southeastern VHF Conference. It is slated for April 25th and 26th at the Huntsville Marriott in Huntsville, Alabama. For further information and to register, visit that now up and running website at www.sevhfs.org. (SEVHFS)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our

RESCUE RADIO: THIS IS HDSCS

Last week Amateur Radio Newsline’s Joe Moell, K0OV told you that members of the Hospital Disaster Support Communications System of Orange County, California had been included in a new documentary series on the Discovery Channel. The show is called "Critical Rescue" and it aired on Thursday February 20th and on Saturday February 22nd. But what is the the Hospital Disaster Support Communications System or HDSCS and how does it work? Back with the answers is Joe Moell, K0OV:

--

HDSCS is a specialty group of ARES. It was formed in 1979 with the specific mission of providing backup communications that are critical to patient care. Since then, HDSCS has responded in 75 communications emergencies, ranging from single-hospital telephone system failures to area-wide disasters.

For its service, HDSCS has received awards and commendations from many hospitals and agencies, including FEMA. The most recent is the National Certificate of Merit from ARRL, awarded at the Board of Directors meeting in January 2003.

From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

EMERGING TECHNOLOGY: RC-110 REPEATER CONTROLLER GOES OPEN SOURCE

How would you like to be able to customize a repeater controller your way? Well, according to Ken Arck, AH6LE, There has been considerable interest from folks wanting to customize their RC-110 repeater controllers. So Arck, who is both president and CTO of Arcom Communications says that he has decided to make the source code available to any ham who wishes to take a stab at 'hacking' it for their own use.

Writing to the Repeater Owners Reflector, Arck says that as far as he knows, no other repeater controller offers this open source archecture. Of course there are certain conditions, but they're pretty straightforward.

If you are interested in getting the source code, Arck says that you simply need to join RC-110 mail list. To do this send an e-mail to

rc110-subscribe@yahoogroups.com. The source is available in the files section of the list. More information is at Ken’s website – www.ah6le.net (Repeter Owners Remailer)

**

INTERNATIONAL – UK: REPEATER STOLEN

A repeater in the United Kingdom is off the air due to theft. According to the RSGB, the GB3NC two meter repeater and its site companion the GB3MCB 1296 MHz beacon have not been heard since someone made off with the equipment. Both were co-located in Cornwall and the RSGB says that its not known if either will ever come back on the air. (RSGB)

**

INTERNATIONAL: YUGOSLAVIA: THE NEW NATION OF SERBIA-MONTENEGRO

Yugoslavia has become Serbia-Montenegro. This, after Yugoslavia's parliament voted to formally abolish that nation and replace it with a new country called Serbia-Montenegro.

According to the ARRL Letter, the new arrangement will have little immediate impact on Amateur Radio. For D-X-C-C purposes, Serbia and Montenegro will be considered a single entity, at least for the time being. Also, amateurs there are expected to continue using Y-U and Y-T prefixes. (ARRL)

**

CONTESTING:: UT5UDX ON THE MOVE

Ukrainian international football player Sergei Rebrov, UT5UDX, who moved to England in a multi-million-dollar deal in 2000, has moved again. This time to Turkish side Fenerbahçe.

Word is that Rebrov has signed an 18-month loan deal with the Turkish club on January 28th. The Turkish club now has the right to buy him at the end of the loan period.

Rebrov is a High Frequency contest operator. He and has been very active as M0SDX from his home in the U-K and from other locations in the British Isles over the last two years. He is reportedly now in the process of obtaining a Turkish callsign. (RSGB)

**

DX

In D-X, GB2RS says that a group of Swedish amateurs will be active as JW slash SM0BSO, JW slash SM0LQB and JW slash SM1TDE from Svalbard through the 23rd of March. Activity will be on 160 through 6 meters on CW, SSB, RTTY and other digital modes. Q-S-L this one as directed on the air. (GB2RS)

And F5PAC is returning to Panama from the 23rd of February until the 24th of March. He will also operate from several Islands on the Air groups including

from the 25th to 27th of February. You can fopllow his exploits on the web at www.qsl.net/f5pac (Via e-mail)

**

THAT FINAL ITEM: EXTENDING MORE THAN A WELCOME

And finally this week, the story of a ham radio dream thats about to come true. Its also the story of what Amateur Radio is all about. Bruce Tennant, K6PZW, has the details:

--
Audio story only. Hear it at http://www.arnewsline.org
--

And after that, what else is there to say? (K6PZW)

Some time before technology was clever enough to manufacture 9MHz xtl filters I vaguely remember reading somewhere about why sidebands conventionally switched from LSB to USB somewhere in the HF band. It was something to do with ship-to-shore communications and could have been for similar or related reasons but at lower frequencies. 465 or around 1600 KHz come to mind.

By the way, what is the precise HF transmit frequency at which the LSB/USB switch takes place ?

[snip]

Nope. Negative frequencies are just as "real" as positive frequencies.

Aside from appearing in mathematical notation associated with Fourier and LaPlace,
negative frequencies are used quite extensively in practice. Especially in digital signal
processing systems, but also in analog systems where I have seen them used extensively,
and have often used them myself as well.

Positive frequencies are the frequencies of cisoids [A*exp(jwt)] that rotate counterclockwise
in the complex plane, and negative frequencies are the frequencies of cisoids [A*exp(-jwt)] that
rotate clockwise in the complex plane. ["j" is the "imaginary unit marker" and w = 2*pi*f]

On an oscilloscope to "observe" positive and negative frequencies one has to apply
the real part of the signal to the x-axis [Re (A*exp(jwt)) = A*cos(wt)] and the imaginary part
of the signal [A*sin(wt0 to the y-axis input of the oscilloscope. At sufficiently low frequencies
you can see very clearly the difference between cisoids rotating in opposite directions.

In systems with "one real" signal path, the real signals will be supported over both positive and
negative frequencies as analytic signals where there is a special relationship between the positive
and negative frequencies such that one can be readily known from the other.

The special
relationship is called the Hilbert Integral or Hilbert Transform. Hence
there is no need to calculate
show or display the negative frequencies. However in systems that have
"two" signals paths, one
is named "real" and the other is named "imaginary" even non-analyitic
signals can be supported over
both positive and negative frequency ranges wherein both both negative and
positive frequency
components of the signal have no pre-determined relationship[Hilbert].

In fact filters are often designed to filter out the positive frequencies
from the negative frequencies, etc...
I've got filter design programs here that can real actual filters, either
digital or analog, for which the
filtering is different in the negative frequencies than in the postitive
frequencies, etc...

Been there, done that, designed that, shipped that... customers bought that
from us, in fact
you'r likly using some of that technology even as you type your posts here.
Since your
V. series modem and/or ADSL modem/Cable modem contains circuitry using
positive and
negative frequencies and single sided filters, etc...

Best,

Hi Peter,

So the "short" answer is that you cannot provide me with a negative
frequency source and the bulk of snipped commentary proves it?

All military communications seem to take place on upper sideband regardless of frequency. I have flown a number of air freight trips (oil drilling equipment from Texas to the middle east) and all the HF comms were USB.

The first sideband rig I saw in the Navy was about 1958. It was an RCA set with several channels controlled by crystals. It was located on the bridge and had a large placard to the effect that caution must be observed as it was not secure do to its extended range. I am not sure, but I think it was intended as a replacement for the low power TBS (talk between ships) equipment.

More power was required as convoys no longer steamed in sight of one another when operating with aircraft carriers in anti submarine patrols.

Reg,
For what it's worth, the 'switch' frequency
is usually quoted as 10 Mhz. Or at least that's
what I've seen in print (don't ask where, I don't
remember). Meaning 80 and 40 meters are LSB, bands
above 10 Mhz are USB. That only applies to the
amateur service. Everybody else (almost) uses USB
exclusively. And when you get down to the bottom
of the bottle, who cares?
'Doc

Doc:

It's true that most commercial SSB systems use only
the USB and do not switch from U to L according
to the amateur radio traditions.

However lot's of commercial HF systems operate also
operate with ISB... i.e. Independent Side Band where
they transmit independent information on both sidebands
simultaneously. e.g. TTY on one and voice on the other,
etc...

The receivers in such systems will have dual
sideband filters to separate out the two sidebands
independently instead of merely switching the demodulated
carrier [BFO] between sides of the one filter as in amateur receivers.

Heh, heh... Nope.

I can ship you a negative frequency source next week.

I've got one in my lab right here beside my workstation,
I'm not using it currently.

How do you want it shipped, UPS Ground?

How long do you need it for? I have a consulting job coming
up in a couple of months where I will need it again.

If it's for amateur purposes only I can let you borrow it for free,
you pay the shipping, but if it's for commercial purposes, then it's
$2000 per day rental, you pay shipping.

Need any asymetrical bandpass filters designed? To selectively
separate out negative frequencies from positives. I do this in my
consulting work, and I will do that for you as well but for a price
TBD... commercial applications as per diem $3000/day, or for
royalties if you can convince me of the commercial viability of
your application.

What?

Hi Peter,

I see, yours is the only one in existence then, but that begs the
reciprocal of negative frequency with negative time. Aren't you sure
that you could have sent it LAST week? Uh, belay that last or I will
be getting a bill this week.

And I thought faster than light was quick.

Nope, it was a serious mode. The audio on a DSB signal was inverted so
the BFO had to be tuned either 3+ Khz above or below the transmitted
frequency. There was some logical reason for that but I forget what.

419. CATV Hardline Questions

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-23 21:09:44 UTC
From: Adam Adkins <no@way.com>
Message-ID: <MPG.18c2f495f8e8ae0c98968b@netnews.attbi.com>
Source record: 10703
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Recently I have been trying to use 1/2" CATV hardline to feed my vertical antenna. The cable is a little larger diameter as LMR-400 or any other .405 OD coax. It has a solid center conductor with foam dialectric that is glued to the center conductor. The jacket is aluminum, and there is no PVC outer jacket. The connector was crafted from a PL-259 and a brass double female 1/2" compression fitting. That experience has taught me a couple of things, and raised some questions. If anyone has any helpful comments about the following, I would really appreciate hearing them.

I discovered very quickly how a kink in the cable is a disaster. Thirty feet from the end of a 200 foot run, the cable kinked and the outer metal jacket ruptured. Bleah. How disappointing.
Can anyone tell me good, cheap and durable ways to splice the cable?

Talking to a friend, I mentioned that I didn't plan to bury the cable but for a short run to make sure it isn't run over with the tractor. He asked me, "Wouldn't that change the impedance?" I had to admit that I don't know, but didn't think it would since the jacket is ground anyway.
I could not find the answer to this question anywhere. Can anyone tell me whether buried / not buried will change the impedance of this feed line? Are there advantages to burying the entire run? Are there any wild aluminum eating creatures that nibble holes in hardline?

Finally, does anyone care to share any hard-won experience, or pointers to complete information, or whatever?

Thanks in advance for any help,

73,

Adam Adkins, KM5N

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8 OP UNSUCCESSFUL! Peter, DL3APO, informs OPDX, "We are back from Mauritius - frustrated and very disappointed!" The German team for the 3B8/DK7AO operation was unsuccessful in receiving permission to operate; even with the help of Jacky, 3B8CF. Peters states, "In the cirle of the

permission process, security must have played a main character."

6Y, JAMAICA. Kevin/WN9O and Mike/WO9Z will be active as 6Y5/homecall now through March 9th. They will participate in next weekend's ARRL DX SSB Contest as 6Y8Z. QSL via WO9Z.

8P, BARBADOS. Peter, W0SA, is now active as 8P9NX and is expected to be active until March 6th. Activity will be mainly on RTTY and CW. Over the past weekend, activity was spotted on/around 3517, 10107, 14014 and 14088 kHz after 2030z or 0100z. QSL via W0SA.

9S, DEMOCRATIC REPUBLIC OF THE CONGO. Look for Flo, F5CWU, to be active as 9S1X now through March 10th. He plans to participate in next weekend's ARRL International DX SSB Contest. QSL via F2YT.

A5, BHUTAN. Just a few more days to work Glen, W0GJ, as A51B. He will be going QRT at 0200z, Wednesday, February 26th. He has been very active on RTTY and 80 meters. QSL via W0GJ direct.

BY, CHINA. By special arrangement with the government of the People's Republic of China and the Chinese Radio Sports Association, Rick/AE3C and his 10-year old daughter Barbara/KB3HAS will be operating at various locations in Beijing and northern mainland China between February 23rd March 11th. AE3C will be active on HF, SSB and CW. Also, listen for KB3HAS on HF and CW. Callsigns were not mentioned, but look for them to sign possible BY*/homecall. QSL to their Pittsburgh QTH. ADDED NOTE: Rick states, "We will definitely CQ on the Live-Wire and HFPack freqs if they are available to us, 2300z-0100z. We will also try to set up an Echo-Link station if at all possible while there, especially if 440 is active."

C9, MOZAMBIQUE (IOTA Op). By the time you read ths Reinhard "Rei", DL6DQW, will be finishing up his activity as C98RF from Mocambique Island (AF-088); last day on that island is expect to be February 24th. Rei will move onto Quirimba Island (AF-061), and he will be active between February 25th and March 3rd. QSL via DL6DQW.

CDXA GATHERING. The Carolina DX Association (CDXA) invites all DXers and Contesters to visit their booth at the Charlotte, NC Hamfest, on March 8-9th. Some great forums are lined up for the event. Presenters will be:
* Riley Hollingsworth (K4ZDH), FCC Special Counsel for Amateur Radio Enforcement
* Dave Anderson (K4SV), 2002 ZL7C Chatham Island DXpeditioner
* Bob Heil (K9EID), Presenting a second chapter in "The Science of Audio" as a follow-on to 2002's presentation
* Doug Smith (KF6DX), Speaking on the Ten-Tec Orion , Editor of ARRL QEX/Comm. Quarterly
* Wayne Mills (N7NG), ARRL Membership Services Manager
* Get your QSL cards checked for DXCC and take them home with you. Representatives from ARRL will "check em while U wait".
Then join them for an evening of fellowship at Red Rocks Restaurant, Bar, and Bakery. This is a great opportunity to share stories with fellow DXers;

This is priceless! If you'd like to come, let Bob Burton, CDXA VP know by dropping him a line at: Bob.Burton@McKesson.com

CT3, MADEIRA. Operators Rosel/DL3KWR and Hardy/DL3KWF are to be active as CT3/homecall from Madeira (DIP MA-001), March 6-20th. Their activity will be mainly CW on the WARC bands. QSL via their home callsigns, direct or via the bureau. Bureau QSL requests are available via E-mail at: dl3kwr@darc.de

DXCC NEWS. Bill Moore, NC1L, DXCC Branch Manager, reports the following operations have recently been approved for DXCC credit:
VK0MQI - Macquairie Island, January 1, 2002 through March 15, 2003.
3C2MV - Equatorial Guinea, November 11, 2002 through December 12, 2002.

FY, FRENCH GUIANA. Operators Didier/FY5FY, Marc/F1HAR, Herve/F5HRY, Oliver/F5MZN and Larry/F6FVY will be active in the ARRL International DX SSB Contest (March 1-2nd) as a Multi-Single entry. QSL to FY5KE direct or via the bureau.

GMDX CONVENTION AND DINNER. The GM DX GROUP (Scotland's DX Association) invites you to attend their 6th annual convention/dinner on Saturday, April 26th, at King Robert Hotel, Whins of Milton, Stirling, Scotland. Activities start at 12:30 PM. Some of their programs include the following:
* Contest Station HC8N by Don G3XTT
* Antenna Computer Modelling by Alex G3ZBE
* 9L1AB Sierra Leone by Andy G3AB
* Convention wrap up and Raffle draw
The convention will end with an evening DX Dinner and a visit to the hotel bar. There will be special rates at the hotel, and they suggest you arrange your accommodations as early as possible to avoid disappointment. The King Robert Hotel's telephone number is: 01786 811666
More details can be found on the GMDX Group's Web at: http://www.gmdx.org.uk

IOTA NEWS.....
OOPPPSS DEPT. Two typos in last week's OPDX.599 bulletin. IOTA numbers listed as NA-052 and EU-177 were incorrect. Please change NA-052 to NA-82, and EU-177 to EU-171.

AS-047. (Update) Toru/JI5USJ and Makoto/JI5RPT will be active from Daito Island March 4-11th as JS6QVP and JS6QVQ, respectively, on CW/SSB only. The callsign JI5RPT/6 will be used on RTTY/PSK31 only. Activity will be on 160-6 meters (w/200 watts and 50 watts for RTTY/PK31). Their antennas are: 160-10m DP, 20/15/10m 2 element HB9CV and 17/12m 2 element HB9CV. QSL direct to their home callsign (address in OPDX.593) or via the bureau. QSL JS6QVP via JI5USJ and JS6QVQ via JI5RPT. More information is available at: http://www.aa.alpha-net.ne.jp/ji5rpt/as-047/

OC-092 Operators Ken/G3OCA, Gilbert/4F2KWT and possible other DU
OC-120. operators (Nicky/DU1JXP and Mike/DU1MHX were mentioned) will activate Cuyo Islands (OC-120), March 14-17th. From March 21-25th, they will activate Babuyan Island (OC-092). Two

different sources are reporting different callsigns. Their callsigns from OC-120 will be DX0C or 4D2C and from OC-092 it could be 4D2B. They plan to have two stations on the air. Activity will be on 40/20/15/10 meters CW/SSB and maybe some WARC activity. PLEASE NOTE: QSL via G3OCA, except for Russian stations, whose cards will be handled by UA4SKW. All direct cards received for the 2002 DXpedition were mailed out at the beginning of December 2002.

SA-055. Mariano, LU4EJ, informs OPDX that he will be active from Martin Garcia Island as LU4EJ/D, March 20-22nd. The island is located about 60 km east from Buenos Aires. The equipment will be a Kenwood TS-2000, vertical antenna AV3 with 9 ground planes for 20/15/10 meters and dipoles for 80 and 40 meters. Suggested SSB frequencies are: 3680, 7090, 14200, 21300,28460 and 50110 kHz. QSL via LU4EJ (see Qrz.com) direct or via the bureau.

SA-085. Members of the Atacama Desert DX Group (Operators include Mauricio/CA2WUI, Danilo/XQ1ZW, Nicolas/XQ1IDM, Patricio/CE1URH, Patricio/CE1VLY, Sergio/CE1RQB and Ricardo/CE1FLS) will be active as 3G1P from Pan de Azucar, March 14-17th. Activity will be on 160-6 meters CW/SSB/PSK31/RTTY and possibly SSTV. QSL via XQ1IDM: Nicolas Herrera G., P.O. Box 345, Antofagasta, Chile). A web page (currently under construction) will be available at: http://www.qsl.net/3g1p

J2, DJIBOUTI. Karsten, DL2LAH, is expected to be active from here between the end of February and the beginning of June. Currently his callsign is unknown. His activity will be on the HF bands and 6 meters. QSL via his home callsign. Cards will be answered after his return home.

J3, GRENADA. Look for Harry, AC8G, to be active in the CQWW WPX SSB Contest (March 29-30th) as a Single-Op entry. He has applied for a special callsign, possibly J37K or J3**. Activity outside of the contest will be on March 28th and the 31st between 1500-2300z, on 20/15/10 meters SSB. He will consider requests for 12/17 meters. QSL via AC8G.

MU2, GUERNSEY. Operator Marios/5B4WN (aka G0WWW) and Stavros/5B4AFM (aka M0BBB) will be active in the ARRL International DX SSB Contest (March 1-2nd) as a Multi-Single entry. Activity will be on all bands. QSL via G4EOF.

QSL INFO AND NEWS.....
3G5Q activity was from Quiriquina Island (SA-070 and valid as CHI-025 for the ARLHS Program). QSL via XQ5SM.

5B4/UA9MA was active in last weekend's CQ 160-Meter SSB Contest. The operators were Gena/UA9MA and Mike/RZ9UA. QSL via UA9MA.

9K9X QSLS. Hamad, 9K2HN, reports that more than 1300 9K9X QSL cards were sent out via the bureau and 100 direct requests have been answered during the weekend of February 15th (their "Eid Holiday").

IOCA CHECKPOINT. Emir, 9A6AA (IOCAGroup Manager/IOCA Manager), informs OPDX that the following operator has been appointed as an IOCA checkpoints (The Islands Of Croatia Award):
Eugene, RZ3EC, is appointed as the IOCA checkpoint for Russia.
His E-mail address is: rz3ec@rekom.ru

QSL Manager Jim, PY7XC, reports that all QSLs received up to February 20th for the PV7G operation were all replied to and sent out on February 21st.

PLEASE TAKE NOTICE. QSL Manager Vasil, RW6HS, states: "Every month I receive hundreds of QSLs via the QSL bureau. I will not answer cards sent to me via the bureau. I must pay for all cards coming to me via the QSL bureau. Send direct only. Please notify your DX clubs and your national society and tell your members to QSL to RW6HS direct only with SASE or SAE with postage. IRC must be stamped in the lower LEFT hand box by your post office to be any good for return postage. Russia post offices will not accept IRCs that already bare a stamp on them. They cannot be cashed in for postage in Russia. I shall help you with reception answer-back QSL from Russia and CIS. You much more reduce the post expenses. That your envelope was received by me 100 %. As far as possible send your envelope - registered mail. Send direct ONLY to RW6HS no bureau cards please."

Station signing SU9NC during the ARRL CW DX Contest last weekend was Tom, N9NC. QSL via OM2SA.

The Montreal Amateur Radio Club (VE2ARC) is not the QSL Manager for VC2A cards for the period June 15th to July 15th, 2001. You should have received your cards via the bureau already as they were sent out in August 2001. Contact Radio Amateurs du Quebec Inc. (RAQI) for more information at: RAQI, 4545 Pierre de Coubertin, Case Postale 1000, Succursale "M", Montreal, Quebec, Canada, H1V 3R2

"Family Goiciechea" were expected to be active in this past weekend's 160 Contest. QSL YV4GMB (Maria), YV4GMH (Hector) and YV4GMG (Dario) via their home callsign using the address on QRZ.com.

QSL Manager Steve, OM3JW, reports that the complete log of Mike's, OM2DX, activity as YI1BGD (Jan. 1, 2003 - Feb. 13, 2003) will be on Mike's Web site at: http://www.qsl.net/om2dx

ST, SUDAN. Gerben, PA5NT, states that there is a possibility that he will be active from the Sudan again after March 16th. The latest details and the final announcement will be available via his web site. ADDED NOTE: The ST2X story is now available on Dan's Web site and can also be downloaded in PDF format (as well as the JW0PK story). Dan's Web site is at: http://www.dx.to/

T8, PALAU. Seiji, JH6RTO, will be active as T88FS from March 13-17th. He will operate on 80-6 meters and on CW/SSB/RTTY. He points out that there is wrong QSL information on the Web clusters for both his 2001 and 2002 activities. The correct QSL route is via JH6RTO. His address can be found on the QRZ.com Web site or use: Seiji Fukushima, 1182-2506 Hase,

Atsugi-city 243-0036 Japan.

TI, COSTA RICA. Operators Harry/AC8G, Terry/KA8KUZ, Ron/WA8LOW, Ron/W8ILC, Anthony/VE3RZ and Ed/K1EP will be active as TI5N in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. Their activity will be near San Jose. QSL via W3HNK.

VE1, CANADA (A Contest Operation With A Different Twist!). Dan, K6IF, has announced that he was invited by Jim Fisher, VE1JF, to operate from his station for the upcoming CQWW WPX SSB Contest. The interesting twist about Dan's operation is that he plans to write about it and put it on the Web. He states, "This will be a major expedition for me, since I have never operated in a serious contest from outside California. I've decided to write up this effort in a similar way to my 2000 10 Meter effort - although the content will be quite different. While the 10 Meter story was mostly about planning and constructing the antennas and station; this story will be much more focused on my planning and strategizing for the operation of the contest. I will have the pleasure of operating a very well designed station that needs only a small amount of work to be competitive." If you would like to follow his saga, Dan has posted the first chapter (a short introduction) at: http://www.k6if.com/
He hopes you will enjoy it, and your comments/suggestions are valued.

VP5, TURKS AND CAICOS ISLANDS. David, KY1V, will be active as VP5/KY1V from March 11-18th. He states, "For the hams whom would like more than just a signal report, I will be actively pursuing short, meaningful QSOs from Whitby, North Caicos Island." QSL via KY1V. More information can be found at: http://www.ky1v.com

VP9, BERMUDA (VHF). Jon, N0JK, expects to be active June 13-16th from VP9GE's Tarrafal Apartments. He plans to operate mainly in the June VHF QSO Party as a Single-Op/Low Power entry. His station will be an IC-706 MII w/100 watts, a 5 element M2 on 6 meters and 9 element M2 on 2 meters. He hopes to be active on June 13th during the peak times for Europe and plans to be active during the entire contest period. Tear down will be Monday morning June 16th.

WRTC "FINLAND 2002" VIDEO. Review by Tedd, KB8NW: Let me first say I am not a contester, and from the start I was wondering whether or not I would really enjoy this video. However, as always, James Brooks's, 9Y1YC, videos are truly interesting and have excellent videography. There is only one way to describe this video on the "World Radiosport Team Championship (WRTC) Finland 2002" and that is:
"The world's top contesters battle it out in an Olympic style atmosphere using high tech for scoring and refereeing."
To shorten this, WOW! These guys are serious when it comes to contesting. As the camera moves from shack to shack and from operator to operator, you can see that this 24 hour event is stressful and very competitive. I highly recommend that you add this video to your collection, and I truly believe non-contesters (like myself) will enjoy this video. It is also available on DVD with special extras (rules, operators, scores). More details about the video can be found at:

http://home1.pacific.net.sg/~jamesb/

ZF, CAYMAN ISLAND. Peter, N3GXF, is expected to be active as ZF2HW now through February 28th. Bands of activity are unknown at this time because Peter has a Technician Plus license. QSL via home callsign.

Ian is correct, my memory was wrong. I believe it was that the SSB
signal was generated at 5 MHz and the VFO was at 9 MHz. I may not be
right on the exact frequencies, but the principle is correct and it was
the reason for the USB/high and LSB/low custom.

I have a 1959 ARRL handbook which says crystal filters for SSB generation
can be constructed at frequencies as high as 5 Mc, but gives no
construction details.

Does anyone have some old QSTs or a later handbook who could check?

Not to be negative about your frequency source, but is
it REALLY necessary for you guys to crosspost this bullshit
to the DX newsgroup?

We're all really impressed by your perceived technical
superiority, but not really interested. We just collect
post cards.

In Europe, USB seems to be used for ship-to-shore on all frequencies
down to Top Band; but we had already been using LSB on the low bands for
several years while they were still using AM.

>By the way, what is the precise HF transmit frequency at which the LSB/USB

I had always understood it to be 10MHz.

> Can anyone tell me good, cheap and durable ways to splice the
> cable?

Can't help you there. I've only `slightly` kinked either the 1/2"
or the 3/4" stuff but once each -- and it did not burst and I'm
gonna live with it.

> Talking to a friend, I mentioned that I didn't plan to bury the

Mox nix -- being ground. What you'll get is a smashed tube - with
the outer wall much closer to the inner conductor - giving you
(perhaps many - depending on how active the tractor) impedance `bumps`.

[Oh, now that I've re-read the question: No, burying the hardline
directly, or in-directly will *not* alter the impedance. sri]

> I could not find the answer to this question anywhere. Can anyone
> tell me whether buried / not buried will change the impedance of this

> any wild aluminum eating creatures that nibble holes in hardline?

Without _any_ poly jacket, you need to worry about electrolysis and/or
the PH of the soil. If it were me: I'd bury it in some black poly pipe.
'Twould be a feat to stuff in a looooooong run of it...

> Finally, does anyone care to share any hard-won experience, or
> pointers to complete information, or whatever?

http://www.jonz.net/W3DHJ/catvhardline.html

...but, none of my CATV HardLine comes even close to the ground.
Out thru the basement window -- along the side of the house --
and up inside of a 40' tower.

There are repair kits that techs use to patch open shields. Some
professional version of foil, contact cement & hose clamps. I don't
have any, but I'll check for any sources I know..

428. Building a broadband scanner preamp with filters (also a good excuse to solder)

Newsgroup: rec.radio.amateur.dx
Date: 2003-02-24 04:53:42 UTC

Hello all,
I just picked up a Icom IC-R2 handheld scanner, 25-1300Mhz discone
(http://users.cis.net/kingpop/Superdiscone.htm), 40 feet of Belden
9913 cable and 30 feet of mast(radioshack)to start listening to the
world.

I would like to build my own preamp with several sets of filters
(10-20)to knock out the high power RF (radio,pagers, ect.) I am
thinking of using a minicircuits ERA-3 monolithic amplifier
(http://www.minicircuits.com/dg03-168.pdf) but if someone knows of a
better amp, I'll use it.

My main questions are this:

What frequency bands should I target with the filter sets?
The FCC alocation chart I have shows what is licensed to each band,
but does not mention alotted power.

What software would help me quickly find the component values for the
filters?
The simpler the better!

Would I gain anything from cascading ERA-3s? Could I set them up for
variable gain? or would I have to switch in attenuators to prevent
front end overload?

What type of remote filter switching scheme should I use? I want to be
able to control the preamp from inside the house. I know that relays
tend to be noisy, so those are out. Transitters?

Im sure an RF guru could help me out here.

Thanks for reading,

Jason

That is a huge frequency range and no antenna is going to work well on that entire frequency range. It might be a good idea to split the frequency range into at least two bands, say 25-250 and 130-1300 MHz and use two separate antennas designed for those ranges.

> I would like to build my own preamp with several sets of filters

Those MMICs are cheap, why don't you build a complete preamplifier for each band. Filter switching is nasty at higher frequencies, especially when it must be remotely controlled. You could feed the outputs from the various preamplifiers through some combining filters to a single feed line and only switch the DC supply to the various preamplifiers.

When using multiple amplifiers is the tower, there is not much to gain from a single ultra-wide band antenna. Use multiple antennas designed for each frequency range of interest. Usually there is not much point of using preamplifiers below about 200 MHz, since the band noise is quite high and the cable losses are low.

Stripline filters are nice for the upper UHF frequencies, while at VHF, ordinary coils and capacitors or helical filters (e.g. Toko) are nice.

Those MMICs can be easily overloaded, so make sure that the strong signals from nearby FM or TV transmitters are filtered out prior to running the signal through the ERA amplifier.

>Would I gain anything from cascading ERA-3s? Could I set them up for
>variable gain? or would I have to switch in attenuators to prevent
>front end overload?

The antenna amplifier should only compensate for the feed line loss and mask the receiver noise, so a good rule of thumb is that 10 dB should be added to the cable loss to get the required preamplifier gain. Handheld scanners are very easily overloaded, so there is not much point of using too much gain, even if the input is filtered.

K1B QSL UPDATE/CHANGE. Roman Thomas, RZ3AA (K1B, K5K, 3D2CI etc.), reports,
"I completely understand the problems that many of you are having getting
the SSB K1B QSL cards. I feel bad for each of you who have still not
received your QSL card. Unfortunately the mail situation in my country
certainly has room for improvement. In hindsight it was probably not a good
choice to use a Russian QSL address." Roman explains he processed more than
3000 direct QSL requests that were returned direct and has received more
than 1000 bureau QSL cards that have all been sent back via the bureau.
However, he has received about 300 direct QSL card requests which were
already opened and were missing IRCs or postage money, these have been
answered via the bureau. Also, he has received at least 200 E-mail requests
asking for status on specific cards which never arrived. Roman suspects many
more card requests were lost somewhere in the mail system. To date, Roman
still receives about 20 direct requests per week, all being returned direct.
If you would like to pick up a K1B SSB QSL card in person, Roman will be at
Dayton this year and he is prepared to hand out cards there. Watch for an
announcement. --- OR -- Due to Roman's mail situation a new QSL route has
been announced. If you worked K1B using "SSB ONLY", QSL requests can now be
sent to K4YL (ex-W4SMG) to the following address: Stephen M. Grose, P.O.Box
183, Flat Rock, North Carolina 28731-0183. Please include the following:
Your QSL Card indicating Time in GMT, Date, Band, Mode and Report.
A Self Addressed Envelope (SAE) with all necessary addressing information
(USA send SASE).
One Green Stamp (preferred) or One Large IRC is accepted.
Please make sure the envelope contains the three items shown above. "NO"
Bureau cards will be accepted. Please send Bureau cards via Roman, RZ3AA,
via the Russian Bureau. All cards will be processed in the order they are
received. PLEASE send ONLY SSB cards. Depending on the demand, some delay
might result if additional cards have to be printed. All CW and Digital
requests are to be sent to Hrane, YT1AD. Any questions can be E-mailed to
Stephen, K4YL at: K4YL@Highstream.net

So contact K4YL about your QSO with K1B!!!!

I received my K1B SSB QSL a couple of days ago. The path I used was the WF5E QSL service. He has come through for me several times on cards I have been unable to get by other methods.

And no, I do not have any affiliation or connection with his service other than being a very satisfied customer.

The question is : Do you really need a pre-amplifier ?
Not knowing the frequencies of the high power interfering radio sigs and
whether there are other nearby frequencies you would like to monitor , I
would suggest to initially consider a simple (multiple) quarter wave stub
arrangement , to suppress the most troublesome RF sources.....and
take it from there.

Suggest you use flexible 'alkathene' (polyethylene) water pipe
In Europe (incl Britain) it is available in 20 , 32 mm diameter and larger
sizes
;colour is blue.
I use this pipe also for coax cable with copper braid and black sheathing ,
ie for underground 75 Ohms coax to a TV satellite dish as well as for RG
316 ,50 Ohms coax to a vertical HF antenna.
It is important that the pipe at the outdoors end is properly sealed to
prevent
water running into it.
Alternatively (that's what I have done) where pipe with coax come above
ground outdoors there is a half circle bend resulting in the pipe opening
pointing downwards ,hence rain water can not enter and the circular opening
between pipe and coax cable is left open for breathing.
I realise the latter method might not be suitable for hardline coax because
of the bend's radius.

I can tell you from personal experience (we make thoudsands of them) that
targeting, say, the 152-153 pagers and not also eliminating or radically
reducing signals within many MHZ either side is far from a trivial
problem.
The IP3 levels of the MAR and ERA devices make them unsuitable (IMHO) for
preamp use.
In almost every case, wideband preamps create problems far worse than they
solve. Put a good quality feedline on your antenna and forget the preamps.

You would probably want to block everything below 25 MHz
(scanner is not real HF radio and overloads easily), 87-108 MHz
(FM is very strong and not interesting), 152-153 MHz (unless
you want to decode pagers), 108-116 MHz (AIR beacons)
and maybe 116-136 (unless you want to listen to airplanes).

Start with high-pass 25 MHz filter and FM 87-108 MHz notch.

>

R2 is extremely sensitive. Amplifier will make things much worse
- especially with additional outdoor antenna. Forget the amp and
prepare few attenuators: 6/12/18 dB. You will probably find them
much more usefull.

Good luck!
Piotr

I hate to say this, but hooking a handheld scanner to an outdoor antenna
and then addind a preamp is a BAD idea.

Handheld scanners have poor intermod immunity for several reasons. They
are designed to minimize current draw (which drains the battery). That
precludes the use of high IP3 mixers. They usually do not provide
pre-selector filters either due to space constraints. Basically, they are
meant to be used as handheld radios with a small rubber duck antenna.

A good desktop scanner like the Radio Shack PRO-2004 series incorporates a
series of bandpass filters (about 10 as I recall) in the front end to
reject unwanted frequencies. The appropriate filter is selected as the
radio scans through each programmed frequency.

Phil:

Interesting event to say the least. I understand that if you register your letter to EP3SMH you will receive a reply. I did not understand that you would receive your card the same day. I have sent to him on January 29, 2001 and August 25, 2001 with no reply. I have planned to send one registered, but have waited. I guess that I will do that and hope I am as successful as you. No matter, you got your card.

Jason,
I have two radio shack scanners, an RS-2045 (a base) and RS-64 (a handheld).
The 2045 gets a lot more use at home because it allows attenuation to be individually selected for each channel. Adding a preamp will probably just overload your scanner, especially if you live anywhere but out in the country.
But a cheap test might be to put a TV preamp inline with your discone. The discone doesn't have gain to speak of, and you will lose a little of what you receive on your coax, so something like 10 db of gain might not bother you. You will probably want to switch in the FM filter if it has one. Of course using this set up you won't be able to scan all bands, but it will give you a feeling for how much help a preamp can be in your situation.
If you locate something distant you really want to hear, you might investigate a second antenna such as a log periodic, it has gain, bandwidth and is directional.

Good luck, Jim

First, I assumed the OO noted a possible violation. By that assumption, I assume he has a spectrum analyzer or some visual indication that there was what I'd call significant signal above 4.000 MHz.

Re-read the very first sentence of 97.307(b). It says "Emissions resulting from modulation must be confined to the band or segment available to the control operator." Sidebands ARE emissions resulting from modulation, therefore they had better be In-band.

Who's transmitting a second sideband? Anyone CAN in the USA (DSBSC, AM). Depending on alignment of your rig, YOU may be transmitting a little carrier and the sideband you don't have selected. Granted, they should be down by 40 dB or more, but they are still there. Since they are not spurious emissions, the first sentence of 97.307(b) covers them. It doesn't specify an adequate level of suppression...it says "MUST be confined to the band or segment..."

And the last thing I'll address is the second harmonic. I do not believe the FCC considers that to be a product of modulation. That would fall under the spurious emissions and FCC stated supression levels apply.

Hi Piotr,

I am planning to do exactly the same like you describe above, i.e.
build a High pass filter that filters out anything < 30 MHz and
and in series with that a band reject filter 88-108 MHz (in future
depending on the need maybe even some more filters).

Do you have any experience with this?
I mean: Is it possible to cascade the filters just like that?
At least they should have a 'load' of 50 Ohms at the input and
output. If I would have one filter, it's no problem:
Antenna is 50 Ohm (input) and receiver is 50 Ohms (output).

But what if I want to cascade the filters? I reckon that I need
to put a 50 Ohms resitir in series with the separate filters...
Do you have any plans or schematics?

Cheers,
/Marc

Hi Marc,

I built high-pass 25 MHz filter because I had problems
with MVT9000 in low-VHF band (intermodulation).

After adding this filter between outdoor discone and
the scanner, the problems were gone.

You can find my design on:
http://www.geocities.com/bpiotrek/hpf25_e.html

I haven't try FM notch yet because I want to try building
my own circuit before spending money at store (building
circuits is a part of the hobby for me).

As for cascading the filters: it is possible but the resulting
characteristics will be a bit different than simple superposition
of the characteristics of both filters. I don't know how much
it could affect receiving.

I think it is very good idea to separate both filters with small
attenuator. The primary purpose of the device here is not
attenuating the signal but 'terminating' both filters so they can
work 'normally' (similar approach is very often used, for example,
in antenna amplifiers to suppress the results of variable load
impedance). Simple 3...6 dB attenuator in 'pi' or 'T' configuration
should do the job (50 ohm resistor put in series is not a good
solution because both filters should 'see' 50 ohms and not 50+50).

Cheers,
Piotr

I don't know really, but just as a stabbing guess, I'd say 10 mhz/30
meters. Like one mentioned almost all commercial comms are USB no
matter the freq. IE: aircraft for one example. Only we hams seem to
switch. MK

Tain't all that bad. Just use a large enough pipe and don't forget to
get some "wire soap" which is available at most electrical supply
stores. The ugly looking yellow soap makes the cable slippery and
allows pulling far more through a pipe or conduit that seems possible.
You just slop the stuff on, don't use sparingly.
I had two 350 foot runs plus a smaller quasi air core cable and two
runs of 9913.

Then again, at one location where we had dry sandy soil I just buried
the stuff with no extra protection.

>================
>Suggest you use flexible 'alkathene' (polyethylene) water pipe
>In Europe (incl Britain) it is available in 20 , 32 mm diameter and larger
>sizes
>;colour is blue.

My favorite is either the larger sizes of plastic conduit (1/4 inch
wall for mechanical protection and sweep "L"s for corners.

I've also used 5 inch plastic sewer pipe with good results.

>I use this pipe also for coax cable with copper braid and black sheathing ,
>ie for underground 75 Ohms coax to a TV satellite dish as well as for RG

For my two C-band dishes I just bury the cable direct.

>316 ,50 Ohms coax to a vertical HF antenna.
>It is important that the pipe at the outdoors end is properly sealed to
>prevent
>water running into it.

Water was/is the least of my worries. I use a water trap/drain just
before the pipe goes through the basement wall.
The trap is a 45 degree fitting with a cap over the bottom. The cap
has a bunch of 1/8th inch holes drilled in it to allow the water to
drain. The 45 is on the bottom of the pipe and in the sandy backfill
for the basement.

>Alternatively (that's what I have done) where pipe with coax come above
>ground outdoors there is a half circle bend resulting in the pipe opening
>pointing downwards ,hence rain water can not enter and the circular opening
>between pipe and coax cable is left open for breathing.
You don't have problems with varmints, bees and bugs, do you? <:-))
I removed 14 Yellow Jacket nests from the one satellite dish alone
last summer. The things got into the vent for the kitchen range, under
the sewer pipe vent flange, in electrical boxes, In the eaves, in to
soffit, and under the siding near the peak of the roof on the south
end. That particular nest was so large it pulled the siding away from
the house and had to be renailed. I used 14 cans of Wasp and Hornet
killer. As I recall I removed over 40 nests...only got stung4 times.
Three by Yellow Jackest and one by a wasp.

I had a TV tower stacked in the back yard. They built nests in the
legs. The things even built nests in the vertical mast at the top of
my tower, making it more than a little difficult and hazardous to work
on the antennas.

I use a " 20 X 20 Hoffman box" at the end of the pipe.
http://www.rogerhalstead.com/cablebox.htm
The conduit fitting is mounted right on the bottom of the box. All
outside openings are *sealed* with the expanding insulating foam.

NOTE, I am no longer using the 3/4 inch hard line.

Cables come down the tower, form a loop and then enter the box through
a 8 inch long conduit stub. The Yellow Jackets went up the cables and
built a nest in the box., but due to the seal they couldn't get into
the house. Prior to sealing I even had mice crawl up the cables into
the box and then follow the 75 foot run of conduit into the house.

>I realise the latter method might not be suitable for hardline coax because
>of the bend's radius.

Use a Sweep L, or in the case of the flexible plastic pipe, just bend
the whole works over about a 1.5 foot radius. (half meter radius)
If the plastic pipe/tube is a relatively close fit it will help
prevent the aluminum jacket from collapsing. OTOH not much can be
done about the thin jacket on half inch hard line except a wide radius
bend and being very careful..

I'd still seal the outside end, but leave the inside end open. The
thing only needs one end open for breathing and I prefer it not breath
in high humidity and critters.

BTW, the Tower project and station are shown at
http://www.rogerhalstead.com/tower.htm . NOTE, this is a large page
with lots of photos and runs on the order of 2 to 3 megs so unless you
have a fast connection it will take forever to load.

Newgroup members may be interested in hearing how SOTA has progressed over the last year. SOTA is an award that encourages portable amateur radio operation from mountain and hill summits. It started in March 2002 with just England and Wales. Since then there have been well over 500 summits expeditions in the UK from the 50+ activators. Nearly 300 people subscribe to the SOTA mailing list and the award has expanded to encompass Scotland, Isle of Man, Northern Ireland and South Africa. The Republic of Ireland will join on St Patrick's Day and launching SOTA is being explored in Greece, Italy and Germany. Overseas readers may like to consider launching SOTA in their country - we make it easy to do with a proven formula.

You might be forgiven for thinking that it is for mountaineers but in fact the careful choice of summits means anyone can make a start - a vital element of the scheme. Over the past year pretty much all bands and modes have been used for SOTA activations HF/VHF/UHF CW/SSB/FM. It has attracted a growing number of new licencees and has reactivated several older licencees.

From a modest start, here in the UK you can now hear SOTA stations every weekend on at least one band and usually on several. We use an innovative SMS alert system linked to our email reflector that allows activators to inform all the SOTA group members of their activation in near real-time - ensuring a handy mini pile-up as soon as you come on the air.

For the less active, there is a "chaser" section which is growing nicely so there is no excuse for not getting involved.

For the statisticians, here in England no less than 112 out of 178 qualifying summits have been activated - several many times. That's 63% of the total. In Wales about 30% of summits have been activated at least once. In the UK in total 223 unique summits have been activated for SOTA! Not bad for an award that has yet to celebrate its first birthday.

For those of you who chase SWL DX in addition to (or instead of) Ham DX, there is an interesting article in today's WSJ about a Swedish SWL who "discovered" a clandestine radio station operating at 1584 kHz. Calling itself "Radio Tikrit" (Tikrit being Saddam's home town in Iraq), the Swede first heard its broadcasts in early February. The article speculates -- but lacks any confirming evidence -- that the broadcasts are a CIA-operated attempt at disrupting/discrediting/demoralizing the people of Iraq.

References to "radio amateurs", "DX-ers", QSL "cards", the espionage efforts of the world's superpowers, and the eavesdropping/interpretation by the BBC monitoring office are sprinkled throughout the report.

For the Swedish SWL, the article summarizes, the biggest problem is not knowing who to contact for the coveted QSL card! ;-)

Greetings,

This rule seems very backward:
7.8.In a paper log, for each duplicate contact that is claimed for credit, each miscopied call sign or each busted exchange that is removed from the log by HQ, three additional contacts will be deleted as a penalty. In electronic logs, for each duplicate contact that is claimed for credit, each miscopied call sign or each busted exchange that is removed from the log by HQ, one additional contact will be deleted as a penalty.
--
electronic loggers should be held more reliable. So should not 3 QSO's be deducted for electronic and 1 for paper? :)

Regards,
Jim - ku5s

Has anyone received QSL from the /AC4LN operations last summer?
I worked him as YS1/AC4LN and HR2/AC4LN, but still havn't received any
cards.

On the other hand, errors in electronic logs are easier to find. (it's
easier to cross-check an electronic log against other entries) I
suppose it's three times as likely that an error in an electronic log
will be found as that one in a paper log will be found?

Certainly the ARRL would like to encourage that logs be submitted
electronically wherever possible.

I rather doubt that any seriously-contested entries are submitted on
paper these days anyway. Indeed, in most countries/states I doubt it's
possible to make a competitive entry without a computer.

Hi,

> On the other hand, errors in electronic logs are easier to find. (it's
> easier to cross-check an electronic log against other entries)

That's sort of the point. <G> So the errors should be penalized more.

> suppose it's three times as likely that an error in an electronic log
> will be found as that one in a paper log will be found?

Agreed. You are right of course.

My K1B card also came today. It had one more contact than I had in my log. I must have worked them on the first day but because of all the QRM didn't log it as I didn't think it had been a complete QSO. But I worked them again on the next day, and 4 more times on other bands.

Thanks guys, for the country and the new QSL route.

>> outer metal jacket ruptured. Bleah. How disappointing.

The outer jacket is very thin on 1/2 inch.

>> Can anyone tell me good, cheap and durable ways to splice the
>> cable?

Two brass compression fittings and one UHF brass barrel connector.
You may (will) have to smooth down the threads to fit inside the
compression fittings. That's where having a lathe is nice, but a file
will do. Just make sure the finished surface is both smooth and
ROUND. You may have to add a bit of solder to the center conductors
of the 1/2 inch to get a tight fit inside the barell connector..

THEN, go down to your local electrical contracting store and pick up
some "flooded" heat shrink tubing. The stuff is a bit over one inch
inside diameter (unshrunk). It will shrink down tight on RG-8, so
it'll do the same with the connector and hard line.

The heat shrink tubing comes in four foot lengths at about $9 or so
"as I recall". Cut a piece long enough to extend about two to three
inches beyond the splice on each side. Slide this over one of the
pieces of coax *before* making the splice. After the splice is
completed, slide the heat shrink into place and then using a heat gun,
start at the middle and work out, shrinking the stuff tight enough to
see the shape of the connectors.

If done right you will see the flooding material (hot glue) squeeze
out both ends and all the way around. Just let it set...Don't stick
your finger in it as that stuff is *hot* and it won't let go. Please
don't ask how I know.<sigh>

It will if he doesn't bury it deep enough <:-))
One Tractor tire, or even car can make a big difference, particularly
if it's spinning..

>'Twould be a feat to stuff in a looooooong run of it...

It's actually not all that bad...Use lots of wire pulling soap..The
ugly yellow stuff that comes in a pressurized can...sliperier than
snot on a door knob.

One person can do it, but it's safer (for the coax) if you can get two
of three. You need to get the pipe out straight, so it might have to
spend a day or two in the warm sun getting straightened a bit at a
time.

You need to be careful getting the coax out of the roll and
straightened before going into the pipe. It's real easy to pull a bit
too much coax while forgetting to watch the roll. As you've found,
that stuff kinks easily. That's where the extra help comes in handy.

>
>> Finally, does anyone care to share any hard-won experience, or

>
> http://www.jonz.net/W3DHJ/catvhardline.html
>

The only thing I'd change with the 3/4 inch is using brass compression fittings and UHF barrel connectors.
http://www.rogerhalstead.com/conn.htm Moisture is not usually a problem in the 3/4 inch as it can't migrate even if it does get in at the connector, so a good weather proofing of the connection should do the job. You can use adapters for N connectors.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/February, through Sunday, 2nd/March there were 238 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T31, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

6W, SENEGAL. John, F5VHQ (ex-OE5TGL), will be active as 6W/F5VHQ between April 19th and May 1st. Activity will be on 40-10 meters SSB. QSL via

F5VHQ.

8P, BARBADOS. Winston Seeney, 8P9BX (VE3WFS), informs OPDX that he attended a meeting of the Radio Society of Barbados and was told a QRP DX team is scheduled to operate on the Atlantic coast, on March 15th, and is scheduled to go on the air at 1400z. They will operate on CW and SSB on the lower ends of the bands from 40-10 meters.

9N, NEPAL. Dov Gavish, 4Z4DX, will be active as 9N7DX starting April 22nd for 4 weeks. Activity is expected to be on 160-6 meters CW and the digital modes. QSL via 4Z4DX. His Web site is at: http://www.qsl.net/4z4dx

A4, OMAN. Alex, YO9HP, will once again be active as A45WD. He leaves for Oman today (Monday, March 3rd) and is expected to be active around the 5th or 6th of March. His length of stay is not known (possibly two weeks). Look for him on 80-10 meters including the WARC Bands on CW/SSB. QSL via bureau or YO9HP: Alex Panoiu, Pleasa - Prahova, RO-2038 ROMANIA ADDED NOTE: Alex would like to thank all stations who sent direct QSL (with SASE) or a bureau QSL. He has managed to reply to 99% of the direct cards before his trip back to Oman. Also, bureau QSLs are almost done, and he will drop the last batch via the A4 bureau. They normally send the cards out every 3-4 months.

BU2, TAIWAN. Mark Kawasaki, JJ1TBB, was happy to inform OPDX that he has received permission from the Taiwan Authority to operate as BU2/JJ1TBB from Taipei. He states "BU" is a very new prefix for Taiwan. His activity will be mainly CW/SSB on 40-10 meters. He was heard this past week on 21262 kHz around 0200z. Mark's work assignment is expected to keep him in Taiwan for 3-4 years. QSL via JL1ANP. ADDED NOTE: Mark may be known for his operations from Singapore as 9V1AN (1995-96), and Christmas Island as VK9XB (1996), Vietnam as XV2A (1991) and possibly from some others locations.

BW4, TAIWAN. Art, UA3VCS, states there is a minor change in his callsign for the upcoming Russian DX Contest (March 15-16th) and the CQ WPX SSB Contest (March 29-30th). He will not sign BW3/UA3VCS as first announced, but he will sign BW4/UA3VCS. Art also mentioned that he will be a Single-Op/ Single Band (10m)/Low Power entry for the CQ WPX SSB Contest (and also a Single-Op/All Band/Low Power entry for the WPX CW Contest). QSL via the CBA (preferred) or bureau (it may take more than a year and a half to reply for the QSLs received via bureau).

CB5, CHILE (Attention Prefix Hunters). Ferdi, XQ5SM (SCDXG member), will put the CB5 prefix on the air for the first time during the CQWW WPX SSB Contest (March 29-30th). Look for him to be active in the contest as CB5A as a Single-Op/All Band/Low Power entry. QSL via XQ5SM.

DAYTON HAMVENTION EVENT. Tim, K3LR, reports that the North Coast Contesters are pleased to announce: The 11th Annual Dayton Contest Dinner (Tickets are on sale NOW). Master of Ceremonies is Tim Duffy, K3LR. The 2003 Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director and CQ Contest Hall of Fame member, Bob Cox, K3EST. They

are honored to have Rich Strand, KL7RA, as their dinner speaker. The dinner will be held on Saturday night, May 17th, at 6:30 PM: Cash bar opens at 5:30 PM. The event will be located at the Crowne Plaza Hotel (Official Contest Hotel), 5th and Jefferson Streets (Next to the Convention Center), Dayton (Downtown), Ohio in the VAN CLEVE BALLROOM. Menu: Prime Rib of Beef, Potato, vegetables, rolls, chocolate fudge cake, choice of beverage, coffee, tea or iced tea (* Vegetarian menu available by request at the dinner). Price is 31.00 USD per person. SEATING IS LIMITED TO 300, SO ORDER YOUR TICKETS EARLY. Seating is random and is not reserved. Tables are set in rounds or 8. All dinner ticket orders are handled exclusively by Craig Clark, K1QX at: Radioware and Radio Bookstore, PO Box 209, Rindge, NH 03461
http://www.radio-ware.com
You can place your order by calling: Monday through Friday from 10 AM to 6 PM eastern USA time. 1-800-457-7373
1-603-899-6957 for International
or by FAX 1-603-899-6826 24 hours
You can also E-MAIL your orders to: jcclark@prexar.com
Visa, Mastercard, American Express. Sorry no COD orders. E-MAILs must include charge card + number, callsign and return address information. Tickets will be sent via First Class US Mail no later than May 7, 2003. Please allow plenty of time for your tickets to arrive before you leave for Dayton. Radioware and Radio Bookstore is not responsible for tickets lost in the mail. Special thanks to Craig Clark, K1QX and Radioware - Radio Bookstore for once again handling the tickets. Deadline for ticket orders is May 6, 2003. NO EXCEPTIONS There will be no tickets at the door. Many contest operators from around the world will attend this event. If you enjoy radio contesting, you do not want to miss this dinner. They expect a quick sell out. Order your tickets early!

IOTA NEWS.....
AS-084. Club members of Pyoungteak DX Club (PDXC) will be active from the Chuja Island Group between March 18th and March 24th.
The operators who will activate this Korean island, which has been silent for 5 years, are: Han/DS2GOO, Son/DS3HWS, Chae/DS5BSX and Choi/6K2CLF. The operators will sign as homecall/4 and use their club callsign D90HE/4. Activity will be on 80-10 meters (all bands) SSB/RTTY with 100w transceivers.
QSLs for DS2GOO/4 and D90HE/4 are via DS2GOO, and the others are via their homecall. More detailed information and their schedule will be available at:
http://myhome.naver.com/dxer2han/as084/
A log search and various pictures will be available after their return.

AS-079. Takeshi "Take", JI3DST, will be active as JI3DST/6 from Miyako Island (Miyako-jima Hirara-City Okinawa-ken) as follows:
March 20th (0700z) to March 23rd (0000z)
April 26th (0700z) to May 5th (0000z)
Activity will be on 40/17/15/12/10/6 meters SSB. He will listen for DX stations on 6 meters (especially AF and SA).
QSL only via the Bureau.

EU-004. Christian, DL6KAC, will be active as EA6/DL6KAC from Mallorca Island (DIE: E-021), starting March 11th through April 10th. This will be a holiday style operation with activity on 40-10 meters (maybe 80m) mainly on SSB, but with some RTTY and/or PSK31. Using 350 watts, his antennas will be dipoles, maybe an Inverted L for 80m. QSL via the DARC Bureau or direct (using the QRZ.com address).

NA-144. Tom, WA6WPG, is expected to be active next weekend (March 8-9th) from Anacapa Island (USI CA-002S) as WA6WPG/p. His operation will last for 26 hours with activity on 40-10 meters. QSL via his home callsign.

SA-085. UPDATE TO OPDX.600. Marco, CE6TBN, informs OPDX that he will be joining the 3G1P team on the Pan de Azucar Island DXpedition to take place March 14-17th. QSL via XQ1IDM.

JW, SVALBARD. Francois, F8DVD, will once again be active from Spitzbergen Island (EU-026, WAZ 40). He will stay from April 20-24th, in Longyearbyen (Grid JQ78TF), the main city of Spitzbergen. Look for him as JW/F8DVD on 80-10 meters SSB. QSL via his home callsign either via the bureau or direct (SASE+postage).

KH6, HAWAII. Csaba Gal, DH7KU (HA7XQ), will be active from here as KH6/DH7KU during his spare time between March 9-15th. His main purpose for being here is to install different types of equipment at Caltech Submillimeter Observatory (CSO) at Manua Kea, but he hopes to be active in the evenings enough to make a few contacts. He will be using a Kenwood TS-50 into a multiband dipole or a 3 band GP.

KH6, HAWAII. Marty, K2PLF, is now active as KH6/K2PLF until March 14th from Sea Q Maui (OC-019, USI HI-018S, Maui County, Hawaii). He was heard in this past weekend's contest, but plans to concentrate over the next two weeks on the WARC bands and the lower bands.

LIGHTHOUSE ACTIVITY (From Germany).....
Look for DL4OK/p to be active July 15-29th, which includes the IOTA Contest from Pellworm Island. Reference numbers are: IOTA EU-042, German Island Award N-023, German Lighthouse Nr. 40 and ARLHS-LH FED 187. Activity will be on all bands CW/SSB. QSL via their homecall/bureau.

Operators DH7AX, DH1LA and DL2VFR are going to Hiddensee Island from May 29th through June 1st. Activity will include the 1st German Island and Lighthouse Weekend. Island reference numbers are: IOTA EU-057 and German Island Award O-005. Two lighthouses will be activated:
Dornbusch - German Lighthouse Nr. 17 and ARLHS FED-026
Gellen - German Lighthouse Nr. 22 and ARLHS FED-088
Activity will be on 80-10 meters CW/SSB. QSL via their homecall/bureau.

MD4, ISLE OF MAN. Operators G0HSS, G3NKC, G4MJS, G4XUM and M0BEW will be active as MD4K in the CQWW WPX SSB Contest (March 29-30th) as a Multi-???? entry. QSL via G3NKC.

MJ, JERSEY. Pete/K8PT and Craig/K3PLV will be off to the Channel Island of Jersey (IOTA EU-013) again and will be operational from March 19-24th. Their callsigns will be MJ/K8PT and MJ/K3PLV. They will be operating SSB/CW/RTTY on all bands with concentration on the lower bands including 160 meters. Pete states, "Ham radio is our priority." QSL is via their home calls. Direct QSLs are preferred, but bureau cards will be answered as time permits.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about March 4th to April 3rd. His callsign will be MM0LEO, and he plans to be in the CQWPX SSB Contest. Leo will use an Icom 706 (100 watts), an R-5 vertical [10, 12, 15, 17, 20 meters], and a 40-meter dipole in a delta configuration. Leo provided us with the following reference numbers: CQ Zone 14, ITU Zone 27, Grid Square IO-74ku, IOTA EU-005 [Great Britain] and Worked All Britain [WAB] Square NW-95. QSL via W3LEO.

OY, FAROE ISLANDS. Rob, PA5ET, informed OPDX that he was pleased to announce that Ronald/PA3EWP, Dick/PA3FQA and himself (all members of the Low Land DX-pedition Team) will activate these islands between March 24th and April 3rd. Activity will be on all HF bands 160-10 meters CW, SSB, RTTY, PSK31 and some SSTV. (UPDATE: Just before going to print, Rob informs OPDX that Tom/GM4FDM and Bill/AK0A have decided to join the team, so now there are 5 operators. Since Mr. RTTY [AK0A] is joining the team, we can expect a lot of RTTY especially on the WARC bands.) They will have two stations on around the clock. Equipment will be: 2 FT-1000MPs with 2 Alpha Amplifiers, 2 Quads antennas for 30-10 meters, a vertical for 40 meters and the Titanex V80e and V160e for 80 and 160 meters. They have requested local callsigns, but currently have not been informed of them. So for now, they will use OY/homecall. The group would like to use the requested local callsigns for 80/160 meter and for the WPX SSB Contest (the last weekend in March in which they will participate). All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. It is not likely that they will have on-line logs unless it is easy to get an Internet account. However, they are currently investigating the uses of a InterNet Cafe or local hams to upload their information on a daily basis. For more update-to-date information, please the LLDXT Web site at: http://www.qsl.net/lldxt

QSL INFO AND NEWS.....
INTERESTING QSL TOOL. Bill, W9OL, in Chicago, has provided the DXers with an interesting chart/list on his Web page. This Web page contains info on the amount of IRCs or GSs (Greenstamps) needed to QSL to various countries. The URL is: http://files.billnjudy.com/
Bill states, "Hams in all countries are invited to send me data on the amount of IRCs or GSs needed to return QSL requests from their country." His E-mail address is: w9ol@billnjudy.com

Vitaly, VE6JO, reports that his 3C2MV DXpedition was approved for DXCC credit. QSL cards were designed and ordered mid-February with an estimated delivery of mid-March. He has started to prepare labels for the cards received direct and will proceed with mailing as soon

as he receives the QSLs from the print shop. There is a possibility of a delay at the beginning as he has to go to a construction site (no, not in 3C-land, local site in Alberta) around the end of March to beginning of May. Vitaly states, "DX clubs and individuals that supported this DXpedition and has made some donations will receive my QSLs first with couple of photos. Cards received direct but with not sufficient postage and/or with old and incorrectly stamped IRCs will be returned via the bureau."

Juan Pablo, CE4USW, 3G5Q Webmaster and Team Member, informs OPDX that he has uploaded the 3G5Q log to the Web page at: http://www.qsl.net/3g5q

Ferdi, XQ5SM, SCDXG Chairman, informs OPDX that the following Chilean stations were active during the ARRL DX Phone Contest this past weekend:
CE4Y (CE4FXY) --> 28 MHz - High Power
3G5A (XQ5SM) --> All Band - Low Power
CE3NR (CE3NR & CE4PBB) --> Multi-Single
Please QSL all via the route listed on QRZ.com.

Juan, CO8TW, was active in the ARRL SSB Contest over the past weekend as Single-Op/Single Band (10m)/Low Power 100 watts entry. QSL via IZ8CCW, and the log will be online after the contest at: http://www.qsl.net/co8tw/

EA8BH in the contest over the past weekend was Martti, OH2BH, in the Canary Islands. Martti's equipment for the ARRL SSB Contest was small and light (8.6 lbs!), the Yaesu FT-897. During these turbulent times it is advantageous to have all your equipment hand carried--such rigs are the FT-897 and the FinnFet FF-1001 solid-state kilowatt, all fitting into a small airline hand-carry bag. A special QSL will be available that shows/features this compact approach. QSL via OH2BH. ADDED NOTE: In the announcement for Martti's -EA8BH operation- the following was mentioned: "When returning from AH3D and on the Seattle-Copenhagen leg, all their Samsonite case's locking systems were broken by the actions of the Sea-Tac security people. The checking was done in a secure area at the Seattle airport, and with no access to the luggage keys, they broke into them, resulting in damage and messy re-packing."

FO0/N5XX QSL STATUS. Bob, K8BL, reports that Clark, N5XX (aka FO/N5XX, A35XX, ZK1XXX, ZK2XX, etc.), informed him he is sorry about the delay in sending out QSLs, and he (Clark) hasn't been back to the States yet, so, the QSLs are piling up. Clark understands that there are about 4000 QSLs waiting for him at home. He intends to answer all when he returns home in April. Clark also adds, "No need to send another if you have sent one already. Sorry this is taking so long. But, we're here for the Americas Cup and will do a tour of the South Island after it's over before we come home for the summer."

Operator Alfredo signed HC1HC/QRP in the ARRL PHONE Contest over the past weekend. QSL via NE8Z: Rick Dorsch, P.O. Box 616, Hamburg, MI 48139 USA.

LCRA TO BE DISSOLVED: "My old friend HK3DDD has just informed me that postal rates in Colombia were doubled as of January 1, 2003, and it now costs the equivalent of 2.00 USD to send a letter from Colombia to the USA", Fred, K3ZO reports. "It now costs HJ/HK hams the equivalent of 13 cents per QSL to send outgoing cards through the bureau, but anyway the bureau won't be available any longer because the Colombian IARU-member society LCRA is meeting this Saturday to dissolve itself, since with only 200 paid-up members and 8000.00 USD of debt it feels it can no longer stay in business. Beto says Colombian hams have stopped calling CQ and running stations because they can't afford to handle the consequences economically. Colombian DXers are simply searching and pouncing these days, looking for new countries for themselves".

ATTENTION HK HAMS! Alan, VK4AAR, informs OPDX, "I read with sadness of the imminent closure of the HK buro and the increased postage rates. If there are any HK or HJ amateurs who could use my service as a QSL Manager please ask them to E-mail me. There are no charges and I only need to get their log updates regularly (as E-mail attachments preferably)." His E-mail address is: almee@dodo.com.au
His postal address is: Alan Roocroft, VK4AAR, POB 421, Gatton 4343, Australia.

Bill Horner, VK4FW, reports that the FW8FP QSL cards finally arrived from the print shop on Monday, February 24th. He is currently busy sending QSLs out everyday until finished. However, he states that there were some cards received with no return or insufficent postage..... these will not be answered as Bill does not have any access to the bureau system. QSL via: Bill Horner, PO Box 1343, Maroochydore, 4558, Australia.

K1B QSL REPORT. Dave, K4SV, reports that he has had an overwhelming response to the new QSL SSB route for K1B. All the available K1B QSL cards have been sent out, but he expects a new shipment of cards to arrive any day that will fill the current backlog. He requests to PLEASE be patient. Dave has received "850 QSL requests with about 2500 Band/Mode QSOs". Please send your requests to: Stephen Grose, K4YL (ex W4SMG), P.O. Box 183, Flat Rock, NC 28731-0183. Dave states, "Our goal is to get everyone QSLed for K1B who has not received their cards. It is very unfortunate that some have never received their QSLs after several attempts and many dollars spent. We can not bring back the lost money but we can get you a K1B QSL card. Any small donations will be gratefully accepted towards printing cards, printing supplies and postage. PLEASE REMEMBER: USA send SASE; DX send SAE, with one Green Stamp preferred or one Large IRC accepted. Sorry, only direct QSL requests ONLY. Bureau cards for SSB to RZ3AA and CW/Digital to YT1AD."

QSL Manager Ron, AC7DX, reports that he is now the new manager for both LU1FKR and LT1F (an Argentine Contest station).

QSL LX7I, which was active in this past weekend's ARRL International DX SSB Contest, via LX2AJ.

QSL TO1A via IK2QEI. Operator was Stefano, IK2QEI, in this past weekend's ARRL International DX SSB Contest. He was also activate outside of the contest as FM/IK2QEI.

Vasilij, RW6HS, reports that he is now the QSL Manager for EX2F (ex-UM8FJ, UM8MF and UN7GZ).

The QSL Manager for the VC2A cards (for the period June 15th to July 15th, 2001) should go to Jacques, VE2QK, (also the VE2 incoming QSL Bureau Manager). He also responds to bureau cards. Send QSLs to:
VE2:
c/o J. Dube, VE2QK,
875 St. Severe St.,
Trois-Rivieres, PQ G9A 4G4
Canada

Ken Holdom, ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association, announces that all QSL requests for the highly successfull DXpedition to the Chatham Isalnds, ZL7C, in October 2002, which were received as of Wednesday, February 26th, were answered and despatched through the New Zeraland Post on Friday, February 28th. Please note that this does NOT include cards received via the different QSL Services. These will be mailed out at a later date when time permits. For those of you who did not include sufficient postage OR a return Self Addressed Envelope with your requests, these cards WILL go via the bureau. For those who included other DXpedition cards with your ZL7C requests, these will take a little longer to process and will be mailed out accordingly. Please if possible, avoid sending second requests until after the 1 May 2003. This gives them more time to spend on genuine 1st requests. PLEASE NOTE: OPDX InterNet Subscribers will receive Ken's complete press release as an additional bulletin. Also, Ken, ZL4HU, had arranged to have the ZL7C QSL card (double sided) to be viewed on the Web at: http://www.qsl.net/zl7c/

RARE RUSSIAN DISTRICT. Alex, RW3RN, informs OPDX to tell the readers to look for special station UE3RDA to be active March 8-15th from the rarest district for the Russian District Award (http://rdaward.org). QSL via RW3RN: Alex Kuznetsov, Box 57, Tambov-23, 392023 Russia.

RU9, ASIATIC RUSSIA. Alex, RW3TN, will be active as RU9G in the Russian DX Contest (March 15-16th) as a Single-Op/All Band/CW entry. RDA: KP-06 or KP-07. QSL via RW3TN.

SPECIAL EVENT. Look for special event station ZS03CWC to be active throughout the "Cricket World Cup" until March 23rd. Activity will be on 80-10 meters. QSL via ZS1AU.

SPECIAL WEEKEND EVENT. The GMDX Group (Scotland's DX Association) introduces "Celtic Connections" to encourage activity by all radio amateurs worldwide to contact areas with Celtic origins. This is purely an activity weekend and will enable participants to pursue the Celtic Knot Award Scheme and provide an interest in contacting Celtic areas of the world. The event is to be held on the third weekend in April each year. Reports on activity

are welcome and certificates of participation will be awarded to anyone who submits a report. If sufficient reports are received, the leading participants from the Celtic and the non-Celtic areas will be presented with an engraved commemorative Quaich (a small Scottish drinking cup). The 2003 Weekend will start at 0000z on Saturday, April 19th, and last until 2400z on Sunday, April 20th. For further details, please contact: Mr. Drew Givens, GM3YOR, 5 Langhouse Place, Inverkip, PA16 0EW, Scotland, U.K. or vist the GMDX Group's Web site at: http://www.gmdx.org.uk

TI, COSTA RICA (Correction to OPDX.600). Harry, AC8G, reports he gave out the wrong callsign for one of the operator's in the upcoming fall TI5N operation (during the CQWW DX SSB Contest). The callsign KA8KUZ should have been Brian, KA7KUZ.

TM5/TO5, MARTINIQUE. Al, F5VHJ (aka NH7A), who was active this past weekend as TM5A in the ARRL SSB Contest, will be active again in the CQ WPX Phone Contests (March 29-30th) as Single-Op/All Band entry. Also, Al will be active in the CQWW SSB Contest (October 25-26th) as a Single-Op/All Band entry, but using the callsign TO5A. QSL all three operations via F5VHJ.

VK9X, CHRISTMAS ISLAND (Update to OPDX.597). David, VK2CZ, reports that he has been allocated the callsign VK9XD for the CQWW SSB Contest (October 25-26th). QSL via VK2CZ direct only.

VP6/D, DUCIE ISLAND. Remember, the second DXpedition to Ducie Island will be active possibly next weekend on March 8th or 9th, depending upon seas and weather. The station callsign will be announced shortly before the operation begins (either from DXpedition organizer Kan, JA1BK, or the pilot stations JE2EHP, DJ8NK and WA2MOE). Activity is expected on CW, SSB and RTTY with operations on all HF bands and 6 meters. AO-40 was also mentioned. Please refer to OPDX.595 for more details. QSL via JR2KDN.

YA, AFGHANISTAN. YA1CQ was heard this past week and weekend on 17/12/10 meters. Check 18130 kHz around 1200z, around 24940/24950 kHz after 0630z and again after 0800z, and 28480 kHz after 0730z. QSL via JA1CQT. It has also been reported that Nick, G4KUX, is in the country until April 2004 and is active as YA4F. Most of his activity reported on the clusters has been on 40 and 6 meters. Watch around 7048 kHz after 1930z. QSL via G4KUX.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Amateur Radio Newsline™ Report 1333 – February 28, 2003

Amateur Radio Newsline™ report number 1333 with a release date of Friday, February 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An amazing feat. Alaska to the United Kingdom using one watt on 136 Khz. Find out who did it and how on Amateur Radio Newsline™ report number 1333 coming your way right now.

(Billboard Cart Here)

**

RADIO RECORDS: UK TO ALASKA ON 136 KHZ

Reaching Alaska from the United Kingdom using just one watt ERP is quite a feat for any band, but Laurie Mayhead, G3AQC, has just achieved this on the 136 kHz band. And in doing so he has set a new record. RSGB Newsreader Jeramy Boot, G4NJH, has the story:

--
In the early hours of the 15th of February he transmitted to KL1X in Anchorage, and just before UK dawn at 0615 his callsign was clearly identified. G3AQC was using QRSS - very slow CW - with a 60-second dot period. The distance was 7278 kilometres, a record for one watt ERP on 136kHz.

Last year G3AQC became the first person to cross the Atlantic on the 73kHz band. KL1X is perhaps better known to UK amateurs as Laurence Howell, GM4DMA. Laurence said, "What is more surprising than the distance is that the path is notoriously poor between south-east Alaska, on the east coast of the Pacific, and Europe.

The signal would theoretically go on a great circle route to nearly 80 degrees north, over the northern Canadian Arctic, northern Greenland, east of Iceland, Glasgow, then over the UK to the South Coast - across and through the Auroral oval. There are some thoughts that the actual path might have gone round or even under the Auroral zone as no Auroral Doppler was seen on the received signal."
--

A lot of research and preparation work was carried out by G3NYK, G3LDO, W3EEE and W4DEX. This pre-planning is probably in good part responsible for helping to set this new work 136 kHz record. (GB2RS)

**

ON THE AIR: THE 5 MHZ EXPERIMENT - AN UPDATE

Also from the United Kingdom comes word that progress is being made with the analysis and future direction of the 5 MHz band experiment. This, following a meeting between members of the 5 MHz Working Group and experts from the Rutherford Appleton Laboratory. As a result, work is now under way to convert contact logs to a computer readable form with analysis results by April.

The meeting also looked a the fundamentals of the 5 MHZ experiment and came up with a number of suggestions of ways of improving how it should be conducted in the future. These ideas will require further development and consideration by the full 5 MHZ Experiment Working Group. It is hoped that this experiment and others conducted around the world could eventually lead to a new ham radio band. (RSGB)

**

RADIO RULES: ARRL CONCERNED ON PROPOSED 70CM CHANGES

Back on this side of the Atlantic the ARRL says that its concerned about two FCC proposed actions. Its says that both could negatively affect Amateur Radio and it has made its position known in comments filed to the FCC.

Of the two proposals, the one with greatest impact comes from the National Telecommunications and Information Administration. It would greatly increase the geographical area in New Mexico and western Texas where amateurs in the 70 cm band would be limited to 50 Watts peak envelope power to protect military radiolocation operations.

The ARRL says that there are 67 Amateur repeater in the proposed area. It says that most of these are far beyond line-of-sight paths to any military facilities. So the League has asked the FCC and NTIA to cooperatively evaluate the proposed restrictionton to determine whether it is overly broad. The ARRL adds that weak-signal operations in the region could also affected.

The other propsal comes from the National Weather Service. It wants to deploy wind-profiler radars in the 448 to 450 MHz segment of the 70 centimeter band. Here, the League says that it understands that the National Weather Service would notify ARRL of their locations as selected. The League notes that amateur repeaters are incumbent in the band at this time. It suggests that the National Weather Service select sites that minimize the effect on repeaters in that part of the band. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater system serving all of Eastern Kentucky.

**

ENFORCEMENT: HAM TURNS IN LICENSE FOR RUNNING UNLICENSED BROADCAST STATION

A Berkley Michigan ham radio operator has turned in his ticket after the FCC finds he has operated an unlicensed radio station. The Commission's Daryl Duckworth, NNZ0W, explains:

--
Duckworth: "The Enforcement Bureau has issued a Notice to Thomas Brothers KI8BE, acknowledging the cancellation of his amateur license as a result of a finding by the Detroit office that he operated an unlicensed FM station."
--

The action rescinding Brother's ham radio license is the result of monitoring and direction finding by the Detroit Field Office. It established that Brothers operated an unlicensed FM radio station from his home in 2001. In addition to canceling his current ham radio license the Commission is prohibiting Brothers from applying for a new one until December 5th, 2007. (FCC. RAIN)

**

ENFORCEMENT: STILL MORE FINES

Hams are not the only ones feeling the sting of Uncle Sam. In fact, the FCC is continuing its enforcement activities in all of the services it oversees. Roy Neal, K6DUE, has the details on what they are doing outside of the world of Amateur Radio:

--
The CGC Communicator reports that a$ 5,000 Notice of Apparent Liability -- better known as a fine -- has been issued to an AM radio station. This, for failing to maintain a record of the its efficiency factor that is used to determine its actual operating power. The station was also dinged for operating in excess of 105% of its authorized power,

Another A-M broadcast station has been socked for $10,000. This, for failing to register its antenna structure and failing to maintain a presence at its main studio during its normal business hours.

But the big one -- a fine of $20,000 went to a company for operation of radio transmission equipment without the required Commission authorization. It was also cited for use of a radio frequency device that failed to comply with Commission regulations.

This is just a sample of the non-ham radio enforcement the regulatory agency has been involved with. In all, its been a pretty busy time for the protecxtors of the airwaves at the FCC.

For the Amateur Radio Newsline™, I'm Roy Neal, K6DUE.
--

The details on all of these actions are on the FCC's website. You can read the details at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030206.html (CGC Communicator, FCC)

**

ENFORCEMENT: UK MAN CONVICTED OF SELLING ILLEGAL CCTV GEAR

Meantime, across the Atlantic a British electronics supplier has been convicted of selling Closed Circuit TV transmitters that operated illegally in an amateur radio band. According to Jim Merachen, ZL2BHF, the British might say what he did just isn’t cricket.

--
The United Kingdom’s Radiocommunications Agency says that David Burrows plead guilty on February 10th in Newark Magistrates' Court to two charges of selling non compliant radio apparatus. The prosecution by the Radiocommunications Agency followed a complaint about interference from a licensed U-K radio amateur in May 2002.

The source of the interference was identified as an illegal Closed Circuit TV transmitter installed at a farm in Lincolnshire. The Radiocommunications Agency says that the tranasmitters had been bought from David Burrows's company valled A-E-R-C.

Inspectors searched the company's premises last July. At that time they seized a number of television transmission modules capable of illegal operation on amateur frequencies. The company website had claimed the surveillance equipment was exempt from the need to obtain a U- K licence.

Burrows, of Newark England, was sentenced to serve 60 hours of community service and ordered to pay 300 Pounds in court costs. Also, the equipment seized from Burrows business was ordered forfeitted to the government.

For the Amateur Radio Newsline™, I’m Jim Meachen, ZL2BHF.
--

It appears as if the Radiocommunications Agency may be using the Burrows case to send a message to others thinking of selling similar equipment by calling it ham radio gear. (GB2RS)

**

RADIO LAW: NY STATE HAMS TRY AGAIN TO GET ANTENNA PREEMPTION

For the third year in a row, Amateur Radio antenna legislation has been introduced in the New York Legislature. If approved and signed by Governor George Pataki, it would prevent passage of any zoning ordinance that would prohibit or -- effectively prohibit -- the construction of an antenna support structure by a federally licensed Amateur Radio operator.

But theres more. The ARRL Letter says that municipal ordinances in New York State that impact the placement, screening or height of antenna support structures would have to reasonably accommodate amateur radio antennas and impose the minimum regulation necessary. It would also prohibit municipalities from passing laws or ordinances to restrict antenna support structure height to less than 95 feet above ground level or restrict the number of antenna support structures. The legislation also would require municipalities to adhere to the provisions of PRB-1.

Last year's bill passed in the State Senate but died in the Assembly's Rules Committee. (ARRL)

**

THE WAR AGASINST TERRORIOSM: FREE EMERGENCY NOTIFICATION ALERTS

Even though the government says that it may downgrade the national terrorism alert back to Code Yellow, the Emergency E-mail & Wireless Network says that it is increasing its efforts to encourage everyone to sign up for its free Homeland Security notices. This by e-mail and wireless device. You can sign up for the messaging notifications at www.emergencyemail.org

The Emergency E-mail & Wireless Network is the largest public service notification network and a provider of e-mail notification and wireless messaging services to government, the private sector and non-profit organizations. The organization serves over 3160 local areas in all 50 U. S. States. Its website is located in cyberspace at www.911message.com. (EEWN)

**

THE WAR ON TERROR: THE FIRST RESPONDER

The latest terror alert has law enforcement agencies on guard and preparing for the worst. And after September 11, 2001, emergency crews are better prepared for disasters, thanks to new technology. Amateur Radio Newsline’s Bruce Tennant, K6PZW, tells us about First Responder:

--
One major problem on September 11th 2001 was communications between emergency crews. Most could not talk to one another because they were all using different types of radios, in different services and on different frequencies. In fact, the only group with common communications channels in the days immediately following the 911 terror attacks were the ham radio operators who had their own gear and volunteered to assist.

But that all could soon change thanks to a a new mobile command center built into a Sports UtilityVehicle and dubbed First Responder by its designer Raytheon.

While the exact information on how it works has not been made public, First Responder is designed to allow emergency crews to communicate on the same radio channel anywhere, anytime - even if phone and power lines are down. In addition to normal two-way radios, the design includes satellite phones, a mapping system, hacker-proof computers and infrared cameras. Just about any type of communications you can imagine except for ham radio and C-B.

Raytheon says that it developed First Responder to improve homeland security. It will also soon be equipped to detect biological and chemical agents as well as providing inter-service communications.

For the Amateur Radio Newsline™, I’m bruce Tennant, K6PZW, reporting.
--

According to news reports, the first, First Responder is already in use in the Los Angeles California area, but more of these S-U-V's may soon be seen nationwide. This, thanks to new federal legislation that could release billions of dollars in Homeland Security funding. (Published news reports)

WITH THE HANDI HAMS: A-R-T FOR THE BLIND

A descriptive audio version of the new ARRL video "Amateur Radio Today" will soon be available for the visually impaired from the Handi Hams. According to Pat Tice, WA0TDA, the ARRL has agreed to let the Handi Hamd reproduce a special version of the show in audio for its members with disabilities who cannot use regular video.

Tice says that the audio only version will contain added dialogue to describe the action that would be on-screen in the original version. No date for when this special version of Amateur Radio Today will be available, but you will have to be a Handi Hams member to be eligable to receive a copy. You can join by calling the toll free Hamdi Ham membership line at 1-866-HANDIHAM. For those who perfer numbers, thats 1-866-426-3442. (HandiHams)

COLUMBIA DISASTER: NASA SEEKS HELP FROM SKY WATCHERS

NASA is still seeking help from the American public to supply video and still images of the Space Shuttle Columbia on its return flight to Earth. The agency says that while there has been a great public response, more material will help the investigation of the Columbia accident.

Anyone who may have video or stills of Columbia's entry path are encouraged to send it to investigators. You can mail videotapes to the NASA Johnson Space Center, Mail Code JA17, 2101 NASA Road 1, Houston, Texas 77058. Email digital images to columbiaimages@nasa.gov

NASA adds that videotapes and photos can be returned upon request and the materials will not be released to the media without the submitter's permission. For more information call the Johnson Space Center Emergency Operations Center at area code 281-483-3388. (NASA)

**

VOLUNTEER NEEDED: AMSAT SATELLITE REPORT NEEDS NEW EDITOR

AMSAT says that it s looking for a new Editor for its Weekly Satellite Report. If you are interested in volunteering to help your fellow satellite operators stay abreast of the latest status of the ham-sats, please e-mail n1jez@amsat.org (AMSAT-NA)

**

CONVENTIONS AND HAMFESTS: CHARLESTON W VA IN MARCH

Between 600 and 700 Amateur Radio Operators are expected to gather on Saturday, March 15th, for the 19th Annual Charleston Area Hamfest and Computer Show. The venue for this one is the Coonskin Armory, on Coonskin Drive in Charleston. The event is a giant flea market of new and used amateur radio, computer and related gear.

Representatives of Governor Bob Wise will be present, along with people the Board of Public Works. Also, the states Office of Emergency Services will have their Mobile Command Center on display. And for those want to get into the hobby or upgrade, ham radio testing will be availabe.

The Charleston Area Hamfest, which is open to the public draws attendees from West Virginia, Ohio, and Kentucky. It runs from 9 AM to 3 PM with an entry fee of only $5.00. For more information on the Charleston Hamfest, e-mail n8tmw@arrl.net or call 304-965-5349 during normal business hours Eastern time. (N8TMW)

**

INTERNATIONAL – BAHAMAS: 6 METER BEACON MOVED

On the international scene, Steve Rutlidge reports that his C6AFP beacon is back on the air from grid square FL16. The beacon, which operates on 50. 062 MHz was moved from Great Abaco Island to Green Turtle Cay. The distance is about five miles and the grid square in the same. The beacon is now operating from the home of C6AGN. (VHF Reflector)

**

INTERNATIONAL – FINLAND: BEACON STOLEN

Users of the five-band Northern California D-X Foundation beacon network may have noticed the absence in recent weeks of transmissions from the Finnish OH2B beacon. The reason? The transmitter hass been stolen. The good news -- the beacon is expected to resume transmissions in the European spring. No other transmitters in the word-wide NCDXF beacon string have been affected. (RSGB)

**

INTERNATIONAL - SINGAPORE: NEW FREQUENCIES FOR HAMS

And word that Singapore’s telecommunications regulators have approved several UHF spot frequencies for Amateurs to operate. They are 433.425 , 433.450 and 438.450 MHz, and a maximum of 5 watts effective radiated is permitted. (Q-News)

**

DX

In D-X, Q-News reports that the Air Force has closed down Johnston Island and demolition will start shortly on the remaining buildings. There will be probably DXpeditions to the island later but not under the call of KJ6BZ. The good news is that the history of the Johnston Island Amateur Radio Club will be held in the Air Force archives. (Q-News)

The ARRL DXCC Desk has announced that the VKZ0MQI Macquairie Island operation from January 1, 2002 through March 15, 2003 has been authorized for DXCC credit. Also approved the 3C2MV Equatorial Guinea DXpedition from November 11 through December 12, 2002. (ARRL)

**

THAT FINAL ITEM: HAPPY RETIREMENT TO N6AWE

Before we go, a word of congratulations to Amateur Radio Newsline's own Mert Garlick, N6AWE, on his retirement from Fox Television's KTTV in Los Angeles. Mert started with the station back in October of 1966 when it was still a part of Metromedia. Over the years he has done every job a broadcast engineer can perform at a television station. From manning the transmitter atop Mt. Wilson to microwaving signals back from the scene of a breaking news story to covering the annual Tournament of Roses Parade in Pasadena -- Mert Garlick, N6AWE, has done it all -- and a lot more.

Now its time for him to travel other roads and Mert tells us that retirement will not really slow him down. Instead it will give him a lot more time to pursue his other interests which include genealogy and of coarse Amateur Radio. And you will still be heraring him regularly, right here, on these weekly Amateur Radio Newsline reports.

So before we sign off, please join us in wishing one of the nicest people in ham radio -- Mert Garlick, N6AWE -- many happy and fulfilling years of retirement. And don't be surprised if you run into him more regularly on the air. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. 476. Current DXCC prefixes for some old-time QSOs?

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-06 05:42:49 UTC
From: HarryB <mamdac@hotmail.com>
Message-ID: <tdB9a.38146$zb.11669262@twister.socal.rr.com>
Source record: 10760

Recently reactivated my dxing after more than 2 decades of sparse activity and have entered the modern world with computer-based dx logging software. I have been entering all my old dx QSOs confirmed with QSLs received. I can not figure out the current DXCC prefixes for several of them. Is there a web link that gives that type of info? Can anyone help with the following:

VR1AA - Betio, Gilbert Islands (T30?)
VR1W - British Phoenix Islands
VK9FH - New Britain
KX6GS - Kwajalein, Marshall Islands (V7?)

Thanks,

Harry, N6TE

Yes, Gilbert Islands is today called Western Kiribati [T30]

> VR1W - British Phoenix Islands

Central Kiribati [T31]

> VK9FH - New Britain

This counts as Papua Territory, deleted Sep 15, 1975. If after this
date, it counts as Papua New Guniea [P2].

> KX6GS - Kwajalein, Marshall Islands (V7?)

Correct - [V7]

GM4YXE is not listed but G4YXE is. This could mean that an English ham is operating in Scotland.

My call is GM0VIT. If I was to transmit form England I would have to use G0VIT ; from Wales GW0VIT; - etc.

You'll find G4YXE at qrz.com

Hope this helps.

483. RAC [FLYING HORSE] CALL BOOK

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-07 10:59:09 UTC
From: John <k1xn@arrl.net>
Message-ID: <9Q_9a.22925$Eg6.14956@fe09.atl2.webusenet.com>
Source record: 10767

2003 "FLYING HORSE" CALLBOOK CD-ROMS COMING IN MAY

The RAC Call Book business was sold after the first of the year to the
German group that was producing the CD's for RAC USA. The
German group has named a US distributor and will be producing the
RAC CALL BOOK CD on the same schedule as in the past.

The 2003 SUMMER EDITION of the "Flying Horse" CD-ROM will be available
in mid-MAY.This CD will have over 1.6 million entries, thousands of
new entries, 54,000 QSL Managers, 56,000 E-Mail addresses, bearings
and distance for US calls, maps for each State/VE Province, 6 search
functions, prefix and zone lists, QSL bureaus and latitude/longitude.
You are able to print directly on to your envelope or label.
The NEW features include: selectable program in English, German, Spanish
or French; display ITU and IARU Zone for each call; US and DX data lists
population and other info.

Updates to your information can be made via by using the form on the
call book web site at http://callbook.com/request_update.htm

Still the same GREAT price and same GREAT service from the Golist.

SUMMER RAC CD will sell for $38.50 shipped 1st Class and FREE to aUSA
address.

SPECIAL DISCOUNT: When you renew/or purchase GOWIN, GOLIST-DOS, GODATA
or GODISK, you can also order the current release of the RAC CD Call Book
for only $36.00 with FREE shipping in the USA. The Golist product and RAC
must be ordered together to receive the additional discount on the RAC CD!
INTERNATIONAL Shipping for RAC. The CD can NOT be shipped INSURED.
International shipping will be at the customers risk. I can not replace
the CD if it is damaged in shipping or lost. It will be mailed in a padded
envelope similar to those used to ship the Floppy Disks.
International shipping charges are $5.00 extra.

Use the Web order form to order your Summer RAC Call Book and it will be
shipped
just as soon as it is available. http://golist.net/tord.cfm
or
orders@golist.net

Spiro,

No - at least I don't think so.

The ARRL charts list band allocations by regions, but does not include specific information for each prefix. So, if I wanted to know the specific allocations for Australian phone privileges on 40 meters, where would I find that information? Or how about some of the Central American prefixes like Puerto Rico, or Cuba? Their REAL allocations do not seem to match the broad-stroke regional descriptions provided on the ARRL web site. ((either that or the ops from those locations are operating out of band! ;-)

I was simply asking whether there was a single web site that had compiled that information. Apparently, there is not..

Sorry Fred but I'd take your advisories with a grain of salt. The above
is simply wrong. Transceivers in SSB, AM or FM mode always indicate the
(supressed) carrier frequency.

491. News of 7P8ZZ, A61AJ, and CY0MM ?

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-09 17:49:30 UTC
From: Bill Ogden <wogden@attglobal.net>
Message-ID: <3e6b7ee9_3@news1.prserv.net>
Source record: 10775

Has anyone received a QSL from any of these recently?

I know CY0MM was a very busy operation and they may still be working on the QSL backlog.

I sent the 7P8ZZ card via ZS6WPX --- is there a better way?

The A61AJ cards were sent to N4QB. Is this out of date?

Thanks....

Bill W2WO

492. ARNewsline 1334 - March 7 2003

Newsgroup: rec.radio.amateur.dx

Amateur Radio Newsline™ Report 1334 – March 7, 2003

Amateur Radio Newsline report number 1334 with a release date of Friday, March 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A national ham radio socierty on the brink of faiulure and how ham radio will survive in space while the shuttles are grounded. These stories are first on Amateur Radio Newsline report number 1334 coming your way right now.

(Billboard Cart Here)

INTERNATIONAL: COLOMBIAS NATIONAL AMATEUR RADIO SOCIETY SAVED BY A MIRACLE

Colombia’s national Amateur Radio Society has received a reprieve from extinction. At least a temporary one. We have this in-depth look at what happened and whats being done to save the L-C-R-A.

--

Colombia’s national ham radio society remains on the brink of being dissolved and you may soon hear very few of that nations hams on the air. This, according to Fred Laun, K3ZO in a report that originally appeared in a number of D-X newsletters. The reason? The economy.

According to Laun, his old friend Beto Rojas, HK3DDD, in Bogota informed him that postal rates in Colombia were doubled as of January 1st. That it now costs the equivalent of $2.00 U-S to send a letter to the United States. And as a result Colombian hams would have to pay the equivalent of 13 cents per QSL to send outgoing cards through the bureau.

That 13 cent fee would not be to bad except for the fact that the bureau probably won't be available much longer. This, because the Colombian I-A-R-U member society -- the Liga Colombiana de Radioaficionados -- L-C-R-A -- was to meet on Saturday, March 1st to dissolve itself. The problem is that L-C-R-A membership is down. It now only has 200 paid members. It also had the equivalent of 8000 United States dollars in debt. It’s leaders felt that it could no longer stay in business.

But says Laun, a miracle actually happened. At the meeting one of the members donated $7000 to pay off most of the current debt. So, L-C-R-A will continue to operate as Colombia’s national society for at least the next three months. During that time the leadership will try to figure out what went wrong and see if they can get the organization back on an even keel.

In a note to Amateur Radio Newsline, Laun says that several Colombian hams were apparently moved by the messages they received from around the world and have vowed to try to rescue their almost 70 year old society from the brink of oblivion. Even so, HK3DDD tells Laun that many Colombian hams have stopped calling C-Q and some have even terminated all high frequency operations. This is because they can no longer afford to handle the economic consequences of the demand for QSL cards.

Also says HK3DDD, some Colombian DXers who are still on the air are simply listening, searching and pouncing on rare ones these days. Instead of being the DX, they are selectively looking for new countries for themselves.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP .

--

The bottom line to all of this? H-K prefix hams may soon become very rare on the H-F ands and those whom you work may never be able to QSL. (K3ZO)

**

RADIO RULES: WRC-03 GETS US POSITION

The U. S. Department of State has forwarded several agenda items to Geneva as being this nations opening position at the 2003 World Radiocommunictions Conference. The most important of these relate to International Radio Regulation s-25 and its sub-parts. Included in the initial United States position is rewording S 25 subpart 1 to give member nations more authority to determine the points of communication of the amateur stations it has licensed. The suggested modifuication reads that administrators shall verify the technical and operational qualifications of any person wishing to operate an Amateur station.

The United States is also proposing to eliminate regulation 25.5. This is the rule that mandates Morse Code peoficiency examinations for all candidates for an Amateur license with high frequency operating priveleges. The United States says that its time to remove the Morse testing requirement and leave the decision as whether or not to test for code up to individual I-T-U mermber nations. (W5YI)

**

HAM RADIO IN SPACE: CREW OF 2 TO THE ISS

It will be a two man crew rather than a three man crew on the International Space Station until the U-S Space Shuttle flies again. But ham radio will remain on the air from the I-S-S as the investigation in the Columbia tragedy continues. Amateur Radio Newsline's Roy Neal, K6DUE, has more:

--

NASA'S WORST NIGHTMARE BECAME REALITY WHEN AN ORBITTING SPACE SHUTTLE BLEW UP, KILLING ALL SEVEN ABOARD AND PUTTING UNITED STATES SPACE ACTIVITY OH HOLD FOR AN INDEFINITE FUTURE. NOW, OUT OF THE DEBRIS, INVESTIGATION AND SORROW, NASA HAS BEGUN TO REORGANIZE.

ADMINISTRATOR SEAN O'KEEFE HAS TOLD A CONGRESSIONAL PANEL THAT AN AGREEMENT HAS BEEN REACHED WITH THE INTERNATIONAL PARTNERS. THE INTERNATIONAL SPACE STATION WILL CONTINUE IN ORBIT FOR AT LEAST THE NEXT 18 MONTHS.

THE TWO ASTRONAUTS AND ONE COSMONAUT ON BOARD WILL BE BROUGHT BACK TO EARTH IN LATE APRIL OR EARLY MAY ABOARD THE SOYUZ SPACE SHIP THAT'S DOCKED AT THE STATION. THEY WILL BE REPLACED BY A NEW CREW OF ONLY 2 PEOPLE, ONE ASTRONAUT AND ONE COSMONAUT, PROBABLY ED LU AND YURI MALENCHENKO, WHO ARE NOW IN TRAINING AT RUSSIA'S STAR CITY. THEY WILL KEEP THE STATION OPERATIONAL, EVE N PLAN TO TALK TO ONE OR TWO SCHOOLS ON EARTH EVERY WEEK. FUTURE CREWS WILL COPNSIST OF TWO PEOPLE FOR THE TIME BEING.

RUSSIAN PROGRESS SPACECRAFT WILL BE USED TO FERRY SUPPLIES, SOYUZ WILL CARRY PASSENGERS. ONCE NASA HAS FIGURED OUT WHAT CAUSED THE SHUTTLE COLUMBIA TO DISINTIGRATE, THEY HOPE TO FIX AND FLY THE THREE REMAINING SPACE SHUTTLES. THE BOEING COMPANY HAS BEEN ASKED TO GO TO WORK ON A NEW CARRIER TO AUGMENT THE SHUTTLE FLEET.

RUSSIA HAS AGREED TO ACCELERATE THE DELIVERY OF 2 PROGRESS RE-SUPPLY VEHICLES FOR A TOTAL FLEET OF FOUR THIS YEAR AND FIVE IN 2004 AND THERE IS TALK OF AUGMENTING THE SOYUZ FLEET.

EXISTING HAM RADIO EQUIPMENT ON BOARD SHOULD KEEP THE STATION ON THE AIR. OTHER EQUIPMENT MAY BE SENT UP IF NEEDED. THE SPACE AGENCIES HAVE COMMITED TO STAYING IN SPACE WHILE THEY MAP A FUTURE AND HAM RADIO IS AN INTEGRAL PART OF THAT ORBITING STATION.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE.

--

NASA says that having only two people aboard the I-S-S will help extend supplies while the shuttle fleet remains grounded. (NASA, ARNewsline™)

**

RESCUE RADIO: METRO-COMM AND THE NORTH-EAST BLIZZARD

A follow-up to our recent coverage of the severe weather that has blanketed the North-East in recent weeks. Steve Bromhead, KB2TRZ, reports that the Metro-Comm linked repeater system did yomens duty during last months blizzard.

According to Steve, their Snow Watch Net was activated for 42 consecutive hours handling storm related traffic for 12 counties in New York, New Jersey, Pennsylvania and Delaware. This included 10 formal messages to the National Weather Service office in My. Holly New Jersey.

Steve says that Metro-Comm is a linked repeater system covering Binginghamton, New York to Ocean City, New Jersey. The system has machines on 144, 220, 432, and 1296 MHz as well as a packet BBS. (KB2TRZ)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD8AYE repeater and the Stark County ARES Net -- both serving Canton Ohio.

THE VEC SYSTEM: QPC RELEASES DRAFT GENERAL CLASS SYLLABUS

You have the answers. They have the questions. So says the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

The Q-P-C has just released a draft syllabus for the new Element 3 General class Question Pool. This is the syllabus will be used when developing the new General class question pool that will become effective July 1, 2004.

This draft syllabus is available for download at www.arrl.org/arrlvec/pools.html. The public is invited to comment on this syllabus, as well as to suggest questions for consideration in the next General Pool.

The Question Pool Committe says that all responses must be received prior to July 15, 2003. Please direct your comments to the following people:
Scotty Neustadter, W4WW, Chair QPC email: W4WW@arrl.net
Bart Jahnke, W9JJ, Member QPC email: vec@arrl.org
Fred Maia, W5YI, Member QPC email: w5yi@w5yi.org
John Johnston, W3BE, Member QPC email: johnston.john1@worldnet.att.net (NCVEC)

**

ENFORCEMENT: NO RULES BROKEN

A ham accused of running a telephone call-in program on 75 meters has been cleared of any wrong doing. Amateur Radio Newsline’s Bruce Tennant, K6PZW has good news for one California ham:

--
Back on October 15, 2002, the FCC wrote to James S. Watkins, KI6GU, of Burbank California. This, regarding complaints that his station was involved in a telephone call-in like program on 3.830 MHz on August 16th and 24th.

The complaints alleged that Watkins had operated the call-in show using reverse phone patch. Copies were provided to him and the FCC requested additional information from Watkins in regard to that operation.

Watkins provided the requested information in a response dated last November 12th. Following a thorough review the FCC now says that that there were no violations of Commission rules since licensed operators were in control of the station during all transmissions. As a result the inquiry is closed and no enforcement action is deemed to be necessary.

For the Amateur Radio Newsline, I’m Bruce Tennant, K7PZW, in Los Angeles.

--

The FCC also thanked Watkins for what it termed as his quick reply and his cooperation. (FCC)

**

ENFORCEMENT: WARNING LERTTER FOR ALLEGED KEY-DOWN

A Michigan ham has recieved a Warning Notice from the FCC. This time the letter went to to George Albrecht, N8PGB, of Lansing , and says that the FCC is in posession of information alleging that Albrecht's station was the source of deliberate interference to the W8LCC repeater system on 442.025 Mhz.

The notice says that the interference took the form of unidentified transmissions and keying down to cause sound effects from a link to 52.525 Mhz. In its note the FCC warned all Albrecht of the possibility of fines and revocation proceedings against him if the alleged problems continue. (FCC)

**

ENFORCEMENT: NY CAR SERVICE FINED FOR UNLICENSED OPERATION

International Car Service, Inc. of Brooklyn, New York has been fined $10,000. This, for operating of unlicensed radio transmitters on 33.20 Mhz.

The original forfeiture order was issued on October 22, 2002 by the District Director of the Commission's New York Field Office. International Car Service never filed a response to the N-A-L. Based on the information before the Commission, the fine has been affirmed and International has been ordered to pay. (FCC)

**

ENFORCEMENT: HACKER SENTENCED

A federal judge has ruled that a California man who quit his job to work for a competitor and used his old computer password to snoop on his former employer must pay $21,600 and serve five years probation. The sentence comes after the San Dimas man pleaded guilty in September of 2002 to one count of illegally obtaining information from a protected computer

Until February of last year, the man reportedly worked for a contractor specializing in large retail buildings. After leaving that job to work for a competitor, the man admitted that he used a password to access its computer system more than 20 times. (Published reports)

**

FM AND REPEATERS: REPEATERLINK.ORG WANTS YOU

Hams and repeater owner operators interested in connecting their system to another cirty or another nation now have a new resource. Its in cyberspace at www.repeaterlink.org and once there you will find a growing list of who'se repeater is linked to where and how its being done.

repeaterlink.org is the work of Jim Willmore, KC9BIX. He says over several Internet remailers that his site is unique in that it lets you to search for

repeater systems that connect two different cities together or linked systems that have repeater in a specific city. It also allows hams who own a repeater system to log in and maintain your own system information in real time.

According to Willmore, repeaterLink.org is totally independant and supported by the ham radio community. It does not buy data from the FCC or the ARRL, but rather relies on the architects and engineers who own the repeater networks to register their own systems.

Again, that site is www.repeaterlink.org. If you have any questions about the site, email Jim at kc9bix@repeaterlink.org (KC9BIX)

**

HAM RADIO HONORS: NAB ENGINEERING ACHIEVEMENT AWARD WINNERS ANNOUNCED

The National Association of Broadcasters has honored a ham radio oprtator with one of its two, 2003 Engineering Achievement Awards for Radio and Television.

John Reiser, WQ4L, the retired Senior Broadcast Engineer of the FCC International Bureau, will receive the award for Radio. Robert Eckert, Branch Chief - Electromagnetic Compatibility Division, Technical Analysis Branch of the FCC's Office of Engineering and Technology, will receive the award for TV.

The Engineering Achievement Awards for Radio and Television will be presented at NAB's Technology Luncheon on April 9th. The NAB annual convention takes place April 5 - 10 at the Las Vegas Convention Center. The Amasteur Radio Reception is Wednesday April 9th from 6 to 8 P.M. right next door at the Las Vegas Hilton Hotel. The complete details are in cyberspace at www.nab.org/newsroom/pressrel/n2003/c2603.htm) (CGC)

**

CONVENTIONS AND HAMFESTS: THE ZL TECHNOLOGY CONVENTION

No plans for this springs Easter holiday? Well think down-under as in Hamilton New Zealand because that’s where this years Technology Convention will take place. The dates are April 19th and 20th at the Hamilton Astronomical Society meeting facility.

This years Technology Convention will be hosted by the Hamilton Amateur Radio Club. Plans for the event call for presentations on such subjects as microwave equipment construction, homebrew test equipment, APRS, 10 GHz ATV, plus others state of the art Amateur radio disciplines. And if the weather permits, some viewing of the Southern Hemisphere’s night sky from the facility’s optical telescope may be included.

Want to find out more? You can write to the New Zealand Technology Convention 2003, PO Box 606 Hamilton New Zealand. Or better yet send an e-mail to Gavin Petrie at gavinwp@ihug.co.nz. (NZART)

**

HAMFESTS AND CONVENTIONS: WEAK SIGNAL BANQUET IN DAYTON OHIO

Here in the United States tickets are now on sale for the 11th Weak Signal Banquet slated for on Friday night May 16th in Dayton Ohio. This is one of the largest gatherings of V-H-F weak signal enthusiasts held anywhere in the United States and is timed to coincide with the Dayton Hamvention. Cost is $35 per person and only 125 people can be accommodated. For information and reservation information take your web browser to www.wa8wzg.com and click on Dayton Banquet 2003. (WA8WZG)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

TRAVEL WARNING: DX'ERS ADVISED TO USE CARRY-ON LUGGAGE ONLY

If you are planning a D-Xpedition, you might want to think in terms of smaller being better. This following reports of vandalism to the luggage of a recent DXpedition by none other than those highly trained security folks at Seattle Washington's Sea-Tac Airport. Amateur Radio Newsline's Jim Meachen, ZL2BHF, in Auckland New Zealand reports on what happened to a bunch of DXpedition operators who were headed home:

--
When the D-Xpedition group returning from the recent AH3D operation reached Seattle for their connection to Copenhagen Denmark, all their Samsonite case's locks were been broken by the Sea-Tac Airport security people who just had to take a peek inside. The checking was done in a secure area of the Seattle airport. As most seasoned travelers know, security is supposed to find the passengers to get the keys to luggage that they want to inspect. In this case security simply broke into them, resulting in damage to the luggage and some rather messy repacking.

As a result of this experience, D-X'er Martti Laine, OH2BH, says he will be going hand carried from now on. When he operates the ARRL SSB Contest from the Canary Islands as EA8BH it will be using the new Yaesu FT-897. This is a radio that weighs in at only 8 and 1/2 pounds and can be toted along in the passanger cabin with him.

Laine says that EA8BH will be on the air on all bands using the new Yaesu radio. He adds that the QSL for this operation will feature information on this new, compact DXpedition, approach.

From down-under I'm Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

Several D-X publications quote Laine as saying that during these turbulent times it is advantageous to have all your equipment hand carried. He says that such rigs as the FT-897 and the FinnFet FF-1001 solid-state kilowatt will all fit into a small airline hand-carry bag. Laine adds that if you work him, QSL direct to OH2BH. (OPDX, others)

**

ON THE AIR: CELEBRATING THE FIRST NATIONAL WILDLIFE REFUGE

Meanwhile, closer to home, the Vero Beach Amateur Radio Club as announced a special evebt operation for March 15th and 16th. From 1400 to 2100 UTC both dats the club will operate station W4OT to celebrate the 100th Anniversary of the nation's first National Wildlife Refuge on Pelican Island. Suggested frequencies are 14.290, 21.360 and 28.390 Mhz. If you make contact QSL to P O Box 2082, Vero Beach Florida. The zipcode is 32961. (VBARC)

**

INTERNATIONAL - UK: THE RADIO COMMUNICATIONS FOUNDATION

The Radio Society of Great Britain has announced the launch of the Radio Communications Foundation. As envisioned. the new foundation will be used by the RSGB to channel all its work in the field of education and training. It will support the promotion of amateur radio to a wider audience in the U-K. The Foundation is being registered as a charity and will operate independently of the normal commercial activities of the RSGB. (GB2RS)

**

INTERNATIONAL - GERMANY: NOMINATIONS SOUGHT FOR THE HORKHEIMER PRIZE

The German national ham radio society -- the DARC -- is seeking nominations for the 3003 Horkheimer Prize. The award is named after Rudolf Horkheimer was one of the first radio amateurs in Germany. Its awarded annually by the DARC for contributions to amateur radio, its further development, and the goals of the society.

According to DARC, the prize can be awarded to one or more persons or institutions. Any member of an amateur radio society in the IARU is entitled to field a nomination and self-nominations are also allowed.

The 2003 prize will be awarded during the Ham Radio 2003 fair in Friedrichshafen. Nominations must be submitted by March 31st to DARC, Lindenallee 4, 34225 Baunatal, Germany. (GB2RS)

**

THE WORLD ABOVE 50 MHZ: QSOP PARTY HONOR ROLLS POSTED

Back here in the U-S-A, Tim Marek, K7XC, says over the W6YX VHF Reflector that the V-H-F Q-S-O Party Honor Rolls through September 2002 have been updated and posted to his website. The U-R-L is a bit complex to read, so look for them in the print edition of this week’s Amateur Radio Newsline report. You can find it http://k7xc.tripod.com/VHF_Records/index.html (K7XC)

**

DX

In D-X word that G3TBK, is returning to work in St. Vincent and will be active again as J88DR until the 10th of April. He will be on all bands from 80 through 10 meters. mostly CW. There may also be a possibility of some operation on 160 metres if he can find sufficient space for an antenna. All QSLs go to G3TBK, either via the bureau or direct. (RSGB)

And FO5RK reports that he is planning to be active again from Rapa Island through March 20th. Rapa Island is located in the Australs group, which counts as a separate DXCC entity from French Polynesia. QSL this one as directed on the air. (OPDX)

**

THAT FINAL ITEM: W2NSD ADVISES ON THE WAR ON TERRORISM

And finally this week a word on how to win the War on Terrorism without firing very many shots. It comes in some advice from 73 Magazine's Wayne Green, W2NSD. And as we hear from Blair Alper, KA9SEQ, Green has some rather interesting albeit offbeat ideas -- all using radio:

--

Writing in his March editorial, the prolific W-2-Never-Die quotes a rather strange idea he says comes from Newsmax.com. Its a story recommending that Israel set up narrow passages at every checkpoint with sandbags to absord any explosions. Then use UHF transmitters to detonate any explosives that a terrorist may be trying to sneak in. That says Green would get rid of a lot of suicide bombers in short order.

But Green takes it a lot futher. He suggests that the United States adopt a psychological approach to fighting terrorists. He says that we should set up a series of radio and television broadcasts in the Arabic language. He says that the programs would be made up of psychics supposedly interviewing dead suicide bombers who are screaming that they are roasting in hell and not enjoying the after-life that they were promised. The psychics would also claim that God is furious with them and has put a curse on their families.

Would it work? On this one we won't even venture a guess. But 73's Green does add this comment. He says that it is far better to outsmart enemies than to try to outfight them. It's cheaper, says W2NSD, and that it saves lives.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ.

--

Green also has some advice for the United States military on how not to fight a war with Iraq. That one you really have to read for yourself. You will find that information on page 4 of the March 2003 issue of 73. (73 Magazine)

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

9N, NEPAL. Bjorn "Hugo" Ark, LA5YJ, is once again active as 9N7YJ after a two week break to his home QTH in Vestre-Toten Kommune (county), in a

town called Reinsvoll, located in western part of the area Oppland, South Eastern Norway. Hugo's length of stay in Kathmandu is unknown at this time (possibly through December). He is there on a mission for the U.N. Hugo has a better rig with him this time. He used a Kenwood TS-50 before and is now working with a Yaesu FT897 w/CW Collinsfilter, and 100 watts. He also has trap dipoles made by Rag, LA6FJA, for several bands now. This will allow him to be active on 160/80/40/30/20/17/12 meters. He plans to be active on 160 meters during the weekends. He will not be active on PSK31 or RTTY; however, someone has been active on the Digital modes and this is the work of a Pirate. QSNs show to look for him on 10103 kHz on various times throughout the day (betweeb 1230 and 1830z; even as late as 0030z), 7003 kHz at 1600z and 3503 kHz between 2300-0100z. Hugo will try to get access to a linear which may be availble later. No QSLs via the bureau. QSL only direct with 2 USD/2 Euro or valid IRCs to: Bjorn Hugo Ark, Rute 504- Paulsrud, NO-2840 Reinsvoll, NORWAY.
PLEASE NOTE: Hugo will not answer any QSL requests until he returns home. He has answered some QSL requests (for his activity between November 2002 and February 10th) when he was home during his 2 week break.

A35KB QRT!. Paul Kidd, A35RK, informs OPDX that he hasn't heard Father Kevin Burke, A35KB, on the air for some time, so last week Paul telephoned him. Father Kevin told Paul he is fine and in good health. However, Father Kevin states he is very very busy with his duties as parish priest on the Island of Eua, and is no longer able to operate on the radio. He has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon, and he can no longer respond to QSL requests. Paul states, "So, if you were hoping for a contact with Father Kevin, or if you were hoping to receive his QSL card, then I'm afraid that you are simply out of luck.....he's just too busy to deal with ham radio."

A3, TONGA. Janusz, SP9FIH, informs OPDX that he will be active from here March 19th through April 14th. He does have verbal permission to operate, and his license will be given to him after arrival on the island. Activity will be on 80-10 meters including the WARC Bands on SSB. He will use 100 watts into a HF9V antenna and wire verticals. Janusz states he plans to make 12000 to 15000 QSOs. QSL Manager will be SP9FIH: P.O. Box 480, 44-100 Gliwice, Poland.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation has been approved for DXCC credit:
TT8ZZ - Activity from Chad between September 24, 2002 to November 8, 2002

FM, MARTINIQUE. Joachim Gilbert, FM5FJ, states he will be active in the CQ WPX SSB Contest as a Single-Op/Single Band (15m) entry. QSL via KU9C.

FO/M, MARQUESAS ISLAND (Update to OPDX.597). Silvano, I2YSB, informs OPDX the dates for the DXpedition to the Marquesas are April 25th to May 9th. The details on their schedule can be found on the Web page at:
http://digilander.libero.it/i2ysb
There will be 3 stations active on HF and one on 50 MHz. The beacon on 50105 MHz band will be active every hour and every half hour for 5 minutes.

Their callsign at the moment is still not yet known.

FS & VP2E, SAINT MARTIN AND ANGUILLA. Nigel, G3TXF, is planning to be active from Anguilla (VP2E) using his old callsign of VP2EN from Thursday, March 6th through Wednesday, March 12th. He was expected to be active in this past weekend's RSGB's Commonwealth Contest (March 8-9th) using 100w to a vertical antenna. During the period of Thursday, March 13th through Tuesday, March 18th, Nigel hopes to operate on a number of occasions as FS/G3TXF/p from Tintamarre Island (NA-199). These are likely to be daytime only operations from about 1400-2200z. He will try to "stick to the zeroes" (i.e.: 14030 or 14040, 18080 or 18090, 21030 or 21040, 24900 or 24910 and 28030 or 28040). Both operations will be CW only. QSL via G3TXF. For more details, visit: http://www.G3TXF.com

HB0, LIECHTENSTEIN. Pascal, F5RZJ, will be active from here as HB0/F5RZJ/p, March 15-16th. Activity will be on 80-10 meters CW/SSB. Pascal will be using only 100 watts into a HF6V antenna. QSL via his home callsign. For direct QSLing, use the following address: Pascal Sotty, Grand Champ, F-71130 Chassy, FRANCE.

HH4, HAITI (Update). The HH4 Team Haiti 2003 plans to be active from the Northwest Haiti Christian Mission about 2300z on March 10th. K3VN had to drop from the team due to work commitments, but has been replaced by another Florida DXPedition Group (FDXPG) member, Bob, HH4/K9MDO. The rest of the team is the same: Jan, HH4/K4QD; Bill/W4WX, and William/N2WB. The team plans to try to upload the logs once or twice over the next two weeks. Look for the team as a Multi-Single entry in the BARTG Contest next weekend using HH4/K4QD. Check the Team Haiti website at: http://www.geocities.com/n2wb2003/

HI3, DOMINICAN REPUBLIC. Operators Rafael/HI8ROX, HI3HCE, Carlo/HI3CCP and Teodosio/HI3TEJ will be active as HI3CCP in the CQ WPX SSB Contest (March 29-30th) as a Multi-Op/Single entry. QSL via AD4Z.

IOTA NEWS.....
AF-073. Andy, DJ7IK, informs OPDX that the planned DXpedition (Callsign TS7N) to Kerkennah Island from March 21st to April 1st has been cancelled due to the insecure political situation. Their plans now are to try again at the end of November with participation in the CQWW DX Contest. They will update this information as soon as they receive their license.

AS-043. CANCELLED. Operators Eiji/JQ1SUO, Tatsuhiko/JF1CCH and JA2HMD were expected to sign homecall/1 from Hachijo Island, March 8-9th. However, due to the bad weather airplanes will not fly to the island, so the DXpedition had to be cancelled.

AS-049. Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara Kuchino-shima, starting around 0100z on May 3rd until around 0200z on May 4th. Activity will be on 40/20/17/15/12/10 meters CW only. QSL via the JARL Bureau or direct to his home call.

AS-079. Taka, JR3TVH, will be active once again as JR3TVH/6, from Miyako Island starting around 0900z on May 1st until around 1000z on May 5th. Look for activity on 6, 10, 12, 17 and 20 meters SSB and CW. QSL via home call or the JARL QSL Bureau.

EU-012. Stewart, GM4AFF, will be active as GZ7V from Shetland during the CQWW CW Contest later this year (November 29-30th). For updates, check the Web page at: http://www.gm7v.com

EU-125. Operators Karl/LA8DW (CW) and Lars/OZ1HPS (SSB) plan to activate two islands in the Jylland West Group in the late spring. Both islands are good for the Danish Island Award. Look for them to be active from Fano Island (NS-02) and Mando Island (NS-03) using the special callsign OZ4DI (OZ4 Danish Island).

EU-187. There will be a DXpedition to Gavdos Island from June 1-10th. There was no callsign mentioned or bands/modes of activity. QSL via SV2DGH.

OC-NEW. Tom Marlowe/VK3ZZ, Peter Forbes/VK3QI, Keith Proctor/VK3FT and Jack Bramham/VK3WWW with on-shore "pilot" David McCaulay/ VK3EW will activate Waldegrave Island East (part of the South Australia State West Centre Group) from April 17-22nd. They will be using the special callsign of VI5WCP to celebrate the historical naming of the island by Mathew Flinders during his coastal exploration of March 1802. A special bicentary commemorative QSL card will be prepared to celebrate this historical event. Activity will be on all bands except 160m, both Phone and CW. QSL will be direct to VK3ZZ: P.O. Box 368, Leongatha, Victoria 3953, Australia, with a self-addressed envelope plus sufficient return postage, or, via the bureau. Direct QSL cards notconforming to the above will be returned via the bureau.

OC-142. By the time you read this, Bill Horner, VK4FW, should be active from Fraser Island. He is there to work and fix a communicational link on the island. He will be on the island until Tuesday, March 11th. However, he will be extremely busy but hopes to get a little time in for some radio operations. His activity will be mostly CW. QSL direct only with a greenstamp/IRC to: Bill Horner, PO Box 1343, Maroochydore, 4558 Australia.

OC-242. Operators YB8CR, YB8BHV, YB0KLI, YC8CPV, YB0DPO, YB8HZ, YB8HGM, YB0ECT, YB0LBK and YB0AI will be active from Latondu Island, Takabonerate, South Sulawesi, Indonesia, between March 26-31st. The callsign will be YE8A, and the QSL Manager is YB8BRI. They planned to be active on all HF bands 80-10 meters CW, SSB, SSTV, RTTY, PSK31 and AO-40 Satellite. Also, look for them to participate in the CQ WPX SSB Contest. Please visit their Web site at: http://takabonerate.aerocity.net
If you would like to be a sponsor, please open their proposal

documents on: http://takabonerate.aerocity.net/pdf/english/
Should you have any questions, please do not hesitate to
contact them at: operators@takabonerate.aerocity.net

SA-042. Luc, PY8AZT, informs OPDX that the ZY8C operation had to be rescheduled suddenly from the ARRL SSB Contest week to the CQWW WPX SSB Contest. They had two reasons to reschedule the operation. First, some of the team members had last minute business commitments and their absence would have been missed (because of their modes and skills of importance) for a successful operation. Secondly, their initial schedule was to get there some days before the ARRL SSB Contest and stay a coupled days after to not only work stateside stations but also non-USA stations. However, this was not going to happen. With the new schedule, the team will now be active for 8 days between March 27th and April 3rd. Activity in the contest will be a Multi/Single effort.

OH0, ALAND ISLANDS. Operators Claus/DF8QJ Marvin/DL2VB, Mike/DK6QW, DG1YTF and Reinhard/DL6YFB will be active as OH0/DF8QJ, OH0/DL2VB, OH0/DK6QW, OH0/DG1YTF and OH0/DL6YFB from April 19-25th. Activity will be on 80-2 meters including the WARC bands on CW/SSB/RTTY. QSL via their homecalls.

OOPPPPSSS DEPARTMENT. OPDX forgot to mention under "TM5/TO5, MARTINIQUE." that Al, F5VHJ, who was active as TM5A in last week's ARRL SSB Contest and will also be active in the upcoming CQ WPX Phone Contest, is in France. Actually, the heading should have read: "TM5/TO5, FRANCE AND MARTINIQUE." (Sorry for the confusion.)

OY, FAROE ISLANDS (LLDXT DXpedition Update). Rob, PA5ET, informs OPDX that the team has received confirmation from the Faroer Telecom Department and that the following callsigns can use:
OY7ET operator PA5ET OY7WB operator AK0A
OY7QA operator PA3FQA OY7WP operator PA3EWP
OY7TW operator GM4FDM
OY8PA for 80/160 meters, digital modes and the WPX Contest.
Their activity will take place between March 24th and April 3rd. They will have 3 stations with amps active. One will be dedicated to the digital modes. During their dark periods, they will mainly be active on 80 and 160 meters. Rob states, "You can expect lots of digital mode activity on the WARC bands, so this is your change to fill the OY gaps on all bands and modes." All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. They are currently investigating if they can make use of an Internet Cafe or local Hams to upload the logs on a daily basis. The latest information can be found soon on the LLDXT Web site at: http://www.qsl.net/lldxt

PJ2, NETHERLANDS ANTILLIES. Steve/N8BJQ and Bob/N8NR will be active from Curacao during the CQWW WPX SSB Contest (March 29-30th), as PJ2T and PJ2C, respectively. Both will probably be a Single-Op/Single Band entry (one on 10 meters and the other on 15 meters, depending on the conditions). The

operators will be on vacation there and will arrive on the island late Tuesday, March 25th, so they don't know how much operating they will do outside of the contest. Steve told OPDX, "I hopes to get a little low band and WARC band CW stuff in before the contest. I'm sure Bob will also get on a bit and do likewise." QSL both contest operations via N9AG.

QSL INFO AND NEWS.....
Hamad, 9K2HN, reports that he has uploaded the 9K2USA log to the DX.QSL.NET Web site at: http://dx.qsl.net/cgi-bin/logform.cgi?9k2usa If you have any QSL problem, please let Hamad know. He has just taken over this QSLing job from the previous QSL Manager after getting a lot of complaints. His E-mail address is: dxer@qualitynet.net

Younis, A41MA/p, was active from Suwadi Island (AS-112) over the past week. QSL via the A41 bureau or direct to home callsign: P.O. Box 1470, CPO, 111 Oman. For more information, check the Web page at: http://www.geocities.com/suwadi_island/

CY0MM QSL STATUS. OPDX has been informed that Lali, VE3NE, states, "I have received the first 5,000 cards on March 3rd. Also, the picture and video CD have arrived a couple of days ago. I already mailed the CDs and cards to our sponsors like NCDXF and others. The rest follows very soon. On Sunday afternoon (March 9th), I am expecting Nick/VE3EY, Peter/VE3NWA (He was doing the online LOG), Geo/VE3NZ, Dragan/VE3FF, Yuri/VE3DZ and maybe a couple of others to prepare the return envelopes and cards. I am hoping to answer all the direct cards in a few weeks. Please pass along this info and I hope everybody will be satisfied."

5W0IR, KH8/VK2IR, 3D2IR, J6/VK2IR and 6Y5/VK2IR QSL STATUS. Mario, DJ2MX, informs OPDX that he has finally received all the cards that have been mailed directly to Tommy's address in Australia. Due to moving to Munich (see below), Mario will be replying to these cards in April. CHANGING ADDRESS: Mario states, "I'm currently in process of moving to Munich, which is about 500 km south from here. I hope you will understand that the QSL management has to be put on hold for a few weeks. The new mailing address will be announced as soon as I settle in Munich, but all the mail sent to current address will be forwarded for next 12 months (until April 2004)."

FW8FP QSL STATUS. Bill Horner, VK4FW, reports all QSL cards received as of February 28th are now processed and in the mail.

HJ-HK QSL VOLUNTEER. William, KV4DT, informs OPDX that he is available to be a QSL Manager for any HJ-HK station that needs one. His E-mail address is: kf4wru@arrl.net
His home address is: William Brooks, P.O. Box 309, Drummonds, TN 38023.

Taka, JR3TVH/6, was active from Miyako Island (AS-079) this past weekend (expected to go QRT around 1000z on March 10th). QSL via his home callsign or JARL QSL Bureau.

J7/VP2M QSL STATUS. Rob, PA5ET, reports that he has finally received the "Caribbean Tour 2002" J7/VP2M QSL cards from the printer over the

past weekend. They will do their best to get most of the direct QSLs
in the mail before they start their next OY DXpedition in March (see
OY above). They still need quit a bit of time for their preparations,
so please be patient if you don't get your QSL in the first round
while others got theirs already!

QSL MANAGER ADDRESS CHANGE. Long time QSL Manager Kash, WB2RAJ, has
a new QTH and a new mailing address. Send all QSL requests to:
Dick "KASH" Kashdin, 4591 West Overlook Drive, Williamsville, NY 14221.
WB2RAJ is QSL Manager for EM3W, FK5DX, FK8GM, J39BW, LZ2TU (1992 ONLY),
ST2/G4OJW, ST2AA (up to February 25, 1995), ST0K, UZ3AYR and WB2RAJ/VP9.

Lee, WA7OBH, is now the QSL Manager for the following stations:
MM5PSL, GB2ELH, EI9HQ and EJ9HQ. QSL via the Bureau or direct with
a SASE or SAE and 1.00 USD.

ZY7USA QSL STATUS. Ciro, PY7ZY, informs OPDX that all the cards for
the ZY7USA operation received direct have now been answered as of
March 6th. If you don't receive your QSL within the next 10 days,
please contact Ciro at: py7zy@ig.com.br
You can see a sample of ZY7USA QSL on the following Web site at:
http://www.qsl.net/py7zy/zy7usa.htm

RE-ELECTED OFFICERS FOR 2003. Members of the Northern Ohio DX Association
have re-elected the following individuals for May 2003 through May 2004:
President : Tedd Mirgliotta, KB8NW
Vice President : Dwaine Modock, K8ME
Secretary : Ron Borkey, K8VJG
Treasurer : Mary Michaelis, N8DMM

RSGB IOTA CONTEST 2002 (Results). Justin, G4TSH, reports that the results
listings for the RSGB 2002 IOTA Contest are now available for viewing at:
http://www.rsgbhfcc.org

S0, WESTERN SAHARA. Toni, EA5RM, URE Magazine's DX Editor and EADX Bulletin
Editor, informs OPDX that almost everything is ready for the upcoming
"Sahara 2003 Dxpedition". He states to look for the first press release
to be sent out at the end of the week.

SILENT KEY. It has been reported by the Russian Robinson Newsletter that
Vladimir Lukjanchuk, RX3DQU (RRC #629), has died in the plane crash on
March 1st. As a "Robinson" member, Vladimir may be well known for his
participation and activation of several Russian Robinson Award (RRA)
Islands. OPDX and its readers would like to send out their deepest
sympathy to Vladimir's family and friends.

SOUTH AMERICAN TRIP. Dr. Rick, NE8Z, informs OPDX that from March 14-30th,
that he will be operating from various locations in Argentina, Uruguay
and Brasil with the following callsigns:
LU/NE8Z - various locations in Argentina (LU0 for WPX)
CX/NE8Z - Colonia, Uruguay (CX0 for WPX)
PY5/NE8Z - Iguazu Falls, Brasil
No specific dates were provided, but Dr. Rick will use a TS-50s with an

Outbacker TriSplit antenna. Operations will be on 40-10 meters CW (with most of the activity on WARC bands). QSL via NE8Z: Dr. Rick Dorsch, P.O. Box 616, Hamburg, MI 48139 USA.

ST, SUDAN. Look for Claudio, IV3OWC, to operate as ST2CF (not ST1C as previously announced) from March 16-31st. His activity will include an entry in the CQ WPX SSB Contest. QSL direct only via home call.

SUDAN PIRATE. Reports indicate that the QSL Manager Claudio, IV3OWC, is stating that Nobili, ST1MN, operations at this point are those of a pirate. In fact, this callsign has indeed been issued and that activity is anticipated, but the real ST1MN has no time for radio now (per IV3OWC).

VP5, TURKS AND CAICOS ISLANDS. Mike/WA2VQW and Rob/WB2NVR, members of the W2RZS Radio Club, will be active from the Providenciales (NA-002) during the CQ WPX SSB Contest as VP5RZS (contest callsign), and will be active before and after the contest as VP5/W2RZS and VP5/homecalls. They are scheduled to be there from March 27th untill April 1st. They expect to be active on 160-10 meters and possibly on 6 meters as well. There will be WARC band activity before and after the contest. QSL via their home callsigns through the bureau or direct. All cards will be answered in the manner in which they are received. Please remember to use SASE, etc....if sending direct. WB2NVR collects stamps, so overseas direct mail bearing postage stamps will be an added plus for him.

VP5, TURKS AND CAICOS ISLANDS. Operators William/KX4WW, Bruce/W4OV and Charles/W4SAA will be active as VP5WW during the CQWW WPX SSB Contest (March 29-30th) as a Multi-Single entry. Bill, KX4WW, informs OPDX that he will be there from March 24th-April 2nd. The other operators will be down there for a shorter stay. Outside of the contest, look for activity on most HF bands both CW/SSB. QSL via KX4WW.

VP6/D, DUCIE ISLAND. It seems the Ducie Island DXpedition began a little before 0001z, Sunday March 9th. The callsign they are using is VP6DIA. It was announced late last week the following suggested frequencies will be used:
CW - 1826.5, 3507 and 7007 kHz (listen up per instructions)
10102 or 10124 kHz (listen up per instructions)
14020, 18070, 21020, 24900 and 28020 kHz (listen up 9 kHz on all)

Up 9 allows other DX to transmit in the DX edge.

SSB - 3793 and 7070 kHz (listen up per instructions)
14195 kHz listening up on 14215 kHz (+), allows U.S. Generals stations to call on 14225 and up
18130 kHz listening up on 18140 kHz
21295 kHz listening up on 21305 kHz
24950 kHz listening up on 24955 kHz
28445 kHz listening up on 28455 kHz(allows U.S. Technicians to call)
RTTY - 21080 kHz listening up on 21100-21120 kHz (as a primary band as long as there is demand)
14080 kHz listening up on 14085 kHz (as a second band)

50 MHz - 50110 kHz SSB/CW on operators instruction. A beacon will be there 24 hours.
Remember to QSL via JR2KDN: Yuichi Yoshida, 4F Kato Building, 529 Rokugaike, Kita-Ku, Nagoya 462-0002, Japan. The URL address for pilot station's bulletins are at: http://www.qsl.net/aa0mz/ducie2.htm
There is also a link there to the official web site which has, among other things,the log. The official web site is at:
http://www.qsl.net/wd4ngb/ducie.htm

WARD 2003 AWARD. The "World Amateur Radio Day (WARD) 2003 Award" is devoted to commemorate the World Amateur Radio Day celebrated by the IARU on April 18th each year. The theme for the 2003 WARD is "Amateur Radio Supporting Technology Education in the Classroom". It is issued by the MK QTC - Polish Amateur's Radio Journal with PZK (Polish Amateur Radio Union) support. The WARD Award is available for at least the following number of contacts:
10 QSOs on HF bands or 5 QSOs on VHF bands. All contacts must be made on April 18th between 0000 and 2400z. A standard application form including the list of QSOs should be sent before May 31, 2003 to: Redakcja MK QTC, ul. Wielmozy 5b, 82-337 Suchacz-Zamek, Poland. The price of the WARD Award is 5 USD or 5 Euro. This is a full color award, sized 210 x 297mm. The WARD Award is available also for the same amounts of SWL reports. Any questions can be sent to: qtc@post.pl

WEB SITE AND INVITATION. Stuart, VK8NSB, President of the Darwin Amateur Radio Club, announces that their club is now online with Web pages located at: http://www.vkham.com/vk8da
The Darwin Amateur Club welcomes all visitors to the Northern Territory Australia. Their meetings are on Wednesday nights starting at 1930 local time. For more infomation, please feel free to contact Stuie at:
vk8nsb@octa4.net.au

YU8, THE STATE UNION OF SERBIA AND MONTENEGRO. Andy, 9X0A, was heard this past week signing YU8/9X0A from Kosovo. The length of his activity is unknown. He was heard on 17/12 meters 1230 and 1630z. Watch 18130, 18144 and 24964 kHz. Also, watch 20 meters CW/SSB after 0600z. QSL via UA3DX.

ZP40, PARAGUAY (Attention Prefix Hunters). Tom/ZP5AZL/ZP6Y and Jorge/CX6VM will operate from Tom's station in the CQWPX SSB Contest as a Multi/Single/ High Power entry using the special callsign as ZP40Z. QSL via W3HNK.

KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

/EXIT

Message-ID: <3e6cefb6$1_1@news.vo.lu>
Source record: 10781

Hi,

A question for the european readers using a vertical antenna with no linear amplifier.
(typical shack, TS-850 + R7 or so)

At what strenght (power) do you receive VP6DAI in Europe ? According some OM I contacted in SM, G or 7X, this DX seems hard to capture in HF?
Personnally, here in LX I receive him 53 on the 20 and 10m bands, no more, using a dipole (by 17 UTC)

Thierry
http://www.astrosurf.com/lombry

NB. I am no more SWL, but ON1SKY since the eve. Great ! Next step the full privilege licence !!

Of course the signal reports are always "599" or "59" for rare DX. In New York, using a two element quad at 40' (and partly blocked by hills) I hear VP6DAI about RS 54 or RST 549 on 12 and 10 meters. He is quite readable but easily covered by anyone else on the same frequency. (Note that he almost always operates "split" --- this means that he listens on a different frequency and NOT on his own transmit frequency.)

Hi Bill,

Mm... Very fine (for my configuration, Hi !).
That's mean that my small TS-570D and its dipole (and sometime a simple
longwire tied in the field) do a great job... Good to know ;-).

Knowing these reports (or no report from VP6) I am more and more proud to
have selected this RTX. I made an excellent choice in the past without
really knowing its performances excepting from catalog (I didn't read
reviews).

These are two goods news today : my license ON1KSY and the quality of my RTX
that is confirmed, too much !

Nope, those are Windoze machines. <<grin>>

Seriously, tho, the Macs are great machines...just don't play with one...you'll probably dislike the PC when you go back to it. FWIW, my G3 Mac runs circles around my P3, esp. on video/photo editing. Just did an entire spanish trade show presentation in two days on the Mac.

If you do satellites, try the MacDoppler program. Quite nice.

As for "Win Vs Mac," to each their own.

Cheers!
Andrew

Hi Guys.

I worked V51/DL2AS on 28mhz this morning, a new country for me.

The guys name was Peter and qsl was via his homecall.

I've searched all the online callbooks I know of but can't find any sighn of an address for DL2AS.

Has anyone any address and/or email they can supply for this guy.

Cheers.

Gary. G0VXD.

Bill, just noticed this.It was in the last OPDX bulletin 9 March 2003

CY0MM QSL STATUS. OPDX has been informed that Lali, VE3NE, states,
"I have received the first 5,000 cards on March 3rd. Also, the picture
and video CD have arrived a couple of days ago. I already mailed the
CDs and cards to our sponsors like NCDXF and others. The rest follows
very soon. On Sunday afternoon (March 9th), I am expecting Nick/VE3EY,
Peter/VE3NWA (He was doing the online LOG), Geo/VE3NZ, Dragan/VE3FF,
Yuri/VE3DZ and maybe a couple of others to prepare the return envelopes
and cards. I am hoping to answer all the direct cards in a few weeks.
Please pass along this info and I hope everybody will be satisfied."

Go to www.google.com and search for
"sunset sunrise civil twilight".

You will find dozens of links providing different ways to
calculate everything related to sunrise and sunset.

Hi Vince,

Me and many others OM we are using DX4WIN. It is a licensed product
but it is very very complete. It comes with many databases (QSL
managers, IOTA and more), reports, labels, and you can even extract
data from a cluster, drive your CW key or a callbook CDROM if
necessary.
Maybe a bit short for contests but I think the latest release 6 as
some add. features.
Support is excellent and it run perfectly on NT, ME, XP, etc.
A master choice.
See www.dx4win.com

>

Can you import information form CDROM callbook direct into DX4WIN or you must retype it?

In some log programs there is direct link between CD callbook and logbook. Its handy for editing US OMs. Don't need to type manualy State, County and Loc. info...

No really. The CD callsign db helsp you to find a callsign when typing it in
DX4WIN.
e.g. you type S57, the program search in the CD and suggest you all S57 it
finds. You complete the callsign with..MH (so it know it is S57MH +
something) and with some chance it finds you Alex, S57MHA
This is an excellent tool when there are much noises on the QRG, in CW etc.

Thiery

Don't despair - I worked (and have confirmed) VP6 on the first DXpedition
with 100watts CW into a dipole AND I was only receiving them at 319.
I don't know if the operators have such good ears this time, their operating
doesn't sound so slick on CW.

73 and good luck with the new ticket.
John

528. Re: Power of VP6DAI Ducie

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-14 14:10:56 UTC
From: Bill Ogden <ogden@us.ibm.com>
Message-ID: <3E71E2F0.324C99AB@us.ibm.com>
Source record: 10662

My location is rather poor for working the South Pacific. (A large hill is in the wrong place.) I have worked a number of stations (and expeditions) whose true report would be about 319 --- that is, just barely above the noise level at times---usually on 10 or 12 meters. (I use a Tentec Omni 6+ and a quad at 45'; RF and AF gain are almost all the way up on 10 meters in these cases.) It may take a lot of calling on my part, but I usually get through.

I have heard that a sea-side location is worth another 10db in receiving and transmitting levels. While I normally think of both directions in a path being at about the same level (assuming reasonable power levels at both ends), I wonder if the naturally lower background RF levels and some "sea-side effect" allows the island stations to hear better? If they hear my signals at the same level I hear their signals, I am astonished they would ever return my call. Or, perhaps they have only super operators with supernatural ears!

Source record: 10663

Well one way they may hear better is the noise level must be very low at
that location. Outside of lighting noise, the only noise there must be what
they brought with them. That is generators and white noise from the
transmitters etc. So even in a rural area there are power lines and all
other kinds of noise makers.
On an uninhabited island all that is gone.

Amateur Radio Newsline™ Report 1335 – March 14, 2003

Amateur Radio Newsline report number 1335 with a release date of Friday, March 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC has a new tool to keep people honest and the ARRL tries again in Congress. These stories are first on Amateur Radio Newsline report number 1335 coming your way right now.

(Billboard Cart Here)

**

RADIO RULES: FCC SAYS YOU HAVE TO TELL THE TRUTH

If you have to contact the FCC, be sure to tell the truth. This is because the Commission has revised its own rules to strengthen the requirements for the submission of truthful statements to the agency. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells you who is affected and what it all means:

--
As amended, section 1.17 of the Commission's Rules prohibits written and oral statements of fact that are intentionally incorrect or misleading. It also prohibits written statements of fact that are made without a reasonable basis for believing that the statement is correct and not misleading.

In requiring that submitters of written statements in fact-based adjudications and investigations have a reasonable basis to believe that what they say is correct and not misleading, the Commission is imposing on the submitters a duty of due diligence. This includes the obligation to take appropriate affirmative steps to determine the truthfulness of what is being submitted.

The now revised section 1.17 broadens the category of persons subject to its requirements to include any applicant for, or holder of, any Commission authorization. Also subject is any person performing without Commission authorization an activity that requires Commission authorization; any recipient of a Commission citation or letter of inquiry, or any person subject to a Commission or staff investigation

Others covered include those in a proceeding to amend the FM or Television Table of Allotments, any person filing an expression of interest, and, to the extent not already covered, any cable operator or common carrier.

Perhaps the most interesting of these is any person performing without Commission authorization an activity that requires Commission authorization. That's a fancy, legalese way of saying bootleggers. And its telling bootleggers that lying to the Commission can bring with it some pretty hefty penalties. Consequences far more severe than just the act of unlicensed

operation, itself.

The amended rule applies to all investigatory and adjudicatory matters. It does not apply to declaratory ruling or to rulemaking proceedings except for expressions of interest in proceedings to amend the FM or Television Table of Allotments, and tariff proceedings. Attorneys and engineers acting in their representational capacities are not covered by the amended rule.

Simply stated, almost everyone is now subject to the revised and enhanced section 1.17 FCC rule. This includes all of us with Amateur Radio Service callsaigns attached to our names.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

The FCC claims that this new rule is a clearer, more comprehensive, and more focused articulation of the standards for truthful statements than the old rule. The Commission also said that it will enhance the effectiveness of its enforcement efforts. You can read it all at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231908A1.doc and at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-45A1.doc (FCC)

**

RADIO RULES: FCC TO CONSIDER RECEIVER STANDARDS

The FCC has decided to consider on an item that it has been extremely reluctant to act on in the past. That being the setting of interference immunity performance specifications for receivers.

Specifically, the FCC says that it will consider a Notice of Inquiry concerning the possibility of incorporating receiver interference immunity performance specifications into its spectrum policy on a broader basis.

It all falls under MM Docket No. 00-39. Its titled Interference Immunity Performance Specifications for Radio Receivers; Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television. You can read more on the web at the U-R-L appearing in the print edition of this weeks Amateur Radio Newsline report. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231820A1.doc (CGC)

**

RADIO POLITICS: AR SPECTRUM PROTECTION ACT IN BOTH HOUSES

The ARRL Letter reports that the Amateur Radio Spectrum Protection Act of 2003 now has been introduced in both chambers of Congress. Idaho Senator Michael Crapo introduced the Senate version of the bill, S 537, on March 6. Its original cosponsors were Senators Daniel Akaka and Larry Craig. Florida Representative Michael Bilirakis put the latest House version of the bill, HR 713, into the legislative hopper on February 12th.

HR 713 and S 537 are twin ARRL initiatives aimed at ensuring the availability of spectrum to Amateur Radio operators. The legislation would protect existing

Amateur Radio spectrum against reallocations to -- or sharing with -- other services unless the FCC provides equivalent replacement spectrum elsewhere.

The Amateur Radio Spectrum Protection Act legislation has already been introduced twice before Congress. League President Jim Haynie, W5JBP, believes this third time could be the proverbial charm. (ARRL)

HIGH TECH SHOWDOWN: IRAQ MAY TRY TO JAM SATS

I'm Blair Alper, KA9SEQ, with this late breaking story.

If Iraq could tries to jam U.S. military satellites during a possible invasion, it will be in for quite a surprise. This, according to a Pentagon official who hints that the United States already has countermeasures in place.

News reports say that Iraq is reportedly seeking ways to jam the Global Positioning Satellites that would be used to help guide so-called smart bombs. But Brigadier General Franklin Blaisdell who is the Air Force's space operations director says it really can’t be done these days. He says that any enemy that would depend on G-P-S jammers for their livelihood is in grave trouble.

Blaisdell says that, as it did during the 1991 Persian Gulf War, the Defense Department is buying access to commercial communications satellites. This, to help provide the massive bandwidth needed to connect all the high-tech gear a modern army uses. He adds that the military also successfully launched a broadband communications satellite on Monday the 10th.

For the Amateur Radio Newsline, Im Blair Alper, KA9SEQ, reporting.

**

RESCUE RADIO: HAM RADIO ASSISTANCE REQUESTED IN MA. PLANE CRASH

Ham radio was called out on March 3rd to help locate a missing aircracft. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--
John Spencer, WA1NTI, was listening to his radio club’s 146.91 MHz repeater in the Pittsfiels Massachusetts area early on Monday morning March 3rd. That’s when John Lindley, WA1ZHM , put out a call looking for hams who could assist in locating a downed aircraft.

According to information provided by Arthur Rowe, N1ORC, Lindley said it was the Massachusetts State Police who requested radio amateurs assist in the search. In fact it was about 4 a.m. when a Lieutenant from the State Police Task Force came knocking on WA1ZHM's door. At the time the location of the aircraft was unknown and there was a wide search area to cover. The police told Lindley that the agency needed people with radio knowledge and equipment who could help triangulate the location.

Spencer says that the operators who could help out were told to report to the Sheffield Massachusetts Police Department. There they were briefed and shown an area of Beartown State Forest where the crash site was believed to be. The hams were tasked with listening for the airplanes 121.5 MHz Emergency Locator Transmitter and trying to T-hunt its exact location.

Gary Kleinerman, K1SXA, was put in charge of the group of seven hams. The downed aircraft was located by a Search and Rescue helicopter about 3 miles in from where Kleinerman and Spencer had been assigned to search. The chopper pilot also saw that there was at least one survivor.

Due to terrain, another heavy-duty rescue helicopter was called in from Albany New York to help rescue three boys who survived the crash. Unfortunately rescuers found the boys parents and two of their siblings were dead at the scene.

And even though the ham radio operators were not the first to find the downed aircraft, those involved in organizing the search and rescue effort thought enough of the skill of radio amateurs to have them take part. That's why they knocked on WA1ZHM's door in the middle of the night.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.
--

The three hour rescue involved police, fire and E-M-S from Massachusetts and New York. Volunteer manpower for the search came from Massachustts and Connecticut. (N1ORC)

**

ENFORCEMENT: NO AUTOMATIC CONTROL FOR YOU

On the enforcement scene, the FCC told David Price, WA6FUL, that he may not operate his repeaters under automatic control. This, while the enforcement Bureau reviews allegations of rules violations.

In a letter to Price from the FCC's Riley Hollingsworth, the Redwood City California ham was informed that these include charges of failure to identify and transmitting false call signs. Price was also warned that continued violations could lead to a fine or license revocation proceedings filed against him. (FCC)

**

ENFORCEMENT: DOJ SEIZES WEB SITE DOMAIN USED FOR ILLEGAL ACTIVITY

Sellers of allegedly illegal FM transmitters might want to take heed. Bob Gonsett's CGC Communicator reports that the government has seized a web site used to sell chips designed to circumvent electronic copyright protection. And now a Washington Post news story quotes government officials as indicatinfg that this move could be a harbinger of other such enforcement actions. Its all on-line in cyberspace at http://www.washingtonpost.com/wp-dyn/articles/A7996-2003Feb26.html (CGC)

**

RADIO RULES: FCC ADJUSTS ALLOCATIONS BELOW 28 MHZ

Also from the CGC Communicator comes word that the FCC has amended various parts of its rules. This, to implement the decisions from the World Radiocommunication Conferences regarding various frequency bands below 28 MHz.

Affected spectrum and users include the expand A M Broadcast Band, International Broadcast Stations, the Amateur Service, and continued use of 26.110, 26.130, 26.150 and 26.170 MHz by Broadcast Auxiliary Remote Pickup stations. There appeared to be no earthshaking items affecting the Amateur Radio Service. Its too is in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-39A1.doc (CGC)

**

NAMES IN THE NEWS: N1WRY BIKES THE SOUTH-EAST

Jason Baack, N1WRY, says that he will be looking for a few good contacts. This, as he bikes across the South-Eastern United States over the next few months.

The SERA Repeater Journal says that Baack will be riding through Georgia and Florida during March as part of his 400 mile trek. His bicycle is equipped with VHF FM and High Frequency SSB gear. For more information please drop by Jason's website at www.n1rwy.com (Repeater Journal)

**

HAMVENTION 2003: N8IGS REPLACES KB8OUO AS GENERAL CHAIRMAN

With only 10 weeks till the doors open on Hamvention 2003, Pat Neff, N8IGS, has swapped places with Jim Trangenstein, KB8OUO, and become the event's General Chairman. According to sources close to Hamvention, Trangenstein stepped down because he had changed jobs. This left him little time to full-fill the obligations of the Hamvention's General Chairman's post. Neff says that plans for Hamvention are on-target:

--
Pat Neff, N8IGS: "We are planning on having a great 52nd show and see interest picking up as we get closer to Hamvention 2003. And, we continue to look at ways to inprove the show and make it the Amateur Radio event that every ham should experience at least once in their lifetime."
--

Hamvention 2003 is slated for May 16th through the 18th at its longtime home at the Hara Arena in Dayton Ohio. More information is on the web at www. hamvention.org (ARNewsline™)

**

HAMVENTION 2003: 11TH ANNUAL CONTEST DINNER

Tickets are now on sale for the 11th Annual Dayton Contest Dinner. According to this years Master of Ceremonies is Tim Duffy, K3LR, this years gathnering will be held on Saturday night, May 17th, at 6:30 PM at the Crowne Plaza Hotel on 5th and Jefferson Streets in downtown Dayton. Rich Strand, KL7RA, is scheduled to be the after dinner speaker and the 2003 Contest Hall of Fame inductees will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST.

All dinner ticket orders are handled exclusively by Craig Clark, K1QX at the Radio Bookstore up in Ringe New Hampshire. You can place your order Monday through Friday from 10 AM to 6 PM eastern by calling 1-800-457-7373. International orders must use the comopany's 603-899-6957 direct dial line. For more information please visit www.radio-ware.com on the World Wide Web (K3LR)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: NASA ANNOUNCES PLANS FOR OSP

In his report last week on the future of ham radio in space Roy Neal, K6DUE, mentioned the possibility of a new vehicle to augment the space shuttle fleet. Roy is back this week with more on that part of the story:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Space Daily, the Orbital Space Plane will be launched using a rocket booster and will land much like an airplane. (ARNewsline™ from news reports)

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-11

The OSCAR-11 ham radio satellite celebrated its 19th birthday on March 9th. Almost two decades old, this amazing bird continues to output consistent

signals on its 145.826 and 2401.5 MHz. beacons. It also achieved a remarkable 100,000 orbits on October 31st, 2002. (ANS)

**

NEW FRONTIERS: THE DCC WANTS YOUR PAPERS

Technical papers are being solicited for presentation at the 22nd Annual ARRL and TAPR Digital Communications Conference. The gathering is slated for Hartford, Connecticut, from September 19th to the 21st.

These papers will also be published in the Conference Proceedings published by the ARRL. Presentation by the author at the conference is not required for publication. Information on paper submission guidelines are available on-line at www.tapr.org/dcc.

Submission of papers is due by August 5th, 2003 and should be sent to Maty Weinberg, ARRL Headquarters, 225 Main Street, Newington, Connecticut 06111 or by e-mail to maty@arrl.org (WB8IMY, VHF Reflector)

**

INTERNATIONAL - AUSTRALIA: THE MORSECODIANS RADIO SHOW

Mark Titterington, W1EOF, says over the web that ABC Australia has a radio program available about the early history of the telegraph called "The MoreseCodians." The program traces the electric telegraph from its invention in 1832 by Samuel Morse until it became obsolete in V-K land in the early 1960s when the last line ceased to function in Australia.

The show’s full summary can be found by taking your web browser to www.abc.net.au/rn/history/hindsight, click on more summeries and then scrolling down to the link "MorseCodians." W1EOF says that he is making arrangements to make the program audio available on the hamnutz.com website. He also plans to distribute it on CD for those that don't have a fast enough internet connection. His e-mail is w1eof@hamnutz.com. (W1EOF)

**

INTERNATIONAL - WORLDWIDE: RADIOMINISTRIES.ORG

Radioministries.org is a new website dedicated to assisting missionaries in remote regions with the communications through Amateur Radio. According to the groups Director, Scott Thile, K4SET, many missionary and relief groups are working in areas without access to land based phones, cell phones, or the Internet. These groups must find alternative ways to communicate within the group, and with family, friends and supporters back home.

Thile says that only a small number can afford satellite telephone service. Others must rely on alternate channels including ham radio.

K4SET hopes the new website will be of assistance to those in the missionary field. For more information visit http:// radioministries.org. You can contact Thile by e-mail to k4set@radioministries.org (K4SET)

**

DX

In D-X, Peter McKay, G3WQU, who has been active for a couple of years as CN2PM and S07PM from Morocco and the Western Sahara, will be moving to East Timor at the end of March. He operates almost exclusively CW. Look for him operating with a 4 W prefix from his next Q-T-H. (GB2RS)

Also, DL2GAC, who has been active from several Papua New Guinea island groups as P29VMS, has moved on to the Solomon Islands. He plans to be active as H44MS until mid-April. (GB2RS)

And the Balkan Contest Club LZ1KZA will operate with the special event callsign LZ125O through the 31st of March. This to commemorate the 125th anniversary of the liberation of Bulgaria. Activity is on CW, SSB and RTTY on all the HF bands. (Via e-mail)

**

THAT FINAL ITEM: A MILESTONE FOR SETI@HOME

And finally this week a story about a screen saver that is close to the hearts of many radio amateurs. Amateur Radio Newline's Henry Feinberg, K2SSQ, is here with the latest on a project called seti@home:

--
After what adds up to more than a million years of computation by well over 4 million computers networked worldwide, the SETI@home screensaver that crunches data in search of intelligent signals from space has produced a list of candidate radio sources that deserve a second look. And in a few days the scientists behind the project will use a giant radio telescope to take a second look based on this data.

SETI@home is a more than the usual screen saver. Its actually a very high tech data processing program disguised as a screen saver. It springs into action after a computer is idle for a given length of time. Its purpose is to analyze radio telescope data downloaded to the machine over the Internet, search for strong or unusual signals from space and file a report back.

Many hams world-wide have embraced SETI@home and have it running around the clock on their P-C's. They are the first to tell you that that the project is in keeping with the spirit of Amateur Radio itself.

Now, three members of the SETI@home team will head to Puerto Rico to use the giant radio telescope at Arecibo to revisit up to 150 places in the cosmos. These places in space have been identified as the source of possible signals from intelligent civilizations based on data already processed.

The candidates for that second look are particularly strong signals or ones that have been observed in the same spot more than once. Some of them five or six times. SETI@home project coordinators say that limited analysis of the signals will be done while the team collects the new data. This will permit the observations to be halted and repeated if -- by chance -- a very strong signal reappears.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ
--

SETI@home users could find out the results of the re-observations within two to three months. More on SETI@home in next weeks Amateur Radio Newsline report. (W6RCL, Published Reports)

Gentlemen, I have whipped up a Maidenhead grid long/lat calculator not limited to 6 characters, http://jidanni.org/geo/maidenhead/ :

```
$ echo 120.866 24.182|lonlat2maiden 12
PL04KE33WQ03
```

Just revel in the new vanity precision achievable as the cluster bombs hone in on your shack.

Hi,

I do not despair. I have various solutions in my bag to work this DX. I heard him 53 maybe more with a poor longwire and I suspect it to be louder if I could use a more "powerful" (sensitive, high Q) antenna.

Usually when I want to work one of these "most wanted DX", when I see it on the cluster but cannot hear him or when it is sunk in the QRM and I capture only partly his callsign, I do not hesitate a second.
Up to now I keep my RTX with me, the headset and my longwire that all fit in an aluminum box, (the battery being temporary the car one) and I drive a few km from home where I can benefit of a horizon line over 30 km away and no QRM. There, in a quiet spot, I ties my wire in a tree or to a fence for a couple of hours. Up to now I have captured this way all DX waving near my "shack"... excepting the weakest (Pacific islands as seen from Europe with occasionnally stations from FK, H4, ZK1 dxp, etc).

Of course this is relative as I capture well ZK1 or most VK, ZL stn, but all of you know that this wire is a poor performer, what ever its length. In a near future I will probably buy a Hi-Q 3-80 RT antenna that I could push to its limits, with the hope to get most of my RTX and to avoid reception la 319 like you exprimented. The Hi-Q and a good spot could offer me some more dB, well I hope....

If in these conditions I cannot work any far or weak DX located over 15000 km away (LP), there will be no other solution than to erect a R7 on the roof top (as I cannot erect a beam due to the lack of discretion) or to find another solution in /P (a R7 on a Hi-Q tripod ?...to see).

535. FM receive system

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-16 20:31:50 UTC
From: CuriousMind <piratewebuk@yahoo.co.uk>
Message-ID: <b52mso$3pq$1@news6.svr.pol.co.uk>

I wish to install and distribute an FM yagi to my living room. I would like to use a masthead amplifier for this. Sounds straight forward but I wish to send it down the Sky Digital cable which has recently been installed - the reason for this is it is rented property and I don't want to have to drill an additional hole in the living room wall!!

The masthead amplifier runs off 12vdc. I am unsure about sending two seperate voltages up and down the cable (sky lnb voltage and masthead amp voltage). I understand that for the masthead amp, you can send voltage and RF up and down the one cable but having looked through CPC, the diplexers and alike, will only deal with VHF and UHF only cable or UHF and Satellite only. Please help me!!

Thanx in advance....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th/March, through Sunday, 16th/March there were 237 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T31, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP5, VP6, VP6/d, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4W, EAST TIMOR. ARNewsline reports that Peter McKay, G3WQU, who has been active for a couple of years as CN2PM and S07PM from Morocco and the Western

Sahara, will be moving to East Timor at the end of March. He operates almost exclusively CW. Look for him operating with a "4W" prefix from his next QTH.

5R8 PIRATE. Phil Whitchurch, G3SWH, informs OPDX:"I am sorry to report that Albert's, 5R8GZ, call is being pirated on 80 and 160 metres. Albert does not operate on these bands at all as he has no suitable antennas."

9M2, WEST MALAYSIA (IOTA Op). Dr. Keith Kerr, GM4YXI, is expected to be back in 9M2-land this week. As always, he will try to activate various islands. Firm plans thus far include AS-046, Pulau Tioman, with Rich, 9M2/G4ZFE. Keith will be active on SSB as 9M2/GM4YXI and Rich, 9M2/G4ZFE, will be on CW. Activity will be on 20/17/15/12/10 meters using verticals and 100 watts (possibly 400 watts on one station). Watch the usual IOTA frequencies (+/- QRM). QSL the 9M2/GM4YXI contacts via Steve, N3SL. Steve states it is possible/probable he will have those logs on an on-going basis. Keith will E-mails logs almost daily to Steve, N3SL, so QSLs should be available immediately. QSL the 9M2/G4ZFE contacts via Rick's home callsign. Also, they are planning on operating from the club station, 9M2RPN, during the CQ WPX Contest as a Multi-2 entry. Ian, G3TMA, will join them during their contest activity. QSL the contest operation via 9M2RPN.

A3, TONGA (Update to OPDX.599). By the time you read this, the German team should be active as A35XM. Operators are Irina/DL8DYL, Reinhard/DL8YRM, Thomas/DL5LYM, Wolfgang/DL4WG and Ralf/DL9DRA. They will be active on CW, SSB and RTTY. Also, their main focus will be on Europe, the WARC Bands and RTTY. QSL via DL8YRM, via the bureau or direct. E-mail requests for bureau cards can be sent to: dl8yrm@darc.de
They now have a Web page for this operation at: http://www.df3cb.com/a35xm

C9, MOZAMBIQUE. Max/IZ4DPV and Filippo/IK4ZHH, inform OPDX that they will be active from Maputo and Beira, April 20th through May 4th. Their C93 licenses have been obtained, but they will not release their callsigns until on the air or few days before starting. Activity will be on 80-10 meters including the WARC Bands on SSB, CW (RTTY ?). Their will probably be activity on 6 meters. They will use 100 watts into a TH7 antenna and wire verticals. QSL will be via direct CBA or bureau (no QSL via E-mail or eQSL). Further info later...

D2, ANGOLA. Joao, CT1BFL, is expected to be active as D2U until February 2004. There has been NO QSNs reported yet, but his planned activity will be on 160-10 meters CW/SSB. QSL via CT1BFL.

FM, MARTINIQUE. Bernard, F5LBG, will be active for one month starting on March 13th from Martinique Island (IOTA NA-107 and DIFO MN-001), as FM/F5LBG. Activity will be on 80-6 meters CW. QSL via his home callsign, bureau or direct (+postage) to: DAUVIER Bernard, 20 Chemin des Mottes, F26760 Beaumont les Valence, FRANCE.

HC8, GALAPAGOS ISLANDS. Diego, LU8ADX, will be active as HC8/LU8ADX from March 24-31st. Activity will be on SSB and possibly RTTY. He will join the team of N5KO, OH0XX, K5KA, XE1KK, KI7WX and NM5M to be active in the

CQ WPX Phone Contest as HC8N.

IOTA AND USI ACTIVATION. John, WA4JA, will activate Shell Island, IOTA NA-085 (now FL Group, Bay County) and USI FL401S for one day between April 7-11th. The day for the boat trip depends on the WX. Activity will be on 20-10 meters near the IOTA and USI frequencies. Also, he will try to operate from Okaloosa Island (NA-142 and FL003S) during the same week, mostly on 10 meters SSB. QSL to WA4JA, direct (PSE SASE). DX stations with Bureaus will be QSLed via the bureau automatically.

IOTA NEWS.....
AF-018. Operator Giuseppe/IT9BLB and an International team will activate Pantelleria Island as IH9P in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. QSL via KR7X.

AS-008. Look for members of the Kitagawa ARC (JH1ZHU) to be active from Izu Island. Possible callsigns to be used are JH1ZHU/1 or members homecall/1. Activity will take place between March 21-23rd, on 80-6 meters CW/SSB. QSL via JH1ZHU or to the participating operator's home call.

AS-017. Nobu, JQ1EYN, will be active as JQ1EYN/6 from Komaka Island from April 27-28th. He plans to be active on 80-6 meters SSB and CW. Visit the Web site for more details at: http://www.chinenmarine.co.jp/local/komaka.htm QSL via the JARL Bureau or direct to his home call.

AS-105. Members of the "Korea AnSung DX Club" will activate Chebu Island betweeb April 4-6th as D70HL/2. Activity will be on 80/40/30/20/17/15/12/10/2 meters CW/SSB/RTTY. They will have an arsenal of equipment and antennas as follows: Transceivers - TS-870S(100W), TS-570S(100W), 145BASE(50W) Antennas - 80m (DP/GP), 40m (LOOP/GP), 30m (DP/GP), 20m (LOOP/GP), 17m (DP/GP), 15m (3 ele. YAGI/GP), 12m (4 ele. YAGI/GP), 10m (3ELE YAGI/GP), 2m (GP), 3 ele. YAGI (40/17/15/10m), LOOP (40/20m home-made), 7000+ (HF all band), 4 ele. YAGI (12m homemade), and BRAVO.CO WARC+ (80/30/17/12m).

EU-170. Feco, 9A/HA8KW, will activate the Island of Prvic (CI-094) on July 24-31st. He will use an IC-745 radio with a vertical and wire antennas. He will participate in the IOTA Contest (in the limited, 12-hour section) as 9A/HA8KW.

EU-187. Giannis, SV2FPU/8, reports that the "Radio Amateur Union of Northern Greece DX Foundation Team" will be on the air from Gaydos Isle using the special callsign SX9G. Please visit the following Web page: http://www.qsl.net/sx9g

OC-201. You should still have a few days to work Steve, G4EDG, from Waiheke Island as ZL1/G4EDG. His operation started on March 14th and is expected to last for 4-5 days. Activity will be

on 20 meters QRP CW only (best time for EU is around 0600z).
QSL via his home call.

OC-237. Operators Rivai/YB2MTA and his friend Pri/YC2CJQ will activate Panjang Island from a lighthouse (LH 0479). They will be using the callsigns homecall/P from Friday through Sunday, March 28-30th. Activity is expected to only be on 15 meters. On Friday, they will try to work PSK31 and CW. Then on Saturday, they will enter the CQ WPX Contest. QSL both callsigns via EA7FTR: Francisco Lianez, Asturias 23, 21110 Huelva, SPAIN.

J5, GUINEA-BISSAU (IOTA Op). Simone, IV3NVN, is now active as J5UCW from a new IOTA, Pecixe Island (AF-093), until about March 22nd were he will return to the mainland. Once back on the mainland, he will be active as J5UDX again until April 2nd. He will try to be active on 160 meters. QSL J5UCW and J5UDX via IV3NVN: Simone Candotto, P.O. Box 4, 33050 Castions di Strada - UD, Italy.

JW, SVALBARD. Members of the LA8G-group (Radioamatorklubben P35) will be active from Longyearbyen, Svalbard, this spring. They will also be active as JW8G during the CQ WPX SSB Contest. Their callsigns used outside of the contest will be JW3JJA (Martin), JW9IY (Bjorn) and JW9GY (Morten). QSL to their home callsigns and QSL JW8G via LA9GY: Morten Antonsen, Hallsetreina 6, N-7027 Trondheim, Norway. Please notice that 1 USD will not cover the postage fee to countries outside of Europe. For more info, please check the following Web page at: http://www.qsl.net/la8g

KH3, JOHNSTON ISLAND. Bert, V73GOD, is once again going back to Johnston on a short term work assignment between March 18-20th. Look for him during his freetime hours. If the KJ6BZ club station building is still standing, he will operate as KJ6BZ. Otherwise, look for him to sign KH3/WH7USA.

P4, ARUBA. Andy, AE6Y, will be operating as P40Y from Aruba from March 22-30th. His activity will included an entry in the CQ WPX SSB Contest. QSL to AE6Y.

P4, ARUBA. John, KK9A, will be active from here between March 22nd and April 5th, from the Iguana Villa < http://www.iguanavilla.com >. He will be active as P40A in the CQWW WPX SSB Contest (March 29-30th). His operating class for the contest is not known. QSL via WD9DZV.

PHILIPPINES PIRATE. Sasi, 9V1SM, informs OPDX that there have been some pirate operations from the Phillipine. Be on the lookout for a station signing as DX1ABC claiming to be on IOTA OC-128. He has also tried to check into SEANET. Sasi states, "A few of us in this region including the SEANET net controllers Roy/DU9/G4UNL, Karl/3W2XK and myself (9V1SM) have been breaking into his QSOs and announcing that he is a pirate. It may be impossible for us to keep a constant watch and urge DX stations not to work anyone signing in with this callsign. More information about this operation can be looked up at QRZ.COM under the call sign DX1ABC. I thought it would be nice to warn the Dx community and discourage all

pirate operations on the amateur radio bands. It is really terrible in this part of the world."

PX5, BRAZIL (Attention Prefix Hunters!). Sergio, PP5JR, will be active as PX5E during the CQ WPX SSB Contest as a Single-Op/Single Band (15m)/ High Power entry.

QSL INFO AND NEWS.....
C53M/C56R QSL STATUS. Juha, OH9MM, reports that all C53M and C56R direct cards have now been mailed. The last bunch of cards will leave Finland on Monday 17th (today). Due to some problems, the orginal schelude was delayed for a couple of weeks. During the process, they had also changed their QSL Manager. Juha, OH9MM, will take care of all C53M and C56R QSLs. They state that they should have all the cards from OH3RM, so no need to resend your card! If you have any problems with your QSLs send an E-mail to: oh9mm@sral.fi
The C53M/C56R Web site will be activate in the future at:
http://www.qsl.net/c53m
They will try to do their best with the QSLs! Already about 70% of the bureau QSLs have been done...

Mike, W2GR, informs OPDX that he is now the QSL Manager for Daniel, HK3AXY, for past and future QSOs. Mike will be accepting direct cards to his CBA with the usual SASE,SAE/GS/IRC for return. However, since the Bureau is working fine in Colombia....BUREAU cards should be sent to HK3AXY via the HK3 BUREAU. Daniel will answer these as they come in. Mike is taking on the direct cards only for him as his mail is usually pilfered, and he has no idea how much mail ends up missing, stolen etc...
W2GR's address is: Mike Benjamin, 1064 99th Street, Niagara Falls, NY 14304 USA.

HK QSL BUREAU SAVE! During the Colombian IARU Society (the LCRA) meeting last Saturday, March 8th, the members agreed not to dissolve the association. So the HK Bureau service will still continue to operate 100%.

QSL STATUS OF THE CARIBBEAN TOUR 2002 - J7/VP2M. Rob, PA5ET reports that about 75% of all direct QSLs are mailed, the remaining 25% will be sent out in the coming week. Here are some QSL notes from Rob:
- As of today, only new type IRC's are accepted (and they need to have a stamp on it)
- Only U.S. Dollars or Euro's are excepted currencies
- QSLs without SASE will be treated as bureau cards
- SASE without address on it will be treated as bureau cards
- U.S. envelopes, put USA on the SASE, there are other countries in the world!
- Don't send Rob registered letters without prior e-mail, they will be returned because he doesn't collect them from the post office
- Inquiries about the status of all LLDXT DX-peditions can be found on the LLDXT web-site at: http://www.qsl.net/lldxt
- Use envelopes which don't fall in parts
- Please use RECENT stamps because Rob collects them

- If you send Dutch stamps don't stick them on the envelope but
put them separate in the envelope

Ron, PJ7/ND5S, reports that over 5500 contacts were made during his
recent stay on Dutch St.Maarten. He reports that all direct request
QSLs have been answered. Any QSLs received without means for return
will be sent via the BURO. QSL direct via homecall or BURO. A trip
summary can be seen on < http://www.qsl.net/nd5s/index.html > then
select St.Martin Update.

QSL Manager Vasilij, RW6HS, informs OPDX that he is now the manager
for UK8GDW, UN8LA, UN8LWZ and UP9L.

Bill Horner, VK4FW, was active as VK4FW/p from Fraser Island (OC-142)
for only a few days last week. He mentions that conditions to EU were
poor, and he only worked just over 400 stations. QSL via direct ONLY to:
Bill Horner, P.O. Box 1343, Maroochydore, 4558 Australia. He will QSL
immediately.

R1, FRANZ JOSEF LAND. You still have a few more days to work operators
Valery/RD3AF, Valery/RX3DU and Victor/UA3AKO as R1FJ. They are expected
to go QRT on March 19th. Activity will be on 160-10 meters CW/SSB/RTTY.
QSL via DL6ZFG using the information from QRZ.ru.
Also, visit the Web page at: http://qrz.ru/webnews/?id=1249

SPECIAL EVENT. ARNewsline reports that the Balkan Contest Club (LZ1KZA)
will operate with the special event callsign LZ125O through March 31st.
This is to commemorate the 125th anniversary of the liberation of Bulgaria.
Activity will be on CW, SSB and RTTY on all the HF bands.

ST, SUDAN (Operation Cancelled!). Gerben, PA5NT, informs OPDX that his
March 16th trip to the Sudan has been cancelled (no details provided);
thus there will be no ST2X activity this time. He did mention; however,
that the ST2X QSL cards (for his past operation) are expected to arrive
soon from the printer.

T8, PALAU. Toshiyuki "Tosy" Moriyama, JA6VZB (T88JA and ex-KC6VW),
states, "I am planning the KC6SZ 160m QRV 20m anniversary and honeymoon
DXpedition." He also states he stopped operating on 160m from T8 during
1997, but now he wants to restart it again. Tosy hopes to be active from
the beach of the Peleliu Island (OC-009) because there is less QRN compared
with Koror, the main island of T8. His equipment will be an ICOM IC-756
Pro and a JRL-2000F running 1200W input. The antenna will be an inverted
"L" on the beach. Tosy mentions, "To protect the peace of my home, the
operation is limited to 160m only." Activity will take place between March
19-22nd. QSL information is as follows: Toshiyuki MORIYAMA,
10-101 Karaku-en, 5-53-62 Hanazono, Kumamoto-city 860-0072, Japan. All
logs will be uploaded to: http://www.eqsl.cc
Also, all QSLs will be submitted to the bureau (A.S.A.P.).

TI5, COSTA RICA. Phil, N0KE, informs OPDX that he, William/N0ZA, William/
TI2WGO and Carlos/TI5KD will be active as TI5N in the CQ WPX SSB Contest
as a Multi-Multi/High Power entry from TI5KD's station. Look for TI5/N0KE

and TI5/N0ZA before and after the contest. Some RTTY operation is anticipated. QSL TI5N via W3HNK. The other callsigns are via their home callsign.

V6 & V7, MICRONESIA AND MARSHALL ISLANDS (IOTA Ops). Jeffrey, KI0RO, informs OPDX that he will be active from Roi-Namur (IOTA OC-028) as V73/KI0RO from March 23-28th. Activity will be on 40-10 meters CW/SSB. From March 30th-April 2nd, Jeffrey will be active from Kosrae (IOTA OC-059) as V63JE. Activity will be on 40-10 meters CW/SSB. From April 4-7th, Jeffrey will be active from Pohnpei (IOTA OC-010) as V63JE. Activity will be on 40-10 meters CW/SSB. He will also operate on WARC bands from all locations too. This is NOT a DXpedition.... He will operate as time permits. All QSLs via KI0RO.

V7, MARSHALL ISLANDS. Neil, WD8CRT, is now active as WD8CRT/V73 on Kwajalein Atoll of the Marshall Islands until an unknown date. He is currently awaiting for the applied callsign of V73NS. Over the past week he was active on CW only. Look for his activty to take place after 1200z and around 0000z to 0300z. He will be around 14029 kHz and on the 10/15/30 meter bands when they are open (watch 10116, 21004 and 28021 kHz). Bob, WB8B, informs OPDX that if Neil is working split, he will be on the air for some time. However, if you hear him working stations on the same frequency, it's just a visit to the shack for a short period of time. Bob also mentions that there are some 80/160 meter antennas there that Neil has not tuned up yet, and he will be setting up a "flat top fed" antenna with ladder line. QSL via the address on QRZ.com: WD8CRT/V73, Box 8341, APO, AP 96557 (Or via the V73 Bureau).

VK9X, CHRISTMAS ISLAND (Update to OPDX.596). Steve, VK3OT (ex-VE3SIX), who will be active from Christmas Island (OC-002) as VK9XI between April 7-21st, informs OPDX that he will have on-line logs for his VK9XI operation. The log's URL address will be at: http://www.qsl.net/vk4cp/vk9xi/logbook.htm For more up-to-date details and information, please visit the Web page at: http://members.datafast.net.au/electronics/path.htm

VP2E, ANGUILLA. Sheila/N5HGB, Gordon/N5AU and Ray/KC5EA will be active as VP2E during the CQ WPX Contest as a Multi-Single entry. They will operate on SSB and CW, no digital modes or WARC bands. Also, Gordon, N5AU, informs OPDX that the VP2E contest station is a permanent station/house on the hilltop overlooking Shoal Bay East. The hill is about 200 feet above sea level. The VP2E station is equipped with radios for each band 160-10 meters and is designed for "Multi-Multi" contesting. VP2E radios are all Yaesu FT-1000MP MK5s with KW amps. Antennas are on 6 Rohn towers (mostly 55G) ranging from 90 feet to 200 feet:
10 meters is 7 over 7 stacked M2 yagis
15 meters is 5 over 5 over 5 stacked Telrex yagis
20 meters is a 4L M2 yagi and a 5L Telrex yagi
40 meters is a 3L M2 yagi (the full-size beast) and a
2L shorty Cushcraft yagi
80 meters is a rotary Force 12 dipole at 200 feet with assorted
wire antennas on TX and beverages on RX

160 meters is a full-size elevated GP vertical on TX with
beverages on RX.

VP6/D, DUCIE ISLAND. The second operation to Ducie is now history and in the books. Operators of VP6DIA left the island around 2100z on March 13th. Last report all of the operators are doing fine and should be on their way home. Remember to QSL VP6DIA to JR2KDN.

XY, MYANMAR (Possible New IOTA). Frank, DL4KQ, informs OPDX that he will stay again in Myanmar between April 1-15th. He will spend 2 days at Yangoon; possible operation times there are April 2-4th. From April 6-14th, he will stay at Chaungtha; coastside Bay of Bengal/Indian Ocean. During his stay at Chaungtha there will be a 4 day operation from the Yangon/Irrawaddy/Pegu Region Group (AS-NEW). The exact date will depend on the local situation. His activity will be SSB/CW with 400 watts into a G5RV`s, several verticals, on 80-10 meters including the WARC Bands, and perhaps he will monitor 6 meters with a 2nd rig. Callsign is currently still unknown. QSL via DL4KQ, direct or bureau. Look for updated information on the Web page at: http://www.dx-pedition.de

YK, SYRIA. Saad, N5FF, informs OPDX that he plans to visit and operate from Syria again next month. His current and tentative plan is to leave for Damascus on Friday, April 11th, and arrive there on Sunday, April 13th. Saad plans to have the same simple setup as last year, bare foot into a short G5RV. This setup worked surprisingly well last year, so he hopes to get similar results this time also. Saad expects to be active from April 15-27th, give or take a day or two, and possibly extend his stay for a few more days up to one week. His callsign will be YK1BA. QSL via N5FF, direct or Bureau is OK. The purpose of the trip is not ham radio, so his operating will be very spotty and not extensive at all. Like last year, Saad hopes to be able to operate at least 3-4 hours a day. He thinks he will limit his operating to 20 meters, unless the propagation is better on the other bands (40-10 meters) at the time. Saad will work the Americas and Pacific early mornings local time, that's between 0100-0400z. Europe and Africa will be in the late evenings, that's between 1900-2200z, and possibly some afternoons, that's 1100-1400z. Saad will try to be around 14195 kHz on SSB, and 14045 kHz on CW, split listening 5-10 kHz up.

YS & HU1, EL SALVADOR. Operators Holger/DL7IO, Birgit/DL7IQ and Cisco/YS1CF will be active from various mountains, lakes, beaches, and ruins of El Salvador between March 24th and April 15th. They will be using YS1/homecall from the San Salvador area. There will be an entry in the CQ WPX SSB Contest using the special call HU1M. Activity will be on all bands 80-10 meters CW, SSB, RTTY and SSTV. They will also be active from Meanguera Island (NA-190) as YS3/homecall and from El Tigre (NA-060) as HR4/homecall. QSLs for all activities go via DK7AO.

ZL1AMO AIR AMBUKANCE FUND. Judy, AA7UC, informs OPDX that INDEXA has reached its goal of collecting 20,000 USD (40,000 NZD) for the "ZL1AMO Air Ambulance Fund"! They are also pleased to announce that INDEXA absorbed all administrative costs so that 100% of each donation went directly to the Fund. Judy also states the following, "Please express the gratitude

of INDEXA, ZL1AMO, and the Wright family to your subscribers. As always, in a time of great need, they and so many others in the DX/amateur radio community rose to the occasion in order to provide humanitarian assistance to a colleague in need. The camaraderie and fellowship that goes beyond the nuts and bolts of the hobby is what makes amateur radio truly unique!"

I would make the hole big enough to pass two coaxes through, and eliminate all kinds of possible problems. You might consider patching a piece of small diameter coax on to the FM lead where it goes through the hole. You will have to look this up, but I think RG188 is 75 ohms, and about 0.1 inch OD.

I looked it up, RG179 and RG187 (not 188) are 75ohm, but might be hard to obtain in small quantities. He would only want about a foot. Might be better to go with all 50 ohm stuff, with the amp, there's signal galore.

You might consider DXKeeper, a FREE full-function logging application:

- comprehensive set of logging fields consistent with ADIF 1.0

- intuitive, configurable Log Management window

- compact Capture window for real-time logging with navigation shortcut keys

- extracts operator data from the Radio Amateur's Callbook, QRZ, or Buckmaster Callbooks

- powerful searching and filtering (full SQL is available)

- based on Microsoft's Jet database engine (logs are Access-compatible and can be viewed and manipulated with Excel)

- tracks progress against DXCC, Challenge, TOPLIST, Continents, Zones, States, Counties, IOTA, and Grids (more coming)

- automatically identifies needed QSLs based on DXing objectives

- generates QSL cards or labels, and/or uploads in realtime to eQSL.cc

- addresses envelopes or generates envelope labels

- aging report identifies overdue QSLs

- supports operation from multiple QTHs within one DXCC entity

- supports operation from multiple DXCC entities

- robust ADIF import and export

- 32-bit implementation runs on Windows 95, 98, 98SE, NT4, 2000, and XP

- iterative approach to development yields frequent multiple releases available to all users

- strong, constructive user reflector at http://groups.yahoo.com/group/dxlab/

- automatically interoperates with other FREE DXLab Suite applications

* Commander for Icom/Kenwood/K2/TenTec/Yaesu transceiver control

* Pathfinder for QSL route discovery

* SpotCollector for spot capture and analysis from packet/telnet/IRC

* DXView for

> beam heading display on world map

> solar terminator display on world map

> DX spot display on world map

> one-click rotator control (ARSWIN/Heath/Hygain/M2/Yaesu)

* WinWarbler for 3-channel PSK31 and 2-channel RTTY from one user
interface

* Propview for

> graphical propagation prediction (using included IONCAP engine)

> active IARU/NCDXF beacon monitoring (QSY's transceiver on schedule)

DXKeeper and all other DXLab applications are available via
www.qsl.net/dxlab .

Hi,

P29KM seems to be the QSL Mgr for H44H.

Can someone give me is complete addresse (no mention on QRZ or buck).
Otherwise my last chance will be the 2003 callbook (when I will get it and
if it is listed).

Thierry

AMERICA AT WAR: HAM RADIO PREPARES

America's terror threat level has again been raised to "Code Orange." This in the wake of President Bush’s ultimatum to Iraqui dictator Saddam Hussein. And with our nation on high alert for terrorist attacks, Homeland Security Secretary Tom Ridge outlined a national plan Tuesday March 18th. One that he said would increase America's at-home defenses. Part of it is in the area of personal communications. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the latest on this and the way ham radio can be prepared:

--

The plan, which Homeland Security Secretary Tom Ridge has named Operation Liberty Shield heightens security at the nation's borders, airports, seaports and railways. It also provides additional security at nuclear and chemical plans along with protecting elements of the nation's food supply and distribution system.

As you have probably heard in other n ews reports, vehicles are again will be subject to random inspections on roads leading into and out of airports, sea-ports and similar facilities. Most of those who will making inspection stops are probably unaware of ham radio equipment and why hams have it in their cars. Akll they will sdee is a different kind of radio that they have never experienced before. So, for the forseeable future Amateur Radio operators would be well advised to carry a copy of their license with them if they are driving a vehicle equiped with an antenna array anyplace close to a high security area. Its much simpler to show you ham ticket to the inspector than to try to explain the hobby while a long line of cars behibd you are honking their horns.

Also suggested by Holeland Security is for every family put in place an emergency communication plan. This plan should be specific to a given family unit, understood by all of its members and practiced regularly.

Some experts have recommended that a family communications plan not be totally dependant on land based or cvellular telephones that can easily become overloaded in an emergency. Recommended are forms of personal radio including FRS and the new M.U.R.S. service. Families where all members are licensed radio amateurs have a definite advantage here. If your wife and kids are not yet hams, now might be a hood time to make getting them all tickets as a super high priority. Three places on the web you can find training information are www.arrl.org, www.w5yi.org and www.gordonwestradioschool.com. And gordonwestradioschool is one word.

Radio amateurs involved in civil defense and disaster preparedness should now be on high alert as well. Radio gear should be in tip-top shape, tested daily and H-T batteries should be maintained at full charge. Do the same spare battery sets. Also, have one or more sets of alkaline cells ready to go. If the power goes out you will have no way to quickly recharge your NiCad or NiMH packs.

If you belong to an emergency service group like ARES or RACES, make sure your leaders know how to contact you 24 hours a day, 7 days a week. Take part in regular any scheduled on-the-air drills so that you will be knife-edge sharp if your services are needed.

And if you have never had Emergency Communications training, don’t wait. The ARRL is the only national Amateur Radio group certified to provide you with the schooling you need and courses are available right now. As soon as this newscast is over we urge you to go to the League’s website at www.arrl.org and to sign up.

Meantime, the American Red Cross is urging families and individuals across the nation to make appropriate preparations. The relief agency suggests everyone follow the Red Cross Recommendations for the Homeland Security Advisory System. It’s on the web at www.redcross.org.

For the Amateur Radio Newsline, I’m Norm Seely, KI7UP, reporting.

--

We will have more on ham radio and its part in defending America against the threat of terrorism in future Amateur Radio Newsline reports. (ARNewsline™)

**

AMERICA AT WAR: PROTECTING THE NATIONS COMMUNICATIONS

With war now reality and the possibility of terrorism, leaders from the telecommunications, Internet Service Provider, satellite and cable industries have begun consideration of widespread recommendations to help restore communications services in the event of an attack on the nation’s communications infrastructure. Some of the recommendations were presented by members of the Network Reliability and Interoperability Council at its quarterly meeting March 14th at the FCC.

In developing what the group calls its best practices for service continuity and disaster recovery, the industry representatives identified and analyzed more than 200 such concepts. These cover a wide range of scenarios. And for the first time in the area of cyber security the communications industry has conducted a thorough assessment and analysis of its vulnerabilities.

The 56-member council vote on which recommendations to put in place will be completed on March 28th. (Published news reports)

HAM RADIO IN SPACE: ARISS TO CONTINUE WHILE SHUTTLES ARE GROUNDED

The grounding of America's Space Shuttles following the February 1st Columbia disaster has not had any major impact on Amateur Radio. Roy Neal, K6DUE, brings us up to date on whats happening in the shuttle program and with manned ham radio in space:

--

The announcements by NASA that its having Boeing build a new Orbital Space Plane and that it hopes to have the remaining Space Shuttles back in the sky by this fall signal a turning point for the space agency. It is telling the world that things are getting back on track.

But in there here and now there are still several months before full space operations resume. Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, says that ARISS is prepared for any eventuality.

According to Bauer, until the shuttles fly there will be less scientific work taking place on the International Space Station. This is because of the reduced on-orbit staffing of two member crews.

Bauer believes the most probable scenario for a crew change will be what we reported two weeks ago. That U-S Astronaut Ed Lu, KC5WKK and Russian Cosmonaut Yuri Malenchenko will fly to the I-S-S on a Soyuz rocket to become the Expedition 7 crew. But Bauer adds that Astronaut Mike Foale, KB5UAC, is a back-up for the crew -- also in training -- just in case he is needed. He also notes that Astronaut Pedro Duque, KC5RGG, who planned to use the ARISS equipment on the upcoming Soyuz transport flight, will now probably fly in the fall.

Baueer says that the only major setback for ham radio so far concerns upgrading the I-S-S ham station itself. According to KA3HDO, with the shuttles not flying, consumables like food and water are the highest priority items to be launched on the upcoming Progress re-supply missions. This means that the ARISS hardware that was planned to be flown this year will probably be delayed. The gear waiting for transport includes the Slow Scan Television equipment, plus Kenwood D700 and Yeasu FT-100 radios and the Naval Academy's P C Sat 2 ham satellite. Bauer says that this equipment will be kept ready for any upcoming transport flight opportunities to the I-S-S.

The good news: Bauer says that the opportunities for school contacts will remain at the same. Look for them at a rate of at least two a week. Maybe more if the Expedition 7 crew finds itself with extra free time.

Right now, it appears as if ARISS operation from the I-S-S will continue on as it has since operations resumed. This, as investigators on the ground work to determine what caused the Columbia to disintegrate as it attempted to land last month and get ready to return the rest of the shuttle fleet to service later this year.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE.

--

The only item not touched on by Bauer was open contacts with the ham radio public. These tend to occurr only when the crew has some unscheduled free time. (ARISS)

RESCUE RADIO: UK RADIO CLUB FIRE

Back on Earth, a radio club meeting is interupted by a fire. It happened in the U-K and Jeramy Boot, G4NJH, joins us from Nottingham Englanmd with the details:

--

The Bredhurst Receiving and Transmitting Society's quiz night on the 6th of March was interrupted by what all members present assumed to be a power cut. However, club member Terry Wheeler, G7MIM, went out to investigate and discovered that a fire had broken out in the room above the club. He calmly asked the members to leave the premises and the evacuation of the building took place in a swift, orderly and calm manner. Richard, G7PPE, tried to open the door of the flat above the club room where the fire had started as the occupant was still inside, but was unable to break down the door. Fire crews arrived in a matter of minutes and the occupant was rescued and taken to hospital. Jeramy Boot, G4NJH.

--

Jean Darley, G1DLL, the Secretary of the Bredhurst Receiving and Transmitting Society says -- and we quote: "It's never a dull moment if you're a member of our radio society." G1DLL is also now trying to find an alternative venue for the club to meet. (GB2RS)

**

RADIO LAW: ANTENNA PROTECTION - CALIFORNIA TRIES AGAIN

If at first you don’t succeed, try again. And that’s exactly what hams in California are doing as they try to convince the state legislature and the governor that its time to offer protection for their antennas and towers. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--
March 26th is the date for a legislative hearing on California's latest attempt to pass an Amateur Radio antenna protection bill. The ARRL Letter says that Assembly Bill 1228 was introduced February 21st by Assemblyman Bob Dutton. It has been referred to the Committee on Local Government for consideration.

ARRL Pacific Division Director Bob Vallio, W6RGG, and the League’s antenna expert Dean Straw, N6BV, are among those scheduled to testify on behalf of AB 1228. Several others also plan to attend.

Back in 2000, the California Legislature passed a bill incorporating the essence of PRB-1, but Governor Gray Davis vetoed the measure. At that time the Governor said his opposition stemmed from a lack of budgetary funds to complete the required studies and his personal belief that amateur antennas should be considered a local rather than a state issue. The earlier California measure had carried a price tag of between $70,000 and $100,000 to fund studies and a model ordinance that lawmakers required.

Organizers behind the current bill say the new measure, being called "The Emergency Communications Enhancement Act," will not carry any price tag. A copy of the current legislative proposal is available on-line the California State Legislature web site.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

So far, 16 states have incorporated the essence of PRB-1 into their laws or have approved Amateur Radio antenna legislation that includes minimum regulatory heights for antenna structures. (ARRL)

**

RADIO LAW: CALIFORNIA WORKING TO MOBILE CELL PHONE BAN

Still in the Golden State, a bill requiring cell phone users to use handsfree devices while driving has been adopted by a powerful California Assembly committee. Bill Pasternak, WA6ITF, has been following the story and has the latest developments:

--

The measure passed the California Assembly Transportation Committee on a 14 to 5 vote on Monday March 10th. This, after falling a single vote short of passage for the past two legislative sessions.

The bill's author is Assemblyman Joe Simitian, of Palo Alto. He has called the committee's approval the first step to saving lives on California roads and highways.

Under the Simitian's bill a first offense for using a cell phone while driving a motor vehicle would result in a mandatory $20 fine. Subsequent violations would carry a maximum fine of $50. Drivers could use handsfree cell phones without threat of a penalty.

The measure is exclusive to mobile cellular telephone use. It reportedly excludes all other forms of two-way radio communications. The bill now heads to the state Appropriations Committee for further hearings.

Reporting from near the city of Valencia California, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

If the measure eventually becomes law, California will become the second state to require handsfree use of cell phones by drivers. New York was the first back in 2001. (ARNewsline™ from various reports and sources.)

**

ENFORCEMENT: FCC ALLEGES NUMEROUS VIOLATIONS ONB MICHIGAN REPEATER

A pair of Michigan repeater operators have been told to cease operating their systems under automatic control. This, as the FCC launches an investigation into charges of several rules violations. The agency’s Daryl Duckworth, NN0W, has more;

--

Duckworth: “The Detroit District Director issued an order to cease autonmatic control of Amateur repeater station K5YHA to Sheri Gilbert and an order to cease automatic control of Amateur repeater station K5EKP to William Gilbert, both of Lupton Michigan. Both stations are under review by the Enforcerment Bureau for apparent violations of the Commissions rules inccluding inadaquite station control and deliberate interference.”

--

In a letter February 24th letter to the Gilberts, FCC Special Counsel Riley Hollingsworth alleges that numerous rule violations have taken place on the repeater. Also that the repeater is the source of interference to the K8GER system. He said that Violations on the repeater consisted of failure to identify by some users, use of false or misleading call signs by users and failure to have a control operator for the repeater. Hollingsworth alleges that back in January the Gilberts’ apparently turned the operation of the repeater over to a car rally. During that time several of these type of rule violations occurred for more than 12 hours during a two-day period.

The letters warns the Gilberts’ that that if they are unwilling or unable to prevent violations on their repeater, then their Amateur operator and station licenses will be subject to enforcement action by the Commission. This could include a fine, operator license suspension or station license revocation. The Gilbert’s have since informed the FCC that the repeater has been taken off the air. (FCC)

**

AT THE FCC: NOW WE HAVE COALS

The acronym laden Federal Communications Commission has added COALS to its dictionary. This, as the regulatory agency begins implementation of the Cable Operations and Licensing System by Report and Order on March 13th.

With COALS the FCC has expanded its electronic filing capabilities to make it easier for multichannel video programming distributors to submit applications, reports, and other documents. The FCC says that COALS also makes license and cable operational information more accessible to FCC staff. This in turn makes for more efficiency in monitoring spectrum usage and competitive conditions in the cable and multichannel video marketplace. The FCC adds that the introduction of COALS represents more progress in the FCC’s own modernization initiative. (FCC)

**

RADIO RULES: MEDIA OWNERSHIP HEARINGS

It looks like there will be more public hearings on media ownership restrictions. A Democrat on the Federal Communications Commission plans to hold two more hearings, sidestepping the wishes of the agency's Republican chairman.

Commissioner Michael Copps says he will hold hearings at the University of Washington in Seattle and Duke University in Durham, North Carolina. Copps is seeking public input on the F-C-C's review of whether decades-old media ownership restrictions are appropriate in a market altered by the growth of the Internet, satellite boadcasting and cable television.

FCC chairman Michael Powell had previously said that the hearing he held in Richmond, Virginia, on February 27th is all that's needed. Powell said that the agency has received 13 thousand comments from the public, most filed electronically. (FCC)

**

HAM RADIO CUDOS: PAUL HARVEY HONORS HAMS

Radio commentator Paul Harvey dchose Wednesday, March 19th to honor ham radio. In his broadcast, Harvey described radio amateurs as America's quiet warriors. He said that there are 700,000 of them who are unpaid, uncelebrated, civilian, radio operators, who are there during and after floods, fires and tornadoes. And says Harvey, after the 911 attack hams were indispensable in reuniting families.

It was a very unexpected salute to the nations ham radio community. You can find it on the web at www.paulharvey.com. Look for the show dated March 19th. (W6RCL)

**

CHANGING OF THE GUARD: MARC TONNA, F9FT, - SK

A pioneer in antenna design has passed on. According to a notice on thew A.F.T. antenna wwebsite, company founder Marc Tonna, F9FT died on March 2nd at the age of 91.

Way back in 1946, Marc Tonna revisited the design described by the Japanese searchers Yagi and Uda in 1926. Tonna brought to the Yagi improvements that made his antennas famous among the radio-amateurs, as well as in the field of the then uprising commercial TV. He later went on to become the co-founder of the company Antennes Tonna which today is known as A.F.T.. (AFT)

**

NAMES IN THE NEWS: NEW ARKANSAS SM

Dennis Schaefer, W5RZ, has been appointed as the new Arkansas ARRL Section Manager. He succeeds Bob Ideker, WB5VUH, who first served as Section Manager from 1991 through 1995 and who returned to office in 2001.

And heres where it become rather uinteresting. Ideker had decided to not run for another term. Eldon Bryant, K7ZQR, was elected to replace him. But Bryant later decided not to assume the office and Schaefer was named as his replacement.

Schaefer’s term begins on April 1st. Arkansas ARRL members -- or anyone elser can contact him by e-mail to w5rz@arrl.org (ARRL)

EMERGING TECHNOLOGY: CALL IT MC INTERNET

Hungry? You may soon get a surprising bonus when you dine at the Golden Arches. This, with word that McDonald's restaurants in three U.S. cities will be offering one hour of free high-speed Internet access to anyone who buys a promotional meal.

Ten McDonald's in Manhattan New York began offering wireless WiFi, or 802.11b, Internet access on Wednesday, Matrch 12th. By the end of 2003 McDonald's plans to extend the access to 300 restaurant locations in New York City, Chicago and a yet to be announced California city. Window signs will alert customers to which restaurants have WiFi wireless access. After using the hour of free access that comes with a meal, customers can pay $3 for another hour online or get more time by purchasing another extra value meal

Besides McDonald's, Internet surfers will also be able to tote their laptops to 400 U.S. Borders book stores, hundreds of hotels and a pair of U.S. airports

where WiFi access will be available this summer. (Published news reports)

**

SPACE AND SCIENCE: MORE ON SETI@HOME

Last week Amater Radio Newsline’s Henry Feinberg, K2SSQ, brought you the latest news on a project called seti@home. Henry is back this week with some background on the project and how it got stasrted:

--
SETI@home first offered its screensaver to the world in May of 1999 as the first example of wide-scale distributed computing. Its aim was to link idle computers through the Internet to tackle large computational problem involved in searching for intelligent signals from space.

The key to its success was the collaboration between two people who would become the principal architects of the project. David Anderson is a computer scientist who was one of the principal developers of distributed computing. Dan Werthimer is a physicist with two decades of experience collecting radio data and parsing it in search of unusual signals from space. Together, they have drawn in not only the computer community, but many others as well. This includes thousands of ham radio operators interested in offering use of their spare computer time to benefit worthwhile projects.

Werthimer, who serves as chief scientist for SETI@home has conducted his own Search for Extraterrestrial Intelligence for the past 24 years. For 11 of those years he has been able to use the giant 1,000 foot diameter radiotelescope at Arecibo Puerto Rico to look again at promising locations and frequency ranges. This, to determine if a strong radio signal is more than random noise or a transmission from an orbiting satellite.

So far no luck but Werthimer is not disappointed. This is because SETI@home has mobilized so much more computing power than has ever before been thrown at signal analysis. Also, the team has been able to perform much more detailed and complicated computations on the radio data than now possible with Werthimer's own ongoing SETI project, called Search for Extraterrestrial Radio Emissions from Nearby Developed Intelligent Populations. Thats SERENDIP IV for short.

What is important is that SETI@home has performed the most sensitive and detailed SETI sky survey to date. It has also demonstrated the power of the Internet for doing scientific distributed computing, and has allowed the general public -- and the ham radio communuity to participate directly in an exciting research project.

And the success of SETI@home has also spawned numerous other distributed computing projects. These include Folding@home -- a distributed computing project to calculate the three-dimensional structure of proteins and climateprediction.net to improve scientific forecasts of 21st century climate. And scientists say that there is more to come.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

So far, 4,287,000-plus users have lent thir spare computing time to analyze radio data for the SETI@home team. You can become a part of the project by taking your web browser over to http://setiathome.ssl.berkeley.edu. And if you missed that U-R-L you will find it in the print edition of this weeks amateur Radio Newsline report. (W6RCL, Published Reports)

**

DX

In D-X, word that A35KB has gone QRT -- probably for good! Paul Kidd, A35RK, told the Ohio Penn D-X newsletter that he hasn't heard Father Kevin Burke, A35KB, on the air for some time. So, last week telephoned Father Kevin only to learn that he is very busy with his duties as parish priest on the Island of Eua. Because of this, he is no longer able to operate on the radio, has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon. Nor can he any longer respond to QSL requests. (OPDX)

On a brighter note for D-X’ers, the OPDX also reports that SP9FIH will be active from Tonga through April 14th. He already has verbal permission to operate and his license will be given to him after arrival on the island. Activity will be SSB on 80 through 10 meters including the WARC Bands. QSL to P.O. Box 480, 44-100 Gliwice, Poland. (OPDX)

And lastly word that Meanguera Island in the Fonseca Gulf will ba activated by DL7IQ, DL7IO and YS1CF from march 27th to the 28th as HU1M. Modes used will be SSB, CW, SSTV and RTTY. On the 29th and 30th the same call letters will be from San Diego Beach El Salvador. Full information is on the web at www.dl7io.de. (The’ Modern DX’er)

**

THAT FINAL ITEM: SWLFEST 2003

And finally this week, hams are not the only radio hobbiests who get together at conventions. Shortwave listeners recently had a major get-together in Pennsylvania that saw guests and presenters from around the world. Steve Coletti of WBCQ was among them and has this in-depth report on SWL Winterfest 2003:

--

The listening side of the radio hobby made its 16th pilgrimage through the snow to the little town of Kulpsville, PA., for the annual SWL Winterfest hosted by NASWA. Although SWL stands for short wave listeners, the fest activities cover DC to daylight as again there were the usual demonstrations of overseas TV via satellite, the activities of the group who we affectionately call the "Scanner Scum", and a demonstration of DRM, the European digital shortwave broadcast standard by Jan Peter Werkman of Radio Netherlands, James Briggs of Merlin Communications and Kim Elliot, KD9XB, of the Voice Of America with additional help of a PC loaned by attendee Eric Cottrell, WB1HBU, to decode the broadcasts beamed specifically to Kulpsville.

This year, Bill Whitacre of the International Broadcast Bureau, parent of the VOA and other US international broadcast ventures, was able to schedule it's annual meeting of radio monitors to coincide with the Winerfest and 26 professional listeners from around the world joined the crowd in Kulpsville to explain that their job was more than just making sure that the signal was heard in the target area.

Although the Fest has been a listener only event, over one third of the attendees every year are hams and this year new ground was broken as Skip Arey, N2EI, ran an introduction to Ham Radio forum. Not only the first time for this discussion, but it was also one of two first time evening forums held on Friday night.

The international broadcasters were represented this year by Adventist World Radio and Radio Free Asia in the forums as well as live broadcasts over WBCQ. In addition to some regularly scheduled programming that went remote on Friday night, WBCQ had a Saturday marathon broadcast by the station's engineering magician, "Tim Tron" Smith, WA1HLR.

Other forums featured reports on listening tips, a summation of a DXpedition to Australia, and a report on overseas SWL group, the European DX Council's annual meeting.

Last year, Bob Zenotti, HB9ASQ, co-host of the now gone Shortwave Merry-Go-Round on Swiss Radio International made his first appearance at the fest as a guest speaker. This year he came on his own as regular attendee.

--

Zenotti: “This is one of the best ones I can remember. Great bunch of people, fantastic discussions, and a lot of excitement here….and very little sleep.”

--

The fest was not without it's humor. The hotel has the Stockholm, Copenhagen, and Oslo meeting rooms. In honor of the delegation from Finland that attends every year, the hosts of the event, Richard Cuff and John Figliosi, unofficially named the fest's hospitality suite, the Helsinki room.

For the Amateur Radio Newsline, I’m Steve Colletti a-k-a Big Steve Cole of WBCQ Radio reporting fot the Amateur Radio Newsline.
--

The 2004 S-W-L Winterfest is slated a year vfrom now on March 12th to the 13th at the same venue. You will find lots more about it on the web at www.swlfest.com. (Strve Coletti for ARNewsline™)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th/March, through Sunday, 23rd/March there were 228 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V7, V8, VE, VK, VK9N, VP2V, VP5, VP6, VP8, VP8/h, VQ9, VR, VU, XE, XT, XU, XW, YB, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3XY, GUINEA. Leo, UT1WL (a member of Lviv Shortwave Club regional branch of UARL) is currently working for one of the companies in Conakry in the

Republic of Guinea. He obtained the license from the local authorities (as of March 16th) to operate as 3XY1L. He is expected to be active during the year 2003. This is not a DXpedition, and he will be active only during his spare time on the weekdays after 1800z and probably in the daytime during the weekends. Most of his activity will be on 20 and 15 meters. However, he will later try to activate 40 meters. Over the past week, he was mainly on 20 meters (watch 14195 and 14210 kHz) and activity took place between 2000-0000z. There were a few QSNs reported on 40 and 15 meters. Leo is using a TS-50S transceiver on battery power due to the hard situation with electricity. During his stay there, Leo will try to activate some local islands (including some new IOTAs - AF-NEW) but the exact dates will be announced later on. QSLs should be sent to UY5XE: George Chlijanc, P.O.Box 19, 79000, Lviv, Ukraine (either direct or via the bureau). A special thanks to Branko, YU1FW, for his consultations on the info about obtaining the license in Guinea.

4L, GEORGIA. Look for Shota, 4L6AM, to be active in the CQ WPX SSB Contest as a Single-Op/Single Band (band not mentioned)/High Power entry. QSL via the address on QRZ.com.

5Z4, KENYA. Tom/DL2RUM (5Z4BL) and Jan/DJ8NK (5Z4BK) will be on a vaction trip from here, March 30th to April 12th. Activity will be on CW/SSB/RTTY. No activity on 160/30/6 meters. QSL via their home callsigns.

9K, KUWAIT. Faisal, 9K2RR, is expected to use the new contest club callsign 9KCC next weekend. Activity for this new callsign is planned to be used on March 23rd on CW/SSB on 15 meters between 1200-1600z. More details about the new contest club can be found on the Web page: http://www.qsl.net/9kcc and http://www.9kcc.com

C5, THE GAMBIA. Andrius, LY2TA, will be active as C56TA from March 25th to April 7th. Activity will be on 160-10 meters SSB/CW/RTTY. QSL via LY2TA: Andrius Ignotas, P.O.Box 15, Kursenai, LT-5420, Lithuania.

C5, THE GAMBIA. An international group of operators LY2TA, RA4HTX, RZ4HF, YL1ZF, YL2KL and YL3CW will be active as C5P in the CQ WW WPX SSB Contest (March 29-30th) and EA RTTY Contest. Their operating class is unknown. QSL via YL2KL. The group will be there for 2 weeks from March 25th through April 7th and will use the following callsigns: YL2KL - C53KL, YL3CW - C53CW, YL1ZF - C53ZF, LY2TA - C56TA, RZ4HF - C56HF and RA4HTX - C56HTX. They will be active CW/SSB/RTTY on all HF bands.

C5, THE GAMBIA (Lighthouse Activity). Kas, YL1ZFI, one of the international operators from the operation above, plans to be active from Fort James Island and also activate the lighthouse there (reference GAM-002). To indicate that he is on the island, Kas will sign /p to his Gambian callsign C53ZF. If you hear him without the /p then he is located at the hotel in Banjul and not on the island.

CQ9, MADEIRA ISLAND. Operators CT3EE, CT3BD, CT3DL, CT3IA, CT3IQ, CT3EN, CT3KU, CT3KY and CT3HK will be active as CQ9K in the CQWW WPX SSB Contest (March 29-30th) as a Multi-Single entry. QSL via CT3EE or CT3BD or CT3DL.

The station is located in Santo da Serra- Madeira Island and is composed of 1 FT 1000D, 1 FT1000MP, 1 TS 870, 2 IC756PROII, 2 Ameritron AL1500, 1 Commander, 1 Heathkit 922 Antennas: 2x3 Elem. Tribander, 1x6 element for 20m, 1x2 element for 40m, 2 dipols for 40m, 2 dipols for 80m, and a Delta loop for 80m.

CS6, PORTUGAL. Look for CS6RPA to operate as a Multi-Single station during the CQ WPX SSB Contest from Mendro Mount in Alentejo, South Portugal. This is a TEAM PORTUGAL joint effort by ARPA (Associacao Radioamadores Planicie Alentejana) and CRCV (Club Radio Costa Verde). The club station of ARPA will be used, including two Cushcraft A4S and a 40/80 m dipole. TEAM PORTUGAL this year is: CT1EAT, CT1ERK, CT1ETE, CT1GQN and CT2IAF. QSL cards should be addressed to CT1EAT direct or via bureau.

DXCC (EARLY) LISTING AVAILABLE. The DXCC 2002 Annual Report is now available on the ARRL web site at:
http://www.arrl.org/awards/dxcc/listings/2002-annual-list.pdf
The report is in Adobe Acrobat format, and you will need Acrobat Reader 4.0 or later to read it.

EA8, CANARY ISLAND. Richard, EA8AJO, is expected to be active in the CQ WPX SSB Contest as a Single-Op/All Band entry. QSL via CBA.

EA9, CEUTA AND MELILLA. Jim, N6TJ, will be active as EA9LZ during the CQ WPX CW Contest as a Single-Op/All Band entry. QSL via VE3HO (this operation ONLY).

FO, FRENCH POLYNESIA. Jean-Baptiste, F8DQL, will be active as FO/F8DQL from Tahiti (IOTA OC-046 and DIFO FO002) between May 3-25th. This will be a CW ONLY activity. Jean-Baptiste has also planned a several day trip to Moorea (IOTA OC-046 and DIFO FO010) whose dates will be provided later on. Suggested frequencies are: 14030, 21030 and 28030 kHz (+/- QRM). QSL via F8DQL to the French REF Bureau or direct to: Jean-Baptiste JACQUEMARD, 241, Boulevard Voltaire, F-75011 Paris, FRANCE. Direct QSLs without sufficient postage will be answered by the bureau.

FY, FRENCH GUIANA. Didier, FY5FY, will be active in the CQ WW WPX SSB Contest (March 29-30th) as a Single-Op/All Band/High Power entry. QSL via FY5FY.

HC8, GALAPAGOS ISLANDS. HC8N will be active during the CQ WPX SSB Contest in the Multi-Multi category with the following operators: N5KO, XE1KK, NM5M, KI7WX, OH0XX, K5KA and LU8ADX. Pre-contest activity will begin on Monday, March 24th on all bands from 160-6 meters plus FM Sats. QSL via W5UE.

HU, EL SALVADOR (Update to OPDX.603). Holger, DL7IO, informed OPDX that he and Birgit/DL7IQ will use the callsign HU1M for the whole time they are there (March 24th-April 11th and not only for the contest). Their contest effort is planned for a Multi-Single entry or possibly a Multi-2 entry if they get help from some local HAMs. On the weekend of April 5-6th, they will be active from Meanguera Island (NA-060) as HU1M/3. The schedules for the HR4 Island (Amapala Island) is not confirmed yet. Also, the callsign is not sure yet. Holger asked for HQ4M and the decision was expected last

Wednesday, however, nothing was heard as of print time. If the callsign is denied, they will use HR4/homecall. They will have two radios (FT890) and 1x PA (500 W). Antennas will be: a beam for 20-10m, a HF9V vertical (80-10m) and dipoles (160/80m). They will be active on 160-10 meters on CW, SSB and RTTY. Holger cannot promise SSTV. The QSL route will be DK7AO. A log search will be available after their return. ADDED NOTE (from Holger): Germany had a change in their postal rates. For small letters (to outside Europe destinations) there is no difference between airmail or surface mail charges. Every letter costs 1.50 Euro. So it needs 2 green stamps or better one IRC. Letters mailed inside Europe are cheaper now and cost 51 Eurocent.

IOTA (XE) OPERATIONS. Look for a group of operators from Radio Club Cancun (RCC) to activate a few Mexican IOTAs using the callsign XF3RCC during the first part of April. All activity will be on 160-10 meters CW/SSB/RTTY. Their expected schedule is as follows:
Cozumel (NA-090) - April 3-6th Mujeres (NA-045) - April 8-11th
Holbox (NA-045) - April 6-8th Contoy (NA-045) - April 11-13th
Their operations are to celebrate the first anniversary of the RCC. QSL via XE3RCC: P.O. Box 1883, Cancun, Quintana Roo 77500, Mexico

IOTA NEWS.....
AF-018. (UPDATE) Operator Giuseppe "Joe", IT9BLB, informs OPDX that he and the International team will activate Pantelleria Island (CQ Zone 33, IIA TP-01 and WAIP TP) as IH9P during the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-Multi entry. Joe states that it will be the 6th time to be active from there (IH9P M/M since 1998). The team usually stays on the island for about 8 days before the SSB contest, operating during their free times. Pre-contest testing times will be on all WARC/HF bands, on CW and RTTY. QSL via KR7X. More details will be forthcoming closer to contest time. Please visit the Web page at: http://www.ih9p.com/

AF-064. (Update to OPDX.596) Robben Island is listed amongst the top 500 most wanted IOTA groups in the latest IOTA Directory. There have been several fairly low-key operations in recent years, mainly on SSB only. The team, consisting of Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, has been allocated the special callsign ZS1RBN. Additionally, the lighthouse on the island counts as SAF023 for the Amateur Radio Lighthouse Service (ARLHS). The team plans to activate the island between April 4-7th, and, propagation permitting, have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 40-10 meters. QSLs will be handled by G3SWH, either direct to his CBA with SAE and return postage or via the RSGB bureau.

AS-017. (Update) Look for Nobu, JQ1EYN/6, to be active from the uninhabited island of Komaka Island (next to Okinawa, which takes about 15 minutes to get there by the express ship). If

the WX is bad, he will not be able to reach the island. His activity will take place April 27-28th (possibly the 29th) on CW/SSB on all bands including 6 meters. Main frequencies will be: 21260 kHz (SSB) and 7030 (CW). He will use a FT-817 with a 50w PWR AMP and portable generator. Antenna will be a Delta loop (wire)+ATU(icom AH-4). QSL via the bureau or direct to: Nobuhiko Hiruma, Engel Kawasaki Glandia 1405 higasida-chou, Kawasaki-ku KAWASAKI city KANAGAWA, 210-0005 JAPAN.

AS-125. Winit, HS1CKC (HSDXA's preasident), has announced a mini DXpedtion to Chang Island in the southeast part of Thailand during April 5-7th. The callsigns to be used are as follows:
HS0GBI/P 80m and 40m CW QSL via CBA/Bureau
HS1CKC/P High band SSB QSL via CBA/Bureau
E20HHK/P High band CW QSL via E21EIC
Operating frequencies will be on the IOTA frequencies. The operators will include: HS0GBI, HS1CKC, E20HHK, HS9IFG, E20NTS, E20RRW, HS0NNU, HS6MYW, HS6TIM and E21LSE.

EU-025. Giuseppe "Joe", IT9BLB, will be active from Sicily Island as IU9S during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/Single Band (20m)/High Power entry. QSL via IT9BLB.

EU-051. Members of the "Project DX Team" (Ari Lomazzo), which includes operators Andrea/IK2XDE, Giovanni/IK2JYT, Antonio/IK2ZJR, Dario/IK4MED and Angelo/I2ADN will activate Ustica Islands (IE9, IIA PA-001 and WW. Loc. JN68OR) between March 26th and April 1st. Activity will be on all HF bands 80-10 meters plus 50 MHz and Satellite, on SSB, CW, RTTY, PSK31 and some SSTV. The callsigns used during their activity will be IE9/homecall (this also includes their activity in the CQ WPX SSB Contest). During the week they will concentrate their activity on the WARC bands and also on the digital modes. So, this is your chance to work the IE9 prefix on all bands and modes. All QSLs will be via their home callsign for sure via the BUREAU.

EU-124. The North Wales Radio Rally Club, Bardsey Island Lighthouse DXpedition 2003, will take place from August 17-23rd. They will be using the callsign GW0NWR/p. Operation will be on 80-6 meters SSB and CW. The Lighthouse references numbers are LH-0685 for the World Lighthouse Award and WAL-001. QSL via GW0DSJ: E. Shipton, 34 Argoed, Kinmel Bay, Rhyl, Conwy, LL18 5LN, Wales, UK (w/ IRCs or return envelope with postage paid).

OC-242. A group of YB operators will be active from Rajuni Island, as YE8A. QSL via YB8BRI. They hope they will be active during next weekend's WPX SSB Contest. More information will be available during the operation. Frequency Band plan can be found on Web at:
http://www.ok1jr.com/ye8a/ye8a-rajuni-island-oc-242.htm

KH2, GUAM. Yoshi, JE2EHP, will be active from here as K1HP/KH2 between April 11-14th. Activity will be on 80-6 meters CW/SSB. QSL is via the Bureau to JE2EHP.

KH3, JOHNSTON ISLAND. John, KT6E, will be here for the next several months. Reports indicate that he is using just 100 watts with a long wire and has been worked on 20 SSB. QSNs show him signing KH3/KT3E and active on 14185 kHz around 0615z. John is there working, so his operating time will depend on his work schedule. "The Daily DX" is reporting the QSL address of: John Lee, PO Box 153, APO AP 96558 Johnston Atoll.

MU, GUERNSEY. Members of the Scouts Radio Club SP5ZCC (Operators SP5UAF, SP5LCC, SP5MBQ and SP5ULC/M0ULC) will be active from Guernsey Island from April 2-8th. This operation is organized to celebrate 23 years of the Scouts Radio Club SP5ZCC and also 70th Anniversary of the SP DX Contest. The callsigns to be used: MU/SP5UAF, MU/SP5LCC, MU/SP5MBQ and MU0ULC. The callsign MU0ULC will be used during the SP DX Contest. SPDXC is a single-country contest (SP HAMs work stations outside Poland), but all callsigns will be answered. Before and after the contest, operators will be active on all possible bands and modes. All QSL cards (for all callsigns) go via SP5ZCC (the best via the bureau).

OY, FAROE ISLAND (DXpedition Update). Rob, PA5ET, reports that thanks to a strike at SMYRIL LINE (the ferry line between Denmark-Shetland Islands-Faroe Islands) they had to change their planned OY activity. They are currently planning to go one week later which means they will arrive in the early morning of Monday, March 31st and stay until April 10th. Unfortunately, they will miss the CQ WPX Contest. The published callsigns will remain the same: OY7ET operator PA5ET, OY7QA operator PA3FQA, OY7TW operator GM4FDM, OY7WB operator AK0A, OY7WP operator PA3EWP and OY8PA for 160 meters and probably digital modes. On 80 meters they will be using their individual callsigns in contradiction to earlier announcements. They will have 3 stations with amps with one to be dedicated to digital modes. During the dark periods, they will mainly be active on 80 and 160 meters. You can expect lots of digital mode activity on the WARC bands, so this is your chance to fill the OY gaps on all bands and modes. All QSLs will be handled by the LLDXT QSL Manager PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. They hope to upload logs on daily basis using cellular phones. The latest developments can be found on the LLDXT web-site: http://www.qsl.net/lldxt Currently, they are working on a back-out plan if the strike is still on next week, and will go to the Isle of Man.

P3, CYPRUS. Operators RA9JX, RZ9UA, UA9UR, RW9UP, RW4WR, RA0AM, RZ9OA and UA9OTM will be active as P3A during the CQWW WPX SSB Contest (March 29-30th) as a Multi/??? entry. QSL via W3HNK.

QSL INFO AND NEWS.....
DO NOT QSL VIA THE BUREAU. Floyd, N5FG, informs OPDX that N5AU will not answer Bureau cards..

QSL H44H via Kazuo Miyamura, P.O. Box 321, Port Moresby, PAPUA NEW GUINEA.

Oscar, HK6DOS, informs OPDX that the QSL Manager for HK6DOS, HK6KKK, HK6ISX and HJ3ISB is Pepe, EA5KB. Also, the QSL Manager for HK6PSG is Paco, EA5OL.

QSLs for the Caribbean Tour 2002 J7/VP2M have been mailed this past weekend per Rob, PA5ET.

Online logs are now available for JS6QVP and JS6QVQ from the IOTA AS-047 Daito Island operation at:
http://www.aa.alpha-net.ne.jp/ji5rpt/as-047/search-j.html

K1B QSL REMINDER. Dave, K4SV, K1B North America QSL Administrator, K1B Team member (as KW4DA), wants to remind everyone that K1B QSLs can be sent to Stephen, K4YL (direct ONLY, NO BUREAU QSLS). They have put about 2000 QSL requests in the mail so far, and they receive an average of 25 QSLs daily from all over the world. Please keep them coming, it's working! Please contact Stephen, K4YL, the new K1B QSL manager, (if you have any special requests) at: K4YL@highstream.com
Stephen will do all he can to help you in obtaining all K1B QSL cards. Send your direct requests to: Stephen Grose, K4YL (ex W4SMG), PO Box 183, Flat Rock, NC 28731-0183, Their goal is to get everyone QSLed for K1B who has not received their cards. Please remember:
USA - send SASE.
DX - send SAE, one Green Stamp preferred or one Large IRC accepted.

NOT THE QSL MANAGER. Chuck, N1NA, reports that he has been receiving QSL Cards for PJ5NA, and he is NOT the QSL Manager nor the operator of PJ5NA. The correct QSL Manager is K1NA.

PS7AHR is the official station of "The Brazilian Amateur Radio Historical Archive", the only organization in Brazil that is devoted to documenting and preserving the history of amateur radio in Brazil. QSL via the Bureau, or P.O. Box 2021, Natal/RN, 59094-970, Brazil.

QSL SO6A via SP6IHE. Jan, SP6IHE, states this is a special contest callsign.

Activity as TG0AA in the 2003 ARRL International DX CW Contest was done by operator Dennis, K7BV. QSL direct to: Club de Radioaficionados de Guatem ala (CRAG), P.O. BOX 115, CORREO CENTRAL, GUATEMALA CITY 01011, GUATEMALA. Their Web page is at: http://www.iaru.org/iaru-soc.html

Vasilij, RW6HS, reports that he is now the QSL Manager for: UN7MM, UK8CAD and UK8CWA.

It was announced (by Kan, JA1BK) last week that the VP6DIA logs will be available on-line sometime after March 22nd, when QSL Manager Yuichi, JR2KDN, has returned to Japan from Ducie.

S05, WESTERN SAHARA. Operators Marq/CT1BWW, Fernando/EA1BT, Juan/EA2RC, Julio/EA5XX, Max/I8NHJ, Jordan/KD7RCD, Doug/N6TQS, Hrane/YT1AD and Miki/YU1AU will be active as S05X from April 16-21st. Activity will be on 160-6 meters. QSL via EA4URE. Toni, EA5RM, URE Magazine DX Editor, will act as pilot station. Any questions or comments can be sent to him

at: ea5rm@ure.es Log will be posted at after the team returns
back home at: http://www.ure.es

SPECIAL EVENT. Look for the special callsign, EW5HST, to be active during the "5th World High Speed Telegraphy Championship", which is to take place in Minsk, Belarus, on May 4-8th. For the moment, the callsign, EW5HST, will be used by the Championship's organizers. The "CW ONLY" station will be active around 1800z on the weekdays and at random (but longer times) on the weekends. The expected frequencies are to be around 30 kHz from any band edge; 14030 kHz will be used mostly. Any question regarding the Championship can be asked during any QSO. QSL via EU1SA. Details of the Championship can be found on: http://hst2003.osto.by/

SPECIAL EVENT. Sam, VE3XAP, informs OPDX that the Industry Canada has authorized the use of the following "Special Event Prefixes" to celebrate 50th Anniversary of the National Library of Canada between May 24th and July 27th. Look for Canadian operators to change their prefixes as follows:
CK for all VE's CY for all VO's
CJ for all VA's CZ for all VY's

ST2, SUDAN. Claudio, IV3OWC, has been very active as ST2CF over the past week and will continue until March 31st. Activity over the past week has been on 40/20/17/15/12 meters. Watch 24945, 21295, 18145, 14195 and 7048 kHz. Look for him to be active in the CQ WPX Contest. Also, check out the following Web page for more details at: http://www.irae2.com

ST0, SUDAN. The ST0RY team continues to be active. Activity has been heavy on the lower bands and the WARC bands, mainly CW with some RTTY and very little SSB. Three of the five operators are CW operators. They expect to leave the evening of April 2nd. For updates, watch the Web page at: http://www.qsl.net/st0ry

TO3, MARTINIQUE. Danny, T93M, will be active from March 25-31st from the QTH of Laurent, FM5BH, on Martinique (IOTA NA-107) as FM/T93M. Activity will include an entry in CQ WPX SSB Contest in the Single-Op/All Band/ High Power category using the special callsign TO3M. Outside of the contest, you can expect him on the WARC and Low Bands. QSL for both callsigns goes to DJ2MX who recently moved to this new address: Mario Lovric, Kampenwandstrasse 13, D-81671 Muenchen, Germany. Mail sent to the old address (Mario Lovric, Am Oelberg 11, D-61231 Bad Nauheim, Germany) will be forwarded until April 2004.

V3, BELIZE. Jay, K0BCN, will be active from Caye Caulker (IOTA NA-073) as V31MX during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/ Single Band (15m)/Low power entry. QSL via K0BCN.

V6 & V7, MICRONESIA AND MARSHALL ISLAND (Update/Delay). Jeffrey, KI0RO, reports, "Due to inclement weather, my departure from Denver, Colorado, has been delayed. As a result, I will be arriving in each location a few days late. However, due to airline availability, I will be staying a few days longer in both Kosrae and Pohnpei." Here are the new dates for Jeffrey's IOTA operations:

Roi-Namur (OC-028) - March 26-31st as V73/KI0RO
Kosrae (OC-059) - April 2-7th as V63JE
Pohnpei (OC-010) - April 9-14th as V63JE
All the other information in OPDX.603 is still valid.

VK9X, CHRISTMAS ISLAND. Four members of Yamato ARC (JA1ZEK) will be active from here between April 26th and May 2nd. They will be on all HF band from 160-6 meters CW/SSB/RTTY. They will have two 400 watts amplifiers with four rigs. Operators and their callsigns are: VK9XC - Karl/JA3MCA, VK9XE - Kuni/JA8VE, VK9XK - Sasi/JA1KJW and VK9XY - Mat/JA1JQY. Their suggested frequencies are:
CW - 1822, 3507, 7007, 10007, 14007, 18077, 21007, 24897, 28007 and 50110
SSB - 3799, 7080, 14170, 18130, 21270, 24940, 28470 and 50110
RTTY - 14080 and 21080
6m beacon will be on 50.110MHz
QSL via each operator's home callsign as follows:
JA3MCA - Tachibana Kaoru, 1-7-5-403 Tsukimino, Yamato, 242-0002 JAPAN
JA8VE - Saito Kunio, 2-26-5-554 Nishitsuruma, Yamato, 242-0005 JAPAN

ZW2, BRAZIL. Sergio "CRIS", PY2TV, will be active in the CQ WPX SSB Contest using the special callsign/prefix ZW2TV from Sao Paulo, Brazil. He will be Single-Op/Single Band (10m)/ Low Power entry. QSL via the bureau or direct to PY2TV (SASE+postage).

ZW90, BRAZIL (Special Event/Callsign). Paul, PY3DX, Club Director of the "Associacao De Radiomadores", reports that their club station, PY3ARD (AR SOGIPA, from southern Brazil), has obtained from the Brazilian Telecom the special callsign ZW90S throughout the year. The callsign is to celebrate the 90th anniversary of the 001RS - Gerge Black Scout Group that was created back in 1913 and is consider to be the oldest Scout Group in Brazil with uninterrupted activities ever since. The club will take part in the upcoming CQ WPX SSB Contest and will use the callsign for the very first time. QSL both callsigns, PY3ARD and ZW90S, via the bureau or direct to:
Associacao De Radiomadores da SOGIPA, Rua Barao do Cotegipe, 400,
90540-020 - Porto Alegre, RS BRAZIL.

Just ignore all the Japanese characters. The box where you enter your call has a label in English and the search result is also in English.

563. Sudan story...

Newsgroup: rec.radio.amateur.dx
Date: 2003-03-28 13:40:24 UTC
From: Doug Smith W9WI <w9wi@invalid.invalid>
Message-ID: <3E845634.70109@invalid.invalid>
Source record: 10697

So, I've been following the habits of ST0RY on DX Summit, and occasionally listening to the pileups. And occasionally giving a call or two, but the propagation when I've been on hasn't favored the U.S. (for example, listen for 30 minutes & hear them work only one W) Not their fault - I'm just not on at the optimum times, and propagation is not all that good.

Yesterday, I was home sick from work and, around 2300z, decided to scan the bands & see if they were any stronger at that hour. Couldn't find 'em anywhere. Until...

I hit 17 meters. A few RTTY signals up at the top, nothing at the bottom. Except this really, really weak signal calling CQ. And signing -- ST0RY. ESP-weak, but there. Thought he said "UP 2" so quickly set the other VFO & dropped in my call - he calls CQ again. Oops, he's saying "UP *3*". Reset the VFO - too late to call this time, he's CQing yet again. Call again - "??" Hmmm, could he have possibly heard me? Dump in my call twice more. "W8MI??"

To shorten a story that would have been a lot shorter anyway if my amp worked<grin>, after about six attempts they got my call right & we went into each other's logs.

He proceeded to call CQ for another 2-3 minutes - and worked absolutely *nobody* else. (remember, I *was* sick - by the time I could get to the den & launch an Internet connection & put him on the cluster, he'd have been long gone anyway...)

So, this morning I feel a whole lot better than I did this time yesterday. For two reasons. And if you know anyone in the ST0RY expedition, please tell them to congratulate whoever was working 17 CW early this morning. He can hear *VERY* well.

Amateur Radio Newsline™ Report 1337 March 28, 2003

Amateur Radio Newsline report number 1337 with a release date of Friday, March 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Keeping a repeater on the air in New Zealand could become very expensive and Australia considers complete restructuring of its Amateur Radio service. Find out the details on Amateur Radio Newsline report number 1337 coming your way right now

(Billboard Cart Here)

**

RADIO REGULATIONS: NEW ZEALAND MAY START REPEATER LICENSE FEES

Ham radio operators could soon be paying a lot of money to keep a repeater on the air in New Zealand. This as government regulators down-under look at instituting a new license fees that could make keeping a system on-the-air prohibitive for many clubs that sponsor multiple machines. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland New Zealand with the rest of this breaking story:

--
NZART stands for The New Zealand Association of Radio Transmitters and it is the official national ham radio society here in New Zealand. It also functions much the same as the ARRL in the United States and is a member of the International Amateur Radio Union.

NZART has received proposals from government telecommunications regulators that could cost hams in this nation a lot of money just to stay on the air. What the New Zealand regulators want to do is go to lifetime licensing with a one off license payment, That's the good idea. But there is more.

Regulators have also proposed fees for repeater and beacon licenses that are just plain unacceptable to NZART or the New Zealand ham radio community. Right now there is no repeater or beacon license fee. Under the proposed revision, there would a NZ$250 initial fee to put a one on the air and an on-going annual NZ $200 charge per system to keep it on the air. Currently the NZ to US Dollar exchange at just under 2 for 1.

The current no fee for beacons and repeaters was introduced some years ago for good reason. This proposal is a very significant policy change with what NZART says are serious and unacceptable implications. This is because, by definition and by international agreement, the Amateur Service is non-pecuniary and by international agreement cannot be used for money-making. Unlike other services

that can pass on costs to others, in the world of Amateur Radio, there are no "others". As a result, the NZART
intends to oppose this one, all the way.

Reporting from below the Southern Cross in Auckland New Zealand, I’m Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

An example of what Jim was talking about? Since each repeater would pay the $200 license fee, a club with 5 systems -- which is quite common -- would be paying $1000 New Zealand dollars every 12 months. (NZART)

**

RESTRUCTURING: WILL AUSTRALIA CHANGE ALL?

The debate in Australia about the need for a new Entry Level license has now been expanded into a call for the review of the entire amateur licensing system. Q-News Graham Kemp, VK4BB, in Brisbane is here with the details:

--

A research report entitled "Amateur radio and the challenge of change" has been co-authored by Jim Linton VK3PC and Roger Harrison VK2ZRH. Here is Jim Linton VK3PC giving a summary report of the Linton-Harrison Paper 2003.

--

(Note: This is an expanded version of what is found in the audio newscast)

VK3PC: “Amateur radio is at the crossroads, it can continue straight ahead down hill and virtually disappear, or set its own path by changing the amateur licensing system.

The time to act is now. When the UK Foundation License was introduced at the beginning of last year, there was not instant support for Australia to take a similar approach. However, some 15 months later there is majority support for a new license in Australia.

What the Linton-Harrison Paper 2003 does is to refocus the debate on the entire licensing system in Australia, the types of licenses, the syllabuses and examinations. We must not be tempted to simply copy the UK Foundation License. It does not meet Australian conditions and needs, and will not provide the necessary sustained growth for amateur radio here.

Australia's new Entry Level License should not be strictly an "operators' license" - a simple permit to use a type-approved transceiver. Entry Level Licensees should be able to enjoy the thrill and satisfaction of operating a radiocommunication system under as many circumstances and conditions and on a wide variety of bands across the RF spectrum as they wish to explore. This should be in keeping with long-standing amateur radio tradition and in line with the ITU definition, which says amateur radio exists for the purpose of self-training, intercommunication and technical investigations.

There will be changes to the licensing system as a direct result of the World Radiocommunications Conference in Geneva later this year where the mandatory Morse code testing requirement is to end.
The amateur radio community and the Wireless Institute of Australia must be ready to take action to revitalize the amateur radio licensing system at the earliest opportunity.

If the right action is not taken, the decline of amateur radio that the Linton-Harrison Paper identifies as being in now its 6th year, will lead to its ultimate demise.

Again, sustainable growth is absolutely essential. It is important to encourage people into the hobby who retain their license and their interest in amateur radio. A hobby that continues to interest, challenge or reward them.

Linton-Harrison advocates a two license system. An Entry Level with a syllabus set at a basic standard, along the lines of the original intention of the Australian Novice license. An Unrestricted License with a syllabus that is revised to comply with the ITU Recommendations for amateur licensing.

The Linton-Harrison Paper describes the current Novice and AOCP syllabuses as being "bloated" and beyond what is expected internationally. The WIA Federal Council agrees.

The current Novice license standard is recognized as being too high. It should not take 40 weeks study to get an amateur license. The Novice license is equivalent to the United States Technician License.

The current AOCP examination is also not relevant to the needs of today, and is at least two decades behind the times. The Linton-Harrison Paper calls for the whole licensing structure, the examination system and syllabuses to undergo a fundamental rethink. In its 8-pages the Paper covers much more than I can in this audio report.

--

Linton and Harrison wrote a similar paper in 1985 that is still being referred to today. (Q-News)

**

RESCUE RADIO: THE PARTNERSHIP FOR PUBLIC WARNINGS DRAFT IS NOW AVAILABLE

Here in the United States as well as around the world, letting the public know that an emergency situation is taking place can save lives. Because of this government agencies as well as the private sector are always trying to find betters methods of issuing alerts.

Now, comes word of a draft document for a new United States national emergency warning strategy from a group called the Partnership For Public Warning. A plan that some say holds the potential to truly modernize the way the public is informed.

For those not aware, the Partnership for Public Warning is a national organization formed in November of 2001. Its Board of Trustee’s include

representatives from every area of public warning communications including at least one radio amateur. The stated goal of the Partnership for Public Warning is to promote and enhance efficient, effective, and integrated dissemination of public warnings and related information so as to save lives, reduce disaster losses and speed recovery.

This document they have released is said to represent the first time anyone has proposed an overall emergency warning strategy for the United States. The concepts outlined help to look ahead to more advanced warning systems than the current E-A-S, weather service products, and other offerings. After reading it, the Partnership for Public Warning invites your participation and comments. You will find it in cyberspace at:
http://www.ppw.us/ppw/docs/nationalstrategy.pdf (GCC, PPW))

**

RESCUE RADIO: S.DAKOTA EMERGENCY COMMS LOOSE TOWER

The town of Mitchell South Dakota has last its 180 foot communications tower used for public safety and public radio. According to Jeff Pierce of the South Dakota Bureau of Information and Telecommunications, the tower fell Tuesday, March 18th after a ground anchor rotted and gave way.

Pierce said it knocked out State Radio communications used by law enforcement and other agencies, though nearby towers picked up that radio traffic. South Dakota Public Radio in the area was off the air until a portable tower was put up the next day but reception of weather alerts will not be possible until the fallen tower is replaced. Also, Mitchell police have not been able to use handheld radios and instead must rely on radios in their cars. A replacement tower should be installed and operational the week of April 1st. (CGC)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Montgomery Amateur Radio Club serving Rockville Maryland.

**

RESCUE RADIO: NJ HAMS RESPOND FOLLOWING PROPANE BLAST

New Jersey radio amateurs were called up following a large propane explosion in the city of Newton the weekend of March 8th. Amateur Radio Newsline’s Ken Locke, N8PJN, has the rest of the story:

--

It was Robert Stepanek, N2TTT who put out the call for more assistance. Stepanek is the ARES District Emergency Coordinator of Susan County who requested assistance in the form of additional operators after a propane tank exploded in the town on Newton New Jersey on March 14th. Hams from several

other New Jersey counties responded.

Amateur radios' primary role was to provide back-up relief shelter communications. Many of the evacuated residents were sheltered by the Susan County Chapter of the American Red Cross.

Pat Day is the Executive Director of that Red Cross chapter. According to Day, about 1000 residents who were forced out of their homes. Those who did not have other places to stay went to nearby shelters operated by the relief agency where some stayed until March 16th. Hams from Somerset, Union, Morris and Hudson
counties volunteered during the emergency.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting

--

Rich Krajewski, WB2CRD is the Public Information Coordinator for the ARRL's Northern New Jersey Section and provided most of the information for this story. (WB2CRD)

**

RESCUE RADIO: KILLER TORNADO HITS GEORGIA

Amateur Radio operators in southwestern Georgia have been helping in the wake of tornadoes that hit the region on March 20th. The storms left six people dead and over 200 injured. Georgia's Governor has declared a state of emergency in two of the hardest hit areas.

According to an ARRL Bulletin, ARES was activated in Mitchell, Worth, Lee and Dougherty counties. There, hams have been assisting various relief agencies including the American Red Cross, the Salvation Army and Georgia Baptist Disaster Relief.

ARES members of the Albany Amateur Radio Club also responded. Most of them are Red Cross volunteers. They took emergency response vehicles to the affected areas to feed victims and provide communications.

The ARRL Lee County Georgia Emergency Coordinator is Bob Smith, K4PHE. He says that several ARES members have been volunteering continuously since the tornadoes hit. (ARRL)

**

ENFORCEMENT: NY HAM WARNED ABOUT INTERFERENCE

A Patchogue New York ham has been told that he could face a fine of up to $7500 if he continues to violate the Amateur Service Rules. The FCC's Daryl Duckworth, NN0W, tells us who and why:

--

Duckworth: "Anthony Satornino, N2QPY, was issued a Warning Notice concerning deliberate interference with other licensees' on the 2 meter Amateur band and

engaging in unlicensed operation in the 10 meter band.”

--

Satornino was also asked to clarify his actual address for FCC records and to do so within 20 days. (FCC)

**

ENFORCEMENT: THE FCC VS. K1MAN - AGAIN

The FCC has again written to Maine radio amateur Glenn Baxter, K1MAN, regarding he operates his Amateur Radio station. Amateur Radio Newsline’s Paul Courson, WA3VJB, is in Washington with the details:

--

In its latest letter to Glenn Baxter, K1MAN, the Commission says he has not corrected problems that prompted their letter in January, which was based on monitored information and numerous
complaints to the FCC.

The FCC claims that Baxter’s Amateur Radio station is apparently being used for broadcasting non-ham radio matter including programs, talk shows, and children’s shows. The agency also alleges transmissions from his station are being used for deliberate interference and for communications where Baxter apparently's trying to make money.

The FCC also notes that some of the transmissions start and stop erratically, and leave the air with no identification as required by Commission rules. An enforcement official who wrote the letter said such operation indicates the transmissions are not under the control of a licensed operator.

The FCC goes on to say that the transmissions from Baxter’s station are tape recordings, which themselves wouldn't be illegal, but that in some cases it sounds to the FCC as if the recordings may have been questionably taken from an answering machine and off the telephone and broadcast without full compliance with the law. Enforcement authorities also wrote some of the transmissions are repetitive, apparently for weeks, of the same telephone calls.

Baxter has raised controversy for years with what he portrays as a daily bulletin service on 14.272, 3.972 and 3.890 MHz, prompting interference complaints from sideband and AM communities alike.

Baxter has patterned his program to the style of commercial talk radio, right down to having a toll free telephone number for listeners to call in and chat. The FCC wants Baxter to respond to its latest letter to decide what if anything to do next.

For the Amateur Radio Newsline, I'm Paul Courson, WA3VJB, near FCC headquarters in Washington.

--

This latest letter to Baxter came from Vincent F. Kajunski who is the FCC’s District Director in Boston Massachusetts. Kajunski also directed K1MAN to submit weekly reports detailing certain aspects of his stations on air operations. (FCC)

**

ENFORCEMENT: ALASKA BROADCASTER FACES FINES $137,000

A Christian broadcaster is facing up to $137,500 in fines for alleged wetlands damage on Alaska’s Kenai Peninsula. Fred Vobbe, W8HDU, of the National Radio Club’s D-X Audio Service has more:

--

The Anchorage Daily News reported on March 13th that Alexander Kozned of Ninilchik poured gravel and other fill into about three and a half acres of protected wetlands, as well as a stream and intertidal zone that drains into Cook Inlet.

The charges against Kozned come in a complaint filed this month by attorneys for the United States Environmental Protection Agency. The alleged violations are reported to have taken place during the summer of 2002 on Kozned's property a few miles north of Ninilchik. That’s a location where he reportedly wants to install a broadcast antenna array to broadcast religious programming to Russia and China.

An attorney for Kozned said the area affected is less than a tenth of an acre and that volunteers, not knowing about the wetlands, made an honest mistake. He also claims that the EPA's reaction amounts to overkill.

But officials at the federal agency said Kozned knew of the wetlands and filled them without a permit, despite a 1998 warning. The E-P-A and the U.S. Army Corps of Engineers issued cease-and-desist orders at that time after discovering that Kozned used earth-moving and road building equipment on wetlands to build antenna pads. The E-P-A ordered Kozned to restore and revegetate the wetlands he harmed. Kozned complied and was not fined in that case.

For the Amateur Radio Newsline, I’m Fred Vobbe, W8HDU.

--

The charge marks his second run-in with federal environmental regulators. (Anchorage Daily News)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

EMERGING TECHNOLOGY: A NEW KIND OF POP UP SPAM

As if junk e-mail and pop-up ads weren't annoying enough on their own, now there's pop-up junk e-mail. This, as the result of a developer of bulk-mail software has figuring out how to blast
computers with pop-up spam over the Internet through a messaging function on many Windows operating systems. Amateur Radio Newslie’s Bruce Tennant, K6PZW, is here with more on how it works:

--
The software is called DirectAdvertiser. The company that developed it is reportedly based in Romania. In recent weeks, Internet users have reported receiving pop-up messages such as one touting university degrees without classes or books.

DirectAdvertiser does not hack into computers. Rather, it
uses a part of the Windows operating system called Messenger. It comes turned on by default with many Windows systems including 2000 and XP. Its meant for system administrators to broadcast service notices and should not to be confused with the various other instant messaging programs.

DirectAdvertiser was first reported by Wired.com, and appears to represent the latest attempt to bypass the increasingly sophisticated e-mail spam filters employed by leading Internet service providers and individual users. It also appears to circumvent federal and state laws designed to curb junk e-mail.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting

--

There is one major fault to DirectAdvertiser that makes it easy to beat. To receive the pop-ups Windows Messanger must be turned on. If you don’t want to get them -- just turn Messanger off. (OnLine Technology)

HAM RADIO IN SPACE: AMSAT SPACE SYMPOSIUM SEEKS PAPERS

The 2003 AMSAT-NA Annual Symposium, scheduled for October 17 to the 19th in Toronto Canada has put out its first call for papers to be presented at the event. The subject matter should be of general interest to amateur radio operators involved in satellite communications.

Papers may be presented by the author during the Symposium or simply offered for inclusion in the Symposium Proceedings publication. A brief abstract of the proposed paper should be submitted as soon as possible. The final date for abstracts is June 15th with copy ready papers must be received no later than August 15th. Electronic submittal is preferred in Microsoft Word format. E-mail electronic submittals to Wayne Chandler at ve3whc@amsat.org (AMSAT)

**

INTERNATIONAL - AFGHANISTAN: NEW KANDAHAR RADIO STATION TO BE LAUNCHED

On the international scene, the Boston-based N-G-O Afghans for Civil Society has announced that former BBC producer Akhtar Kohestani will serve as station manager for Afghan Independent Radio or A-I-R. This is a new station which is to be launched this spring.

A-I-R will be the first independent radio station to be based in the former Taliban stronghold of Kandahar in southern Afghanistan. Plans are under development for program sharing with the BBC, Radio Free Europe, Radio Liberty, the Voice of America and Radio Afghanistan. (Stewart McKenzie)

**

INTERNATIONAL - POLAND: NEW BANDS FOR SP HAMS

Also, SP5HS reports that Poland’s new national frequency allocation table came into effect on February 27th and its pretty good news for that nations hams. The new rules allows S P amateurs to use the 136 kHz band, while the 50 MHz band is now allocated to amateurs in Poland on a secondary basis. 6 meters is still shared with government services. (GB2RS)

**

BEACONS: 2 METER K7XC/B ON THE AIR FROM NEVADA

A new 2 meter propagation beacon is on the air from the state of Nevada. Amateur Radio Newsline’s Don Wilbanks, AD5DW, tells us who put it on and where to find it:

--

Tim Mareck, K7XC reports that the 2 Meter beacon operating under is call sign is now installed at it's new mountain top home here in grid square DM-09. Tim says that its on 144.288 MHz and operating from 4900 feet atop Lahotan Peak. This is above the Lahotan Reservoir near Silver Springs Nevada. Currently, the beacon consists of a 10 watt C-W transmitter into a single K-Q Loop at the 30' level on the tower. If you hear it, you can be pretty sure that 2 meters is open to Nevada from where ever you are.

Tike adds that the next project is a 6 meter beacon from the same site. It will use a Yaesu FT-620B running at 10 watts into a old style KB6KQ loop. This antenna will be placed 2' above the 2 meter loop on the same mast. Tim's target date to complete this phase of the project? He says hopefully sometime in June.

--

Again, the frequency of the K7XC beacon is 144.288 MHz. If you hear it you can send Q-S-N reports to Tim by e-mail at timm@cccomm.net (VHF Reflector)

**

DX

In D-X, six German operators will be active as A-35-X-M from Tonga to the 4th of April. They will concentrate on working Europe. More information is at www.df3cb.com/a35xm (OPDX)

And Tim Totten, N4GN, reports that all Oh-J-one thru Oh-J-8 QSL cards for W-R-T-C 2002 have been printed and ready for release. If you want to obtain your QSL cards directly, send an S-A-S-E before April 15th to Toni Linden, OH2JTE, Ohratie 16E218, 01370 Vantaa, Finland. Tim also says that plaque and T-shirt and Early Bird submission winners can be viewed at the following site. Its out there in cyberspace -- at www.n4gn.com/wrtc. (N4GN)

**

THAT FINAL ITEM: YHOTY 2003 NOMINATIONS SOUGHT

And finally this week, the nominating season for the 2003 Young Ham of the Year Award is now open. Our producer, Bill Pasternak, WA6ITF, is here with the details:

--

Each year, we at the Amateur Radio Newsline join forces with Vertex-Standard and C-Q Magazine to honor the accomplishments of a young radio amateur who has contributed in some special way to the hobby or to society through the hobby.

The rules are still the same. A nominee must be age 18 or younger, hold any class of Amateur Radio license issued by the FCC and live in the contiguous 48 states. And this year, thanks to Kevin Boudreaux, N5XMH, its easier than ever to file a nomination.

Kevin was the 1993 Young Ham of the Year award winner. He has now created a new on-line home for the award that has all the information, rules and downloadable forms needed to submit a nomination. And Kevin has taken it a step further. He has also created our first-ever fill in the blank on-line nomination form. Just provide the information on-line, click at the bottom of the page and your nomination is on its way to us.

After you finish filing your nomination, please click on some of the other pages and take a look around. You will find it in cyberspace at www.yhoty.org/2003.htm . There is also a link to it from our website at www.arnewsline.org . Printed forms are available for an SASE to the Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California 91350.

--

Our thanks to Kevin Boudreaux, N5XMH, of Dynamic Marketing for taking the time to create this new website. He is one Young Ham of the Year who is still an important part of the award. (ARNewsline™)

> expedition, please tell them to congratulate whoever was working 17 CW
> early this morning. He can hear *VERY* well.

I've been on low bands chasing CW DX for fifty years now. This group has one of the best consistent 40 and 80 meter signals for the paths, at just exactly the right optimal times, working precisely the correct 160 vs. 80 vs. 40 operations of all the 'expeditions' that have been on. Not only that, but the operator crew is VERY patient and thoughtful to take special pains to try their utmost best to get a call CORRECT in the log for whom then do work.

They hear VERY well indeed.

I realize that not everywhere is optimal for paths and signals and so on at the same time and someone always gets 'left out', in a way. But this group has done a superb job of working low band stuff.

And that's what I would have said even if I didn't work them, based on 50 years worth of hearing what is now in over 320 countries on 40 CW in my log books. I don't know about their Gray Line path optimization which was so outstanding on low bands from the XZ0A crew, but the general operation is right up in there with the best of them.

Class act.

Yes.

And if you REALLY want to experience the wonder of it all, wait until one night about 2:00 am in the morning under good contitions; you work Australia on say 40 meter CW with only ONE WATT of power! Yes, it can be done!

Then, go out in the back yard and take a five cell flashlight, which is about that same one watt of power. Shine it up in the sky. Look up there at the beam and see how far you can see it go!

Then think. That same one watt from your little rig is going up in the sky, bouncing off the ionosphere back down to earth, bouncing back up in the sky, down to earth. It's going up and down like that five or six times to get there to Australia for your little one watt of power!

And if a MILLION people in Australia all had ham radio receivers, they could ALL hear you at the same time! Or Russia, or China or wherever given halfway decent condtions.

Then take a good look at your little rig and flashlight again. Contemplate on all you are really seeing and what might be responsible for allowing that to happen for you.

Then really contemplate what Samuel Morse sent, when he sent that first code from the telegraph sounder that has escaped so far from those two little copper wires so long ago, "What hath God wroght?"

Open the real book of life that ham radio will let you see and take a closer look. It's a lifetime worth of wonder.

(now there's another familiar call!)

I was running the same power but a Force 12 C3 at 65'. Especially given recent propagation, that's a great catch with a wire antenna from Oregon! (which way did you work them? Across North America, or across Asia?)

Heard ST0RY later that evening on the bottom of 80m, unfortunately tuning in just as they QSYd to another band. They were about S2, which is 2 S-units louder than anything else from the other side of the Atlantic on 80 at that time!

Man, you can say that again.

Most other expeditions would have given up after two-three tries for my call -- and I'd be in their log as W9MI. These guys stuck it out until I acknowledged they had it right.

Judging from their signal when I heard them on 80 an hour or two later, I presume they've got amplifiers. (they were the loudest trans-Atlantic signal on 80 at the time, by 2 S-units. That means they were S2<grin>.)

If they were running an amp on 17, I'm even more impressed. Mine isn't working; I was running 100 watts. They were just barely copyable here -- I have an unusually quiet QTH -- and if I may be briefly immodest, I think I hear pretty well. And they were able to copy a signal 10dB weaker than theirs. Awfully impressive.

That's the problem with wire antennas :-) Kinda hard to be certain if
something is long path or short path. QSO was at 2300z (1500 local),
so pretty certain it was short path. Have also worked them on 15, 20, 30,
and all were at times when only short path should be working. Have
not yet heard any trace of them on 12 or 10 :-(Did hear them on 40,
but was "below the noise level". 3 el tribander, so certain that 15 and
20 were short path. QTH is on the east slope of small mountain, 750
feet above the valley. So even the wire antennas work pretty well.

I need to: 1) get some more wire antennas up; 2) get a amplifier.
Both are scheduled for this summer, along with a second tower.

As a former resident of Danvers, Massachusetts [I moved last September after 64 years] I have had radio contacts all over the world, all continents, the South Pole, Australia, etc. with a 100 watt radio station and a 'smallish' vertical antenna mounted on the ground. I know a man in Danvers Massachusetts who talks with his brother in Northern Ireland every single week and has done so for almost 15 consecutive years.

The reply from Mike Luther is an excellent response.

<grin>! But I suppose you could figure it from the time. That said, 2300z seems a bit ambigious from here. Having never operated from the West with anything bigger than a 15m mobile whip, I'll have to beg to a lot of ignorance to propagation out there though.

> I need to: 1) get some more wire antennas up; 2) get a amplifier.

My AL80A developed a shorted turn in the transformer an hour before the end of the 2001 10-Meter Contest. I've since tried two replacement transformers - both of which develop way too much HV. Guess I'm going to have to get an official replacement from Starkville.

In the meantime I'm in the market for something a little bigger. On 80 and 160, power really does count. 500w and a C3 makes me "king of the hill" on 15, but it's only about mid-pack on 80.

(beginning to think about a third tower too. #2 is ready to go up as soon as I get some home improvements done, but it's going to be strictly for 3m FM BC and UHF-TV DX antennas - may sneak a small 6m Yagi up there too...) (#2 will be a shortie - maybe 25-30' - holding a small tribander. Probably fixed on New England. For the second rig in contests.)

You can never have too many antennas<grin>.

I didn't know you could load a C3 on 80..... no wonder you
don't do so well there :-)

I've done WAS and WAC on 160 with 100 watts and a random wire, but
only when other people aren't trying to work the same stations!

I am not sure if it is A6 land directly but more their QSL managers.
Has anybody had any success with getting a QSL card direct from N4QB?.

Hmmm
I think I'll e-mail N4QB AND W3UR before I send my card, but will take any more suggestions. Shre would like yo get that card back. Hi

Charles

<grin>!
(y'know, I wouldn't be all that surprised if you *could* load a C3 on 80
- but I sure wouldn't try running 500 watts that way!) (it's not
supposed to work on 30m, but it sure does.)

Source record: 10519

I have been trying to QSL direct with them for a while now (using the info on QRZ.com), and despite emails to them asking for progress I have not heared or received anything.

Does anybody know if there is another QSL route.

Let us know how you get on, as I have e-mailed N4QB today. I'll post the
reply (if I get one!!).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/March, through Sunday, 30th/March there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Remember to look for Brian, N6IZ, to be active as 3D2IZ from Namotu Island (OC-121) through April 6th. His activity will be mainly on CW on 80-10 meters. He was heard over the weekend on 14023 kHz between

0430-0730z and 7005 kHz between 1000-1345z.

4Z8, ISRAEL. Guenter, OE1GZA, informs OPDX that he will be active once again from here on April 4th and most probably also on April 5th. He will activate the rare 4Z8-prefix using the callsign 4Z8GZ. The operation will take place in Tel Aviv. Activity will be on 20-10 meters. QSL to OE1GZA. Guenter's Web page is at: http://www.qsl.net/oe1gza

7P, LESOTHO. Frosty, K5LBU, reports that they have lost one of the operators for their July trip to Lesotho. Operators now aboard are: Frosty/K5LBU (7P8CF), Tom/WW5L (7P8TA) and Madison/W5MJ (7P8MJ). Reportedly, all the equipment is already in Lesotho, and the operators will not have to carry any heavy radio equipment. If interested in joining the operation, please contact Frosty/K5LBU at: frosty1@pdq.net
Frosty states more details on this operation will be forthcoming.

8Q, MALDIVES. Look for Riccardo/IZ5EBL and Rossella/IZ5BRO to be active from April 13-21st as 8Q7RL and 8Q7RC. Activity will be on 40-10 meters SSB with some CW and PSK31. QSL via their home callsigns.

CT3, MADEIRA ISLAND. Ben, DJ8FW, will be active as CT3AS, from April 9-21st. Activity will be on CW/RTTY/PSK31 on 80-15 meters as time permits. QSL via DJ8FW.

CY9, ST. PAUL ISLAND. A group of 5-6 operators will be going here between July 24th and August 2nd. Their activity will include an entry in the July IOTA Contest. St. Paul Island's IOTA number is NA-094.

DU, PHILIPPINES (IOTA Ops). Frank, VE7DP, informs OPDX that he will be making a short visit to the Philippines during April. Some of his partners/ operators from his 2001 activations (which includes 4I1P, 4H2B and DU1/VE7DP) will be joining him again. This trip's destinations of interest are Semirara Islands (OC-125), also Calagua Islands (OC-202) or Cagayan Islands (OC-207). Most of their activity will take place April 6-18th. More info/details are forthcoming.

IOTA NEWS.....
AF-064. (Update). Operators Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, will be active at the end of the week from Robben Island (as well as the lighthouse SAF023) using the special callsign ZS1RBN. Activity will take place between April 4-7th, and propagation permitting, they will have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 80-10 meters. Suggested operating frequencies will be:
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
CW - 3530, 7026, 10115, 14040, 18098, 21040, 24920 and 28040 kHz.
Nevertheless, small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM.
QSLs will be handled by G3SWH, either direct to his CBA:

21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, U.K.
(with SAE and return postage) or via the RSGB bureau.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and
7L4PVR will be active as homecall/1 from Hachijo Island from
June 6-9th. Look for activity on 80-10 meters SSB, CW and
PSK31. QSL direct to their home callsign or via the JARL
QSL bureau.

AS-049. (Update) Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara
Kuchino-shima starting around 0100z on May 3rd. The length of
his stay has been increased to one day due to the schedule
change of the ferry. He will now stay until around 0000z on
May 5th. Toshi's activity will be on 10/12/15/17/20/40 meters
CW only. QSL via JARL or direct to his home call.

NA-082. Randy, W5UE, wants to remind everyone that several members
of the Magnolia DX Association will be active from Cat Island,
Mississippi (USI MS002S), from April 4-6th. Cat Island is a
barrier island located about 6 miles south of Gulfport, MS,
in the Mississippi Sound. They will be active on 80-10 meters
(including the WARC bands) on CW and SSB. They will be using
the special event callsign K5C from multiple stations. Team
organizers are Bill/K5YG, Glenn/K2FF, Darryl/KD5CQT, and
Randy/W5UE. QSL via K2FF. Their Web page is at: http://mdxa.org
Read the article of their September 2002 trip to NA-082 in
the March/Arpil 2003 issue of The DX Magazine.

IP1, ITALIAN ISLAND. Giuseppe "Beppe", IK5CBE, informs OPDX that he,
Alberto/IK5FTV and possibly others will activate Palmaria Island using
the special callsign IP1A from April 4-7th. Palmaria Island does not
have an IOTA number, but is valid "only" for the Italian Islands Award
with the reference number IIA SP-001. Activity will be on 160-6 meters.
A Web page has been set up for this operation at:
http://space.virgilio.it/gmiross@tin.it

KH6, HAWAII. Philip, KA0PGQ, announced that he will be active from here
in October. Activity will include an entry in the CQWW SSB Contest as
QRP. He is looking for advice on his operation, and his E-mail address is:
pschweit@mninter.net

NEW OFFICERS FOR 2003. The Association des Radioamateurs Senegalais has
elected the following officers for 2003:
President - Malick M'Bengue, 6W1FJ
1st Vice President - Mustafa Diop, 6W1KI
2nd Vice President - Jean Georges Imbo, 6W1OO
Secretary - Monique Imbo (XYL), 6W1OM
Assistant Secretary - Bilal Youssef, 6W1RD
Treasurer - Roger Zogbi, 6W1BR
Assistant Treasurer - Geoges Farrage, 6W1PQ
IARU Liaison Officer- Monique Imbo (XYL), 6W1OM
DX Manager - Jean Louis Pipien, 6W6JX

Jean-Louis, 6W6JX, asks the French speaking Hams to have a look on the Association des Radioamateurs Senegalais Web site at the following address: http://www.radio6w.org/
Some pages on this web are still under construction, but it's a good over-all view of the 6W ham activities. The ARAS and QSL bureau addresses are: Association des Radio-Amateurs du Senegal, Box 971, Dakar, Senegal. ADDED NOTE: If you are journeying to Dakar on weekends, you can meet the 6W hams at their Radio Club at the following address: Immeuble des Colis Postaux, Avenue El-Hadj Malick Sy, Dakar. The Radio Club is open every Saturday at 1700z.

QSL INFO AND NEWS.....
Ted Melinosky, K1BV, Awards Editor CQ Magazine and K1BV DX Awards Directory, informs OPDX that 4L5A and EY8MM has asked him to handle cards for these operations. Ted is "OK" in all the online lookups. He has the Feb/Mar 2003 logs for D44TT and is awaiting the logs for D4B. He doesn't have cards yet, but hopes to get them shortly. Bureau cards are accepted as well.

AP2AUM QSLS. Boris, T93Y, informs OPDX that he has received information that Willy, 9A4NA/T98N, was expected to be active during the CQ WPX SSB Contest using the callsign of Asad, AP2AUM. Also, please note that QSL information for AP2AUM QSOs made in the year 2003 will be via 9A4NA: Zeljko Curkovic, Vukovarska 125, HR-21000 Split, Croatia.

The logs are now on-line for the D90HE operation from Chu-Ja Island (AS-084). Visit the Web page: http://myhome.naver.com/dxer2han/as084/

TEAM HAITI 2003 WRAP-UP. Jan Heise, K4QD, reports: "The HH4 team from the Florida DXpedition Group (FDXPG) has returned safely home. It was a hot, dry and dusty two weeks at the Northwest Haiti Christian Mission. The supply ship had still not arrived when we left, so we ate a lot of beans and rice. It also somewhat impacted our low band and six meter operations because of antennas and coax that were on the ship. The team made over 18,000 contacts on 160 through 10 meters on SSB, CW, RTTY, PSK-31 and 10M FM. The logs have been uploaded, and log checking can be accessed from the Team Haiti web site at:
http://www.geocities.com/n2wb2003/
If you have questions about a QSO, contact that operator directly. QSL HH4/K4QD, HH4/W4WX and HH4/K9MDO direct to home calls. QSL HH4/N2WB via N2OO. The team wants to thank our pilot station, Roger K9RB. We also want to thank Jim, KC4HW, for processing and uploading the logs to the Internet."

Samy, JR8KJR/8, was active from Rishiri Island (AS-147) over the past weekend. QSL direct to JR8KJR or via the JARL QSL bureau.

Activity by L71F during last weekend's contest was from the "Bad Power Station" (LT1F). Operators were: LU1AEE, LU1FGE, LU1FKR, LU1FMO, LU2DKT, LU2FT, LU2NI, LU3FP, LU4DX, LU5DX, LU5HM, LU6ETB, LU6FQD, LU7DW and LU9HS. QSL via AC7DX.

There has been a QSL route update for P41P during the CQ WPX SSB Contest last weekend. Please QSL via I2MQP.

Ton, PY2YU, was active as PX2W during the 2003 CQ WPX SSB Contest, on 10 meters. QSL via PY2YU to the bureau or direct to: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.

If you heard R9/N5XZ during the CQ WPX Contest this past weekend it was Allan/N5XZ with RA9JP and RW9QW/9 at the mike. QSL via his home callsign.

Paco, EA4AHK, the QSL Manager for Francisco Cortadellas, TT8FC, reports he has been receiving a lot of QSLs for CW contacts. Paco states that TT8FC does not work CW, does not work the American Band and does not work 40m band.

"In a state of panic!", says Martin, VK5GN. The 2003 CQ WPX SSB Contest was Martin's last operation as VK5GN. His XYL (VK5QP) has been offered a new job as University Librarian at the University of Tasmania (VK7), so they are moving interstate. Martin states, "Down come all the towers (8) and pack all the beams etc and off we go. Don't have any idea when I will have a new contest station up and running. Both Bureau and direct QSLs will continue to work for at least 12 months."

VP6DIA log is now available on-line at the following URL address: http://www.qsl.net/wd4ngb/ducie.htm

WRTC2002 QSL CARDS, T-SHIRTS AND PLAQUES. The WRTC2002 Organizing Committee announced that all OJ1 thru OJ8 QSL cards are printed and ready for release. If you still would like to obtain your QSL cards directly, you have a chance until April 15th. Send your SASE so that it would reach Toni, OH2JTE, by that date: Toni Linden, Ohratie 16E218, 01370 Vantaa, FINLAND. The plaque and T-shirt winners as well as the Early Bird submission winners can be viewed at the following site: http://www.n4gn.com/wrtc/
There are a total of 71 T-shirt winners, and they kindly ask you to select your size and inform Ari, OH5DX, directly via E-mail at: oh5dx@sral.fi
If no further information is received by April 1st, an XL-size T-shirt will be mailed. If your postal address has been changed over the past 12 months, you may wish to inform OH5DX accordingly.

Yves, F6CYV, reports that F5JRY is not the QSL Manager for XU7ABN. The only QSL valid address for Claude, F9LC (aka XU7ABN), is: Laget Claude, Po Box 1373, General Post Office, Phnom Penh, Kampuchea. For many QSL routes see: http://f6cyv.free.fr/f6cyvqsl.php

Vladimir Kovaceski, Z35M, informs OPDX that all direct QSL requests for ZA/Z35M and Z35M received as of March 22, 2003, have been also answered direct. His address is: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

S0, WESTERN SAHARA. A bulletin from the "S05X Team" announced this past week the biggest INTERNATIONAL team ever seen in the desert will be on air from Western Sahara next April 15th. Operators Hrane/YT1AD, Miki/YU1AU, Max/I8NHJ, Doug/N6TQS, Jordan/KD7RCD, Marq/CT1BWW, Juanca/EA2RC, Fernand/EA1BT, Toni/EA5RM, Julio/EA5XX and Mahafud/S01MZ (all 11 are first class operators) will be doing their best and represent six different countries: Yugoslavia, USA, Italy, Portugal, Spain and Western Sahara. They will be working from the very heart of the desert as S05X. All of them are very well known DXers and DXpeditioners, and their plans include a 24 hours, all band, all mode, operation from S0-land. Using 1KW output power, they are going to transmit especially on the low bands, CW and SSB, as well as PSK31, RTTY and 6 meters. They will take a special interest/care to listen for USA's West Coast openings. Their antenna farm will include a few yagis, so they expect to have worldwide coverage. Their pilot stations will be the two main editors of the 425 DX News:
Mauro/I1JQJ (i1jqj@interlink.it) and Maurizio (i121171@tin.it)
The QSL Manager is EA4URE, the Spanish Bureau, and S05X is going to be on the air until April 20th. The "S05X Team" now has a Web page active with a SURVEY to fill out for your "S05X" needs/wants (bands/modes). Go to:
http://www.pagus.it/S05X
On-line log search shows 32,906 QSSOs as of Friday, March 28th. The log was not updated during the CQ WPX Contest.

ST, SUDAN. You have until April 2nd to work ST0RY. They continue to be very active, especially during last weekend's contest. All the operators are in good spirits and the equipment is holding up. Pictures, log and updates can be found on the Web page at: http://www.df3cb.com/st0ry

T30, WESTERN KIRIBATI. Tusti, W4WET, is now active as T30ONM from Tarawa. His orginal plans were to head to Nauru (C21) and then go to Tarawa. Nauru said he could get a visa upon arrival, but the airline bumped him because he had no visa. It looks like Tusti will be here through the rest of the week and maybe longer as Nauru does not look possible. Anyway, Tusti has been very active on 20 meters RTTY (some 10/15 meters). QSL via W4WET.

TU, COTE D'IVOIRE. David, F5THR, should be active as TU5CD now through July 1st. As this was being written, no QSNs were reported as of yet. QSL via F8BON.

V6, MICRONESIA (New IOTA Activated). You have a couple of more days to work Joe/I2YDX and Robert/IK2WXZ from Nukuoro Island (OC-259) as V60A and V60Z, respectively. They plan to leave this new IOTA on April 1st (they have been there since March 28th). After their operation on Nukuoro Island and they head back to Pohnpei, another source reports that the two operators will make a several hour stop on Oroluk Island (OC-NEW). They are expected to activate this new IOTA possibly between 0000-0600z (maybe as late as 0800). After this activity, they will then go to Mokwil Island (OC-226) and be active from April 6-7th as V63DT and V63ZR. Most of their activity has been on 40/20/15 meters, mainly SSB very little CW.

XY, MYANMAR (Update to OPDX.603). Frank, DL4KQ, will use the callsign XY4KQ during his operation from April 1-15th. For updated information, please watch the Web page at: http://www.dx-pedition.de

YB0, INDONESIA. Stan Matejicek, OK1JR, informs OPDX that he has just received his Indonesian Radio Amateur Licence, and his callsign is YB0AJR. He will stay in Indonesia another few months at the Czech Embassy. Stan plans to be active on 160-6 meters from not only from Jakarta (YB0), but also from other Indonesian Islands. QSL via OK1JN (his dad). You can find more details on the Web page at: http://www.ok1jr.com
LAST MINUTE NOTE: If you worked Stan during the CQ WPX Contest, he was on West Jawa Island.

ZC4, UK SOV. BASE AREA ON CYPRUS. Bill, G4EHT, will be visiting his son Dez, ZC4DW, between April 14-28th. Bill will be on a family holiday but hopes to schedule in some time on HF CW. He will be operating from the Eastern Sovereign Base using their club callsign ZC4ESB. Please be patient with Bill as he hasn't worked pile-ups for many years. QSL via G4EHT:
Bill Watson, 7 Darwin Close, Lichfield, Staffordshire, WS13 7ET, ENGLAND.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1BV, K1XN & GoList, N2OO, NG3K, W3UR & The Daily DX, K4QD, N4AA & QRZ DX, N4GN, K5LBU, W5UE, K8YSE, W9DX, DJ8FW, DL1EK/DL7VOA & DX Newsletter, EA5RM, F5NQL & UFT, F6CYV, FJ5DX & La Gazette du DX, G3SWH, I1JQJ & IK1ADH - 425 DX NEWS, IK5CBE, JI6KVR & JA-IOTA Islands News, LU7DW, OE1GZA, OK1JR, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PY2YU, S05X Team, T93Y, VA3RJ & ICPO, VE7DP, VK5GN, Z35M and ZC4DW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd/March, through Sunday, 30th/March there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Remember to look for Brian, N6IZ, to be active as 3D2IZ from Namotu Island (OC-121) through April 6th. His activity will be mainly on CW on 80-10 meters. He was heard over the weekend on 14023 kHz between

0430-0730z and 7005 kHz between 1000-1345z.

4Z8, ISRAEL. Guenter, OE1GZA, informs OPDX that he will be active once again from here on April 4th and most probably also on April 5th. He will activate the rare 4Z8-prefix using the callsign 4Z8GZ. The operation will take place in Tel Aviv. Activity will be on 20-10 meters. QSL to OE1GZA. Guenter's Web page is at: http://www.qsl.net/oe1gza

7P, LESOTHO. Frosty, K5LBU, reports that they have lost one of the operators for their July trip to Lesotho. Operators now aboard are: Frosty/K5LBU (7P8CF), Tom/WW5L (7P8TA) and Madison/W5MJ (7P8MJ). Reportedly, all the equipment is already in Lesotho, and the operators will not have to carry any heavy radio equipment. If interested in joining the operation, please contact Frosty/K5LBU at: frosty1@pdq.net
Frosty states more details on this operation will be forthcoming.

8Q, MALDIVES. Look for Riccardo/IZ5EBL and Rossella/IZ5BRO to be active from April 13-21st as 8Q7RL and 8Q7RC. Activity will be on 40-10 meters SSB with some CW and PSK31. QSL via their home callsigns.

CT3, MADEIRA ISLAND. Ben, DJ8FW, will be active as CT3AS, from April 9-21st. Activity will be on CW/RTTY/PSK31 on 80-15 meters as time permits. QSL via DJ8FW.

CY9, ST. PAUL ISLAND. A group of 5-6 operators will be going here between July 24th and August 2nd. Their activity will include an entry in the July IOTA Contest. St. Paul Island's IOTA number is NA-094.

DU, PHILIPPINES (IOTA Ops). Frank, VE7DP, informs OPDX that he will be making a short visit to the Philippines during April. Some of his partners/ operators from his 2001 activations (which includes 4I1P, 4H2B and DU1/VE7DP) will be joining him again. This trip's destinations of interest are Semirara Islands (OC-125), also Calagua Islands (OC-202) or Cagayan Islands (OC-207). Most of their activity will take place April 6-18th. More info/details are forthcoming.

IOTA NEWS.....
AF-064. (Update). Operators Phil/G3SWH, David/G3UNA, Vidi/ZS1EL, Kosie/ZS1SR, Malcolm/ZS1MC and Andrew/ZS1AN, will be active at the end of the week from Robben Island (as well as the lighthouse SAF023) using the special callsign ZS1RBN. Activity will take place between April 4-7th, and propagation permitting, they will have two stations on the air on a 24 hours a day basis. One station will operate SSB and one will operate CW on all bands 80-10 meters. Suggested operating frequencies will be:
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
CW - 3530, 7026, 10115, 14040, 18098, 21040, 24920 and 28040 kHz.
Nevertheless, small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM.
QSLs will be handled by G3SWH, either direct to his CBA:

21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, U.K.
(with SAE and return postage) or via the RSGB bureau.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and
7L4PVR will be active as homecall/1 from Hachijo Island from
June 6-9th. Look for activity on 80-10 meters SSB, CW and
PSK31. QSL direct to their home callsign or via the JARL
QSL bureau.

AS-049. (Update) Toshi, JM1PXG, will be active as JM1PXG/6 from Tokara
Kuchino-shima starting around 0100z on May 3rd. The length of
his stay has been increased to one day due to the schedule
change of the ferry. He will now stay until around 0000z on
May 5th. Toshi's activity will be on 10/12/15/17/20/40 meters
CW only. QSL via JARL or direct to his home call.

NA-082. Randy, W5UE, wants to remind everyone that several members
of the Magnolia DX Association will be active from Cat Island,
Mississippi (USI MS002S), from April 4-6th. Cat Island is a
barrier island located about 6 miles south of Gulfport, MS,
in the Mississippi Sound. They will be active on 80-10 meters
(including the WARC bands) on CW and SSB. They will be using
the special event callsign K5C from multiple stations. Team
organizers are Bill/K5YG, Glenn/K2FF, Darryl/KD5CQT, and
Randy/W5UE. QSL via K2FF. Their Web page is at: http://mdxa.org
Read the article of their September 2002 trip to NA-082 in
the March/Arpil 2003 issue of The DX Magazine.

IP1, ITALIAN ISLAND. Giuseppe "Beppe", IK5CBE, informs OPDX that he,
Alberto/IK5FTV and possibly others will activate Palmaria Island using
the special callsign IP1A from April 4-7th. Palmaria Island does not
have an IOTA number, but is valid "only" for the Italian Islands Award
with the reference number IIA SP-001. Activity will be on 160-6 meters.
A Web page has been set up for this operation at:
http://space.virgilio.it/gmiross@tin.it

KH6, HAWAII. Philip, KA0PGQ, announced that he will be active from here
in October. Activity will include an entry in the CQWW SSB Contest as
QRP. He is looking for advice on his operation, and his E-mail address is:
pschweit@mninter.net

NEW OFFICERS FOR 2003. The Association des Radioamateurs Senegalais has
elected the following officers for 2003:
President - Malick M'Bengue, 6W1FJ
1st Vice President - Mustafa Diop, 6W1KI
2nd Vice President - Jean Georges Imbo, 6W1OO
Secretary - Monique Imbo (XYL), 6W1OM
Assistant Secretary - Bilal Youssef, 6W1RD
Treasurer - Roger Zogbi, 6W1BR
Assistant Treasurer - Geoges Farrage, 6W1PQ
IARU Liaison Officer- Monique Imbo (XYL), 6W1OM
DX Manager - Jean Louis Pipien, 6W6JX

Jean-Louis, 6W6JX, asks the French speaking Hams to have a look on the Association des Radioamateurs Senegalais Web site at the following address: http://www.radio6w.org/
Some pages on this web are still under construction, but it's a good over-all view of the 6W ham activities. The ARAS and QSL bureau addresses are: Association des Radio-Amateurs du Senegal, Box 971, Dakar, Senegal. ADDED NOTE: If you are journeying to Dakar on weekends, you can meet the 6W hams at their Radio Club at the following address: Immeuble des Colis Postaux, Avenue El-Hadj Malick Sy, Dakar. The Radio Club is open every Saturday at 1700z.

QSL INFO AND NEWS.....
Ted Melinosky, K1BV, Awards Editor CQ Magazine and K1BV DX Awards Directory, informs OPDX that 4L5A and EY8MM has asked him to handle cards for these operations. Ted is "OK" in all the online lookups. He has the Feb/Mar 2003 logs for D44TT and is awaiting the logs for D4B. He doesn't have cards yet, but hopes to get them shortly. Bureau cards are accepted as well.

AP2AUM QSLS. Boris, T93Y, informs OPDX that he has received information that Willy, 9A4NA/T98N, was expected to be active during the CQ WPX SSB Contest using the callsign of Asad, AP2AUM. Also, please note that QSL information for AP2AUM QSOs made in the year 2003 will be via 9A4NA: Zeljko Curkovic, Vukovarska 125, HR-21000 Split, Croatia.

The logs are now on-line for the D90HE operation from Chu-Ja Island (AS-084). Visit the Web page: http://myhome.naver.com/dxer2han/as084/

TEAM HAITI 2003 WRAP-UP. Jan Heise, K4QD, reports: "The HH4 team from the Florida DXpedition Group (FDXPG) has returned safely home. It was a hot, dry and dusty two weeks at the Northwest Haiti Christian Mission. The supply ship had still not arrived when we left, so we ate a lot of beans and rice. It also somewhat impacted our low band and six meter operations because of antennas and coax that were on the ship. The team made over 18,000 contacts on 160 through 10 meters on SSB, CW, RTTY, PSK-31 and 10M FM. The logs have been uploaded, and log checking can be accessed from the Team Haiti web site at:
http://www.geocities.com/n2wb2003/
If you have questions about a QSO, contact that operator directly. QSL HH4/K4QD, HH4/W4WX and HH4/K9MDO direct to home calls. QSL HH4/N2WB via N2OO. The team wants to thank our pilot station, Roger K9RB. We also want to thank Jim, KC4HW, for processing and uploading the logs to the Internet."

Samy, JR8KJR/8, was active from Rishiri Island (AS-147) over the past weekend. QSL direct to JR8KJR or via the JARL QSL bureau.

Activity by L71F during last weekend's contest was from the "Bad Power Station" (LT1F). Operators were: LU1AEE, LU1FGE, LU1FKR, LU1FMO, LU2DKT, LU2FT, LU2NI, LU3FP, LU4DX, LU5DX, LU5HM, LU6ETB, LU6FQD, LU7DW and LU9HS. QSL via AC7DX.

There has been a QSL route update for P41P during the CQ WPX SSB Contest last weekend. Please QSL via I2MQP.

Ton, PY2YU, was active as PX2W during the 2003 CQ WPX SSB Contest, on 10 meters. QSL via PY2YU to the bureau or direct to: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.

If you heard R9/N5XZ during the CQ WPX Contest this past weekend it was Allan/N5XZ with RA9JP and RW9QW/9 at the mike. QSL via his home callsign.

Paco, EA4AHK, the QSL Manager for Francisco Cortadellas, TT8FC, reports he has been receiving a lot of QSLs for CW contacts. Paco states that TT8FC does not work CW, does not work the American Band and does not work 40m band.

"In a state of panic!", says Martin, VK5GN. The 2003 CQ WPX SSB Contest was Martin's last operation as VK5GN. His XYL (VK5QP) has been offered a new job as University Librarian at the University of Tasmania (VK7), so they are moving interstate. Martin states, "Down come all the towers (8) and pack all the beams etc and off we go. Don't have any idea when I will have a new contest station up and running. Both Bureau and direct QSLs will continue to work for at least 12 months."

VP6DIA log is now available on-line at the following URL address: http://www.qsl.net/wd4ngb/ducie.htm

WRTC2002 QSL CARDS, T-SHIRTS AND PLAQUES. The WRTC2002 Organizing Committee announced that all OJ1 thru OJ8 QSL cards are printed and ready for release. If you still would like to obtain your QSL cards directly, you have a chance until April 15th. Send your SASE so that it would reach Toni, OH2JTE, by that date: Toni Linden, Ohratie 16E218, 01370 Vantaa, FINLAND. The plaque and T-shirt winners as well as the Early Bird submission winners can be viewed at the following site: http://www.n4gn.com/wrtc/
There are a total of 71 T-shirt winners, and they kindly ask you to select your size and inform Ari, OH5DX, directly via E-mail at: oh5dx@sral.fi
If no further information is received by April 1st, an XL-size T-shirt will be mailed. If your postal address has been changed over the past 12 months, you may wish to inform OH5DX accordingly.

Yves, F6CYV, reports that F5JRY is not the QSL Manager for XU7ABN. The only QSL valid address for Claude, F9LC (aka XU7ABN), is: Laget Claude, Po Box 1373, General Post Office, Phnom Penh, Kampuchea. For many QSL routes see: http://f6cyv.free.fr/f6cyvqsl.php

Vladimir Kovaceski, Z35M, informs OPDX that all direct QSL requests for ZA/Z35M and Z35M received as of March 22, 2003, have been also answered direct. His address is: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

S0, WESTERN SAHARA. A bulletin from the "S05X Team" announced this past week the biggest INTERNATIONAL team ever seen in the desert will be on air from Western Sahara next April 15th. Operators Hrane/YT1AD, Miki/YU1AU, Max/I8NHJ, Doug/N6TQS, Jordan/KD7RCD, Marq/CT1BWW, Juanca/EA2RC, Fernand/ EA1BT, Toni/EA5RM, Julio/EA5XX and Mahafud/S01MZ (all 11 are first class operators) will be doing their best and represent six different countries: Yugoslavia, USA, Italy, Portugal, Spain and Western Sahara. They will be working from the very heart of the desert as S05X. All of them are very well known DXers and DXpeditioners, and their plans include a 24 hours, all band, all mode, operation from S0-land. Using 1KW output power, they are going to transmit especially on the low bands, CW and SSB, as well as PSK31, RTTY and 6 meters. They will take a special interest/care to listen for USA's West Coast openings. Their antenna farm will include a few yagis, so they expect to have worldwide coverage. Their pilot stations will be the two main editors of the 425 DX News:
Mauro/I1JQJ (i1jqj@interlink.it) and Maurizio (i121171@tin.it)
The QSL Manager is EA4URE, the Spanish Bureau, and S05X is going to be on the air until April 20th. The "S05X Team" now has a Web page active with a SURVEY to fill out for your "S05X" needs/wants (bands/modes). Go to:
http://www.pagus.it/S05X
On-line log search shows 32,906 QSSOs as of Friday, March 28th. The log was not updated during the CQ WPX Contest.

ST, SUDAN. You have until April 2nd to work ST0RY. They continue to be very active, especially during last weekend's contest. All the operators are in good spirits and the equipment is holding up. Pictures, log and updates can be found on the Web page at: http://www.df3cb.com/st0ry

T30, WESTERN KIRIBATI. Tusti, W4WET, is now active as T30ONM from Tarawa. His orginal plans were to head to Nauru (C21) and then go to Tarawa. Nauru said he could get a visa upon arrival, but the airline bumped him because he had no visa. It looks like Tusti will be here through the rest of the week and maybe longer as Nauru does not look possible. Anyway, Tusti has been very active on 20 meters RTTY (some 10/15 meters). QSL via W4WET.

TU, COTE D'IVOIRE. David, F5THR, should be active as TU5CD now through July 1st. As this was being written, no QSNs were reported as of yet. QSL via F8BON.

V6, MICRONESIA (New IOTA Activated). You have a couple of more days to work Joe/I2YDX and Robert/IK2WXZ from Nukuoro Island (OC-259) as V60A and V60Z, respectively. They plan to leave this new IOTA on April 1st (they have been there since March 28th). After their operation on Nukuoro Island and they head back to Pohnpei, another source reports that the two operators will make a several hour stop on Oroluk Island (OC-NEW). They are expected to activate this new IOTA possibly between 0000-0600z (maybe as late as 0800). After this activity, they will then go to Mokwil Island (OC-226) and be active from April 6-7th as V63DT and V63ZR. Most of their activity has been on 40/20/15 meters, mainly SSB very little CW.

XY, MYANMAR (Update to OPDX.603). Frank, DL4KQ, will use the callsign XY4KQ during his operation from April 1-15th. For updated information, please watch the Web page at: http://www.dx-pedition.de

YB0, INDONESIA. Stan Matejicek, OK1JR, informs OPDX that he has just received his Indonesian Radio Amateur Licence, and his callsign is YB0AJR. He will stay in Indonesia another few months at the Czech Embassy. Stan plans to be active on 160-6 meters from not only from Jakarta (YB0), but also from other Indonesian Islands. QSL via OK1JN (his dad). You can find more details on the Web page at: http://www.ok1jr.com
LAST MINUTE NOTE: If you worked Stan during the CQ WPX Contest, he was on West Jawa Island.

ZC4, UK SOV. BASE AREA ON CYPRUS. Bill, G4EHT, will be visiting his son Dez, ZC4DW, between April 14-28th. Bill will be on a family holiday but hopes to schedule in some time on HF CW. He will be operating from the Eastern Sovereign Base using their club callsign ZC4ESB. Please be patient with Bill as he hasn't worked pile-ups for many years. QSL via G4EHT:
Bill Watson, 7 Darwin Close, Lichfield, Staffordshire, WS13 7ET, ENGLAND.

It depends on operator you worked, since it is a club station of Iran postal
office (I think).
If you worked Massoud, QSL info is as follows:
P.O.BOX 333
19575 Teheran
Iran

BTW You can find EP3PTT almost every Sunday on Lazy DX Net runned by HA5CQ,
on 14.242MHz, around 14.00Z.

From January of 2002, I had JH8PHT as the route, but haven't gotten the card yet, so that too may be wrong.

From the cluster of this last week, I now see YT1AD is listed as the
manager..

YT1AD
Dr. Hrane Milosevic, Vitanovac, 36206
Serbia-Montenegro

And now I am really confused, Buckmaster has:

Institute Superieur De L'Animation Pour La Jeunesse Et La Culture, 3V8BB
PO Box 2055, Bir-el-Bey
Tunis,
TUNISIA

Since it appears to be a DX club, maybe the QSL route is up to the operator
at the time.

Exactly. I think you'll find that who's the manager depends on when's
the QSO. Another good reason to collect your post cards now instead of
waiting five or six years......

My only QSOs with Rodriquez Island have been with 3B9FR - so I'd really like to get a card from him. QRZ.COM now shows a direct address (no mention of a manager) but used to show F6FNU as the manager -- but I've sent 3 cards to F6FNU with no results.

Does anyone else have a better route? Has direct worked for anyone?

http://www.arrl.org/hamradio.html

will tell you all you need to know about getting a license.

As for cost, there are so many variables, no one can give you as answer.
You can get a handheld for under $100. Or, you could probably spend
over $10,000 for a fancy base station, tower, and antenna.

Hi,

Massoud is regularly on the air.
I received his QSL in january on which he wrote another address :
P.O.Box 15875-4415
Tehran, Iran.

The QSL is not the one displayed on QRZ or here,
http://www.astrosurf.com/lombry/Radio/qsl-ep3ptt.jpg
but the one displayed in the lower right corner of the same image (for the
moment).

Hi,

Sure you can, even in QRP, all is a question of opening and propagation
depending the sun cycle and activity of the ionosphere
Try mainy in the first hours of the day or i.e. working with the gray line
which is a "powerful amplifier", Hi !

More information about DX and propagation :
http://www.astrosurf.com/lombry/menu-qsl.htm
NB. And for the file, even some CBists worked most DXCC on 11m... (so using
a low power with a 28 Mhz like whip).

Hope this helps.

Not sure if this is the correct newgroup: apologies if it would be better placed elsewhere.

I am thinking of getting a second-hand Ameritron 811 amp to hook up to my FT1000MP Mk5 Field.

Does any one have experience of this (or similar) combo?
Do the Yaesu and Ameritron ALC lines hook up OK?
Are there any particular considerations for connecting the TX/RX relay in the amp to the Yaesu?

I normally operate full-break in CW. How slow (or fast, to be more optimistic!) can I expect the Ameritron switching to be?

Thanks
John, G4IRN.

144.9 or 145.9?

The OSCAR low-earth-orbit satellites transmit between 145.8 and 146.0MHz
, and would account for European signals being heard in Asia on these
frequencies. To my knowledge there aren't any transmitting as low as
144.9 though. I would expect to hear closer (Asia, Australia, etc.)
hams on the same frequencies occasionally.

My guess is, you did hear some EchoLink-signals on your local AM-band.

EchoLink connects repeaters worldwide via Internet. Sound quality is often like
a local-radio-connection.

The Ameritron ALC circuits are adjustable to match your transceiver [-10 VDC max]. My Icom 746 requires -4 VDC max. Simple adjustment...no problems.

Use an isolation circuit on the TR relay. [I use the Ameritron ARB-702 opto isolator]. Many hams use an external keying relay to key the amplifier relay.

623. Good shortwave antenna

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-03 05:40:15 UTC
From: Oleg Konovalov <olegk@yahoo.com>
Message-ID: <b6invm$529$1@news.chatlink.com>
Source record: 10612

Hi,

Can anybody recommend a good inexpensive shortwave antenna ?

Or an easy way of making one?

I remember from my chilhood in Russia (we lived in apartment on the 3rd
floor),
my father had a 20 feet piece of thick (4mm) wire on our balcony
and there was a really big difference between with or without it.

Thank you in advance,
Oleg.

P.S.: Is it true that different radios have different kind of optimal
antennas ?
And some radios don't gain much from using antennas ?
(I happen to have DX-398).

You read it right the first time. It is 144.900 Mhz. Traffic is
very active (almost non-stop) from 10.00 till 23.00 UTC. Mostly it's
European and American Ham's. Signal is weak but readable.I'm using a
Diamond 130J as antenna. I've already checked AMSAT.org but found
nothing. Never heard Satellites doing this low freqs.

And Thank You All...

Coast Station.

Believe me! It is an EchoLink-Connection to the HAM-Frequency you are listening
to.

It's NOT a satellite-signal what you are receiving !

Look at http://www.synergenics.com/el/

It could be echolink ... or it could be a WIRES-II system on a simplex freq or it may be a IRLP node. Do you ever hear them mentioning IRLP NODE numbers (Like Node 755, Node 852 etc etc), WIRES ID numbers (like 1148D, 7110D, 4102D, 5105D ..or something like that) or Echolink Node numbers (like 63231, 74849 or similar etc.) .... If they do say a number ... what do they say ... usually the 3 digit node numbers will be IRLP, the 4 digit and or numbers that end with a D are WIRES-II nodes, and the 5 digit numbers are echolink type nodes.

Does anyone know whether the on-line log is complete.

There is absolutely no doubt in my mind that I worked these guys on
the first call on 80M SSB but I'm not in the log.

I'm okay on 20, which I don't need tho.

Why?

I don't use real-time spots, but looking at the DX-Summit archives
there are several spots from 6's and 7's for the timeframe of my QSO.
I see one other comment that a guy worked them on his first call.

If the log is complete and I'm not in it, they blew it on that end. I
guess I'll start making insurance QSOs, which is really bad practice
but apparently necessary.

Wes-

I'm not in the log for a 17m QSO either. I know I worked someone
claiming to be VP6DIA.

Sometimes calls get recorded incorrectly in the log, and the managers
figure it out. I'll send them my QSL anyway, just in case.

I sent direct QSL to OD5NH some 3 months ago.
No response. A few weeks ago, I sent him an e-mail to ask
if he had received my QSL card. I still havn't heard from him.

If I were you, I would hold back the other cards.

73 de Jon, LA8HGA

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th/March, through Sunday, 6th/April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8/o, VQ9, VR, VU, XE, XT, XU, XW, XX9, XZ, YA, YB, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

5J0, SAN ANDRES ISLAND. Members of the Florida DXPedition Group have entered the CQWW SSB Contests from many DX locations starting in 1996 as WP2AHW. In 1997, they were C6AJT, 1998 as WP2Z, 1999 as J6J, 2000 as FG5BG, 2001 as

J75J, and 2002 HI9X. In addition to the CQWW Contests, their members have operated from Guantanamo Bay, Cuba, Antigua, Montserrat, Haiti, Crete, Wake Island, Spratly Island, Chatham Island, East Malaysia and New Zealand. This year eight members will be operating from San Andres Island (IOTA NA-033) during the period of October 20-28th. They plan to run 4-5 stations before and after the contest. They have also requested the contest callsign 5J0X. In the past they have never asked for any assistance. This year they are asking for donations to help offset the cost. If you are interested in helping them out, please send your donations to: Bill Gallier, FDXPG, 2694 North Camel Ave., Middleburg, FL 32068. Visit their two web pages at:
http://www.geocities.com/hk02003
http://www.geocities.com/w4wx1/upcoming

8P, BARBADOS. Richard, G3RWL, is expected to be active from here until April 20th (No callsign was provided). Activity will be on 40-10 meters, plus 80 and 6 meters if he can arrange the antennas. QSL via his home callsign, direct or to the bureau.

9N, NEPAL. Dov, 4Z4DX, is expected to be active as 9N7DX from April 22nd to May 13th. He will be looking for Israeli stations everyday on 14195 kHz starting around 1500z. His activity will be on all bands and modes, but mostly on PSK31/RTTY/CW.

A4, OMAN (Pirate Activity). Axel, DL6KVA, has been in contact with Alex, A45WD (YO9HP), and has confirmed that a station using Alex's callsign operating on 30 meters (March 29th, 2000-2100z on 10107.6 kHz) was a PIRATE. Alex states he is NOT licensed to operate on 30 meters (yet). All QSLs for this band activity will be returned. He is trying very hard to get approval to operate on 30 meters, but it is going very slow.

CY9, ST. PAUL ISLAND (Update). OPDX was informed that the 5-6 operators (who will be named later) going to CY9-land July 24th-August 2nd, should be active on 160-2 meters SSB/CW/RTTY. The group is trying to get a CY9 callsign which will be put out after their arrival.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Branch Manager, announced this past week that the following is approved for DXCC credit:
VP6DIA - Ducie Island - March 8-13th, 2003

GACW DX CONTEST. Raul, LU6EF, GACW Coordinator, wants to remind everyone that the GACW World Wide DX Contest will be held during the third weekend of April (April 19-20th). For details and rules on the contest, please visit their Web site at: http://gacw.no-ip.org

IN SEARCH OF BY YOUR EDITOR! I know this has nothing to do with DX, but your editor's second love (other than DXing) is MUSIC. I have been searching for a music CD (not LP) called the "Young and Rich" by the group "The Tubes". The CD is now out of print. Please look at your local record/CD store to see if they have a copy. I am interested in buying a copy (or even a backup version) at a reasonable price......Thanks Tedd, KB8NW

IOTA NEWS.....
AF-045. Members of the Association des Radioamateur Senegalais (ARAS)

6W Radio Club will be active as 6V1A from Goree Island, June
7-9th. Activity will be on HF bands mainly on SSB with some
CW. QSL via ARAS QSL bureau to Jean Louis, 6W6JX.

AS-079. Taka, JR3TVH, informs OPDX that he will be active as homecall/6
from Hirara City (near or around), on the Island of Miyako
(Ryukyu Islands, Okinawa-ken) between April 11th (0700z) until
around April 13th (0100z). He will be on the HF band from 40-6
meters on CW, SSB and RTTY. His specific aim on this visit is
to provide QSOs on 6 meters overseas (especially to African and
European stations). Look for his beacon on 50.138 MHz (JR3TVH/b)
to call him on the frequency, or contact him by an E-mail at:
jr3tvh@arrl.net
QSL to his home callsign, via the bureau or direct (QRZ.com).

AS-117. Opertaors JA1KJW, JJ1JGI, JK1EBA and JN1IKT will be active as
homecall/0 from Sado Island, April 10-13th. Activity will be
on 160-6 meters CW/SSB. QSL via the bureau or direct to their
home callsign.

EU-038. Peter, DL4FCH, will be active as PA/DL4FCH from Texel Island,
April 11-17th. Activity will be only CW on 10/15/20/40/80
meters. QSL via his home callsign. An online log will be
available on his home page at: http://www.niksch.de/dl4fch

EU-045. Members of the Mediterrano DX Club (MDXC); Antonio/IZ8CCW,
Antonio/IK8VRH and Gianni/IZ8CGS will be active as IB0DX
from Ventotene Island, April 25-27th. Activity will be on
80-10 meters CW/SSB/RTTY. QSL via home callsign, direct or
via the bureau. Their Web page is at:
http://www.mdxc.org/ib0dx

EU-170. Ron/9A5JR (OE3REB) and Emir/9A6AA will activate the Island
of Dugi Otok (CI-018, CRO-183, not WLH) from April 7th
(afternoon) to April 9th (before noon). They will operate
from the lighthouse of Veli Rat. Look for for them on SSB
on 15, 20 and 40 meters.

EU-171. Ela/DL3YMK and Torsten/DH3YMG will be active as OZ/homecall
from Vendsyssel-Thy/Nordjylland Island (aka Jutland Island).
This island also counts as DIA NJ-001 for the Danish Islands
Award. Activity will take place between now and April 17th.
Operations will be on 40/20/15 meters. QSL via their home
callsign, direct or by the bureau.

SA-056. Members of the HCDX group will be active from April 8-11th
from Muisne Island in the Esmeraldas Province Group. Their
callsign is currently not known yet. Activity will be on
10, 15, 20 and 40 meters. QSL via EA7FTR:
Francisco Lianez Suero, Asturias 23, 21110 - HUELVA - SPAIN.

IR4, ITALY. Igor, IZ4COT, informs OPDX that the IR4A contest team, which
consists of operators IK4MSV, IK4SWX, IK4IDS, IK4HLU, IZ4COT, IZ4DIW and

IZ4AGI, will be active during the ARI International Contest May 3-4th. QSL via the bureau (preferred) or via direct to: ARI, P.O. Box 178, 42100 Reggio Emilia, Itlay.

J5, GUINEA-BISSAU. Miguel, EA5IK, hopes to be active during his spare time from here, April 12-15th. No callsign or bands/modes of activity were provided. QSL via EA5BY.

J7, DOMINICA. Jon/AA1K and Jeanie/AB1P are now active through April 12th as J79K and J79P, respectively. This is a vacation and casual DXpedition. They will have a pair of IC-706's and wire antennas. Jon hopes to be active a little on all of the bands 160-6 meters, but he will focus mainly on CW, especially on the WARC bands. Jeanie will do some phone operating. The second radio will be monitoring 50.110 MHz or CQing on 50.102 MHz CW. Activity began late on April 5th and is expected to end early on April 12th. The only QSNs to report as of print time are Jon was heard on 10107 kHz around 2255z and on 18073/18080 after 1900z. QSL via their home callsign.

OH, ALAND ISLAND. Ben, SM6CCO, will be active as OH0CO from April 10-16TH. Activity will be mainly on the WARC bands and CW. QSL via SM6CCO, bureau or direct.

OY, FAROE ISLAND. Plently of activity by the LLDXT group continues until April 10th. Remember ALL QSLs will be handled by LLDXT's QSL Manager PA5ET. Pictures and an online log search are now available on the LLDXT Web page at: http://www.qsl.net/lldxt/oy_2003/

QSL INFO AND NEWS.....
Activity by 4G6A was by Frank/VE7DP and Rey/4F1FZ on Semirara Island (OC-125). Operation to end April 7th. QSL via VE7DP (QRZ.com).

Phil Whitchurch, G3SWH, is pleased to announce that the 8Q7ZZ QSL cards have been delivered from the printers on April 1st. He states, "Needless to say, I am very embarrassed about the delay in sending out the cards. I have not been responsible for the design or printing of them, as the expedition operators wanted to do this themselves. I will get on with the job as fast as I can now they are to hand, but please do NOT send second applications, as they will not be answered. As you will imagine, there is quite a large backlog of requests to answer, which will take many weeks (if not months) to work through, so please have patience."

According to "The Weekly DX", the AH3D cards will not be back from the printers until May. The QSL is expected to be a great aerial photo of Johnston Atoll. QSL AH3D to: 2003 Johnston Atoll DXpedition, P.O. Box 73, 02380 Espoo, Finland.

QSL AY9H via LU9HO. Use the address on QRZ.com. OPDX was informed to please remind the readers to QSL as follows:
1 SASE with one IRC is ok for reply for the whole world.
1 USD for the bordering countries.
1.50 USD to the rest of Americas.
2 USD to the rest of the world.

Gerben, PA5NT, reports that all direct cards for ST2X have been answered and are in the mail right now. Those who worked ST2X on all 7 bands that were activated will receive a special award.

ST0RY QSL INFO. Chris, DL5NAM, DXpedition Team Leader/QSL Manager, has requested that only one QSL card with all QSO info listed on the card be sent to expedite processing. Chris said that he really did not care if you did not send a card, and a piece of paper would do as long as all info for all your QSOs were on one peice of paper. A system will shortly be in place on the ST0RY Web page to request a bureau card via E-mail. For direct QSL returns for US stations, please enclose 2.00 USD (the German cost of return airmail postage) and a pre-addressed return envelope. For European stations, please enclose one Euro Dollar and a pre-addressed envelope. Direct cards go to Chris, DL5NAM, at: Chris Sauvageot, Guttenburg 19, D-91322 Graefenberg, Germany. Chris also said that individual donations would be greatly appreciated to help defray the great cost of putting #18 of the 100 Most Wanted List on the air for a lot of DXers.

Rustam "Rusty", UU2JQ, informs OPDX that his QSL Manager Andy, KZ1L, passed away in 2001. QSLs for UU2JQ should now be sent to the Ukraine via direct or bureau.

QSL XF3RCC via XE3RCC: P.O. Box 1883, Cancun, Quintana Roo 77500, Mexico. Activity was by members of "Radio Club Cancun" from a few Mexican islands and lighthouses over the past week.

Nik, HB9EAA, informs OPDX that he has been receiving a lot of direct cards for his ZK1EAA DXpedition without sufficinet postage. Nik states to please remember the cost of an airmail-letter for outside of EUROPE is more than 1 USD (approx. 1.35 USD). So all cards without enough postage will answer via the QSL bureau. Also, Nik can't use stamps from USA or JAPAN. These cards will also be answered via the QSL bureau. Detailed information about his activity can be seen on the Web page: http://www.qsl.net/hb9eaa/dxped03/
The ZK1EAA activity on 40m or 30m was not operated by Nik. (This was a Pirate). An ONLINE log of ZK1EAA will be available soon.

S0, WESTERN SAHARA (Update). The S05X Team keeps preparing the next "BIGGEST DXPedition" ever seen in the Sahara Desert. They will have 11 operators from 6 different countries. The S05X Team will be active from April 16-21st, and be on air from Tifariti, Western Sahara, operating 24 hours, on all bands, all modes. The list of equipment includes: Kenwood TS2000, a few Icom 706s, Icom 756PRO and a BRAND NEW ICOM 7400 (Icom 746PRO) to test in this really hard environment. They have this special Icom IC7400 thanks to one of their supporters, the major Icom reseller in Italy: Giorgio Mossino's "D.A.E. Telecomunicazioni" who is always ready to support RADIO ACTIVITIES. Other kind supporters have supplied the team with 4 brand news laptops to use during their DXpedition. "Hewlett Packard of Italy" will let them use their fast new XE4000 for their logging and digitals transmission. From the first day of operation, S05X will be on CW, SSB, RTTY and PSK, and is expected to provide you with a 59(9) signal from an exceptional locator for the very first time.

The S05X Team will be on 6 meters from a very new LOCATOR: IL46RD
They are going to use a 6 meters 3 element yagi (Cushcraft A30S) during
the operation. They will try to be on air as much as propagation allows
because they know this is the very first time this locator is activated.
QSL Manager is URE, the Spanish National Asociation and Bureau, and the
cards will go VIA EA4URE. Any comments or ideas can be sent to their
specials pilot stations: Mauro I1JQJ (i1jqj@interlink.it)
Maurizio (i121171@tin.it)

SPECIAL EVENT. The Maritime Radio Historical Society is pleased to announce
that K6KPH will be on the air on April 26th, to participate in the annual
International Marconi Day commemorative event. International Marconi Day
takes place each year on a weekend close to the birthday of the great
radio pioneer Guglielmo Marconi. The event is organized by the Cornish
Amateur Radio Club which offers awards to stations in various classes.
See their Web site for details at: http://www.gb4imd.co.uk/
Station K6KPH's transmitting frequencies will be 7050, 14050 and 21050
kHz (3545 kHz may also be activated if conditions warrant). Also, K6KPH
will begin operations on April 26th at 1700z (1000 PDT). The actual
International Marconi Day event runs from 0000-2359z on April 26th. QSLs
for K6KPH and reception reports may be sent to: Ms. DA Stoops, P.O. Box 381,
Bolinas CA 94924-0381, USA. Visit the Maritime Radio Historical Society
Web page at: http://www.radiomarine.org

TX4, MARQUESAS ISLAND (Update to OPDX.597 and OPDX.602). Silvano, I2YSB,
informs OPDX that his callsign for his April 25th-May 9th operation will
be TX4PG. Updates and all other information is available on his Web page
at: http://digilander.libero.it/i2ysb

V2, ANTIGUA AND BARBUDA. A group of amateurs from the recently formed
Antigua and Barbuda Radio Club (callsign V21ARC) will be going on DXpedition
to the sister island of Barbuda over the Easter weekend (April 18-21st).
Their callsign for this operation will be V21BBQ (BBQ is the Airport
designator for Barbuda Airport!). They plan to operate on 160-10 meters
plus localized 2 meter contacts. The plan is to have three stations on HF
and one on 2 meters. To their knowledge, there has never been any ham
activity from Barbuda. With their activity and presence on the island,
they hope to expose the residents to ham radio and secondly, to familiarize
the ham community with Barbuda. QSL to: Antigua & Barbuda Radio Club,
P.O. Box 965, St.John's, Antigua, West Indies.

VK9X, CHRISTMAS ISLAND (Update). Steve, VK3OT (ex-VE3SIX), reported before
he left Victoria on April 4th, that he has changed his operating schedule
for his VK9XI operation between April 7-21st. His priority is now the 6
meters band and HF CW when 6 meters is closed. The following operating
times are subject to change due to propagation and solar activity.

Time	Band	Frequency	Mode
0200z	10m	28040 kHz (Up 5)	CW Primary
0400z	15m	21040 kHz (Up 5)	CW Primary
0600z	20m	14040 kHz (Up 5)	CW Primary

0800z 30m - 10114 kHz (Up 1) CW Only
0900z 40m - 7030/7055 (Up 5) CW Priority
1000z 80m - 3530 (Up 5)/ 3797.5 CW Priority
1100z 160m - 1827/1822 (Dn 5) CW Only
0000-1500z 6m - 50115 (Up 5) (QSX 50110 and 28885)

Steve may make possible appearances on the "IOTA Net", Saturday on
14260 kHz at 1300z and Sunday on 21260 at 1300z. Also, watch on the
weekends for him to possibly show on the ALARA Net, 14222 kHz at 0600z
and on the daily ANZA Net, 21205 kHz at 0500z. QSL via VK3OT (Direct
ONLY) to: Steve Gregory, Post Office Box 622 Hamilton, Victoria 3300,
Australia. For a printout of the frequency schedule, visit the Web
page at: http://members.datafast.net.au/electronics/path.htm

VP5, TURKS AND CAICOS ISLAND. By the time you read this, Rodger/GM3JOB
and Willie/GM4ZNC should be active once again as VP5/homecalls from North
Caicos (NA-002) between now anf April 19th. No QSNs have been reported yet
as of print time, but they plan to be active on most bands CW/SSB. QSL
via their home callsigns, either direct or through the bureau.

XY, MYANMAR. Franks, DL4KQ, is now active as XY4KQ until April 15th. He
was heard this past weekend on 20 and 15 meters. Watch 14150 kHz between
1800 and 2045z. Also, watch 21307 kHz after 1630z. Remember, his activity
is expected to be on all bands including the WARC bands, and he will try
to activate a new IOTA (refer OPDX.603). For more info and updates, go
to the Web page at: http://www.dx-pedition.de

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not

have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

650. portable radios

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-07 00:56:54 UTC
From: amaggitti@yahoo.com
Message-ID: <22cfb408.0304061656.77b30fd@posting.google.com>
Source record: 10633

i've been looking for a decent portable radio that has some extras.
here are a few i recently came across and any comments are welcome.

this site has three that look good:

http://www.europradio.nl/radios/portable/

1)Telefunken Bajazzo 101 - i really like this one.
But it only goes up to 104mhz - is that a major issue?
The MW stands for AM - right?
SW - with bandspread(whats that)
LW - longwave? FM?
Also this one has a ferrite rod antenna which is supposed to be
good for
picking up AM stations?

2) Telefunken 201 doesn't say too much about it.
3) Schaub-Lorenz - again only up to 104mhz. And I don't understand the
band
description.

i emailed to find out about them working on 120v. the above have
inputs for tape/cd. and probably have better sound?

this site has two:

http://www.radioattic.com/ads.htm

1) Airline GEN1495A
2) GE Electric Monitor

i do want good sound and something to mess around with i.e., pick up
stations etc...

any comments are appreciated.

al

**

RADIO HONORS: WORLD AMATEUR RADIO DAY

Amateur Radio Supporting Education' is theme for World Amateur Radio Day. Its coming up real soon. RSGB newsreader Jeramy Boot, G4NJH, is here with the details:

--

The theme of this year's IARU World Amateur Radio Day is to be 'Amateur Radio supporting technology education in the classroom'.

World Amateur Radio Day is marked on the 18th of April each year to commemorate the anniversary of the founding of the International Amateur Radio Union on that date in 1925.

Ole Garpestad, LA2RR, the Chairman of IARU Region 1 writes: "There is no doubt that the future of amateur radio belongs to those that are now in the classroom. In keeping with this theme, I would like to encourage every society in the Region to let our young people know that amateur radio is a unique hobby - simultaneously sport, scientific study, personal pleasure and collective activity. And that radio amateurs today are voluntary and selfless researchers in the technological field of amateur radio, an important resource to every country, and something to be proud of."

"But the 18th of April is not only a day to think about our future, it is our day, a day for celebration. All of us, societies and individuals, can celebrate in our various ways - organizing presentations, club meetings, parties, honoring senior radio amateurs who go back to the early years of IARU, or just putting our equipment on the air and making just a single QSO on this day, so realizing how large our ham community is."

Jeramy Boot, G4NJH

--

Again, the date for this years World Amateur Radio Day is Friday, April 18th. (GB2RS)

**

HAM RADIO IN SPACE: PROJECT EAGLE ON HOLD

Plans to launch one of two new ham radio satellites have been put on hold. The reason for the setback can be traced to one word: Funding.

The bird in question is named Project Eagle. It, along with the Project Echo ham-sat is one of two birds that AMSAT had previously announced for development.

According to AMSAT North America President Robin Haighton, VE3FRH, the current levels of contributions to the amateur satellite organization are not enough to pay for building and launching both future satellites. One of two projects has to be put on hold and furloughing Eagle has been the decision.

Up until now AMSAT North America had been working on both new satellites simultaneously. While ECHO is still on schedule for possible launch later this year, the launch of Eagle has been delayed indefinitely. (AMSAT)

**

HAM RADIO IN SPACE: TWO-HAM CREW HEADED TO THE ISS

Just as ARISS Chaiman Frank Bauer, KA3HDO, predicted a few weeks ago, two ham radio operators will be replacing the current three man crew on board the International Space Station. A NASA announcement identifies the latest space adventures as U-S astronaut Ed Lu and Russian cosmonaut Yuri Malenchenko.

Lu holds the call sign KC5WKJ while Malenchenko is RK3DUP. They will comprise the Expedition 7 crew, replacing Expedition 6 astronauts and Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Russian cosmonaut Nikolai Budarin.

NASA and its partners decided on manning the ISS with two space explorers instead of three as an interim measure until the U-S space shuttles are flying again. A two man crew conserves on the amount of vital supplies needed for on-orbit life.

Three person crews will resume when the Columbia disaster investigation is concluded and the space shuttles take to the sky again. The three remaining Shuttles in NASA's fleet Endeavour, Atlantis, and Discovery have been grounded until the cause of the Columbia accident can be determined and safety changes implemented.

NASA's Return to Flight team has been told to complete their initial tasks in time to support the earliest possible launch date, which would be this fall. But officials of the space agency say that it could take

months longer to prepare the shuttles to fly again. (From published news reports)

HAM RADIO AT WAR: DOING BATTLE WITHIN

Ham radio is supposed to transcend international politics, but you would never know this by the on-air antics of one unnamed Ukrainian radio amateur and a few stateside hams.

Lets start with a post on the QCWA remailer by Bob Harvey, K2PI. Harvey says that he heard the Ukrainian operating a contest on March 30th. Thats not news in itself except that the Ukrainian was refusing to work United States or U-K amateurs because of the war in Iraq.

Harvey writes that the Ukrainian said to call him only if you supported his view that the United States was conducting an illegal and evil war. Needless to he had no QSO's with any American or British hams.

But theres another side to it. John Sielke, W2AGN comments over the same QCWA remailer on the plight of a French ham friend of his. W2AGN says that the guy was harassed off of another ham radio remailer only because he was French and the other hams did not agree with France's anti-war stand. Sielke says that the unidentified French ham was truly vilified even though he had made no comments concerning Iraq or politics. He was just attacked purely because he was French. (QCWA Reflector)

**

RADIO RULES: FCC CONSIDERS INTERFERENCE IMMUNITY FOR RECIEVERS

We predicted a month ago that it would happen. Now comes word that the FCC has issued a Notice of Inquiry, seeking comments on possibly requiring receiver manufacturers to build in a certain level of interference immunity. Bill Pasternak, WA6ITF, has more:

--
As noted on the CQ Magazine website and elsewhere in cyberspace, amateurs have been frustrated for years by trying to explain to neighbors that interference problems were really the result of poor design. Bad engineering in their TVs, stereos, cordless phones and other receivers.

Now, because of the need to protect Digital Television transmissions, the FCC is seeking comments on the current immunity performance and interference tolerance of existing receivers. Its also looking at the possibilities for improving receiver immunity in the not to distant future.

The FCC says that it is soliciting input from the public on possible approaches to achieving desired levels of receiver immunity. This runs the gammit from better product warning labels to the possibility of implementing mandatory standards governing the manufacture, import and sale of consumer electronics reception gear.

It is all in FCC E-T Docket 03-65. You will find it on the web by using the document search engine at www.fcc.gov.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

Again the inquirtey into interference immunity standards can be found in FCC E-T Docket 03-65. (CQ Website, FCC)

**

FCC: VANITY FEES MAY BE GOING UP

If you are planning to go for a vanity call sign, do it now or be prepared to pay a few cents more. The proposed hike to $16.30 for a vanity call comes in an FCC Notice of Proposed Rule Making dealing with fee collection matters released on March 26th. Its all in M-D Docket No. 03-83 and comments on it are due no later than April 25th. (From FCC release)

**

ENFORCEMENT: FCC - YOU SOLVE THE PROBLEM

The FCC has told the operators of two competing repeaters that its not going to solve the dispute between them. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has written to Grearal Gogue of Conway Arkansas, David Stone of Morrelton, Arkansas and Tom Lee of Jerusalem, Arkansas, regarding repeaters AC5RU and KD5CYA. In the letter it was stated after reviewing the submissions of all relevant information, we declined to intervene in this dispute. It is our position, that in this case, both parties are responsible for solving the interference and we urged them to so in the best interests of Amateur Radio."

--

In this case, two repeaters sharing the same frequency claim mutual interference. On May 24, 2000, the FCC opened an inquiry about

allegations that Lee's AC5RU system was causing harmful interference to coordinated repeater KD5CYA, licensed to Gerald Hogue. The allegations stated that Lee's repeater was uncoordinated because the coordination had been forfeited by numerous changes in location.

On August 14, 2000, the FCC notified Lee that it was his responsibility to prevent interference to KD5CYA inasmuch as it appeared to be the coordinated repeater. On September 14, 2000, after reviewing Lee's lengthy response, the FCC rescinded its requirement that Lee solve the interference to the KD5CYA repeater. This is because it was unclear to the FCC as to which repeater was properly coordinated. The Commission said that it was not an appropriate matter for enforcement action. It also urged the parties to take advantage of the mediation and dispute resolution program of the ARRL but one declined.

Lee submitted additional information on January 5, 2001. On February 8, 2001, after receiving additional documents from all parties, the FCC stated that although it failed to see why mediation or arbitration would not be a viable option, we nevertheless agreed to review the matter once again. In response to allegations of deliberate interference, we cautioned everyone involved to cooperate in the resolution of this matter.

Now, almost two years later the FCC has again said its not going to act. It says that after reviewing the submissions and all relevant information, that it will not intervene in this dispute. The agency says that in this case, both parties are responsible for solving the interference and it urges them to do so in the best interests of Amateur Radio. (FCC, RAIN)

**

AT THE FCC: MULETA NEW WTB CHIEF

John Muleta is the new Chief of the FCC's Wireless Telecommunications Bureau, which regulates amateur radio along with other two-way radio services. According to the ARRL, Muleta worked for the FCC from 1994 to 1998 and his positions included Chief of the Enforcement Division. He has also worked in the private sector since 1998. Muleta succeeds Thomas Sugrue, who headed the bureau the last four years. (ARRL)

**

RADIO LAW: CONGRESS APPROVES DIFFERENT AMBER ALERT MEASURES

The United States House of Representatives has approved creation of a nationwide Amber Alert network. The action came on Thursday, March 27th after politicians on both sides of the aisle attached several additional child protection measures to the bill.

The bill, approved by a 410 to 14 vote, now goes to the Senate, which earlier approved legislation authorizing only the nationwide child kidnapping alert network. President Bush has commended the House on

acting on legislation to help expand an Amber Alert system across the nation. He says that he looks forward to signing a reconciled version of the bill. (Published news reports)

**

RESCUE RADIO: UK POLICE ASK HAMS TO HELP SOLVE ROAD MURDER

Police in Surrey are asking U-K hams and C-B operators to help solve a case of murder by road-rage. Just after midnight UTC, on Friday the 21st of March, a truck driver on the M3 motorway was driving northbound when someone threw an object at the cab of his vehicle. It smashed the windshield and hit the driver and fatally injuring him. He was able to bring the truck to a safe halt before loosing conciousness. He died at the scene.

Investigators belive that the object was thrown from a footbridge over the highway. They are asking any ham or C-B operator who was driving in the area that night to call in and let them know if they saw anything. Surrey Police say that any leads would be appreciated. (GB2RS)

**

RESCUE RADIO: HAMS HELP SAVE YOUNG BURN VICTIM IN HONDURAS

The ARRL Letter says that quick action on the part of a group of ham radio operators may have saved the life of an young burn victim in Honduras. The 8 year old girl was seriously burned late last month. Amateur Radio operators and volunteers at the International Health Service clinic in a remote village in southeastern Honduras and stateside hams worked together on the air to bring needed treatment to the child. With ham radio to coordinate the move, the youngster was evacuated by air to the nearest town with a hospital. From there she was taken to the capital city of Tegucigalpa, where the University of Honduras Medical Center has a burn trauma unit. (ARRL)

**

WELCOMING THE YOUNG: W9SM AT THE WAUSAU CHILDRENS FESTIVAL

The Wisconsin Valley Radio Association will be sponsoring a special event station W9SM, at the 30th Annual Children's Festival in Wausau, Wisconsin.

The date is Saturday April 5th. The Children's Festival features hands-on activities at numerous booths run by various community groups.

The special event station will operate between 1600 UTC and 2200 UTC on April 5th. This, in the General portions of the 10, 15, 20 or 40 meter bands both SSB and CW.

While in operation the station will demonstrate several aspects of amateur radio to the children attending, including APRS and High Frequecy operations. The kids who stop by will also have the

opportunity to get on the air.

The Festival is sponsored by the Children's Festival Committee and the Wausau and Marathon County Parks and the Recreation and Forestry Department. QSL via WB2TLQ at his callbook address. (WB2TLQ)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION - APRIL 9

On the convention scene, the annual Amateur Radio Reception at the National Association of Broadcasters Convention is slated for 6 to 8 p.m. on Wednesday April 9th. The venue is the Hilton Hotel in Las Vegas Nevada, right next door to the famed Las Vegas Convention Center.

This years hosts are again CQ Magazine and Kenwood Communications. Publisher Dick Ross, K2MGA and Editor Rich Moseson, W2VU will be there representing CQ. Paul Middleton, K4NUH, will be on hand for Kenwood.

Between 800 to 1000 hams in the broadcast industry attend this yearly ham radio social get together. Among them will be top ARRL officials and some of the folks from Amateur Radio Newsline.

The National Association of Broadcasters Convention is one of the largest held each year in Las Vegas. It typically draws over 100,000 attendees. More information is on the web at www.nab.org/conventions/nab2003 (ARNewsline™)

HAMFESTS AND CONVENTIONS: GO SEE THE TV COMMERCIAL

Ever see a television commercial for a ham radio convention? Well the Rochester Hamfest has one and its now on-line so that you can see and hear it.

The commercial comes courtesy of the Rochester Hamfest. That show is slated for May 30th through June 1st at the Monroe County Fairgrounds in Rocheter New York.

To view or download the T-V spot go to www.rochesterhamfest.org. Then scroll down to the words "click here to see our new TV commerrcial."

And oh yes. A high speed connection is recommended. This is because it is a 5.9 Mega Byte file that opens in most recent media players

including Apple Quicktime and Real Player One. (Rochester Hamfest)

**

HAM RADIO IN SPACE: THE 2003 AMSAT-UK SPACE COLLOQUIUM

And the 18th AMSAT U-K Space Colloquium will be held from July 25th to the 27th at Surrey University, Guildford in Surrey England. This year speakers are a bit hard to find. So planners have relaxed the requirement for a printed paper to accompany the talk. AMSAT says that in 2003 this will not be mandatory.

Other changes this year include "Beginners' Sessions" on both Friday and Saturday afternoons and an earlier start of talks. These will begin right after lunch on Friday but alternate planned tours will be available all day.

Full information about the 2003 Colloquium is on the AMSAT-UK web site. You will find it in cyberspace at www.uk.amsat.org/colloquium.htm. (AMSAT-UK)

**

INTERNATIONAL - UK: CB RULES AND FREQUUENCIES TO CHANGE

On the international freont, look for some major changes to happen to 11 meter Citizens Radio in the United Kingdom over the next several years. This, as the result of the British equivlant of our Notice of Inquirey being issued by their Radiocommunications Agency on March 25th.

The Consultation Document -- as it is known -- contains a proposal to deregulate Citizens' Band radio in the United Kingdom and withdraw the 40 U-K only CB channels by 2010. It also proposes removing the need for individual licensing in 2004.

Not changed would be the current technical equipment requirements and the current operating rules. The deleted U-K only channels would be replaced by the 40 pan-European C-B channels. A press release from the U-K Radiocommunications Agency says that this deregulatory move is intended to provide easier access to C-B and to enhance enjoyment of the hobby. (GB2RS)

**

INTERNATIONAL - INDONESIA: WORLD-WIDE CB DIRECTORY

The Indonesian DX Club is inviting Citizen's Band operators around the world to register their callsigns for the IDXC's C-B Radio Callsign Directory. IDXC is the only one DX listeners club located in Indonesia, and regularly listed in the World Radio TV Handbook. To learn more about the club and register take your web browser www.idxc.org/callsign and explore a rather interesting spot in cyberspace. (IDXC)

**

AWARDS: GET YOUR SWL CERTIFICATE

Duane Fischer, W8DBF, says that the beautiful Hallicrafters Ccollectors International Short-Wave Achievement Certificate is still available. You get it for verified reception of 25, 50, 75, 100 or more countries. Proof of reception is not required as the award runs on the honor system. You can see a low resolution copy and get more information on line at the Hallicrafters Ccollectors International website. Irts in cyberspace at www.w9wze.org (W8DBF)

**

DX

In DX, word from KA2AEV that a group from the recently formed Antigua & Barbuda Radio Club will be traveling to their sister island of Barbuda April 18th to the 21st. Plans call for stations on 160 through 10 mters plus a 2 meter station for local contacts using the call sign V21BBQ. Organizers say that to their knowledge, there has never been any ham activity from Barbuda. In addition to racking up contacts the operators hope to expose the islands residents to the magic of the hobby while familiarizing the worlds ham community with Barbuda. QSL to the Antigua & Barbuda Radio Club, P.O. Box 965, St.John's, Antigua, West Indies. (KA2AEV)

Also, PS7AHR is the official station of The Brazilian Amateur Radio Historical Archive . According to Ronaldo Reis, PS7AB, this is an organization devoted to documenting and preserving the history of amateur radio in Brazil. If you happen to contact it, please QSL via the bureau or direct to P.O. Box 2021, Natal/RN, 59094-970, Brazil. More information, in Spanish and English, can be found on the web at www.ps7ab.com.br (PS7AB)

**

THAT FINAL "APRIL 1ST" ITEM: RADIO THAT CAN MAKE YOU SICK

And finally this week, it appears that some hams may be facing a new health threat ... especially if they eat while operating the radio. Roving correspondent Pierre Pullinmyleg is back from his self imposed exile and filed this report on Tuesday, April 1st:

--

For decades, wives of radio amateurs have said that ham radio makes them sick to their stomachs. Now, it seems that ham radio may actually DO that.

The French Office of Oohs and Lalas, or FOOL, has been studying reports of amateurs falling ill after eating while operating during certain band openings on 6 and 10 meters. Officials at FOOL have determined that the problem occurs only during periods of sporadic-E propagation and believe that the radio waves carry with them into the shack of ham some of the ionization from the E-layer of the ionosphere.

If food is present at the amateur's operating position, then the ions apparently interact with bacteria present in the food to cause food poisoning. The scientists have determined that this is a type of E-Coli contamination which they have named Sporadic-E-Coli, both because it occurs only sporadically and because it appears to be caused by sporadic-E radio signals. They recommend using audio filtration in order to "cleanse" the signals before they reach the speaker, which appears to be the major medium of transmission.

Reporting from the E-layer, this is Pierre Pullinmyleg for Newsline.

--

Pierre says that another option, of course, is to eat in the shack only during periods of F-layer propagation -- and then -- to only munch on chocolate F2 layer cake. (A Pierre Pullinmyleg Annual April 1st Exclusive Report)

Sounds like the pll is coming unlocked. The TS940S I used to have had the same problem. Check the Kenwood site for a possible service bulletin regarding this. There was a fairly simple fix for the 940 shown there. If there is no bulletin, check your pll board for dirty contacts, loose connectors and bad solder joints. Over the years some of the solder traces will develop hairline cracks that will contribute to this problem. When cleaning contacts, use cotton swabs with DeOxit. Don't spray the stuff on the board, there are components there that do not like the stuff. Good luck on weeding out the problem.

"The Countess" <countess@upticks.com> wrote in message
news:0304081632506288@news.ttnet.net.tr...
EXECUTIVE SUMMARY VICTOR INDUSTRIES Victor Industries, Inc. (OTCBB: VICI) is beginning the transition from a development stage Company to the operating stage. Sales of its revolutionary moisture and fertilizer conservation tool, ENVIROLIZERTM , began in October of 2002. Additional sales have been booked for March, 2003. Nesland Enterprises of Snohomish, WA was the first distributor to successfully market the product. Nesland Enterprises is a regional distributor and the sales were relatively small, given the timing of introduction. (Apparently, not a lot of fertilizer is sold during the winter in the Northwest) The Company recently hired the Lawn and Garden Performance Group (www.lgpg.com) to introduce ENVIROLIZERtm on a nationwide basis. The Lawn and Garden Performance Group has a twenty year track record of successfully introducing new products to the lawn and garden industry. (Progress Report available by contacting the VICI) Rumor is that ENVIROLIZERtm will be in the running to be voted on as a candidate for the best new lawn and garden product for 2004. (Free samples are available by contacting VICI) A successful launch of ENVIROLIZERtm sales on a nationwide basis would greatly enhance Victor Industries in the eyes of investors across the country. The manufacturing and shipment of ENVIROLIZERtm is largely out sourced and does not require a great deal of managements time. With the present pricing the gross margins are approximately 400 percent. Pre-tax net margins should equal approximately 25% so that 1mm in sales should result in $250,000 in EBITDA. In addition, the present management has the resources necessary to alter the strategy of Victor Industries to reflect a "holding company" mentality. Recently, the management provided the vision and resources to develop a new company that will be spun off to shareholders. New Wave Media Corporation began operating a new radio station in Great Falls, MT on February 1st, 2003. It is already, in the managements opinion, the first or second most popular radio station in Great Falls, MT. Josh Gager will be the Company's president. Mr. Gager's vision for New Wave Media is to own or operate 22 radio stations in Western, MT. Due to Montana's status as a relative economic back water there are operating radio stations that reach very small population centers, that with minor modifications could be transformed into radio stations reaching the major population centers in Montana. The economic growth in Western, MT has been very rapid. In short, Western Montana has been "discovered". This first station is owned by Flinn Broadcasting of Memphis, TN. Flinn currently owns approximately 40 radio stations. Flinn is in the business of acquiring radio stations and around the country and allowing "locals" to operate the stations through a"Local Marketing Agreement" for a set monthly amount. The communication companies that specialize in radio command high premiums to the market. Fisher Communications, Clear Channel and Westwood One

are examples of the premiums commanded by the radio station industry. Mr. Gager believes that the stations will average approximately 1MM per station to the top line, annually, with about half dropping to the bottom line of the Company before taxes. These numbers, if realized, would place the Company's shares at slightly more than one times EBITDA, before accounting for any sales of ENVIROLIZERtm. Radio station companies such as Fischer Communications and Clear Channel Communications (CCU) sell for 30 times earnings. Further, Victor Industries is in the process of developing two additional shells that the management intends to merge operating company's into, and spin them off to shareholders as separately traded entities. In sum, Victor Industries offers exceptional growth opportunities through sales and profits via its revolutionary product ENVIROLIZERtm, rapid expansion of radio stations in a high growth area of the country and the potential to own four publicly traded companies. For the near term, over the next year, it is not unreasonable to assume 1mm in sales of ENVIROLIZERtm with $250,000 in EBITDA combined with $500,000 of EBITDA from the single radio station to total $750,000. The market cap at one cent is $1,250,000. At a multiple of 30 times EBITDA the stock would trade at 30 cents per share or 20 times today's price. Note that some country QSL buro's do not forward cards to ham who are not members of the buro's sponsoring clubs. I don't know if that is the case in Mexico.

From the ARRL:
http://www.arrl.org/qsl/qslout.html
Countries that currently restrict the forwarding of QSL cards to anyone other than members of that country's national radio society include the following:

Denmark ?? France ?? Germany ?? Greece ?? Hungary ?? Italy ?? Japan ?? Monaco ?? Morocco ?? Norway ?? Poland ?? Portugal ?? South Africa ?? Zambia

Ya know I always know better but for some reason this time I didn't heed my own warning. I had advertised a HR2600 with a chipswitch and 2 - 150 amps for sale. One having a preamp switch problem and needed a new switch but the amp side worked perfectly. And I got alot of action but no sales. Well after 2-3 months I got an email from

MITCH N2RADIO [mitch@n2radio.com] MITCHELL Robertson [MR_CPTN@militaryministry.net]

Stating that he had a 6900TB to and an Boomer 600 amp to trade for my stuff. I was like ok, no problem. I got everything packaged up in bubble wrap and boxed real well. And waited for ups to pick it up. And he was to do the same. Well he gave me a tracking number 2 days later and the package was on its way to me. Well mine left and went to him. I triple checked the operation of all the equipment before I packaged it up. Just because I did a trade earlier that month (Sept) and had a DOA problem with a scanner. So I made sure that the equip worked perfectly. Well I found out that Mitch was in the military and was being shipped out. And his family is moving. So they wouldn't be able to get email for some time.

Well the package arrived at completely the wrong address, which was intentional because Mitch and his wife Laura had both double-checked the shipping addy with me. I finally get the package and guess what? Its 3 Chilton's repair manuals no equipment to be found. Well did I get hosed but bad. So over the next 4 months I emailed both addresses well over a hundred times. And no response at all. Well I have a few connections in the military and I'm making some requests. I'll see what happens it should be interesting to say the least. The last email I sent Mitch and his wife I told him this and told him by Jan 1 If I didn't hear anything I would take action. Still no reply!!

Well as I'm typing guess what, I get a box in ups!! SO I open it up and there is my 2600 back and one 150 amp that I sent to him. And a note that the 2600 doesn't receive, the first amp is dead, and he kept the other amp and sent me 2 beat up 15.00 microphones one with an echo. DAM JUNK!! And a mini para dynamics meter DOUBLE JUNK!!! Then he has the balls to throw in a pc board for an amp kit. Well I just wanted EVERYONE to know what happened to me. So if you do business with him BEWARE I warned you.

Robert Mitchell AKA Mitch Robertson AKA deadbeat user

662. New Logging Program?

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-10 18:23:15 UTC
From: Brian Short <bshort4@cox.net>
Message-ID: <BABB20A0.568F%bshort4@cox.net>
Source record: 10646

New Logging Program?

I'm curious, what other logging program is there?

I originally bought LogWindows from AEA along with the
digital mode program which could operate with it. It has
been about 10 years for me, but support is now non-existent.

Unfortunately, it is unusable for me, as is.

I want to have packet cluster (TNC or Telnet), radio control
(FT-1000mp), rotor control (DCU-1), and (optionally) some
integration with RTTY/PSK-31 (PTC-II).

I've heard DXBase is good? Suggestions?

http://www.k7on.com/

663. Longines Symphonette and Craftsman on ebay

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-10 18:56:15 UTC

Message-ID: <22cfb408.0304101056.1e2bffab@posting.google.com>
Source record: 10647

These two are on ebay - anyone have any info?

Longines Symphonette
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=15051&item=3018134964&rd=1

Craftsman
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=15051&item=3018131228&rd=1

Do all the multiband radios have ferrite rod antennas?

I wanted to get a portable for surfing the airwaves and would like an
older multiband if it it is a decent model. Definitely want the
earphones to be in stereo.

Thanks for any comments
al

Suggest you contact his Commanding Officer at Fort Collins. He or She would have little or no legal pressure to assist but usually is interested in the actions of a member of the unit.
Sorry you got dinged.

Amateur Radio Newsline™ Report 1339 - April 11, 2003

The following is a closed circuit report. Here is Amateur Radio Newsline's support fund administrator, Andy Jarema, N6TCQ.

--

For the month of February we heard from: Monthly contributors Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, and Scott Hensley of the Area Communications Team, of San Jose, CA. Total contributions were $25, with NO clubs heard from. On the other hand, our expenses were $661.

That doesn't work! We need your help to keep these newscasts on the air!

I'll make you a deal: you send whatever you can, and I will take the next few weeks to catch up on who's been helping us stay on the air over the past year.

A reminder that Am,ateur Radio Newsline™ is a federal, 501 (c)(3) non-profit corporation. All contributions are tax-deductible.

The address for the Newsline Support fund is PO Box 660937, Arcadia, CA 91066. If you missed it, it will be given again at the end of this week's newscast. I'm Andy Jarema, N6TCQ.

--

Thanks Andy. That ends the closed circuit with Amateur Radio Newsline report number 1339 with a release date of Friday, April 11 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia says its time to restructure that nations Amateur Radio Service and ham radio in Iraq. These stories and more on Amateur Radio Newsline report number 1339 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: AUSTRALIA SAYS TWO LICENSES WILL DO

The Wireless Institute of Australia says that its time to restructure ham radio down-under and that two licenses will do. David Jones, VK4OF, reports from last weekends W-I-A Annual General Meting in the city of Adelaide:

--
Audio report only. Hear it at http://www.arnewsline.org
--

Jones' report quotes a press release from Wireless Institute of Australia President Ernie Hocking, VK1LK. We will have more in future Amateur Radio Newsline reports. (Q-News)

**

AMERICA AT WAR: BAGDHAD RADIO CLUB STATION CLOSED FOR DURATION OF WAR

Ham radio will hopefully re-emerge in Iraq after the war has ended. In the meantime, the Daily DX and the ARRL Letter relay information from Diya Sayah, YI1DZ. This, on the plight of one of that nations best known Amateur Radio operations.

YI1DZ, is one of the primary operators at the Baghdad Radio Club YI1BGD station in Baghdad. He reported that just prior to the outbreak of hostilities in Iraq that he had dismantled the station. Also, that all of the equipment is stored in as safe a place as possible.

Daily D-X Editor Bernie McClenny, W3UR, says that he doubts there will be any activity in the near future from YI1BGD or any other Iraqui Amateur Radio station. The YI1BGD club station went on the air in the 1970s and the Iraqi Association for Radio Amateurs remains an International Amateur Radio Union member-society. (ARRL, Daily DX)

**

IN THE PUBLIC LIGHT: AMATEUR RADIO AT NAB-2003

I'm Bill Pasternak, WA6ITF, in Las Vegas Nevada, where the National Association of Broadcasters Convention Amateur Radio Reception is just winding down. An estimated 700 hams involved in the broadcast profession spent the last 2 hours enjoying one anmothers company. They also heard a brief talk by ARRL Presodent Jim Haynie, W5JBP, who used the occasion to thank thee Las Vegas Amateur Radio Club for an important monetary donation:

--

Haynie: "I want to thank the members for the $1000 donation to the (ARRL) Education and Technology Fund. We think it is particularly important in as much as the Big Project as we call it -- in slang terms -- is teaching kids about Amateur Radio who will hopefully be the next engineers at your radio station or something like that. This exposure to electronics is very important to Amateur Radio and very important for industry.

So with that, have a good time , and again my thanks to the Las Vegas Amateur Radio Club for your vey wonderful and generous donation."

--

Well over 100,000 broadcasters and those in allied businesses attended the 2003 National Association of Broadcasters convention. Among them where three friends who hads not seen one another in almost three decades. They are Dick Flanagan, W6OLD, Martin Geisler, WA6TIC and this writer. All of us were members of the Palisades Amateur Radio Club back in the 1970's. Ill be back with more about this radio club after a short airplane ride home.

Annd less we forget. The N-A-B Amateur Radio Reception was again co-sponsored by Kenwood Communications and CQ Magazine.

Reporting from a quiet alcove just outside the Las Vegas Convention Center on my way to McCarren airport, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline. Don. (ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD9AKO and K9BAR repeaters serving Bolngbrook Illinois.

(5 sec pause here)

**

RADIO LAW: HAM RADIO CC&R BILL REINTRODUCED IN CONGRESS

Another Congressional attempt is under way to provide relief to amateurs prevented by private deed covenants, conditions and restrictions from installing outdoor antennas. The ARRL Letter says that New York Representative Steve Israel has again introduced the "Amateur Radio Emergency Communications Consistency Act" into the current session of Congress. The measure, designated HR 1478, would require private land-use regulators such as homeowners' associations to reasonably accommodate Amateur Radio antennas consistent with the PRB-1 limited federal preemption. PRB-1 now applies only to states and municipalities. (ARRL)

**

RADIO LAW: CALIFORNIA PRB1-LIKE LAW TAKES A GIANT STEP

Some good news for hams living in the Golden State. ARRL Southwestern Division Director Art Goddard, W6XD, says that the California version of PRB-1 passed the Local Government Committee on a unanimous vote at its April 2nd meeting. Goddard says that the next step for A B 1228 is the full California State Assembly.

Representing ARRL at the Committee hearing were Dean Straw, N6BV and Pacific Director Bob Vallio, W6RGG. In his bulletin, Goddard took the time to thank Mike Mitchell, W6RW, Assembly member Bob Dutton and his staff as well. (ARRL SW Div. Newsletter)

**

SPECTRUM SHARING: SATELLITE-FED TRANSLATORS IN THE COMMERCIAL FM BAND

The FCC has assigned RM-10609 to a proposal by Calvary Chapel of Twin Falls and two smaller broadcasters. This, for authority to allow satellite-fed translators or Satellators in the "non-reserved" F M 92 to 108 MHz band. Amateur Radio's Bruce Tennant, K6PZW, has more.

--
As we all know, 92 to 108 Mhz is the band that is currently used by commercial broadcasters, over-the-air-fed translators and most Low Powe F-M stations. Currently, what are called Satellators are restricted to the 88 to 92 MHz band and the translator must be owned by the primary station.

But Calvary Chapel of Twin Falls and the other petitioners want the FCC to allow satellite-fed translators in the non-reserved F M 92 to 108 MHz band. The petitioners claim this proposal will have little impact on existing stations in the spectrum. This is because there is currently a freeze on new terrestrial translators in that band.

The FCC has not indicated when it might act on the Calvary Chapel of Twin Falls rules change request.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

So far the only major objection has come from National Public Radio. N-P-R generally supports the Twin Falls petition, but proposes that coverage distance limitations be set for Satellator operations. More is on the web at http://gullfoss2.fcc.gov/prod/ecfs/comsrch_v2.cgi (CGC Communicator)

**

HAM TESTING: FCC AND VEC'S TO MEET IN JULY

The 2003 National Conference of Volunteer Eximination Coordinators Conference in Gettysburg, Pennsylvania is set for July 25th. This is the annual get-together between the FCC and the Volunteer Examination Coordinators that maintain the question pools and handle all Amateur Radio testing.

Planners say that last years conference was a success and that they are looking for input for this year'a agenda. Please send any thoughts you have for this years conference to John Creel, WB3GXW. John's e-mail is WB3GXW@arrl.net (NCVEC)

**

RESCUE RADIO COMS: THE BOSTON MARATHON NEEDS YOU

If you are planning a trip to Massachusetts later this month and will have a hand held radio with you, the ARRL Letter says that the Boston Marathon can use you.

The 107th running of the event is slated for Patriots' Day, Monday, April 21st. Planners say that they still need more Amateur Radio volunteers to assist with communications for this year's event. If you want to donate your time, please contact Paul Topolski, WSEX by e-mail to w1sex@arrl.net or Steve Schwarm, W3EVE, at w3eve@arrl.net.

Once again, that's the Boston Marathon, on Monday April 21st and its looking for hams top help out. (ARRL)

**

ON THE AIRWAVES: THE LIBERAL RADIO NETWORK

Venture capitalists from Chicago are reportedly behind an effort to start a liberal leaning talk radio network. One that might offer an alternative to conservative talk show hosts heard across the airwaves these days.

The group will be called AnShell Media L.L.C.. Its backers are reportedly investing an initial $10 million. They are also hoping for assistance from like minded entrepreneurs.

With the intent to be on the air by this fall, the are talking with comedian and author Al Franken about working with the network. They also hope to attract other politically liberal entertainers and political guests as well. (ThePolicyPeport nerwsletter)

**

UPCOMING EVENTS: FIELD DAY - VCARS AT THE REAGAN LIBRARY

The Ventura County Amateur Radio Society will conduct it's Field Day 2003 operations on the grounds of the Ronald Reagan Persidential Library and Museum, in Simi Valley, California. According to Peter Heins, N6ZE, this will mark the third year of Field Day operations in conjunction with and co-sponsored by the Reagan facility. (N6ZE)

**

UPCOMING EVENTS: COMMEMORTING FRANK LLOYD WRIGHTS WESTCOTT HOUSE

The Westcott Wireless Preservation Association will be hosting special event station W8AGA on Saturday, May 3rd. The operation will taker place from Frank Lloyd Wright's Westcott house in Springfield, Ohio.

The Westcott Wireless Preservation Association serving the Westcott House Foundation by continuing radio operations at the Frank Lloyd Wright designed Westcott home. Wright designed Ohio's only prairie style house for Burton and Orpha Westcott in 1907. The house is now undergoing extensive restoration and will eventually be opened to the public as a house museum.

But in the here and now, the special event station is coming on the air. A special QSL card will be issued to any station with a confirmed QSO with W8AGA and who sends a QSL card and SASE to the Westcott Wireless Preservation Association. QSL information is on the web at

www.westcotthouse.org/w8aga (Press release)

**

CONVENTIONS AND HAMFESTS: MILWAUKEE - A SUPER SUCCESS

On the convention and hamfest circuit, word that last weekends A-E-S Superfest in Milwaukee Wisconsin is being called a super success. A late season storm made for some fairly inclement weather but it did not dampen the spirit of the regions ham community that showed up in droves to see what was new and buy what was hot.

According to industry sources the weather may have played to the advantage of dealers by driving the crowds to the display floor. And while Friday was a bit slow, Saturday more than made up for it with lots of high tickeet items moving out. We are told that averaged out sales were pretty good on both days and nobody is complaining.

The Superfesrt is held every April and is sponsored by Amateur Electronic Supply. (ARNewsline™)

**

CONVENTIONS AND HAMFESTS: RENO NEVADA IN MAY

And word that the Spring 2003 Reno Ham Swap will be held Saturday May 10th between 7:00 AM and 1:00 PM local time. The event is sponsored by the Reno Nevada Area Metro Simplex Amateur Radio Club. For Complete Details Visit the website at http://k7xc.tripod.com/hamswap/ (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

HAM RADIO IN SPACE: BIG UK ARISS SUCCESS

Its one of the best ARISS contacts to date. This, as students at the Rushey Mead secondary school near Leicester England spent about 10 minutes talking with U-S Astronaut Ken Bowersox KD5JBP on board the International Space Station. It took place on Friday April 4th, and this is how it sounded:

--
contact audio
--

Rushey Mead is a U-K secondary school for 11 to 16 years olds. It also has an active amateur radio club. But for this special occasion, the GB2NSC station of the National Space Center was chosen for the space talk. John Heath, G7HIA operated the station. Here's more of the QSO.

--
contact audio
--

Students, teachers, parents, and the media were present as twelve youngsters asked questions about life in space of Ken Bowersox, KD5JBP.

More contact audio is at Howard Longs website. It is in cyberspace at http://users.skynet.be/fa059641/2003_04_01.htm (ARNewsline™ audio with courtesy of Howard Long, G6LVB.)

**

HAM RADIO IN SPACE: PC SAT ECLIPSE POWER PROBLEMS

AMSAT says that PC Sat is still going strong, but is on ragged edge of power budget during maximum eclipses. This is according to Bob Bruinga, WB4APR, who reports that controllers have caught the satellite on several occasions doing a low power reset.

Bruninga adds that fortunately they have been able to restore the bird before the batteries went to negative power budget. WB4APR recommends that since there are as many as 50 users per day, it is best if everyone turns off any unattended user stations at night when PC Sat is in eclipse. (ANS)

**

EMERGING TECHNOLOGY: SECURITY PROBLEM WITH SENDMAIL - PSTCH AVAILABLE

According to its developer, the most widely used program for transferring e-mail between computer networks has a security flaw. One that could allow attackers to disrupt the flow of e-mail and intercept messages.

The program involved is called Sendmail. The security flaw does not directly affect your personal computers but it does put e-mail and information sent over the Internet at risk. Fixes for the vulnerability are available, free of charge, at Sendmail's Web site by applying a patch or upgrading to the latest version of Sendmail.

Atlanta-based Internet Security Systems Inc estimates that Sendmail handles as much as three-quarters of all Internet e-mail traffic. Sendmail Inc. which developed the program is located in Emeryville, California. (Published news reports)

**

EMERGING TECHNOLOGY: TUBE-TYPE PC'S

It seems that a venerable old friend simply refuses to die the death of technical obsolescence. The vacuum tube continues its reemergence into the audio marketplace, this time -- believe it or not -- in Personal Computerss.

The first tube motherboard appeared last year in response to PC gamers who craved the allegedly "more natural" sound produced by vacuum tube technology. Those who have seen the boasrds call it a strange sight to behold.

More on this May-December marriage of filament and silicon can be found at the website at http://www.neoseeker.com/Articles/Hardware/Reviews/aopenax4btube (CGC Communicator, Clayton Creekmore and neoseeker.com)

**

ON THE AIRWAVES: DIGITAL RADIO MONDIALE IS ON ITS WAY

After long years of gathering a consortium, prototyping and testing, Digital Radio Mondiale has announced that there will be an official launch at the World Radio Conference in Geneva, in June. Thiis according to a report in shortwave.com.

Digital Radio Mondiale, better known by its initials D-R-M is the world's only non-proprietary, digital broadcasting system for short-wave, medium-wave and long-wave with the ability to use existing frequencies and bandwidth across the globe. With near-FM quality sound, DRM hopes to revitalize the AM broadcasting bands below 30 Mhz in markets worldwide.

And right on the heels of the launch announcement came the granting of two highly significant standards for DRM. First, the International Electrotechnical Committee has given the Digital Radio Mondiale on-air system its highest stamp of approval as an International Standard. This was followed by the International Telecommunication Union granting permission for any broadcaster to use existing frequency assignments for DRM digital transmissions. This, provided that there is no interference with other stations. (ASWLC)

**

INTERNATIONAL -IRELAND" A WALKERS FESTIVAL

Over in Ireland, word that theTipperary Amateur Radio Group provided emergency communications support for up to 300 walkers expected to take part in the A-her-low Hillwalking Festival. The event was held the weekend of April 5th and 6th in Irland's Galty Mountainsl. (GB2RS)

**

DX

In DX, word that G3RWL, will be active as 8P6DR from Barbados through the 20th of April on 10 to 40 meters. He will also be on 80 and 6

meters if he can arrange the antennas. (GB2RS)

And VK3OT will be active as VK9XI from Christmas Island through April 21st. He will be concentrating on CW on the H-F bands and 6 metres. Priority will be given to High Frequency CW when 6 is closed. More info is on the web at http://members.datafast.net.au/electronics/path.htm

**

THAT FINAL ITEM: THE PARC FIELD DAY FILM LIVES AGAIN

And finally this week some very good news for ypou ham radio cinema fans. After having been among the missing for over two decaders, a famous ham radio movie has surfaced. And it will soon have its first official public screening since its restoration was completed. The guy who has the movie on his shelf -- our own Bill Pasternak, WA6ITF, has some background on this ham radio cinematic classic:

--
The film's real name is simply Field Day 1971. It is a tongue - in cheek look at the planning and execution of the ARRL Field Day operating event by what was then one of the most active radio clubs in the United States. My home radio club The famed Pallisades Amateur Rado Club of Culver City California. Home of "good-guy the gokld plated radio" repeater.

Field Day 1971 was produced and edited by George Hively, W6GRH, -- then WA6YEA -- as a club project over thirty years ago. Hively, who has spent his life in the motion picture business wrote the script, supervised the filming, edited it together and provided the music and the narriation. And notice we said filming. Field Day 1971 was produced long before the advent of home videotape. It was shot using Super 8 millimerter motion picture film and consumer cameras. The sound track was on a separate tape cassette. In fact, it still must be projected that way -- even today.

A preview screening of the restored movie took place a March 8th at the HandiHams winter camp in Malibu California. They loved it. As a result of that enthuiastic welcome, a public showing of Field Day 1971 to the California ham radio community has been tentatively scheduled for Wednesday evening May 14th. This, hosted by the Santa Clarita Amateur Radio Club that meets just North of Los Angeles.

And for those of you who are wondering where the movie has been hiding the past 20+ years, this might surprise you. It has been kept safe and well protected by a former PARC member -- Richard Burton, the ex-WB6JAC. Richard contacted us a few months ago asking if we would like to have the movie. We said yes, and with the assistance of Anita O'Delll, N2IHX, the movie was brought back to projectable condition.

Because there is only one projectable print of Field Day 1971 available it cannot be lent out. But W6GRH tells Amateur Radio Newsline that plans call for it to be transferred to video -- either VHS casssette or

possibly DVD. And the sound will always match the picture that way. We hope.

With Field Day `71 -- the movie -- sitting on my desk as I record this, I'm Bill Pasternak, WA6ITF.

--

Meantime, those wanting to attend this first public screening in two decades of this riotous movie, you should consult the Santa Clarita Valley Amateur Radio Club website for meeting details. Its on-line at www.w6jw.org. Scroll down and click on "Monthly Meetings" for more. (ARNewsline™)

You can do a few things in this case. You can contact the base provo
martial and file a complaint! You should also send a letter to the base
commander.. Because it went across state lines file a complaint with the US
Postal authorities, i.e. they regulate UPS... And you can also file a
complaint with the F.B.I. because he's in the millitary they handle it..

Is that to say that "all" CB equipment is junk or that the specified
equipment in this situation is junk? Could you please clarify on this?

Good response, I was going to say the exact
thing, beat me to it.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N5FF, WW5L, KI6T, K7OX, K8YSE, N8BJQ, NC8V, W8UVZ, 4X4PG, CE6TBN, CT1END, DL1EK/DL7VOA & DX Newsletter, DL4AMK, F5NQL & UFT, FJ5DX & La Gazette du DX, G0IAS, GM3WOJ, I1JQJ & IK1ADH - 425 DX NEWS, IN3XUG, JI3DST, JI6KVR & JA-IOTA Islands News, LU1BR, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PA1AW, S05X Team, SM2EKM, SP2FAP, VA3RJ & ICPO, and ZK1CG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/April, through Sunday, 13th/April there were 232 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, I, IS, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VK9X, VP2V, VP5, VP8, VP8/h, VP8/o, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4S, SRI LANKA. Ivan, UR9IDX (ex-8Q7VG), will be active as 4S7DXG until May 1st. His activity over the past week was on 30/20/15 meters CW/SSB. Watch 21020 kHz after 1630z. Also watch 14014, 14195 and 10107 kHz between

1630-2230z. QSL via UR9IDX, P.O. Box 85, Mariupol 87531, UKRAINE.

4X/4Z, ISRAEL (Contest). The Israel Amateur Radio Club will run the Holyland Contest on Saturday, April 19th, between 0000-2359z, both CW and SSB. This is a good opportunity to work a good number of 4X/4Z stations towards the famous "Holyland Award" as well as other Israeli awards. The Contest Manager is Mark, 4Z4KX (E-mail address: 4z4kx@iarc.org). For complete details on this contest, please visit the Web page at: http://www.iarc.org

5Z, KENYA. QSL Manager Allan, G0IAS, informs OPDX that after nearly 12 years (when it was virtually impossible for a U.S. citizen to get a 5Z callsign) Don Gardner, ex-7Q7DC (KC7JDC), has been allocated 5Z4DE. Don is in Nairobi and will be transmitting after a long period of inactivity; as soon as possible (as soon as he gets his mast up!). ALL QSL cards are DIRECT ONLY to G0IAS. NO BUREAU and NOTHING sent to Don. ADDED NOTE BY ALLAN: Allan can still confirm any outstanding 7Q7DC QSL cards, but he states that he will probably close the books at the end of the year.

7P, A25 & ZS, LESOTHO, BOTSWANA AND SOUTH AFRICA. Operators Mauro/IN3QBR, Fabrizio/IN3ZNR and Joe/AA4NN are teaming up to go on the air as the "African Double Jump DXpedition". The team will be going to South Africa, Lesotho and Botswana starting at the end of June. According to their Web page, the team will meet with Andre, ZS6WPX, who will become their tour guide. Between June 28th and July 1st, the team will go on a Safari. There is a possibility they "MAY" do some operating using callsigns ZS/homecall. Early July 2nd, the team will head to Botswana's capital, Gaborone City. They plan to erect their antennas and operate from their hotel that day. Callsigns mentioned so far are A25NN and A25ZNR. They plan to leave for the town of Rustenburg on July 5th, and will travel to Sun City, South Africa. There "MAY" be some activity as ZS/homecall. Early July 7th, they will leave for Lesotho and expect to be there late afternoon. They will be active that same day. Expected callsigns will be 7P8JB and 7P8NR. Activity will last until July 11th. They depart for Johannesburg on July 12th and expect to leave for home July 13th. Please visit their Web page for updates at: http://www.qsl.net/xu7aay/africa

7P, LESOTHO. "NOT TO BE CONFUSED with the African Double Jump DXpedition" listed above, look for three Texans (Frosty/K5LBU, Madison/W5MJ and Tom/WW5L) and one Canadian (Neil/VA7DX) to be active as 7P8CF, 7P8MJ, 7P8TA and 7P8NK, respectively, from July 18-25th. Activity will be on all bands 160-10 meters CW/SSB/PSK31/RTTY. QSL each by their home calls. The group currently does not have a Web page, but more details will be released after June 1st. Watch Frosty's Web page for possible updates at: http://WWW.k5lbu.com

DAYTON HAMVENTION DX DINNER PROGRAM. Steve Bolia, N8BJQ, informs OPDX that this year's SWODXA DX Dinner Banquet Program will be "A DXer's Expedition through the Halls of Power" with guest speaker Vice Admiral Scott Redd, U. S. Navy (Retired), K0DQ/A92Q. There are still some tickets available (Please refer to OPDX.597 for details).

DU, PHILIPPINES. Jon, N0NM, continues to be active as DU9/N0NM until April 23rd, before he leaves on a trip to HS-land. He was active this past week on 80 meters (between 3500-3506) after 1000z. If the bands are decent, he will usually try top band (watch 1828.3 kHz).

ELECTED OFFICERS FOR 2003. The following are the officers for the Spokane DX Association for 2003:
President - Gary Elliott, K7OX Secretary - George Tuncil, W6AEA
Vice Pres - Randy Foltz, K7TQ Treasurer - Dan Hearn, N5AR

GM, SCOTLAND (Special Weekend Activity). The annual Scottish Activity Weekend takes place on April 19/20th, and is organized by the GM DX Group. This is not a contest, just an opportunity to work Scottish stations on all LF and HF bands, and to gain credits for several awards, including the new "Celtic Connections Award". For complete details, visit the Web page at" http://www.gmdx.org.uk
Please work GM, MM, GS and MS stations during the weekend.

IN SEARCH OF BY YOUR EDITOR (Still Looking)! I know this has nothing to do with DX, but your editor's second love (other than DXing) is MUSIC. I have been searching for a music CD (not LP) called the "Young and Rich" by the group "The Tubes". Not just the song, but the entire CD. The CD is now out of print. Please look at your local record/CD store to see if they have a copy. I am interested in buying a copy (or even a backup version) at a reasonable price......Thanks Tedd, KB8NW

IOTA NEWS.....
AF-019. Operators ON6VP, ON4CAQ and ON1AEO will be active as IG9/ON4DST from Calla Madonna, Lampedusa Island, between May 24-29th. Activity will be on 80/40/20/15/10 meters SSB only. They will be using a FT-757 with groundplanes and wire antennas. For skeds, please E-mail: ON6VP@pi.be
QSL to ON4DST via the bureau, or direct via ON4AMM (Mary Lou Moons, Oudestraat 9, B-3560 Lummen, Belgium).

AS-079. Takeshi "Take", JI3DST, will be active as JI3DST/6 from Miyako Island (Miyako-jima Hirars-City Okinawa-ken) starting at 0600z, April 26th to 0000z, May 5th. Activity will be on 17/15/12/10/6/2 meters SSB. He will be looking for AF and SA on 6 meters. QSL via the Bureau (Bureau is Best) or direct to the address on QRZ.com.

EU-008. Members of the Calderdale Raynet Group will activate the Island of Colonsay (IOSA NH19 and WAB NR39) from Saturday evening, April 26th to Thursday lunch-time, May 1st. Their activity will be on all HF bands depending on the conditions. They will use the club callsign MM0CRG. All stations worked will be sent a QSL card via the RSGB or QSL direct (w/SAE) to G3TAY.

EU-031. Walter, IN3XUG, will be active on Ischia Island from April 16-27th using the callsign IC8/IN3XUG. Activity will be on the IOTA frequencies (28460, 21260, 14260 and 7060 kHz) SSB.

He will pay particular attention to U.S. stateside stations.
QSL via IN3XUG, Bureau or direct.

EU-172. Peter/DL4AMK and his XYL will activate the Danish Island of
Aaroe (JY-003) as OZ/DL4AMK from April 16-21st. He will use
an Icom 735 with an ZZ-1004 amp and a Gap-Eagle antenna.
Activity will be on 40/20/17/15/12/10 meters SSB. QSL via
the DARC bureau or direct.

OC-NEW. Just a reminder (refer to OPDX.602), to look for Tom/VK3ZZ,
Keith/VK3FT, Jack/VK3WWW and Peter/VK3QI to activate the
IOTA, Waldegrave Island in the South Australia State West
Centre Group, April 17-22nd. Callsign will be VI5WCP. QSL
via VK3ZZ.

OC-241. Irfan, YC4FIJ, will sign YC4FIJ/P from Utan Island, April
19-21st. QSL via YC9BU, with SAE+IRCs only (Note: DO NOT
send USDs, they will be stolen in YB-land's post office).

OC-241. Look for a Multi-operation using the callsign 8A9R to activate
Rote Island in the middle of June. Activity will be on several
bands. Kadek, YC9BU, will be one of the operators and also
the QSL Manager.

LIGHTHOUSE/LIGHTSHIP ACTIVITY.....
A special event station signing CS5E will be active April 25th from
Cabo Raso Lighthouse - reference number ARLHS POR011. This activity
will also be valid for the Portuguese Lighthouses Award reference
number DFP FES04, and Portuguese Castles and Fortresses Award reference
number DCFP F141 - Forte de Sao Bras. Activity will be on 20, 15 and
10 meters, SSB. Look for them near the World Lighthouse frequencies.
Suggested SSB frequencies (+/- 20 khz) are: 14270, 21370, 28370 kHz.
QSL via the address on QRZ.com or via the Bureau.

Look for Kevin/MW3AFR and Melfyn/MW3AGN, to be active as homecall/p
from the Liverpool Bar Lightship "Planet" (ENG-065, WW Loc. IO83LJ)
on April 18th and April 21st. Activity will be on various HF bands,
including 40 meters and also 2 meter FM/SSB. QSL via their home
callsigns, direct or bureau.

OH0, ALAND ISLAND (Cancelled!). Ben, SM6CCO, reports that he had to cancel
his OH0CO operation from Aland Island. It was scheduled to take place
between April 10-16th.

PJ2, NETHERLANDS ANTILLES. Operators John/K1AR, Martin/W1MD, Jeff/WC4E,
Steve/N8BJQ, Ron/K8NZ and Geoff/W0CG will be active from Curacao as PJ2T
in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/2 entry.
QSL via N9AG.

QSL INFO AND NEWS.....
CT QSL HISTORICAL ARCHIVE. Carlos Nora, CT1END, reports: "We are the
only organization in Portugal that is devoted to documenting and
preserving the history of Amateur Radio in Portugal, from the early

days to the present. If you have Portuguese QSL cards prior to 1960, and Portuguese QSL cards from DXpeditions and other special events, we would appreciate receiving them as a donation to our collection, or as an alternative, send a digital image of the QSL card." If you can help them, please respond by E-mail (ct1end@netcabo.pt) or by mail to the address:
Carlos Nora, CT1END, Praceta D.Mecia N 15 - 2 Dto., Massama Norte, 2605 Belas, Portugal.

The LLDXT trip to Faroer Islands (OY) went QRT during the morning of April 10th. Pictures and the team's diary are available at the LLDXT Web site, as are the logs. The logs are updated April 13th with all QSOs. The LLDXT Website : http://www.qsl.net/lldxt/oy_2003/
LAST MINUTE PRESS RELEASE BY ROB, PA5ET:" We have completed our Faroe Island DX-pedition and had lots of fights with the propagation and the high winds. We managed to log 26,964 QSOs in 10 days of operation of which 14,041 in CW and 11,054 in SSB, 1,532 in RTTY, 300 in PSK and finally 37 in SSTV from 10-160 meters although it is better to say we worked mainly from 17-160 meter due to the bad propagation. The QSO statistics can be found on out web-site. Despite the lots of Europeans in the log we worked outside Europe every oppurtunity we had. There have simply not been that many openings unfortunately. Despite of that we are very happy with the result. The on-line logs have now been finalized so all QSOs should be visible on our web-site. The LLDXT web-site will be updated in the coming days with pictures and real-audio files. I like to thank the Europeans for the many times they had to QRX to allow us to work the 'rare' DX, a great example it can be done regardsless what other DX-peditions say. All QSLs will be handled by the LLDXT QSL manager PA5ET, Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands..... 73 de Bill OY7WB (AK0A), Tom OY7TW (GM4FDM), Ronald OY7WP (PA3EWP), Dick OY7QA (PA3FQA) and Rob OY7ET (PA5ET)"

VISALIA CONVENTION. QSL card checking at the "2003 Visalia International DX Convention" will take place from 2-4 PM on Saturday, May 3rd, in the Plaza Room of the Visalia Holiday Inn Hotel. All DXCC QSLs can be checked which would include 160 meters, deleted countries and cards over 10 years old. Also this year they will be able to check cards for the CQ WAZ Award and other ARRL Awards such as WAS and VUCC. Application forms for DXCC and WAZ will be available at the door, however, you can download the forms from these organizations in order to fill them in prior to the convention Any questions can be directed to Gary Stilwell, KI6T at: ki6t@arrl.net

QSL XR6T (active in the 2003 CQ WPX Contest) via CE6TBN at: Box 1234, Temuco, Chile.

Georg, DF7JN, announced this past week that he has lost contact (even a couple weeks before the war) with his friend YI1FC. His friend YI1FC supplied Georg with some (more or less uncomplete) logbooks from YI1 stations. For this reason, Georg has quit his job as QSL Manager for

the YI1 stations until further notice.

S0, WESTERN SARAHA. The S05X team is expected to be active on Wednesday, April 16th. In the S05X press releases this past week, they informed the DX community that the S05X Team will also be active in the U.S. General Class Operator's bands. They also announced that another operator was added to the team. Joe, KO4RR, from Georgia and a well-known Contester and DXer/Dxpeditioner (E30GA, T32R, KO4RR/KH5K- Palmyra, K5K- Kingman Reef and KO4RR/I8) was added to the team of YT1AD, YU1AU, I8NHJ, CT1BWW, N6TQS, EA1BT, EA2RC, EA5RM, EA5XX and S01MZ. QSL Manager is EA4URE. Also, due to the high expense to travel into the desert, all donations to the S05X Team are WELCOME. Donations can be sent to the S05X QSL Manager: URE, Union de Radioaficionados Espanoles, Avda. Monte Igueldo 102, Madrid 28053, Spain. All names will be listed on their Web site at: http://www.pagus.it/s05x/

S2, BANGLADESH. Takeda, S21YY, was pleasing the RTTY operators this past weekend on 20 meters. Watch for him on/around 14080 kHz after 0100z.

SILENT KEY. Victor Rivera, ZK1CG and ZK1USA, received word from Poko, the son of Tuatai Tupou (ZK1MA North Cooks and ZK1CY South Cooks), that his father passed away in Australia on the morning of April 12th. Victor states, "Tuatai will be missed here and in Manihiki by a lot of people. Poko ask me to inform all his Ham radio friends of his passing away." OPDX and its readers would like to send out our deepest sympathy to Tuatai's family and friends.

SPECIAL EVENT. The French Government Service ART has issued the special callsign TM0GAY, to Jean Marc, F8IXZ , to be used from June 20th to July 4th. This special callsign is issued as part of the French Gaypride activities. Activity will be on HF bands from 40-10 meters mainly on CW, SSB possibly as well. QSL via F8IXZ either direct (+ postage IRC or USD) or via the French REF Bureau. Direct cards with insufficient postage dues will be answered by the bureau.

SV9, CRETE. Jim, SM2EKM, will be active as SV9/SM2EKM from Agia Marina, Crete, May 29th through June 12th. Jim informs OPDX that most of his activity will be CW on all bands (but this depends on antenna instalation). QSL to his home callsign, bureau or direct. If there are any Bureau requests, E-mail to: sm2ekm@telia.com

VP8/LU1BR (Pirate Activity). Luis, LU1BR, has informed OPDX that a station using his callsign was operating on 10 and 12 meters on the CW mode was a PIRATE. Activity took place on March 13th, 2140-2240z on 28006 and 24896 kHz. Also, Luis mentions that probably this same person changed all his data entered on the QRZ.com Web page. All QSLs received for these bands activity will be returned.

WARD (Remember!). Just a reminder that the "World Amateur Radio Day" (WARD) will be celebrated by IARU on April 18th (Please refer to OPDX.602). For rules on how to receive the special WARD 2003 Award, go to the following Web site: http://qtc.radio.org.pl/ward2003/

XW, LAOS. Plently of activity from this one over the past week. Stations heard were XW1A, XW1FAN, XW6KM and XW1X. Operator Kamphan, XW1FAN, seemed to be the most active over the past week. Watch around 21220, 21225 and 21260 kHz after 0830z or between 1330-1430z.

YI, IRAQ. Some interesting QSNs where reported over the past week. Jim, KT4CK, was spotted as YI/KT4CK on the DX cluster system. Jim is with or has been with the 101st Airborne and lives near Ft. Campbell. DX Mail Reflectors suggest he was trying to attempt to contact his family on 21312 kHz at 1438z and 21278 kHz at 1632z. Also, heard was Mark, NG5L, signing as YI/NG5L over the past weekend. He was very active on 20 meters after/or just before 0500z and between 1945 and 2300z. Watch around 14195 kHz and 14240 kHz. Mark is with the 82nd Airborne in the Iraqi desert near Nassaryia. Remember, WORK FIRST WORRY LATER.

YK, SYRIA. Saad, N5FF, informs OPDX of the following: "This is to advise the DX community that my planned trip to the YK land, initially scheduled for tomorrow (April 12th), has been postponed due to the current overall situation in the Middle East. No firm date has been set for my trip yet, but it's possible to take place in couple of weeks or so, and it may even be postponed till later on in the year. I guess it's fair to say that the trip is now up in the air, but I will update you the minute I have concrete plans."

ZA, ALBANIA. Fred, IK7JWX, reports to look for "Team ZA3/ On The Air" from the city of Durazzo, Albania, May 29th through June 3rd. Activity will be on HF, WARC, and 6/2 meters. Modes to be used are: CW, SSB, RTTY and PSK31. Their Grid Square will be JN91RH. Operators are: ZA1FD, ZA5G, IK7JWX, IK7LMX, IZ7CTE, IZ7ATN, IZ7BNH, IK7QMJ, IK7FPX, IK2DUW, IZ2DPX, IK6CAC, IZ0CKJ, IV3FSG, IK5MDF and IK5BHN. All the operators will have the prefix ZA3/. Please, QSL via their home call, either the bureau or direct w/SASE (addresses on QRZ.com).

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active as ZD8Z from April 16-26th. Activity will be on CW/SSB on the WARC bands and low bands. QSL via VE3HO, direct ONLY!

ZF, CAYMAN ISLAND. John, NC8V, informs OPDX that he will be conducting his usual operation from the Little Cayman Island (NA-016) this year from April 12th through April 19th. He will be using the callsign ZF2JC and will be operating mostly SSB near the IOTA frequencies on 20, 15, 12 and 10 meters. He will have a 6 meter antenna with him this year and will give that a try if the band should open. QSLs should go to his home address at: 15100 E. Scatter Ridge Rd., Athens OH 45701 (w/SASE etc... would be appreciated).

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

I agree, Bob's program is a dynamite logging program, but it's mostly
tailored toward shortwave listeners, not ham radio.

No reason why not, subject to propagation conditions at the time you're operating. During the last big sunspot cycle, a friend of mine and I would yak on 10m as we both headed in to work. We both had Radio Shack HTX-100 transceivers feeding a mag-mount CB antenna that was trimmed down for 10m operation. During the commute one day, We were called by an OM in the Ukraine who heard us both, loud and clear. Made for an interesting three-way roundtable and a very memorable commute that day!

In the past days I've tried to enter in contact with them: emails, fax, phone calls (last one few minutes ago). Impossible to track down them.

Did Titanex (www.titanex.de) close the shop/factory ?

Have somebody fresh informations about their health's status ?

Thanks in advance.

IZ0FMA, Alberto

695. Announcing 2 IOTA Expeditions: SA-063 and SA-015

Hi DXers and IOTA-fans!

Great News :-)

The "Caracas DX-Group" / ARV hereby announces 2 IOTA-Expeditions within the next months !!

Our 1st Expedition will be to the island "La Cotorra", located at the east-coast of Venezuela in the Orinoco-delta.

Date: June 20 to 24, 2003

Callsign: YW8D

IOTA: SA-063

QRV: all bands SSB and CW

- -

The following expedition will be to the "Los Monjes Archipel", located at the extreme west of Venezuela.

Date: July 17 to 20, 2003

Callsign: YW5M

IOTA: SA-015

QRV: all bands SSB and CW

++++++++++++++++++++++++++++++++++

QSL-info for both expeditions via W4SO (maildrop !)

We hope to meet you !!

73

Ray

dl2gg/yv5

++++++++++++++++++++++++++++++++++

P.D.
As usual, after the expeditions you can see our activities at the following WEB-sites:

http://hfdx.com

and

http://www.qsl.net/dl2gg/

Titanex und ZX-Zagi sind zwei voellig getrennte Firmen und haben nichts
miteinander zu tun.

Titanex-Antennen werden von Titanex gefertigt.
ZX-Yagis werden von WiMo gefertigt.

Actually, just distance. It is an abreviation, just like
RX for receive, TX for transmit... DX for distance.

The 'X' replaces all letters following the initial one.

DX means far away. But HOW far depends on who
you ask. You'll hear a lot of hams calling "CQ DX".

I never answer anybody if they add the DX on the
end of the CQ, because I don't want to disappoint
anybody by not being far enuff away.....

Message-ID: <JnZna.7633$X44.1800@fed1read07>
Source record: 10592

It is defined in Funk & Wagnall's Encyclopedia as the abbreviation for Distance.

For Amateur Radio, DXing (or contacting DX) is making a 2-way contact with distant stations on the Amateur Bands --- usually outside the USA.

On the other hand, DX is in the ear of the beholder, example a 300 mile contact to anywhere using the 2M band (144 MHz) would be to a VHF operator -- DX as this band is usually line of sight. On the 6M band under the best of conditions, contacts can be made from California to Maine or Hawaii or other continents -- all would be considered DX as it is seldom this band supports propagation of this type.

Shortwave listeners consider DX as listening to a far off station -- China, Belgium, India, etc.

ORIGIN OF DX -- used from the earliest days in 1900's of Amateur Radio when contacts were made by Morse code and operators coined, stole, borrowed or whatever -- the abbreviation DX -- meaning distant contacts. Many abbreviations were used by code operators (and still are) to cut down on the time and effort to send common phrases.

Also, DX is an early telephone term for distant exchange. "This is correct. In the 1960s I worked in many telephone exchanges around the United Kingdom. On the old-fashioned switchboards with plugs and cords, circuits coming in from distant exchanges had a label marked "DX" above the jack socket. The operator would plug into the circuit and announce the name of her exchange, as confirmation to the distant operator that she was through to the correct destination. 73 de G3NYY"

The term DX appears in many math formulas as distance of x.

If I call "CQ DX" I mean anybody not in the U.S. or Canada.

I know they tell you not to use "CQ DX" in NA, but I've made a LOT of interesting QSOs that way. Sure, most of them are in "garden-variety" countries, but I still enjoy working UA9's, DL's, LU's, etc.. And every once in awhile, something *really interesting* answers. Like a couple of weeks ago when I called "CQ DX" on 10m CW and a FR5 answered...

DX has one answer but many interpretations ... DISTANCE !

On HF bands it normally means: 'distance' interpreted as a different country.

On 2, 1 1/4, 70 meters and higher it normally means: 'distance' interpreted as more than 100 miles away, [except for moonbounce etc.]

Forty Five years ago on 96 GHZ it meant 120 feet!!

I tried to install Logger32 on Win NT4 SP6a but when I tried
to run it it complained about file "msimg32" (no extension)
missing with run time error 53.
The splash screen does not disappear and when
I closed the program it came up with Dr. Watson.
This did not happen on a Win2k-Pro box however.

Is there a mailing list where I am supposed to report a bug?
If I can contribute my 2 cents to make this program stable
I'll be glad to participate.

By the way: IMHO a 10MB compressed file for a logging program
is hefty. All the debugging code still included?

Please don't get me wrong: I appreciate very much the efforts
of programmers who put in years of experience and many hours
of work and give away their work for free. This helps especially
those OMs in the 3rd World with very little funds. Thank you!

Kind regards, Eike

Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter and Web Site, K1XN & GoList, N1WON, K2FF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, AD5A, K8YSE, 9V1SM, DL1EK/DL7VOA & DX Newsletter, DL2GG, DL2VFR & IOTA-POST, F5NQL & UFT, F6AJA & Les Nouvelles DX, F6KOP IOTA Team, FJ5DX & La Gazette du DX, G4OBK, G0NFA, I1JQJ & IK1ADH - 425 DX NEWS, IT9EJW, JI6KVR & JA-IOTA Islands News, LA3OHA, OE8KDK, OZ6B, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, SQ4NR, UA9OBA, VA3RJ & ICPO and VE7DP for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/April, through Sunday, 20th/April there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9X, VP2E, VP2V, VP5, VP6, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3 YEAR DXPEDITION (Amazing Lady!). OPDX was informed by Skipper Susan Meckley, W7KFI, that she was starting her 3 year DXpedition to Central America and the South Pacific. At the time she contacted us she was

in Mexico soon to sign W7KFI/mm. NOW FOR THE AMAZING PART! Susan told OPDX that she originally was to go on a 1946 Brewer, the vessel called Menage-A-tROIS. However, she states she soon found out that, at the age of 69 years old (YES 69), she could no longer single handedly sail the boat in heavy weather. She stated, "It was just too much boat for an old lady." (ed. AMAZING) Susan traded her boat for a Challenger 1932. The Vessel S/V Dharma. She stated, "This size boat I can handle all by myself." (ed. WOW!). Susan left Oakland, CA, in January and has been slowly working her way south. She has spent time in many ports, and she found them very nice. Susan has been in Ensenada, Mexico (Baja California), for the last month, but has now left again on Wednesday, April 16th, for San Jose, Punta Cabras. Heading south, Susan told OPDX that she would be operating from an island that has not been operated on before, the Isle San Martin (NA-162). She was heard April 17th as XE2/W7KFI from San Martin on 14249 kHz at 2341z. The length of her stay is not unknown. However, Susan provided OPDX with her next stops (no dates given). Her next stop will be at Bahia de Torguga (Turtle bay), and from there to Magdelina Bay, Cabo San Lucas, and finally La Paz. Susan will be in La Paz for a few weeks, then it is off to the islands in the Sea of Cortez for operating....and into Guymas for the hurricane season. Come fall she will go down the mainland coast ending in Costa Rica. In April 2004, she is off to Galapagos Islands and into the South Pacific. Susan states, "I will be in the South Pacific for up to three years, operating from any island that will give me a license to operate. This is a fully self-funded expedition. I asked all around for support but was unable to get any. Rig is an FT-847 with two 32' pop-up masts and I will be on all modes except SSTV...including Pactor. I intend to follow in the footsteps of Danny Weil from the 50's. Hopefully, I will not end up on a reef like he did." We hope Susan will continue to contact us on her amazing trip, and we wish her the best. One last note. Susan told us that she has room on board for a crewmember if anyone wants to go. If interested, let us know and we will forward the message.

7P8, LESOTHO (Update). A fifth operator has been added to the July 7P8 Lesotho DXpedition that will give the group an added plus in the digital mode operation. The newest operator to join the group is Dave Anderson, K4SV, a veteran of many world-class DXpeditions and a world class RTTY and digital modes operator. Dave Anderson of Ashville, NC, whose 7P8 callsign is expected to be 7P8DA. Dave joins Charles Frost, K5LBU/7P8CF; Madison Jones, W5MJ/7P8MJ; Neil King VA7DX/7P8NK; and Tom Anderson WW5L/7P8TA, on the all bands and modes operation July 18-25th from Mohale's Hoek, Lesotho. REMEMBER: THIS OPERATION IS NOT TO BE CONFUSED with the "African Double Jump DXpedition". Dave gives the team some added strength on the digital modes and is a very experienced DXpedition member (member of the A50A and A52A Bhutan, VP5/KW4DA Turks & Caicos 2000 & 2003 operations, T2DA Tuvalu, 3D2CW Fiji, K1B Baker Island, and ZL7C Chatham Islands). QSLs will be handled by each operator separately via their home callsign as each will have their own 7P8 callsign. Look for more details to be released after June.

A6, UNITED ARAB EMIRATES. Ghis, ON5NT, is now in Dubuai for the UN for the next 3 months. Look for possible activity from him.

C9, MOZAMBIQUE (Update). Filippo, IK4ZHH, has informed OPDX that he has left for Mozambique on Friday, April 18th. Remember to look for Max/IZ4DPV and Filippo/IK4ZHH to be active as C93CM and C93FF, respectively, now through May 4th. Activity will be on 80-10 meters CW/SSB and possibly RTTY and 6 meters. They will also participate in the ARI DX Contest (May 3-4th). QSL via their home callsign, either direct or through the bureau.

GD, ISLE OF MAN. Phil, G4OBK, will be on holiday here soon and will operate as GD4OBK/P from near Andreas in the north part of the Island from April 27th until May 2nd. The WAB square is NX40. Phil expects to be active for an hour or two every day on HF 40-10 meters on CW and RTTY. He will use an Icom IC-706 and doublet antenna/ATU. QSL is via his home callsign on QRZ.com. Also, a log search will be available on his home page in early May at: http://www.qsl.net/g4obk/

IOTA NEWS.....
EU-017. A group of operators from the "Radio Group Etna" will be active as ID9RGE from Filicudi Island (IIA ME-003), April 24-27th. The team is: IT9EJW, IT9GAC, IT9GIE, IT9LCY, IT9TPJ, IT9VKY, IW9BCW, IW9BDV, IW9FY and IW9HDS. They plan to operate on HF bands CW/SSB and 6/2 meters. QSL via IT9EJW either via the bureau or direct: Alfio Bonanno, P. O. Box 18, 95028 Valverde - CT, Italy. For further information, go to the Web site at: http://www.rgetna.org

EU-030. Thomas, DL7UZO, will be active as OZ/homecall from Bornholm Island, May 18-23rd. Activity will be on the IOTA frequencies 80-10 meters, including the WARC bands and 6 meters (50.100 MHz CW and WSJT on 50.250 MHz). Operations will be on CW, SSB, RTTY and PSK31 using a FT-847 + Dipole. QSL direct or via Bureau. http://portal.funkstation.info

EU-030. Ben, OZ6B, will be active from Bornholm Island (BO-001 for Danish Island Award), June 19-26th. Activity will be on 14265 kHz (+/- QRM). QSL via the bureau or direct (CBA).

EU-039. As announced earlier, Franck/F5JOT, Daniel/F5LGQ and Claude/F6CKH will be on Chausey Island, but from April 26th to May 2nd (not April 18-26th). They will be active on 80-10 meters on CW, SSB, may be RTTY and SSTV.

EU-047. Peter, DH9YPA, will be active from Borkum Island (German Island Award N-01), April 27th through May 9th. Activity will be on SSB. QSL via bureau.

EU-048. Members of the Radio Club of Provins (F6KOP IOTA Team) will be active as TM7R from the Island of Groix (AT 012), May 7-12th. Their activity will be on HF, VHF and UHF on CW, SSB, RTTY, PSK31 and SSTV. There may also be operations for the French Castle and Forts Award (DFCF). Operators mentioned F4AJQ, F4BTP,

F4BUX, F4EAV, F4EAX, F5AGB, F5PVF, F5TST, F5VHQ, F8BUI, F8BJI,
F8BQQ and F9IE. QSL via F6KOP.

EU-063. Terje, LA3OHA, is once again heading up DXpeditions to Prins
Karls Forland Island. DXpeditions will take place between July
1st and August 2nd. Activity will be on 160-6 meters. This is
the same type of activity that took place in June 2001 as a
multi-national team operated from Prins Karls Forland Island
as JW0PK. The IOTA Community/Group states that it was the "Most
outstanding IOTA expedition in 2001". You can join and operate
from this expedition with your family/friends. For more
information and pictures, please visit the Web page at:
http://www.dxpedition.org/dxjwpk
QSL Manager will be SP5DRH: Jacek Kubiak, P.O. Box 4,
00-957 Warszawa, Poland.

EU-155. The Northern Italy DX Team will be active from Piallazza Island
(IIA ref. is FE-001), April 25-27th. Activity will be on 5 HF
bands CW/SSB. During this stay, the Team will try to activate
a little island (New One for IIA) near Piallazza Island. Expected
callsigns are: IK2SNG (CW only), IK4ALM, IK4VET and IK4XCL.
QSL via their home callsigns or via Bureau.

NA-013. Mike/AD5A and his sons Micheal/AB5EB and Jake/KB5SKN will
activate Little Corn Island between May 31st and June 2nd.
This is a RARE island and only about 10% of the IOTA chasers
have it. All operators are experienced IOTA operators and have
activated several island before. The family operators will use
an IC-706 with an amp and a vertical antenna. The team will
be active on RTTY and possibly 6 meters. The callsign is not
known yet. For more details, please visit the Web page at:
http://www.islandradio.org/na013.htm

NA-076. Operators David/WA4ET, Cory/N1WON, Ron/N4KE and Jim/NU4Y will
be active as WA4ET from Havens Island (USI FL 104S, Grid EL89).
They will be on the air starting around 0000z Friday, April
25th and ending at 1400z Monday, April 28th, WX and conditions
permitting. This island is in the Cedar Key Group on the west
coast of Florida. Activity will be on 40-6 meters CW/SSB/RTTY.
IOTA Frequencies will be used +/- QRM. QSL to WA4ET.

OC-057
OC-067. Yoshitake, JJ8DEN, will be active as FO/JJ8DEN from Maupiti
Islands (OC-067) between April 28th and May 1st. This also
includes activity from Maupihaa Atoll (OC-057). Look for him
to be active on HF on CW and RTTY with an IC-706 and HX52A.
QSL via JJ8DEN either via the bureau or direct to:
Yoshitake Izumi, Minami-24-7, Nishi-1, Obihiro-City, Hokkaido,
080-0011, JAPAN.

OC-066
OC-152. Fabien, F8CFU, will be active as homecall/FO from Hao Atoll

(OC-066), now through May 5th, and Tubuai Island May 6-16th. Activity will be on 30/20/17/15/12/10 meters using a 2 element dipole.

OC-121. Tad, JF6OJX, plans to be active as 3D2JX between now and April 24th from Mana Island, Fiji. Activity will mainly be on the low bands. QSL via JN1HOW.

OC-202. Roland, DU1KGJ, is organizing another trip to Calagua Islands, April 26-28th. Possible/probable callsign will be DX4CN. QSL via VE7DP.

SA-015. The "Caracas DX-Group"/ARV will be active as YW5M from Los Monjes Archipel, located at the extreme west part of Venezuela, July 17-20th. Activity will be on all bands CW/SSB. QSL via W4SO (maildrop!).

SA-063. The "Caracas DX-Group"/ARV will be active as YW8D from the Island of La Cotorra, located at the east-coast of Venezuela in the Orinoco-delta, June 20-24th. Activity will be on all bands CW/SSB. QSL via W4SO (maildrop!).

J5, GUINEA- BISSAU. Sebastien, F8DQZ, who was active from 3X with the callsign 3XD02 from the mainland and IOTA AF-051, will be here for the next two weeks starting April 19th.

KH9, WAKE ISLAND. Jake, N6XIV, will once again operate from Wake Island. His travel plans will have him arriving on or about April 19th. At this point he expects to stay for at least 30 days...with the possibility of up to 60 days. Once again operating time(s) will be limited due to his work requirements. However, Jake states he will carry along his AH-4 tuner in order to try and operate on multiple bands if the opportunity affords itself. As before, K2FF - Glenn in Mississippi and W6FRH - Bob in California will help with piloting duties. All QSLs go via K2FF direct or via the bureau.

OE, AUSTRIA. Dieter Kritzer, OE8KDK (HF-Contest Manager), informs OPDX that the Austrian Radio Amateurs and the Austrian Goverment Radiostations will do a national EMERGENCY TEST on the 1st of May. Activity will be from 0500-0800z and 1400-1700z on the 80 and 30 meter bands and they will be using the CW and SSB mode. The following stations are expected to be active:
OEC State Department
OEP213 Ministry of Interior
OEY??? Military
OEH??? Red Cross
The Goverment Stations have no permission to make international QSOs, but SWL reports are available via the Austrian QSL-Bureau.

PIRATE ALERT. Sasi, 9V1SM, informs OPDX that his QSL Manager W3HNK has been receiving QSLs for 9V1SM on 12 meters CW. This is not Sasi and this operation is a pirate. Sasi states that he only operates on PSK31 and SSB. All QSLs received for this band and mode will be returned to the

sender. If you did happen to have a QSO on this band/mode, Sasi would
greatly appreciate it if you could drop him a note before sending the
card to his manager at: tmssn@nus.edu.sg

QSL INFO AND NEWS.................
PA5ET is the QSL manager for the following callsigns: HB0/PA3ERC,
VP5C (1995), VP5/PA3BBP, VP5/PA3ERC, VP5/PA3EWP, VP45/PA3EWP, FG/PA3BBP,
FG/PA3ERC, FG/PA3EWP, FG/PA3FQA, TO5C (1996), J79BP, J79RC, J79WP,
J79QA, J77C (1996), FM/PA3BBP, FM/PA3ERC, FM/PA3EWP, FM/PA3FQA,
J6/PA3BBP, J6/PA3ERC, J6/PA3EWP, 9Y4/PA3BBP, 9Y4/PA3ERC, 9Y4/PA3EWP,
6Y5/PA3ERC, 6Y5/PA3EWP, ZF2RC/ZF9, ZF2WP/ZF9, PJ7/PA5ET, PJ7/PA4WM,
PJ7/PA3EWP, PJ7/PA3GCV, PJ7/PA4WM, PJ7/PA4EA, FS/PA5ET, FS/PA4WM,
FS/PA3EWP, FS/PA3GCV, FS/PA4WM, FS/PA4EA, V47ET, V47WM, V47WP, V47CV,
V47WM, V47EA, VP2EET, VP2EWM, VP2EWP, VP2ECV, VP2EWM, VP2EEA, 8Q9RC,
8Q9WP, V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9JS, 8P9JT, 8P9JU,
J3/PA3EWP, J3/PA5ET, J3/PA7FM, J38PA (2001), J8/PA3EWP, J8/PA5ET,
J8/PA7FM, J8PA (2001), J75ET, J75EA, J75ZH, J75WP, J75PA (2002),
VP2MET, VP2MEA, VP2MWP, VP2MPA, VP2MCV and VP2MWM (2002), OY7ET,
OY7QA, OY7TW, OY7WB, OY7WP and OY8PA (2003). Direct cards via:
Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.
ADDED NOTES: Rob states that OLD type IRCs are not accepted anymore.
Also, IRCs that are not stamped are treated as NO contribution which
means he will send the QSL(s) via the bureau. There are a few other
guildlines to follow (as mentioned in his press release) when QSLing
to Rob, PA5ET. His complete press release will be provided to OPDX
InterNet Subscribers as an additional bulletin.

QSL STATUS OF RI0B and RU0B (Also Ham Video) of the "Lost Islands"
DXpedition. EDITOR'S NOTE: We did our best to interpret the following
information. Yuri Zaruba, UA9OBA, informs OPDX that all direct QSLs
received in Russia after the polar expedition to "Lost Islands" (2001)
were answered by RW3GW and UA9OBA during last year. Also, ALL QSLs for
all QSOs were sent via UA3DX-QSL-Bureau in 2002. More than 25,000
beautiful 2 page QSLs were printed and they want you to please QSL!
They feel some direct QSL may have been lost in the postal system
to/from Russia. Yuri, UA9OBA, now has all the expedition logs (for
RI0B, RU0B, RS0B, RU0B/p,RS0B/p, R3CA/0 - 2001) and if you did not
receive your QSL(s), please send your QSL with SASE directly to:
Yuri V. Zaruba, P.Box 1, Novosibirsk-92, 630092, Russia. Also, please
remember, that one IRC will only pay for air mailing of only 20 grams
of foreign mail from Russia, so don't forget to enclose sufficient IRCs
for a few QSLs. ADDED NOTE: Also Yuri, UA9OBA, informs OPDX that a
professional video on the "Lost Islands" is now available. This is
the same English version that was shown during the IOTA/DX Hamvention
in England on October 12, 2002. This film-and-radio polar expedition
("Lost islands" which included Ushakova Island AS-156 as RI0B and
Uyedineniya Island AS-057 as RU0B in April 2001) was awarded the
"MOST COURAGEOUS IOTA DXPEDITION OF THE YEAR" by the IOTA community to
the team of Russian operators. This video can be ordered at the following
Web page at: http://www.nsiradio.com
Video will be shipped next business day directly from Russia by

Registered AIR Mail. Please specify the version you are interested in (PAL for Europe and NTSC for America). They also welcome comments about their professional HAM-video and would like to hear from you on the Web page at: http://www.hamradio.ru/rrc

RRA/RDA ACTIVITY. Members of the RZ6AZZ team (which include UA6AMB, RU6AX, RX6AH, RW6CT, RA6AX, UA6MF and RA6AU) will be active from the Caspian Sea Islands between April 23-28th. They plan to activate Morskoy Ivan Karaul Island (RRA-new for the Russian Robinson Award and RDA KM-05 for the Russian Districts Award) using the call UE6IKI, and Morskaya Chapura Island (RRA-new, RDA KM-05) using the call UE6IAA. Activity will be on 40-10 meter CW/SSB. It is possible that the team will be active with personal callsign/p. QSL UE6IKI and UE6IAA via RA6AU.

S0, WESTERN SAHARA. By the time you read this, the S05X DXpedition should be winding down or QRT. Full details on the DXpedition are available at: http://www.pagus.it/s05x/
Logs will be updated daily and will be available at: http://www.pagus.it/s05x/
As this bulletin was being prepared, a press release announced last Saturday that the S05X DXpedition has logged about 26,000 QSOs (CW 8135, SSB 14491 and RTTY 1953). QSL via EA4URE either direct or through the bureau. Donations to help offset the trip will be gratefully accepted and can be sent via the QSL Manager, EA4URE (URE - Union de Radioaficionados Espanoles, Avda. Monte Igueldo 102, Madrid 28053, Spain; E-mail ure@ure.es).

SPECIAL EVENT. A team of SP4KSY club members will be active as HF650O to celebrate 650 years of Olsztyn city. The station will be active from May 1st to July 31st, on CW, SSB, RTTY and PSK. QSL via SQ4NR, bureau or direct to: Grzegorz Gawel, ul. Herdera 16/14, 10-691 Olsztyn POLAND.

TM5, FRANCE. Dominique, F5SJB, will once again be active as TM5CW from May 24th to June 7th. There was NO mention what the special callsign is for.

VP2V, BRITISH VIRGIN ISLANDS. Bob, N6RFM, will be active as VP2V/N6RFM from April 22-25th. He will be on vacation, so his activity will be limited as time permits. Activity will be PSK31 QRP on 20 meteres only. QSL via his home callsign.

VUSHF NEWSLETTER. Derek, G0NFA, reports that the 144 MHz & Above Newsletter (Now Includes 50 MHz News), which is updated daily, and includes all the VUSHF News, DXpeditions, VUSHF Contests, 50MHz News, Beacon News, Etc Etc and much more, can be found at: http://www.144mhz.co.uk
You will also find at the bottom of the page a link to join the VUSHF E-mail List. The 144MHzEu is hosted by G0NFA using Topica and is very popular (w/500 Subscribers). Please sign the guestbook with your comments. ADDED NOTE: G0NFA will be active in Gibraltar for the August 2003 Perseids.

YI, IRAQ (Update). With the mention of portable YI operations in last week's bulletin, many have been wondering whether or not these operations would count for DXCC. Well, this past week ARRL Membership Services Manager

Wayne Mills, N7NG, provided the answer in/on the ARRL Letter and ARRL Web page. Here is your answer: "ARRL Membership Services Manager Wayne Mills, N7NG, says the League will accept for DXCC credit YI/ operations from Iraq by U.S. or British military personnel provided the operator has written permission from his or her commanding officer. 'There is precedent for this,' Mills said, citing an operation during the 1991 Gulf War. 'These operators will need written authorization to operate from their commanding officers until an interim Iraqi civilian government is in place,' Mills said. After that point, operators would need documented permission from Iraqi authorities." YI portable activity heard so far has been from Mark Smith/NG5L, Jim Dunkerton, KT4CK and Bob Furzer/9K2ZZ/K4CY. ADDED NOTE: There has been some mention of Ed Giorgadze, 4L4FN, who is now in the Middle East after wrapping up his North Korean (P5) operation last fall, may be heading to Iraq because of his involvement in the United Nations World Food Program.

ZA, ALBANIA (Update to OPDX.607). Team ZA3/ has announced that during their May 29th-June 3rd operation, they have organized on June 2nd a demonstration called the "Day of the Forces of Peace from the Foreign Countries". They will have two stations (radio/mobile) active from the Port of Durres, Albania, for mutual QSO exchanges by civilians and military personnel from Italy and the bordering nations with Albania (that includes Kosovo - Greece - Macedonia - Yugoslavia). All the radio amateurs of the world, particularly military (and ex-military) operators are invited to be on the radio June 2nd.

ZK1, SOUTH COOK ISLANDS. Operators Jun/VK4SJ and Doug/VK4BP will be active as ZK1AYL and ZK1SIM from April 27th through May 26th. They plan to visit Aitutaki (OC-083) April 27th through 14 May, and then Rarotonga (OC-013) from May 15-26th. Activity will be on 40-10 meters. QSL via VK4SJ either via the bureau or direct to: June Sim, P.O. Box 406, Caloundra 4551, Queensland, Australia. E-QSLs will not be accepted.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:

kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

```
-----------------------------------------
TE75: 75 years of amateur radio in Costa Rica
-----------------------------------------

It was 75 years ago, on May 4, 1928 when then first amateur radio
broadcast was made from Costa Rica. Station TI4NRH, operated at the
time by Amando Cï¿½spedes Marï¿½n began operating with five watts from the
province of Heredia.

Conmemorating the 75th anniversary of TI4NRH, Radio Club of Costa Rica
has chosen to employ the special prefix TE75 during the month of May
2003. Multiple TE75 stations will operate starting May 1, all bands
and modes.

General information on the operation follows. Additional information
may be obtained through our webpage, www.ti0rc.org or via e-mail at
te75@ti0rc.org.

General information regarding special prefix TE75

Description:

In celebration of 75 years of amateur radio in Costa Rica, costarrican
stations will operate using their callsigns with the special prefix
TE75.

Dates of operation:

May 1, 2003 to May 31, 2003.

Bands and modes:

All authorized bands and modes.

Stations:

The official list of authorized TE75 stations can be found at the RCCR
website: http://www.ti0rc.org

QSL routes:

All TE75 stations share a common QSL route, which is Radio Club of
Costa Rica (TI0RC). QSL cards are welcome both via direct mail and
via the IARU bureau service.

Diplomas and awards:

The official list of diplomas and awards available will be published
by
```

RCCR once the operation has concluded. A minimum of six authorized
TE75 stations as well as the official station TE75RC will be required
for any diploma.

Amateur Radio Newsline™ Report 1341 April 25, 2003

(Note: This is the first ever Amateur Radio Newsline report anchored from outside of the United States. It was recorded in Auckland, New Zealand by Jim Meachen, ZL2BHF)

**

The following is a Closed Circuit. Newscast 1341 follows immediately. Here is Amateur Radio Newsline Support Fund administrator Andy Jarema, N6TCQ.

--

Amateur Radio Newsline is still on the air. It's still on the air because staff members paid the bills out-of-pocket. This obviously, cannot continue. These people are not Bill Gates, Warren Buffet, or even Michael Jackson. These are your everyday working people who believe so strongly in the mission of Newsline, that they will support it with hard-earned dollars.

We at Newsline need for you, our listening audience, to believe in that mission, too. To believe enough to help keep these newscasts on the air. To show your thanks to the volunteers that keep the latest in Amateur Radio news coming your way.

The address for the Newsline support fund is: Newsline, PO Box 660937, Arcadia, CA 91066.

Again, as always, thank you for your belief, and for your support.

--

Thank you Andy.

**

Amateur Radio Newsline report number 1341 with a release date of Friday, April 25 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Bad news for United States hams who like high fidelity single sideband, good news for New Zealand hams worried about restrictive R F exposure laws and the Dayton Hamvention says that it plans to stay where it is. Find out the details on Amateur Radio Newsline report number 1341 coming your way right now.

(Billboard Cart Here)

**

A CLASH OF IDEALS: BE CAREFUL IF YOU RUN WI-FI

A sour note for hams running what some call high fidelity single sideband. It comes in a regulatory advisory letter from the FCC. Amateur Radio Newsline's Paul Courson, WA3VJB, reports from Washington D.C.

--

The letter from FCC enforcement counsel Riley Hollingsworth went out to a list of licensed hams who favor what some call enhanced SSB, which is sometimes nicknamed upper wideband and lower wideband, characterized by extended low end response, a clean mid-range, and expanded treble or high-end crispness.

While their passion is to experiment toward exceptional audio quality with their voice transmission and reception, the experiments have been a flop with some other hams near their frequencies of operation.

Hollingworth said the Commission has received a number of complaints, and that his advisory letter is intended to inform them that the complaints claim the bandwidth of these stations is wider than necessary and contrary to good engineering practice.

The FCC letter did not cite these stations for any violations, and acknowledged that a precise measurement can be somewhat complex. But he encouraged each operator to be aware that it can be "extremely inconsiderate of other operators" to employ what Hollingsworth described as wide-band overly processed audio, especially when, in his words, such audio is combined with high intermodulation distortion generated by certain amplifiers.

Two of the hams who received the letter quickly responded to Hollingsworth. John Anning, NU9N, told the FCC that single sideband does not have to sound like a tin-can anymore, and cited the enhanced audio available from the latest manufactured transceivers from Kenwood and Yaesu, as well as the popularity of external audio augmentation marketed to the amateur community from Heilsound and W2IHY. Anning said his station does not splatter, has low distortion, and is not overly processed. He suggested the problem of splatter and excessive bandwidth from distortion products is far more common on the phone bands during any contest weekend.

The other hi-fi ham sharing his response to the FCC advisory letter is Paul Christensen, W9AC. He told Newsline he is puzzled by the letter since he's been off the air the past six months. Christensen said the letter may have been prompted by a group he characterized as "a half dozen tightly-knit, pandering individuals."

Both men who spoke with Newsline compared the experiments with wideband SSB to the activity of AM, which itself has enjoyed rising popularity and has been getting favorable press in QST, Electric Radio, and Popular Communications. By contrast Hollingsworth has reportedly expressed his belief single side band was developed as a mode with spacesaving advantages, with necessary tradeoffs in audio quality as a presumption with its use in the amateur service.

Again, the advisory letter carries no enforcement sanctions. But Hollingsworth told the stations such complaints can trigger petitions for rulemaking asking for constraints on such activity that the recipients of the letters had better keep in mind.

Reporting for Newsline, this is Paul Courson, WA3VJB, in Washington

--

In preparing his report WA3VJB did contact the FCC’s Riley Hollingsworth. Hollingsworth told Courson that he honestly does not think these letters have any bearing on those hams who operate AM stations altho he admits thart he is getting that question. But he says that in his view, there is no need whatsoever for A-M'ers to be concerned. (ARNewsline™, WA3VJB)

**

RADIO LAW: RF EXPOSURE LIMITS DOWN-UNDER

Some good news for hams down-under. This as the Palmerston North City Council favors Amateur Radio on a proposed plan to change local Radio Frequency exposure limits.

According to Mike Newman, ZL1BNB, the Palmerston North council has declined to accept the recommendation of the New Zealand Department of Health to adopt its testing and reporting proceedures. The Council instead adopted the less stringent emission exposure levels set out in an earlier New Zealand standard as being the maximum levels which can be generated by transmitting equipment within the Palmerston North City boundaries.

In taking this action the Palmerston North city council declined to support the government recommended approach which would have required local radio amateurs to carry out the expensive R F exposure evaluation process. Numerous amateur operators and representatives of the nations national Amateur Radio Society -- the N-Z-A-R-T -- testified in support of the measure that was adopted. (NZART)

**

RADIO LAW: CANADA NEW TOWER LAW REVIEW COMMITTEE

Back in North America, Canada’s Minister of Industry, Alan Rock, has announced the appointment of a National Antenna Tower Review Committee. The Committee will be made up of municipal officials, as well as industry, health and academic experts.

The new committee will be chaired by David A. Townsend. Townsend is a Professor of Law at the University of New Brunswick and has authored a previous study on antenna support structures.

And while the announcement outlines the composition of the new Canadian tower committee it does not give the target dates for the submission of inputs or the method by which information can be provided. Radio Amateurs of Canada, that nations national Amateur Radio society says it plans to participate in any policy review affecting Canadian ham radio operations. (RAC)

**

Break 1

From the United States of America and Auckland New Zealand, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the N9AKN

repeater serving Milwaukee Wisconsin.

(5 sec pause here)

**

ENFORCEMENT: RADIO STATION DINGED FOR $9000

A $9,000 fine against WRKQ - AM in Madisonville, Tennessee, has been affirmed by the Federal Communications Commission. The regulatory agency says that WRKQ allegedly failed at least once to identify itself by call sign. Also that it operated at night with daytime power and failed to adequately attenuate its second harmonic.

The harmonic is a rather interesting issue here. WRKQ operates on 1250 kHz. The FCC says that it's second harmonic falls squarely on WWV's authorized frequency of 2.5 MHz. The FCC says that it measured WRKQ's second harmonic down at only -55 dB per centimeter whereas -70 dB is required by the rules.

You can read more on the web at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1033A1.doc (CGC)

**

ENFORCEMENT: YOU CANT SAY THAT ON THE AIR - IN ANY LANGUAGE

The FCC is looking into what a California ham may have said on the air. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "Julio Cedeno, N2GRM, of Hollywood California has 20 days to respond to an inquiry concerning both Spanish and English communications from his station operation on 14.322 MHz on March 5th and March 9th of this year. The transmissions contained threats to another amateur as well as language prohibited by the Commissions rules."

--

In its letter the FCC noted directed that N2GRM specifically address the threats in the transmissions as well as the language. The regulatory agency says that threats made against other licensees are viewed very seriously by the Commission. It also told N2GRM that his response will used to determine what enforcement action the FCC may take in this matter.

**

ENFORCEMENT: YOU CANT SAY THAT ON THE AIR

An Eastlake Ohio ham has also heard from the FCC. On March 18th the regulatory agency issued Dave K. Childers, N8QGI, a warning letter regarding transmissions purportedly made by him last December on 27.115 MHz.

For those of you not aware, 27.115 MHz is also known as Class D Citizens Band channel 13 in regions governed by the FCC. In its note, the government agency did explain its position -- upheld by the courts -- regarding its ban on the

type of language Childers is alleged to have used.

The agency also ordered Childers to respond within 20 days from the date of its letter to him. The FCC also told him that his response will be used to determine what enforcement action to take in this matter.

**

HAMVENTION 2003®: WE PLAN TO STAY AT THE HARA

The Dayton Hamvention hopes to stay at the HARA Arena well past 2003. So says the event's General Chairman, Pat Neff, N8IGS. He tells RAIN's Hap Holly, KC9RP that the rumors of a move are simply not true:

--

Neff: "I can't tell you where the rumor is being propagated from but I can tell you that we are in negotiations for future years at HARA Arena and the only difference is that we are really not looking to have a long multi-year contract anymore. We want to be able to have a shorter length contract so that it could be better advantageous to us from a bottom-line aspect."

--

Rumors of a move away from the HARA Arena or that the HARA had been sold seem to pop up every year. Newsline even heard one being circulated at the recent N-A-B show in Las Vegas. And like all before it over the years, this rumor was as phony as the rest.

But the real bottom line is what Pat Neff says -- and we quote: "As much as the city of Dayton is associated with the Hamvention, HARA is associated with Hamvention." And to paraphrase another very famous ham -- thats the way it is! (RAIN)

**

HAMVENTION 2003®: HEAR MORE ON RAIN

By the way. You can hear more about the plans for Hamvention 2003 with Pat Neff, N8IGS, on this weeks RAIN Report. Its on-line right now in streaming audio at www.rainreport.com. Or, if you are Internet deprived, you can dial in on your phone to listen. The number in Chicago is area code 847 827 RAIN. Thats 847 827 7246. (RAIN)

**

HAMVENTION 2003®: DAYTON REMEMBERS THOSE WHO HAVE PASSED ON

Still with Hamvention related news, last week its planners announced the major award winners for 2003. And from time to time the Hamvention also recognizes the contributions of hams who have passed on but left their mark. Roy Neal, K6DUE, reports:

--

Dating back to the days when we hams talked in Morse code and used keys instead of microphones to talk, we hams call our friends who have passed on as Silent Keys'. The term is one of endearment and respect for those radio amateurs who have lead the way. And in keeping with this long tradition, the planners of the 2003 Dayton Hamvention have paused to salute a number of special people whose lives have helped to make ham radio a little bit better.

The first being saluted by Dayton is Joseph Carr, K4IPV, of Falls Church, VA. Carr became a Silent Key on November 25, 2000. During his lifetime K4IPV authored over 85 books and nearly 700 articles covering electronics and technology. He also contributed monthly columns and articles to many popular Amateur Radio magazines.

Al Gross, W8PAL, of Sun City, Arizona became a Silent Key on December 21st, 2000. For those not aware, Gross brought the world such indispensable wireless communications devices as the walkie-talkie, the pager and cordless telephone.

A name that many Amateur Radio Newsline listeners will remember is that of Bill Orr, W6SAI. Bill became left us on January 24, 2001. He was best know for his voluminous publications for radio amateurs, including "The Radio Handbook", "The Beam Antenna Handbook" and many more. He was a good friend to me and to many other hams.

Raymond Ortgiesen, WF1B, was another major contributor to today’s ham radio way of life. He authored “RTTY,” the leading contest software for digital modes.

Ernie Hudson, KI8O, of Dayton, OH became a Silent Key on 8/2/2002. Hudson was a member of the Dayton Red Cross and acted as the Montgomery County Emergency Coordinator and Assistant Coordinator for a number of years. Hudson’s passion was helping people. His efforts focused on public service and disaster relief while also introducing many young people in Amateur Radio.

Finally there are the Columbia Astronauts who perished earlier this year. Three of them were hams. David Brown, KC5ZTC, Kalpana "KC" Chawla, KD5ESI and Laurel Clark, KC5ZSU, who died along with crew-mates Rick Husband, Willie McCool, Michael Anderson and Han Ramon when Columbis disintegrated over Texas during re-entry.

The Dayton Amateur Radio Association says that through the Space Amateur Radio Experiment and the Amateur Radio on the International Space Station programs, ham radio has enjoyed a special relationship with the Astronaut Corps. It is for their dedication, their role in scientific advancement, and their love of their dreams that the Dayton Amateur Radio Association and the Hamvention have made this very special award this award to the crew of the space ship Columbia on its STS-107 last mission.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE, reporting

--

The announcement of these special remembrances is on the events website at www.hamvention.org (Hamvention 2003®)

**

HAM HAPPENINGS: T-HUNT TIME

And speaking about things that happen in the spring, its T-Hunt time again. Here’s Joe Moell, K0OV, with the latest:

--

Are you looking for some new outdoor ham fun for the spring and summer months? Join your fellow hams who are tuning up their radio direction finding (RDF) equipment in preparation for the hidden transmitter hunting season.

The CQ Magazine National Foxhunting Weekend will be May 10-11, a time when foxhunters from around the country go on their favorite kind of RDF adventure. It could be a mobile T-hunt. When you set out in your RDF-equipped vehicle, you never know where you'll end up and you don't know what you'll find.

Other hams prefer their foxhunting to be all on foot in a big park. They call it foxtailing, radio-orienteering or ARDF. There's an internationally recognized set of rules for this kind of hunt, which takes place in about 30 countries around the world. Stateside hams will host competitors from some of these countries at the Third USA ARDF Championships in Cincinnati, Ohio beginning July 31.

Of course your club can make up its own transmitter hunting rules. The important thing is to make plans now for transmitter hunting on May 10 and 11, the National Foxhunting Weekend. There are more foxhunting opportunities coming up, and I'll be telling you about them in another report soon. You can read about foxhunting and the National Foxhunting Weekend at my Web site: www.homingin.com. That's one word "homingin" --- homingin.com.

From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, Kay-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Again Joe’s website is www.homingin.com. And homingin is one word. (ARN ewsline™, K0OV)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the Auckland New Zealand and Los Angeles California, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAMS HELPING HAMS: DISTANCE LEARNING - AMATEUR RADIO STYLE

The Nacogdoches Amateur Radio Club, in Nacogdoches Texas recently solved a big problem using what it calls typical ham radio ingenuity. This, when John

Fullingim, the person who was supposed to talk at their meeting could not get a ride out from Dallas about 180 miles away

Fullingim¹s program was a Power Point Presentation consisting of a series of slides accompanied by live commentary. Rather than cancel the April 2nd meeting, Fullingham e-mailed the Power Point to Army Curtis, AE5P, in Nacogdoches. Curtis loaded it onto his laptop computer for showing at the meeting.

Next, a communications link was then established between Nacogdoches and Dallas using both the Internet and Amateur Radio courtesy of Jeff Clark, K5NAC and Kevin Anderson, KD5CCH. And on the meeting night Curtis ran the slide show in Nacogdoches as Fullingim in Dallas provided commentary using the specially installed system.

The two way link also allowed questions to be asked from the live audience. This remote program lasted almost 90 minutes, and was very well received by everyone present at the meeting. (KD5ING)

**

NEW HAM TECHNOLOGY: RIMIGATE VER 0.2 NOW AVAILABLE

Sean Jewett, KG4NRC, of Antioch, Tennessee has announced the availability of version 0.2 of his RIMiGate application program. This is a freely available Linux based APRS I Gate server.

Version 0.2 is quite a bit different from the earlier release. Users no longer need to have a Linux system to build RIMiGate. RIMiGate is now distributed as a disk image that can be written to disk using freely available tools for Linux, Windows, and Macintosh. In addition, the configuration files now reside on an M-S DOS based file system so users can easily edit configuration files.

The minimum requirements for RIMiGate is a 486 system with a minimum of 12 megs of ram. You can download the program from the http://www.rimboy.com/rimdistro/rimigate/ (KG4NRC)

**

HAM RADIO IN SPACE: AN AO-40 UPDATE

The AMSAT Oscar 40 satellite is continuing to drift downward as was predicted by its controllers. Unfortunately, this makes for bad satellite conditions that are less than favorable for passband use.

Also, the solar angle is worsening and will soon exceed 45 degrees. This will limit satellites available power while warming the spacecraft considerably as the sun swings across it.

Because of these factors, AO-40’s passband transmitters were be turned off on Saturday, April 19th. They will remain off for about 4 weeks or until conditions improve. (ANS)

**

INTERNATIONAL -GERMANY: DEUTSCHE WELLE GOES DIGITAL

Germany's international broadcaster, Deutsche Welle, has announced that as of June it will transmit digitally on shortwave to Europe and the Middle East using the Radio Mondiale broadcast system. This makes Deutsche Welle the first international broadcaster to commit to a start date for regular D-R-M transmissions on the shortwave bands. (ASWLC)

**

OUR HERITAGE: INTERNATIONAL MARCONI DAY

Saturday, the 26th of April, was 'International Marconi Day'. International Marconi Day is a 24-hour on-the-air event held annually to celebrate the birth of Guglielmo Marconi in 1874. Its also an opportunity for amateurs around the world to make contacts with historic Marconi sites to gain an award for working a specific number of participating stations.

At least 35 special event stations were to be on the air for International Marcoini Day 2003. This included the famed W1AA slash MSC Marconi Radio Club representing the Marconi 1901 Siasconset Station on Nantucket Island in the USA. There were also around 15 United Kingdom sites slated to be on such as Poldhu in Cornwall and Alum Bay on the Isle of Wight and Chelmsford in Essex. Other historic stations include VO1IMD from Signal Hill, Newfoundland, and IY4FGM from Marconi's birthplace near Bologna Italy. (MSC ARC, GB2RS)

**

DX

In DX, the RSGB reports that the International Short Wave League's VHF club callsign, MX1SWL, is being used by Tom Read, M1EYP, through the end of April. Tom will be activating several hilltops, particularly in the Pennines, for the Summits On The Air awards program. (GB2RS)

And F0 slash F8CFU planned to be on from the Tuamotu Archipelago in French Polynesia and Tubuai Island in the Austral Islands through the 16th of May. QSL as directed on the air. (GB2RS)

Also, the former 7Q7DC, has now moved to Nairobi and has been given the call 5Z4DE. Don is the first United States citizen in 12 years to obtain a Kenyan license and will be active as soon as he puts his antennas up. (OPDX)

Lastly, word that 4Z4DX, will be active on 160 to 6 meters CW and digital modes as 9N7DX from Nepal through the 12th of May. Again, Q-S-L as directed by the operator. (OPDX)

**

THAT FINAL ITEM: HAM RADIO ADVENTURE TO THE SOUTH PACIFIC

And finally this week, how about a ham who has decided not to let age stand in the way of her passion to sail and to operate from rare places. Amateur Radio Newsline’s Bruce Tennant, K6PZW, reports on a truly amazing lady:

--

Susan Meckeley, W7KFI, is 69, loves ham radio and loves to sail. And she recently told the Ohio-Penn DX Newsletter that she is headed to the South Pacific on as three-year DX'pedition odyssey.

Meckeley left Oakland, California, in January and has been slowly working her way south. At that time she spore with OPDX Meckeley was in Mexico and soon to sign W7KFI slash maritime mobile. She has already been to Ensenada, Mexico, for a month, but set sail on April 16th, for San Jose, Punta Cabras.

Heading south, Meckeley told OPDX that she would be operating from the Isle San Martin. She was heard April 17th at 24:41 UTC as XE2/W7KFI on 14.249 MHz from the island. The length of her stay is not known.

Her next stop will be at Bahia de Torguga and from there to Magdelina Bay, Cabo San Lucas, and finally La Paz. Then it is off to the islands in the Sea of Cortez for operating and into Guymas for the hurricane season. Come fall she will go down the mainland coast ending in Costa Rica. In April 2004, Meckeley is off to Galapagos Islands and into the South Pacific.

When she's on the air its with a Yaesu FT-847 and a pair of pop-up masts. She runs all modes except ATV from her 1932 Challanger called the S/V Dharma. She tells OPDX that -- and we quote -- "this size boat I can handle all by myself." And it sounds as if Susan Meckeley, W7KFI, is making her dream come true.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

One last note. Meckeley told OPDX that she has room on board for a crew-member if anyone wants to go. If interested, let OPDX know and the newsletter will forward the message. The e-Mail address is kb8nw@arrl.net (OPDX)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 amateur Radio Newsline Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, in Auckland, New Zealand saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter and Web Site, K1XN & GoList, K2FF, K2PF, KF2HC, NG3K, W3UR & The Daily DX, K4VUD, KP4ARN, N4AA & QRZ DX, N4GN, N5VL, W5EW, W5UE, WA5PAE, KG6AR, KK6T, N6CW, AD8J, K8YSE, K9OT, Iveria IARC-4L1W, 9V1YC, CS1CRE, DF5AU, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, E21EIC, F5NQL & UFT, FJ5DX & La Gazette du DX, I1JQJ & IK1ADH - 425 DX NEWS, IK2SAI, JI6KVR & JA-IOTA Islands News, JR3TVH, OH2BH, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, TI2DLL, UA9ORQ and VA3RJ & ICPO for the following DX information.

EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for May 5th, because I have to travel to Martin, Tennessee, next weekend to help move my daughter back from college. However, if everyone sends their info before I leave or if there is a special announcement, there "MAY" be a bulletin late (very late) May 5th. PLEASE continue to send your DX info to me (you never know!).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th/April, through Sunday, 27th/April there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VK9X, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN,

YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4A, MEXICO. Alejandro, XE2BSS, informs OPDX that a group of Mexicans and one U.S. amateur radio operator will be activating the callsign, 4A2Q, from Imuris in the State of Sonora, Mexico (grid DM40). Operations start at 0300z on May 3th and will end at about 2200z May 4th. Modes of operation will be: CW, PSK31, RTTY and SSB. For this occasion, they will also be active for all passess on UO-14, FO-20 and FO-29 satellites; on the two last passes they will operate CW also. The group will also operate on all bands on HF from 160-10 meters. Operators mentioned are: Gerardo C. Varela/XE2Q, Marco Antonio Soto Gutierrez/XE2TG, Vicente Uriel Martinez/XE2VAS, Marco Antonio Gamboa/XE2SNG, Patrick E. Stoddard/ XE2/WD9EWK, Jesus Meraz/XE2VJM, Manuel Rios/XE2ABB, Alejandro Pereida Mendoza/XE2BSS, Rafael Valdez Ley/XE2PVX, Enrique Romanillo Lopez/XE2SER and David Alonso Rivas Perez/XE2RDA. QSL via WD9EWK, Patrick Stoddard. More information about this special event operation can be found at: http://www.qsl.net/wd9ewk/4a2q.html

BALLOON EXPERIMENT. The Italian Amateur Radio Society - Milano Chapter (Associazione Radioamatori Italiani - Sezione di Milano) is proud to announce ARBE: Amateur Radio Ballooning Experiment. A special team will apply APRS technology for balloon ground position monitoring. During the same time a radio operator will fly onboard calling on the amateur radio VHF band (voice, USB) from the Mantova Airport. A special QSL card will be issued for all stations joining the event. QSL Manager will be given during the operations. The callsign used will be IQ2MI/p, and please check on 144.300 MHz +/- QRM USB starting at about 0800-0900z on May 10th. Flight should be 1-3 hours long. Due to weather conditions, the flight may be rescheduled for May 17th, same time. In order to get up-to-date information about the ARBE event progress, you can visit the ARI Milano Web site at: http://www.arimi.it/rubriche/arbe.html
(This page will be activated early May) ARBE is sponsored by the most important Milan Ham Radio Center: EP-Elettroprima srl, Aeronord Balloons & Airships, and the Space Engineering Department of Politecnico di Milano University.

CASTLE ACTIVITY. Members of the "Clube Radioamadores do Entroncamento", will use the special callsign, CS7AL, and will be active May 31st from Castel Alcanede (DCFP reference C-112, DMHP reference SR-012 and DMP reference 1416 for the Portuguese Castles Award). Operation will be on 40 and 20 meter SSB. Castel Alcanede is located in the Province of Ribatejo. QSL via CT1BXE, direct or bureau.

CY9, ST. PAUL ISLAND. The CY9 DXpedition team is now complete. The operation will take place from July 24th to August 2nd, with an entry in the IOTA Contest. The team members are Robert/N0RN, Vance/N5VL, Igor/W0IZ, Joe/KO4RR, Andrea/K5AAH (YL), Alan/K5AB and Dale/VE7SV. They will be taking with them a Battle Creek Special and will operate on the low bands during all openings. Callsign will be given either at the beginning of

the operation or shortly before. QSL via N5VL. Visit the following Web page for updates: http://www.hometown.aol.com/vlepierre/myhomepage/index.html

DAYTON HAMVENTION HAPPENINGS. The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. This year's Hospitality Suite will be dedicated to the memory of one of NODXA's "Silent Key" club members Jim Hire, W8ZET. Jim loved ham radio and enjoyed meeting his friends from around the world each year at Dayton. He was also a NODXA "Honorary Life Member" and was very involved with NODXA and the Hospitality Suite. This year Jim's wife, Janeen (now a new ham - KC8BRS) has decided to keep the tradition going and will provide some special memorabilia of Jim at the Hospitality Suite. Please stop by and visit. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

FP, ST. PIERRE AND MIQUELON. Paul/K9OT and Peg/KB9LIE (YL op) are planning their third annual low-power DX vacation as FP/K9OT and FP/KB9LIE to Miquelon (NA-032) from July 27th-August 5th. This will include an entry by FP/K9OT in the CW North American QSO Party. They will operate both CW and SSB and concentrate on 160, 80, 40, 30, 17, 12, and 10 meters, which are in the greatest demand. Special attention will again be given to QRP stations, mobiles, and VK-ZL-JA-JT-Oceania. QSL via homecalls; bureau cards will be accepted. For direct cards, please include SASE or SAE with one GS or IRC (old or new style). Visit the following Web page for updates at: http://www.mhtc.net/~k9ot

HS0, THAILAND. Charles Harpole, K4VUD, will once again activate his Thailand callsign, HS0ZCW, for the period of April 28th to about June 15th. He states, "Please note... WARC band operations in Thailand are NOT ALLOWED at the present time. Local hams are working on permissions." He also mentions that 80/160 meters operations are only during some contests and only then in small 3 kc windows, CW and SSB.

IOTA NEWS.....
AS-079. Taka, JR3TVH, will be active as JR3TVH/6, from Miyako Island (Miyako-gun, Sakishima Island, Okinawa-ken) from May 1-4th. Activity will be on 40-6 meters AM/CW/FM/RTTY/SSB. He will set up a 6m beacon on 50.138 MHz looking for 6m DX stations. For skeds, E-mail Taka at: jr3tvh@arrl.net
QSL via his homecall via the bureau or direct (QRZ.com).

EU-125. Mirko, DJ1AA, was active and scouting out the Island of Romo, located in the North Sea Coast Group (QTH of this Island is between Sylt [DL] and Mando Island [OZ]), last week. He plans to possibly be active from here for the upcoming IOTA Contest in July. Mirko is the Team Leader for a new IOTA contest group.

EU-136. There has been a slight change in plans!. Boro/9A3KB and Den/9A3FO, members of the IOCAGroup (The Islands of Croatia Activators Group) and the CTC (The Croatian Telegraphy Club),

are planning to be active from five Croatian islands in the EU-136 group as homecall/p, between May 31st and June 4th. Their first island will be Sveti Marko (IOCA CI-117) May 31st. From May 31st to June 1st; they will be active from Krk Island (CI-046) and Voscica lighthouse (CLH 188, Loc: JN75HF); June 2nd and 3rd from Susak Island (CI-108) and Garba Lighthouse (WLHA LH-0444, CLH-031, Loc: JN74DM); June 3rd from Losinj Island (CI-058); June 3rd and 4th from Cres Island (CI-012, Grid JN74). Look for them on 80-10 meters, CW only. QSLs via the individual's home callsign, direct or bureau. No e-QSLs, please!

EU-148. Operators/Members of the Castres DX Gang (F5AUB, F5XX, F5BJW, F4CLO, F5JBR, F5UOE, F5BLP and F6DBX) will be active once more from the Fort Brescou Island (French Departments Award: Herault/34; French Provinces Award: Languedoc-Roussillon, DIFM ME-001, WLH0500, French Forts and Castles Award DFCF34001), from May 22-26th. Activity is planned for HF + 6 meters bands, SSB, CW, RTTY and PSK31. Ther will be at least 4 stations with beams, wires and amps (two on the air using SSB, one using CW and one using PSK31/RTTY/CW). The callsign will be F5XX/p. Two members of the crew (namely Bernard F5XX and Andre, F5JBR) will sign TM5B during the WPX Contest. QSL via F5XX, either direct (envelope + postage) or via the French bureau. More information about the Castres DX Gang is available (in French) at: http://castres.dx.gang.free.fr/

OC-NEW. Operators Wen/YB2DGR and Rivai/YB2MTA will activate the Karimata Island Group (YB7 west) from July 24-30th (minimum operation is 5 days, which includes the IOTA Contest).
IOTA reference number: OC-new (confirmed by G3KMA)
WLH reference number: LH-new (until population of island is known)
Their time of activity will be 12 hours a day as following the LH powered up (evening). Band activity will be on 15m (mainly SSB) and 20m (mainly CW). They will have two Icom 720 radios with 120 watts output max. QSL Manager will be EA7FTR, Fransisco Lianez Suero. Visit the Karimata Group, YB7 west DXpedition (OC-New) Web page at: http://www3.ocn.ne.jp/~iota/newpage45.htm

KH9, WAKE ISLAND. Jake, N6XIV/KH9, became active from Wake Island at 0740z on April 22nd. He came up on 14260 kHz and operated until after 0900z. This was his first operation since arriving on Wake, however, N6XIV/KH9 has been spotted on the internet DX Clusters on April 20th just before 1000z on 30 meters. Jake has confirmed that this station was definitely NOT N6XIV/KH9. There has also been spots on 40 meters CW. His QSL Manager advises that Jake DOES NOT work CW. DO NOT waste your time working and especially QSLing N6XIV/KH9 if heard on CW...it is NOT Jake. He will be on the air as work permits, roughly between 0700z to 0900z, most likely around 14260 kHz. Jake may attempt other bands, but that will be dictated

by his very limited operating hours. Also, Jake states he will be on SSB only this trip. QSL via K2FF.

KP2, U.S. VIRGIN ISLANDS. Ann/W2AZK and Brian/KF2HC from the North Jersey DX Association (NJDXA) will sign homecall/KP2 from St.Croix, June 12-19th. SSB and CW activity will be on 160-10 meters. QSL via direct or via the bureua to the call worked. Confirmed QSOs are good towards the "NJDXA Award" See NJDXA's Web page for award details at: http://www.njdxa.org

LIGHTHOUSE ACTIVITY. Look for Jean Claude/F6HDH and Francis/F6HKS to be active from the following lighthouses which count for the Onshore French Lighthouses (DPLF) Award Program:
On May 2nd, starting 0700z from the Cap Ferret Lighthouse, PB049, FRA226.
On May 3rd, starting 0700z from the Hourtin Lighthouse, PB055, FRA105.
Jean-Claude, F6HDH, will use SSB on 40 and 20 meters. Francis/F6HKS, will use only CW on 30 meters. QSL via their home callsign, direct or via the French Bureau.

LX, LUXEMBOURG. Johannes, DF5AU, will be active as LX5A during the CQ-MIR-DX-Contest weekend, May 10-11th. Activity will be on CW/SSB and on 160-10 meters. QSL via LX1RQ either direct or through the bureau. Visit the Web page at: http://www.qsl.net/lx5a/activities.htm

M, ENGLAND. John Getz, AD8J, will be active as M/AD8J from England during the CQ WPX-CW Contest, May 24-25th. QSL to AD8J.

MJ, JERSEY. Operators Ekki/DF4OR, Tilman/DJ5BX and Rainer/DL1ZBO will be active from IOTA EU-109 from June 3-9th. They will be signing homecall plus the MJ prefix on CW, RTTY and SSB on 80-10 meters. On June 7-8th, with the callsign "MJ/DJ5BX", they will be participating in the ANARTS WW RTTY Contest. QSL via DL1ZBO, direct or Bureau.

OOOPPPSSS DEPARTMENT. The was a slight error (actually misunderstanding) in OPDX.607 under "3 YEAR DXPEDITION (Amazing Lady!)". Thanks to Terry, KK6T, for pointing it out. The "1946 Brewer" was a Brewer 46, which is 46 ft. Also, the "1932 Challenger" was a Challenger 32, which is 32 ft.

QSL INFO AND NEWS.....
James, 9V1YC, informs OPDX that he has a QSL Manager now. QSL 9V1YC via N5ID.

Ralph, K2PF, would like to remind readers that the correct QSL route for AP2ARS is via K2PF. Some are continuing to send via S53R, and due to Robert's travels, he is not able to respond to QSL requests.

Champ, E21EIC, was active this past week (April 23-35th) from Si Chang Island (IOTA AS-107) as E21EIC/P. QSL via direct or by the Bureau. Visit his Web page at: http://www.qsl.net/e21eic

Francois, F8DVD, has just returned from his DXpedition to Spitsbergen Island (EU-026) as JW/F8DVD. He would like to thank every ham radio who called him, especially all Japanese stations. Francois has made 2400 QSOs during his 5 days stay. QSL is OK via the Bureau or direct

with a SASE + IRC or USD to: Francois BERGEZ, 6, rue Liberte/SPAN>,
F-71000 MACON, FRANCE.

Randy, W5UE, reports that the QSLs for the recent trip by the Magnolia DX Association to NA-082/MS002S (Cat Island, MS) as K5C are due from the printer any day now. Direct requests sent to K2FF will be answered promptly upon receipt of the cards. Please check out their web page for the operation at: http://mdxa.org/k5c_03.html
It includes statistics, photos, on-line log checking and a story of the trip.

Silvano, KB5GL, was active as KB5GL/5 from the Breton Islands (NA-089) this past week (April 25-26th). QSL via his home callsign (Silvano Amenta, 5028 Hearst Ave, Metaire, LA 70001, USA) or, for Europe only, via IZ8CCW (Antonio Cannataro, P.O.Box 360, 87100 Cosenza - CS, Italy).

The S05X multi-national team went QRT around 1030z on April 20th, after some 31,000 QSOs. Logs are available at: http://www.pagus.it/s05x/
The log search facility is up and running, however there might be problems in accessing it due to the browser that is being used. Discrepancies in QSO data should be reported to the QSL Manager following the instructions that will be published on the Web site.

Ray, W5EW, reports that he is QSL Manager for J79T (1989), VK9EW and VK9WB (1990) and V63BW (1992). Requests may be sent to W5EW at: Ray Husher, 202 Washington Ave, Thibodaux, La 70301. SASE is necessary or SAE and IRCs or one (1) USD. Ray will not respond to BUREAU cards. Ray states, "I only seek enough to cover the expense of mailing the QSL nothing extra is necessary."

XQ6ET QSL CHANGE. George, W8UVZ, reports, "XQ6ET (Bob) jumped the gun and changed his QSL route to my callsign without the process being complete - not my desired method but not much I can do at this point." George, W8UVZ, does state that he is in the process of taking over QSL chores for XQ6ET, all dates (But, "in the process"). He currently does not have logs nor any cards. Although, he understands the logs will be on their way soon. Also, XQ6ET was out of QSL cards, so they will have to be ordered. Ultimately, when George gets going, he will need a minimum SASE from U.S. stations, and SAE from DX stations with one new IRC or one greenstamp. George states, "It's going to be 6-8 weeks before cards for XQ6ET will flow from W8UVZ."

Terry, N6CW, would like to remind everyone that the QSLs for the current operation by ZD8A are via N6CW. Terry accepts direct, Bureau and/or E-mail requests for bureau cards at: qslvian6cw@aol.com
ADDED NOTE: QSL ZD8R via N6ND.

SPECIAL EVENT. Members of the Georgian ARC "Iveria" will activate the station 4L1W to commemorate the club's 5th anniversary, May 6-7th. Their activity will be on 20/17/15/10 meters CW/SSB. Check out their Web page at: http://www.qsl.net/4l1w

SPECIAL EVENT. Members of the Crimea Contest Club will activate the special event station, EO58JM, from the Ukraine between May 5-11th. Their activity is to celebrate 58 years since World War II. QSL will be via KG6AR.

SPECIAL EVENT. Wilfredo "Junior" Aviles, KP4ARN, reports that the members of the Caribbean Amateur Radio Group will celebrate their "Hamfest and Old Timers Recognition Day" on May 4th. The group will use the special callsign, K4C, for the event during May 3-17th. Look for them on the following suggested frequencies: 28370, 21370, 14270 and 7270 kHz. QSL via KP4ARN (please SASE).

SPECIAL EVENT. Between May 24th and June 1st, look for the special event station TM0AR to be active from the International Festival of Arts and Technologies in the Department of Sarthe (DDFM 72). Activity will be on the following HF bands: 10/12/15/17/20/40 meters SSB. QSL is via F5TJC, either via the Bureau or direct to: M. Briere-Lecomte J-L,
18 Le Petit St Louis, Route de Theligny, 72400 CORMES, France.

SPECIAL EVENT. The Siberian radio amateurs correspondence club "Radio-Prim" was created on May 15, 1993. Look for special event stations using the callsigns UE9OWQ and UE9ORQ to be active between May 10-18th to celebrate the 10th anniversary of the RPC, and between June 28-30th for the 110th anniversary of the capital of Siberia - Novosibirsk. For more details and on how to receive a special diploma, visit the Web page at: http://www.nsk.su/~rpc/eh.htm

TE75, COSTA RICA. In celebration of 75 years of amateur radio in Costa Rica, look for Costa Rican stations to operate using their callsigns with the special prefix TE75 from May 1-31st (2003). This will take place on all authorized bands and modes. The official list of authorized TE75 stations can be found at the Radio Club of Costa Rica (RCCR), Web site at: http://www.ti0rc.org
QSL routes: All TE75 stations share a common QSL route, which is the Radio Club of Costa Rica (TI0RC). QSL cards are welcome both via direct mail and via the IARU bureau service. Diplomas and awards: The official list of diplomas and awards available will be published by RCCR once the operation has concluded. A minimum of six authorized TE75 stations as well as the official station TE75RC will be required for any diploma.

TX4, MARQUESAS ISLANDS. The Italian group is now active from OC-027 as TX4PG until May 9th. Activity will be on all HF bands, including 6 meters, and on CW/SSB/PSK/RTTY. Please refer to OPDX.597, OPDX.602 and OPDX.606 for more details and Web page.

XY, MYANMAR (AS-167 THANKS!). Frank, DL4KQ (aka XY4KQ), has just returned home from his AS-NEW DXpedition to Myanmar (AS-167 THEBYUKYUN), and he wants to send out his thanks especially to all JA hams for a lot of very nice contacts. He states, "I really enjoyed the famous JA QSO discipline in pile-ups!!! THANK YOU !!!!!" However, Frank states, "Activation was unfortunately permitted only for 24 hours by local authorities but I was able to make 1750 QSOs during that short time. I hope to go back again to Myanmar next year (there exist still some other AS-NEW..) possibly

with a bigger group to give a better service and a higher number of contacts."

YA, AFGHANISTAN. A few stations have been active from here over the past couple of weeks. Last week, Roberto, YN1BB, showed up as YN1BB/YA from Kabul on 15 meters (usually around/between 21260-21275 kHz after 1145z as last as 1630z). Also, active last week was Nick, G4KUX, as YA4F on 6 meters CW/SSB. Watch around 50.108-50.111 MHz between 1445-1630z. He will be here until April 2004. QSL via his home callsign. Hiro, JA1CQT, was heard the week before as YA1CQ on 17/15/12 meters. Watch around 18153, 21320 and 24955 kHz after 0730z and as late as 1600z. QSL via JA1CQT. "The Daily DX" reportedly states, Hiro, is in Kabul as part of the Basic Human Needs (BHN) contingent. He has been granted temporary permission to operate as YA1CQ until the end of May, but expects to be in Afghanistan for 12 months. The BHN is a nongovernmental organization (NGO) that helps with humanitarian relief efforts. Others associated with the BHN team include Ito "Dan" Sadao, JA1PBV. YA1JA is the BHN club callsign.

YI, IRAQ. The "ARRL Letter" reports that several radio amateurs, which include some of the world's top operators, are among the United Nations World Food Program (WFP) "Fast Intervention Team" (FITTEST). The personnel is already in Iraq or poised nearby. FITTEST is responsible for building a technical infrastructure to ensure WFP can move relief food supplies rapidly and safely. FITTEST also has a mandate to install or build basic technical networks, including such systems as VHF repeaters, satellite communications and HF fixed and mobile stations. The team also will set up radio rooms, rework administrative procedures, and assign call signs for all UN humanitarian-aid workers and non-governmental organizations (NGOs) --other international aid organizations. However, any ham radio operations would be secondary to the WFP's efforts in Iraq. Operators mentioned are: Peter Casier/ON6TT (who's expected in Baghdad sometime this week), Robert Kasca/S53R, Mark Demeuleneere/ON4WW and Mats Persson/SM7PKK. Others who are ready to go to Iraq include Ed Giorgadze/4L4FN (aka P5/4L4FN), Patrick Pointu/F5ORF and Mark Tell/VK4KMT, who are just among several other FITTEST team members who are radio amateurs. ADDED NOTE: Peter, ON6TT, states in the ARRL Letter that Diya Sayah, YI1DZ (one of the primary operators at the Baghdad Radio Club's YI1BGD and the WFP's Baghdad telecommunications officer) is safe and well in Iraq. For more details, please read "The ARRL Letter", Vol 22, No 17.
Meanwhile, Willie, KV4EB, near Baghdad, was quite active over the past weekend as KV4EB/YI on 20/15 meters SSB, SSTV and PSK31. Watch the DX Clusters for QSNs at various times throughout the day.

ZA, ALBANIA. The following press release is from Martti, OH2BH:
ALBANIA ACTIVITY AS PART OF A 2003 DEVELOPMENT PROJECT
(Friday, April 25th through Monday, May 5th)
Following the November fact-finding mission, it is time to put some plans in place. A follow-up project will be formulated with Albanian Ministry of Transport and Telecommunications officials to secure and further develop amateur radio in Albania.
Contributing to these valuable activities, a four-man team will once

again visit Albania and activate ZA1B on several bands using the regular
DX frequencies.
Operators are Teemu/SM0WKA, Pekka/OH2TA, Pertti/OH2PM and Martti/OH2BH.
They will now have a beam antenna and two Yaesu stations - FT-1000MP and
FT-897 with Finn-Fet amps. QSL via OH2BH.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

/EXIT

735. DXCC Country List (04/2003)

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-28 18:47:28 UTC
From: "W M Brelsford, K2DI" <k2di7@att.net>
Message-ID: <3Hera.129470$ja4.5641808@bgtnsc05-news.ops.worldnet.att.net>
Source record: 10469
Cross-posted to: rec.radio.amateur.dx,rec.radio.info

```
The current ARRL DXCC country list (04/2003 version) follows.
Changes since 04/2000 include new entity Ducie Island (VP6).

This list is available via
- Central Oregon DX Club website: http://www.codxc.org.
- occasional Usenet posting to rec.radio.info and
rec.radio.amateur.dx.
- http://www.arrl.org/files/infoserv/tech/dxcck2di.txt
and other Amateur Radio archive sites.
- email from the ARRL Information Service -- send a message
containing the line "send dxcck2di.txt" to info@arrl.org.

Much of the information was provided by Ron McConnell, W2IOL.
His detailed geographical listing is also available from arrl.org.

The colon-separated fields are:
1. primary amateur prefix
- "*" suffix for deleted countries
- "@" suffix for likely new countries
2. country name
3. continent(s)
4. ITU zone(s)
5. CQ zone(s)
6. time zone (hours from UTC)
7. latitude
8. longitude
9. ITU prefix allocation(s) ("~" suffix for unofficial)
10. other amateur prefixes

Please mail corrections and suggestions to me.

Bill Brelsford, K2DI
Bend, Oregon USA

They also said that have sent the papers to the ARRL but that the league has
not replied, thats all, 73 de Hans

737. *******BEWARE OF SALES OR TRADING WITH "Mitch Roberston"

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-28 19:36:46 UTC
From: TIA <no1@nowhere.com>
Message-ID: <var0qfo1q9qi58@corp.supernews.com>
Source record: 10471
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.cb,rec.radio.scanner

Ya know I always know better but for some reason this time I didn't heed my own warning. I had advertised a HR2600 with a chipswitch and 2 - 150 amps for sale. One having a preamp switch problem and needed a new switch but the amp side worked perfectly. And I got alot of action but no sales. Well after 2-3 months I got an email from

MITCH N2RADIO [mitch@n2radio.com] MITCHELL Robertson [MR_CPTN@militaryministry.net]

Stating that he had a 6900TB to and an Boomer 600 amp to trade for my stuff. I was like ok, no problem. I got everything packaged up in bubble wrap and boxed real well. And waited for ups to pick it up. And he was to do the same. Well he gave me a tracking number 2 days later and the package was on its way to me. Well mine left and went to him. I triple checked the operation of all the equipment before I packaged it up. Just because I did a trade earlier that month (Sept) and had a DOA problem with a scanner. So I made sure that the equip worked perfectly. Well I found out that Mitch was in the military and was being shipped out. And his family is moving. So they wouldn't be able to get email for some time.

Well the package arrived at completely the wrong address, which was intentional because Mitch and his wife Laura had both double-checked the shipping addy with me. I finally get the package and guess what? Its 3 Chilton's repair manuals no equipment to be found. Well did I get hosed but bad. So over the next 4 months I emailed both addresses well over a hundred times. And no response at all. Well I have a few connections in the military and I'm making some requests. I'll see what happens it should be interesting to say the least. The last email I sent Mitch and his wife I told him this and told him by Jan 1 If I didn't hear anything I would take action. Still no reply!!

Well as I'm typing guess what, I get a box in ups!! SO I open it up and there is my 2600 back and one 150 amp that I sent to him. And a note that the 2600 doesn't receive, the first amp is dead, and he kept the other amp and sent me 2 beat up 15.00 microphones one with an echo. DAM JUNK!! And a mini para dynamics meter DOUBLE JUNK!!! Then he has the balls to throw in a pc board for an amp kit. Well I just wanted EVERYONE to know what happened to me. So if you do business with him BEWARE I warned you.

Robert Mitchell AKA Mitch Robertson AKA deadbeat user

MITCH N2RADIO [mailto:mitch@n2radio.com]

MITCHELL Robertson [MR_CPTN@militaryministry.net]

Address I shipped to:

Mitch Robertson 3612 SODERBERG DR. FT. COLLINS CO. 80526

Address he shipped from:

Art Castings 511 8th St. SE Loveland Colorado 80537

738. The ZA operation?

Newsgroup: rec.radio.amateur.dx
Date: 2003-04-28 19:43:29 UTC
From: kuzen001@duke.edu
Message-ID: <b8k091$2rq$1@gargoyle.oit.duke.edu>
Source record: 10472

I saw in one of the DX newsletters that a group--I think
it included M. Laine--was going to be active from ZA around
this time. I haven't heard them, nor any talk of them--
does anyone know the status of this operation? TIA.

Ken Kuzenski AC4RD kuzen001 at acpub .duke .edu

Do you plan on reposting this weekly? and for how long?

When I clicked on this, I expected an update. Not the exact post I saw a
week ago.

Thank you, Bill! I don't currently have a packet setup,
and I'm so old-fashioned that it didn't occur to me to check
the online packet info. Thanks!

Because FREE isn't always BETTER..... When things are FREE and there are hams involved, EVERYBODY is gonna take some. If you removed the 100,000 of the totally useless web sites out of the 110,000 that are there, things would probably speed up. Web site hosting is ony five bucks a month, go get a pay for it site and you'll be amazed at the uptime/speed difference.

Hello All,

I have new software collection for ham-radio.
Also a big coax cable table to compare your cable.
Keplerian elements and satelliet freq. table.

Many more.

Anyone know a current route for 5W1RA (W. Samoa)?

References in QRZ.COM and BUCKMASTER are apparently not current (the call, formerly used by N6RA, has been reissused, and he is no longer the licensee or manager. GOOGLE searches for the call have also turned up outdated (?) references to USA calls.

Current operqator's name is "Rich".

Tnx & 73

Message-ID: <nrisa.33$T4.1964@news.iquest.net>
Source record: 10494

Indiana QSO Party

On Saturday May 3, from 1300Z to 0500Z (May 4) hams in Indiana will reach out to the rest of the world in the Indiana QSO Party. Beside trying for awards for fixed and mobile stations inside and outside Indiana, a lot of county hunters will be on the air trying to collect needed Indiana counties.

For the first time, we expect to be able to hand out contacts from all 92 counties. We even expect to have an aeronautical mobile!!! Since the MARAC CW county hunter contest and the New England QSO Party overlap with the Indiana QSO Party, expect a lot of activity on the bands. It would be great if Indiana stations would listen for MARAC and New England mobiles and work them whenever they change counties (just as we have asked them to listen for Indiana mobiles). You can even keep logs for MARAC and NEQP contacts and enter those contests as well.

For more information on HF frequencies and operating plans, and logging software files, see the INQP web page at www.hdxcc.org/inqp.

Plans are already underway for INQP 2004, when we'll merge with the Indiana Buffalo Stampede to create even more Hoosier Hospitality with a special event station representing the Indiana Radio Club Council. That's 2004.... But until then, please try to get on the air next weekend and make Indiana visible. If you don't have HF operating privileges, consider working with another ham as a "multi-op" to put your county on the air.

See you then?

Hoosier DX and Contest Club
Sponsors of the Indiana QSO Party

My guess is 11m as that link now returns:

> Invalid Item
>
> The item you requested (3022023690) is invalid, still pending, or no longer in our database. Please check the number and try again. If this message persists, the item has either not started and is not yet available for viewing, or has expired and is no longer available.

Sooner or later, CBers will learn that posts offering to sell 11m amps
in this newsgroup tend to get forwarded to the FCC. Maybe if we're
lucky, they *won't* learn<grin>...

What he meant to say was, there are *hords* of uninformed users
on Usnet who don't know any better, and they are even the
majority (if not nearly the total) of users in some newsgroups.

See what happens when you let just _anybody_ have access!

(Where "Anybody" is defined as whatever recognizable group showed
up immediately following the group you were part of... ;-)

I remember people saying that The Well was the death of Usenet,
and then it was people from The Well saying "It's September,
again" or "What do you expect from an .edu domain." Then it was
the institutional folks who didn't like the unwashed masses that
PSI and UUnet allowed.

Of course when AOL hit (never mind WebTV), lets face it, this
wasn't a very funny joke anymore... But we have to admit the
Internet (never mind Usenet) wouldn't be what it is if every
other grandmother in the country wasn't connected.

But damned, the least they could do is learn a little style.

I've never worked one of OH2BH's operations myself, but most
well-run groups like getting either one IRC or a "green stamp"
(a US dollar bill). If I'm feeling flush and it's a brand-new
country for me, I may include one of each, or $2, with a note
saying the extra is to help with printing and other postage.
And I always include either a self-addressed envelope, QSL-size,
or a self-addressed selfstick label the QSLer can peel off and
stick on his own envelope.

Congratulations on getting ZA! OH2BH is suupposed to be a
nice guy and a good DXpedition op--you won't have any trouble
getting the QSL from him. 73!

Don't you think, that after five years, it is time you started doing ti
right?

Please go read *any* netiquette guide you want to choose, because
you'll find they all say that top posting is not appropriate.

>That way you [YOU] don't have to read through many lines you've read
>before. My comments are right there for a quick read/scan/delete.

Right there... and *totally* unconnected to whatever part of the original
article you are referring to, thus making everything you say somewhat
ambiguous. The fact is, if you trim out the quoted text that you are
not referring to, and place your response immediately below the referenced
text, 1) nobody has to read through "many lines you've read before", 2)
your comment is not ambiguous, and most of all 3) three or four articles
later if your comment is still pertinent to comments being made the
attributions and the added comments will all line up nicely to make it
obvious not only what was said, but when and by whom.

It is to some degree a matter of style... *effective style*.

I agree.

> Please go read *any* netiquette guide you want to choose, because
> you'll find they all say that top posting is not appropriate.

The problem is: It takes a little effort to *think* about how to present an argument, how to reply to something and have a coherent train of thought in writing. It takes an effort to trim lines, to read over one's article.

Today's world is not about effort, it's about reward.

Spending time to *think* how other may want to follow an argument is not rewarding.

Say "Thank you" to Mickeysoft. The are the masters of HTML, top-posting, undeclared character sets, horrible quoting and a *HUGE* Send-Button.

For OH2BH, usually $1 is enough - try $2 for good measure. An SAE also
helps.

Hello All,

I've got the new version AGW 2002.308.

Ofcourse you can download it direct by SV2AGW

But I've got the most populair soundcard software
on my website (all in one!!!).

Many more for you to see!

$1 for most locations.
$2 for 'rare' dx
1 IRC if you're not sure.
BUT, include 1 SAE that can handle a 4 inch wide card. Not all cards are
3.5 inches wide.

RE: Need alignment: Heathkit SB-401 / SB-303.

Is their anyone experienced with realigning / cleaning the switches / replacing parts (if required) etc., on my Heathkit SB-401 / SB-303 interconnected TX / RX pair? They worked fine until they were left alone for 4 or 5 years. Now they aren't quite right. But they are functioning.

I would like them gone through from head to toe. I'm not looking for bargain basement prices --- I want it done right.

I am in Ottawa Ontario Canada. Please email me if you can help or know of a place that can do this right.

Thanks,
-- Rob Myers

In addition, Carl post it only in the groups to which it is relevant such as morse or policy not boatanchors, digital, dx, etc.

Include your card with the correct qso information, an addressed return envelope and include one IRC (International Reply Coupon) available at the post office, or a buck. Martti always responds.

You can also send it via the bureau but that will take some time for a reply, and may be the subject of additonal questions.

1. The answers in this particular thread on this particular
newsgroup, are not at all rude.

2. The subject is off topic here, and should *not* be answered
in this newsgroup. (Note that topicality is a subject that
is always on topic, hence the thread we are engaged in is
in fact on topic. As long as we don't answer the OP's
original question that is... ;-)

3. There have been some very good answers and discussion in
other newsgroups, which just emphasizes the mistake that
was made by multiposting rather than crossposting.

Hello All,

Can someone tell me about m2 antenna's for 2m.
How is de construction?
Are there weak parts in it?

Im lookin for a beam more than 15 element.

What's the size of the booms, on the m2 website
they don't use metric details.

Please any info about your practical expiriance!

Cor

791. IRCs?

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-05 15:17:30 UTC
From: kuzen001@duke.edu
Message-ID: <b95vaafgb1@gargoyle.oit.duke.edu>
Source record: 10425

I've been out of radio for a few years. Been back a couple
of weeks. Got a few new ones lately (3XY, ZA, VK9L) and
used the last of my stash of IRCs sending out the QSL requests.

Looked at the US PS's website to see if I could order IRCs
over the web, and I find out that the darned things appear
not to exist any longer. AC6V's site has a mention of
something new, "CN 01" <?>, but the USPS website doesn't
have a mention of THEM that I can find, or anything else
about prepaying foreign returns (apart from a business
option I didn't look at.)

So what's the scoop? How does one send postage to a foreign
ham (apart from the traditional "green stamp") these days?

TIA.

Ken Kuzenski AC4RD kuzen001 at acpub .duke .edu

You can still buy IRCs from local post offices for $1.85, but you
can get them from QSL managers for around $1. (shameless advt
follows -). I have several hundred from QSLing duties for 9V1YC
and HC8N, and many other managers should have a good stash too.

The reason they cost more in the USA is that all our postal services have a surcharge to offset the costs of storing our mail between the time it is posted and time they finally get around to delivering it.

You may have to travel to a larger PO -- call first.
http://www.mapsonus.com/db/USPS/
One here does carry them -- another PO ten miles away and you get blank
stares.

You can buy circulated ones for about half price -- check with the big QSL
managers.

Amateur Radio Newsline™ Report 1342 - May 2, 2003

Amateur Radio Newsline report number 1342 with a release date of Friday, May 2 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An all ham crew takes over the International Space Station, another new record on 136 Kilohertz and the FCC asks the Amateur Auxiliary to help clean up the 10 meter band. Find out more on Amateur Radio Newsline report number 1342 coming your way right now.

**

HAM RADIO IN SPACE: TWO-MAN EXPEDITION 7 HAM RADIO CREW ARRIVES AT ISS

A two ham Expedition 7 crew arrived at the International Space Station on April 28th to replace the crew currently on board. Amateur Radio Newsline's Roy Neal, K6DUE, has the rest of the story:

- -

There are five men in the crew aboard the International Space Station. Those numbers ARE different. Now that U S Space Shuttles are temporarily out of commission, the Russian Soyuz has been pressed into service as a ferry. Much of its space is filled with food and supplies and the crew size has been cut from 3 down to 2 for the time being.

Two men...cosmonaut Yuri Malenchenko, RK3DUP and astronaut Ed Lu, KC5WKJ, have arrived....the first teamever to get to the I S S aboard a Russian spacecraft. They will replace 3 men...Commander Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Nikolai Budarin, RV3FB. That team is scheduled to fly back to earth on the third of May, using a Soyuz that has been docked in orbit since the Columbia shuttle disintegrated killing all seven people on board.

A NASA investigation apppears to be centering on a piece of foam insulation as the cause of disaster...foam that broke loose during liftoff, hitting the Shuttle's left wing.

A final report on the accident may be several more months in coming. Until then Russia's Soyuz is the only crew transport to and from the i s s and the International Space Program has slowed to a mere trickle of its former self. Space officials of the 9 countries directly concerned with building and flying the shuttle are optimistic, saying the delay gives them time better to prepare for the very complex missions of the next ten years.

Roy Neal, K6DUE

--

The two man Expedition 7 crew will spend the next six months on-orbit conducting scientific experiments. Because of the reduced workload they may also have more time for additional ham radio operations and especially school contacts from space. (ARNewsline™ from published reports)

**

ENFORCEMENT: AMATEUR AUXILIARY ASKED TO ASSIST FCC IN 10 METER CLEAN-UP

Back on Mother Earth, the FCC has asked the assistance of the ARRL' s Amateur Auxiliary as part of a clean-up of illegal users of the 10 meter band. In a memorandum issued on April 28th, FCC Special Counsel Riley Hollingsworth, K4ZDH, asks the Auxiliary's help for the next 6 months in identifying any unlicensed operation using the 10 meter Amateur spectrum.

From May through October Auxiliary members will be tasked with monitoring the band to determine whether interlopers are domestic business entities. This includes trucking companies, truckers or other individuals who are not licensed to be in the band or simply not licensed at all.

The FCC is not requesting that Auxiliary members provide direction finding. Hollingsworth does ask that where possible that Auxiliary members provide the names and cities of the operators, and license plate numbers and state if the interfering signal is coming from a vehicle.

The project has been assigned case number 2003-583 and Hollingsworth does ask Auxiliary members to use their best judgment as to whether to include tape recordings of what they monitor. Authority to use the ham radio volunteers in this investigation comes under the terms of long standing agreement between the FCC's Field Operations Bureau and the American Radio Relay League. (FCC)

**

ENFORCEMENT: 11 METER OPERATION BRINGS FCC WRATH TO IDAHO HAMS

Meantime, the FCC has let a trio of Idaho amateurs know that unlicensed operation outside Amateur Radio frequencies could lead to revocation of their ham tickets. Bruce Tennant, K6PZW, has more:

--
The ARRL Letter reports that FCC Special Counsel Riley Hollingsworth, K4ZDH, recently wrote three Boise amateurs, citing allegations that they had transmitted without a license on several frequencies near the 11 meter Blass D CB band.

Letters went out March 17 to Dave Every, KD7QAS; John F. Hail, KD7QAW; and Tom M. Sjoberg, KD7RCS. Every holds a General ticket, while Hail and Sjoberg are Technician licensees.

According to Hollingsworth, the Commission has information indicating that the three hams transmitted without a license on 26.350, 27.420 and 27.700 MHz using SSB and SSTV. These three frequencies involved are above and

below the 11 meter Citizens Radio Band.

Hollingsworth letter pointed out that in addition to the possibility of license revocation proceedings being undertaken, fines for unlicensed operation could also be imposed. These normally range from $7500 to $10,000.

For the Amateur Radio Newslione, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth says he understands that the unlicensed operations have ceased. (ARRL)

**

ENFORCEMENT: KANSAS STATION OWNER FINED

The FCC has fined Maria L. Salazar, licensee of Station KTCM - FM in Kingman, Kansas, and owner of an antenna structure near Spivey, Kansas, thirty-nine thousand dollars. This, for what the Commission says are willful and repeated violations of the Communications Act and of the Commission's Rules. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
Specifically, the regulatory agency says that Maria L. Salazar operated a radio station from an unauthorized location and that she failed to maintain prescribed obstruction lighting on an antenna structure. But thats not all. Te FCC says that she also failed to install and maintain Emergency Alert System equipment at the station, failed to maintain a main studio at an authorized location and failed to maintain a public inspection file.

By way of background, on July 18, 2002, the Commission issued a Notice of Apparent Liability for Forfeiture -- better known as a fine -- in the amount of $39,000 to Salazar. Although she received a copy of the N-A-L, she never filed a response. So the FCC has now affirmed the fine and ordered Salizar to -- pay up.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

The FCC has instructed its Enforcement Bureau to do a follow-up investigation to determine whether Salazar has come into compliance. If not, further enforcement action will be taken. That could include the possibility of a license revocation proceeding. (FCC)

**

FCC BEGINS INQUIRY REGARDING BROADBAND OVER POWER LINES

The FCC has also launched an inquiry into the use of existing power lines to send and receive broadband data by carrier current as some old timers might call it.

According to Bob Gonsett's CGC Communicator, two different Broadband over Power Line or B-P-L techniques are being considered. "Access B-P-L" uses 1,000 to 40,000 volt power lines to bring Internet and other broadband data to homes and offices. "In-House B-P-L" uses existing electric utility wiring to network computers and printers - as well as smart appliances - within a building.

CGC notes that today's chip sets for this application are capable of generating RF out to at least 80 MHz using advanced modulation techniques and high data rates. The question of radio frequency interference to authorized spectrum users including Amateur Radio will be an important consideration as these systems are looked at by the FCC.

More is at the FCC's website at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233537A1.doc
and http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc
(CGC Communicator)

**

HAM RADIO TESTING: NCVEC REMOVES PSK31 QUESTION FROM POOL

The NCVEC Question Pool Committee has withdrawn the use of a test question has in the Technician pool scheduled for use starting July 1st. The querstion designated number T2B17 deals with PSK-31 communications technology.

Again, this is for the new Technician class exam that goers into service on July 1st. The committee says that it apologizes for any inconvenience. (NCVEC)

**

RADIO RULES: FCC REFUSES TO EXPAND THE NCE FM BAND

The FCC has declined to expand the Non-Commercial Educational FM or NCE broadcast. This, band beyond its current limits of 88.1 to 91.9 MHz.

Specifically, the FCC says that television Channel 6 which runs from from 82 to 88 MHz will not be used for NCE radio. Nor will the upper end of the current NCE band be expanded to 93.9 Mhz.

That said, the agency has indicated the expansion issue could be revisited in another FCC proceeding. (CGC Communicator)

**

RADIO LAW: CALIFORNIA PRB-1 LIKE LAW ON TRACK

ARRL Southwestern Division Director Art Goddard, W6XD, reports that the California limited antenna structure protection measure passed the state Assembly on a vote of 67 to nothing on April 10th. Writing in the division electronic newsletter, Goddars days that the bill, patterned after the ferderal P R B One, was then sent to the state Senate where it received its first reading. It now awaits assignment to a Senate committee and further action. (ARRL SW Div. Newsletter)

**

HAM RADIO IN CYBERSPACE: MIZUHO WEBSITE BACK UP

KU4QD says over the VHF Reflector that the unofficial English language Mizuho website is back up. This site is dedicated to Mizuho built ham radio gear and contains a wealth of reference material that's hard to find anywhere else.

For those of you who don't know about Mizuho, it is a family run business started by a former Trio engineer over 30 years ago. The company is best known for its HF and VHF SSB and CW monoband handhelds. These were manufactured from 1981 until 2002. The company also made some VHF base and portable SSB/CW rigs.

KU4QD says that some of the manuals and schematics haven't been uploaded yet, but everything else is there, including more new pictures and specs for various Mizuho gear. And , oh yes. You will find the website at www.mizuhoradio.com (VHF Reflector)

**

NAMES IN THE NEWS: K8JE TO SPEAK AT MURRAY STATE UNIVERSITY ARC

ARRL Great Lakes Division Director Jim Weaver, K8JE, will visit the Murray State University Amateur Radio Club at the club's May 6 meeting. Weaver will talk on Amateur Radio today and as it will be in the future and all radio amateurs in western Kentucky are invited. The venue is the Freed Curd Auditorium of the I & T Building on the Murray State campus at 7 p.m. local time. Murray State University is located in Murray Kentuckey. For directions contact Ron Ladd by e-mail to UBX@Webtv.net or visit campus.murraystate.edu/org/msuarc (Via e-mail)

**

CONVENTIONS AND HAMFESTS: COLORADO IN MAY

The 2003 ARRL Rocky Mountain Division Convention is slated for May 30, 31 and June 1st at the Holiday Inn Estes Park Conference Center. League President Jim Haynie, W5JBP, is slated to be the featured speaker at Saturday Night's Banquet. For more information take your web browser to www.hamconcolorado.org (Via e-mail)

**

HAPPENING AT HAMVENTION 2003r - THE AMSAT FORUM

This years Dayton Hamvention AMSAT Forum will place special emphasis on the status of new satellite projects such as Phase III E and the Eagle ham satellites which are currently being designed. The speakers list so far includes Rick Hambly, W2GPS, Bdale Garbee, KB0G and Gould Smith, WA4SXM, to name only a few.

This years AMSAT Forum will be on will be on Saturday, May 17th from 8:15 to 9:45 EDT in HARA Arena Meeting Room 1. The session is always standing room only. More is on the web at http://www.amsat.org/amsat/activities/dayton (AMSAT)

**

HAPPENING AT HAMVENTION 2003r - THE ANNUAL TOWN MEETING

And Amateur Radio Newsline is again teaming up with the Hamvention to bring you another in its ongoing series of Ham Radio Town Meetings. Ken Lock, N8PJN, has the details:

--

This years topic is how to make Amateur Radio more friendly for kids so that they will stay in the hobby. Our keynote speaker is Mr. Audio himself -- Bob Heil, K9EID. Bob has been a ham since he was a youngster and has some definite ideas on this subject.

Other presenters include New York Educator Carole Perry, WB2MGP, Philadelphia KYW Radio personality Mark Abrams, NT3V and his son - 2002 Young Ham of the Year award recipient Josh Abramowicz, KB3GWY. Josh will cover scouting and its relationship to ham radio youth.

From Florida Richard Paczkowski, Jr., KF4BIA, will be joining us. Richard was our 1998 Young Ham of the Year award winner. He will talk about ways the Internet can be used to interest kids in the hobby.

Others on the speakers roster are Gary Pearce, KN4AQ, of the ARRL's Public Relations Committee and Keith Glispie, WA6TFD, of Suite Sixteen Post in Burbank California. Glispie is a true Amateur Radio success story that took him from a teenage ham to the co-owner of one of televisions most sought after editing facilities.

Also joining us will be John Creel, WB3GXW, who is the outgoing Chairman of the NCVEC and 2003 Radio Amateur of the Year Larry "Tree" Tyree, N6TR, talking about the ham radio children's holiday he created called Kids Day.

And as always there will be door prizes. This year the goodies include an 2 meter HT courtesy of Alinco and a mini-bom-box AM, FM, Cassette radio from Jensen.

So, please join us at Hamvention 2003 for this special session dedicated to making ham radio a friendlier world for the younger set. Rember, kids are the future of the hobby.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

The Ham Radio Town Meeting is from 1 to 3 P.M on Saturday May 17th. The venue is the HARA Arena in Dayton Ohio in meeting room 3. We hope to see you there. (ARNewsline™)

**

HAM RADIO MOVIES: FIELD DAY `71 - REDUX

Two weeks ago we told you that the famed Palisades Amateur Radio Club movie "Field Day 1971" had surfaced after almost two decades in hiding. Now, Southern California hams can get to see it again on Wednesday evening, May 14th. This, in a special screening hosted by the Santa Clarita Amateur Radio Club and Amateur Radio Newsline.

"Field Day 1971" was produced by George Hively, W6GRH, -- then WA6YEA -- over thirty years ago. His half-hour movie is a tongue-in-cheek look at the way one of the regions most famous radio clubs of the 20th century held forth annually to conquer the vagaries of the Ionesphere while having a jolly old time. Or, was it just having a jolly old time with some radios thrown in as an excuse for a hilltop party? Only this movie knows for sure!

The venue chosen for the screening is the City Council Chambers in the City of Santa Clarita California at 7 p.m. Pacific Daylight time. Talk in will be on the 146.79 W6JW repeater. The repeater uses an access tone is 123.0 Hz.

There is only room for about 190 people, so seating will be first-come, first served, with one expeption. If you are a former Palisades Amateur Radio Club member and want to reserve a seat please e-mail wa6itf@arnewsline.org. For more information on the Santa Clarita Amateur Radio Club and the meeting, take your web browser over to www.w6jw.org and click on the word "announcements." (ARNewsline™)

**
BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

RADIO RECORDS: FIRST GM TO YU ON 136 KHX

Another new record has been set on 136 Kilohertz. This, as a ham in Scotland contacts his counterpart in Yugoslavia. Jeramy Boot, G4NJH, has more:

--

Simon Lewis, GM4PLM, completed the first Scotland to Yugoslavia LF contact on the 20th of April. At 2228 UTC on Sunday, Simon had a two-way contact

with Teo, YU7AR, on 137.7kHz.

Simon was using equipment left behind by David Bowman, G0MRF, when the UK 73kHz record was broken, as reported on GB2RS two weeks ago.

GM4PLM is currently the only known GM active on the 136kHz band and at present is using a 125-metre long wire antenna. He plans to improve the antenna system over the summer in preparation for trans-Atlantic tests next winter.

Jeramy Boot, G4NJH

--

After completeing the QSO, Lewis paused to thank G0MRF and G3GRO for their help, and for the donation of equipment to allow him to become active on the 136kHz band. (GB2RS)

**

ON THE AIR: SPECIAL EVENT - 58 YEARS SINCE WW-2

On the air, members of the Crimea Contest Club will activate special event station, EO58JM, from the Ukraine between May 5th to the 11th. Their operation is to celebrate the 58 years since World War II. QSL's via KG6AR. (OPDX)

**

ON THE AIR: CELEBRATING SIBERIA

And keep an ear out for special event stations using the call signs UE9OWQ and UE9ORQ to be active between May 10th to the 18th. This to celebrate the 10th anniversary of the Radio Prim Correspondence club in Siberia. The two stations are also expected to be on between June 28th to the 30th for the 110th anniversary of the capital city of Novosibirsk Siberia. For more details and on how to receive a special certificate, visit www.nsk.su/~rpc/eh.htm (OPDX)

**

ON THE AIR: THE OREGON QSO PARTY 2003

The 2003 Oregon QSO Party will take place on Saturday, May 10 beginning at 14:00 UTC. Sponsored by the Central Oregon DX Club, the object is to work stations in Oregon, and for Oregon stations to work the world. For full information select the Oregon QSO Party link on the Central Oregon DX Club web page at www.codxc.org (K2DI)

**

DX

In DX, CT1CPP is active as S92UN from Sao Tome and Principe for the next three months. Suggested frequencies are 14.270, 21.270 and 28. 470 MHz on SSB. QSL as directed on the air.

And thirteen members of the F6KOP club station will be active as TM7R from Groix Island through the 12th of May. The operation will be on the HF, VHF and UHF bands using CW, SSB, PSK 31, RTTY and Slow Scan TV.

Lastly, the visit by Bill Burton, T88BA, to the South-West Island of Palau, scheduled been postponed until next month, The reason: A lack of money for fueling the government ship that was to carry him. (DX via OPDX and GB2RS)

**

THAT FINAL ITEM: TALKING TO A NOT SO SILENT S.K.

And finally this week, have you ever talked with a Silent Key? Believe it or not we have. His name is Ray Ortgiesen, WF1B, and last week he was named as an honored Silent Key by the planners of this years Dayton Hamvention. But as you will hrear, Ray is very much alive, well and and delighting the honor:

--

Ortgiesen: "I'm enjoying it so far. Its been quite a gas to get phone calls and e-mail's from so many people concerned about my health."

--

Why is the not so Silent Key recieving all these health and welfare inquiries? Well, heres the story in a nut-shell.

Back in the 1980's, in the Neanderthal days of home computing, Ray wrote RTTY. This program soon became the leading contest software for computerized radio teletype. And last week the Dayton Hamvention decided to honor him by nameing him as one of a group of Silent Key Award recipients. But Ray as we already know, Ray is still very much among the living and his first chore was letting everyone know he was still here.

--

Ortgeisen: "Its been fun. I did send out some e-mails as soon as I found out that it was publicized. I sent out e-mails on the of the major reflectors grearting them from the other side and leetting them know that I was fine, and obviously there was a mistake made."

--

Mistake or not, Ray is now an official walking, talking and breathing Silent Key. So we asked him if he had any special wish for the future of the hobby:

--

Ortgeisen: "I hope with the coming of digital and especially computerization that we can keep people interested in radio."

--

And as to the award itself? WF1B, had these -- er -- parting words:

--

Ortgeisen: "Its nice to know that folks considered me for this award, and I am happier to know it being alive, than not ever having known this fact had I indeed been a Silent Key."

--

How the mistake nameing Ortgiesen as a Silent Key Award winner is not clear. But no matter. Ray says that he' kind of enjoying the honor of being this years Dayton Hamvention -- not so silent -- "Silent Key." (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's™ only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline™, P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 Amateur Radio Newsline™ Young Ham of the Year is now open. No significant changes from last year. Nominees must be 18 or younger. Full rules and an application is on our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline™ is Copyright 2003. All rights reserved.

805. question kenwood TM-441 freq range!?!?.

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-08 19:51:40 UTC
From: Carlos Medoza <no@spam.com>
Message-ID: <3ebab6ab$0$76762$1b62eedf@news.wanadoo.nl>
Source record: 10439

Hello All,

I have bought a Kenwood tm-441E (70cm).
The transceiver has a broad range of 340 -
512 Mhz.
The problem is that this transceiver has a
5 Mhz repeater shift.
In holland we use +1,6 shift.

The 5 mhz shift is useual for the american version
like the 441A.

Does the broadband modification change the
tranceiver in the A (american) version?

Im sure I have a E (europe) version, I could
see this on the pakking box, also the 441E identification
was to see near the display,
and it was also to see on a sticker on the back (coling part).

On www.mods.dk I have seen that there is
a diode removed (d209) to get the broad
band range.

I want to install the diode back, the mod. does not show
me how the diode was normaly installed.

Can someone tell me if I disable the broadband
frequentie range (to normal), is it going back to the Europe
version (441A to 441E)????????

Or do I have to do more things to make it
original?

Please your answer on this newsgroup.

Carlos

806. Was S79BC a Pirate

In June of 2002, I worked a guy on 17m CW identifying as S79BC. He said "QSL via Buro", which sounded funny since there is no S79 bureau.

I've seen several spots for him in the DX Summit database. Was this a pirate/SLIM operation? Or is there a QSL route?

73,
Bob

Hi,

I will shortly be assigned to Hai Phong for about two years. Is Vietnam still a desirable DX country?

I have tried the information within the ARRL's web site concerning licensing, however nothing has come back from the contacts listed.

Would anyone of you have more recent information with emails addresses?

Best regards,

Bruce N2AZ,

I have searched in several online QSL address and manager databases and not found anything. That, of course, makes it more likely it was a pirate, but doesn't prove it. I was hoping one of the experts who hangs out here might have a more definitive answer.

73,
Bob

From: <>
Message-ID: <RBGdnagMTJ7A1SGjXTWcqQ@comcast.com>
Source record: 10445

I did a search on http://www.dx-central.com and found the following:

1 match for S79BC was found in the Routes database.

S79BCC - S79BCC: BOX 52 MAHE SEYCHELLES INDIAN OCEAN - 16-Oct-99

Hope this helps.

73,

Phil - N1KI

812. Kenwood tm-441e does not give enough pwr!

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-10 13:30:44 UTC
From: cor &#65533; <corhollandNOSPAM@wanadoo.nl>
Message-ID: <3ebcfefd$0$45386$1b62eedf@news.wanadoo.nl>
Source record: 10446

Hello All,

I have bought a kenwood tm-441E.
It have to be 35 watts, but it give 30.
I trie to adjust it with the hi power potmeter,
but this was already set at max. power 30 watt,
I could not get it more.

The 5 watt difference does not mather to me,
but I like to know why?

There are no other parts in the tx to adjust.
The tx/rx part are orginal.

I used a diamond SX-400 with a SHF dummyload.

Can you tell me why?

Carlos

The Ohio/Penn DX PacketCluster
DX Bulletin No. 610
BID: $OPDX.610
May 12, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K2FF, W2CE, W2LO, NG3K, W3HC, W3UR & The Daily DX, K4SV, N4AA & QRZ DX, WB4PVT, WW5L, K6RIM, KI6T, N7CW, K8JE, K8YSE, N8RKA, W8CNL, W8KL, W8UVZ, W9DC, 9M2/G3TMA, 9M2TO, CS1CRE, CT1EEB, CT1EEN, DJ7ZG, DL/VE3ZIK, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, DL8YR, ES1FB, F5NQL & UFT, F6AJA & Les Nouvelles DX, FJ5DX & La Gazette du DX, GACW, G4OBK, HK3JJH, I1JQJ & IK1ADH - 425 DX NEWS, IK2SAI, IV3SKB, JA3MCA, JI3DST, JI6KVR & JA-IOTA Islands News, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PY2ZX, PY7AB, RW6HS, SP9JPA, SP5UAF, SP5XSD, UR3GM, VA3RJ & ICPO, VE3EXY, VE7DP, VK2UW, VK8NSB and YV4GMG for the following DX information.

** A NOTE FROM TH EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention next weekend, there will not be a bulletin on May 19th (unless something major is announced). Since I missed an issue last weekend and will miss an issue next week, this week's bulletin is extra long to make up for it. Please continue to send your information ("you never know"), and I hope to see you/meet you at the HamVention or the NODXA Hospitality Suite (see Dayton Happenings below).

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Monday, 5th/May, through Sunday, 11th/May there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FO/m, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T9, TA, TF, TG,

TI, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2V, VP5, VP8/h, VQ9, VR, VU, XE, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

7P, LESOTHO (Update). A sixth operator has joined July's week-long 7P8 Lesotho DXpedition. That will give the group even more expertise on CW and digital mode operations. The newest operator to join the group is Igor Zdorov, W0IZ, of Minneapolis, MN. Look for 7P8CF and 7P8TA to be the main phone ops, while 7P8MJ, 7P8NK, and 7P8DA, 7P8IZ will be mostly CW and digital modes. This all modes, all band operation is under the aegis of the Texas DX Society < http://www.tdxs.net/ > and the Lone Star DX Association < http://www.dxer.org/lsdxa >. QSL routes for July 18-25th 7P8 DXpedition are as follows:
7P8CF--K5LBU--Frosty 7P8NK--VA7DX--Neil
7P8TA--WW5L--Tom 7P9DA--K4SV--Dave
7P8MJ--W5MJ--Madison 7P8IZ--W0IZ--Igor
QSL each call individually since there won't be a main DXpedition callsign. A web page will be announced later. ADDED NOTE: K4SV and VA7DX will also be operating from 3DA after 7P8, but callsigns have not been issued yet. AGAIN NOTE (Please): This is a different operation from the "African Double Jump" at: http://www.qsl.net/xu7aay/africa/

AL1, ALASKA. Operators Corliss/AL1G, Francis/KL7FH, William/KL7Z and Kyle/AL7J will be active in the CQ WPX CW Contest as AL1G. The entry is Multi/??. QSL via AC7DX.

BALLOON EXPERIMENT RESCHEDULE (Update from OPDX.609). The Italian Amateur Radio Society - Milano Chapter (Associazione Radioamatori Italiani - Sezione di Milano) has rescheduled their ARBE (Amateur Radio Balloning Experiment) to May 17th due to weather conditions. Look for IQ2MI/p, on 144.300 MHz +/- QRM USB starting at about 0800-0900z. Flight should be 1-3 hours long. If delayed again, they will try again on May 18th. For the latest updates about the ARBE event, please visit the ARI Milano Website at: http://www.arimi.it/rubriche/arbe.html

C6, BAHAMAS. Operators Frederick/K9VV and Calvin/K6CT will be active as C6AKU during the CQWW WPX CW Contest (May 24-25th) as a Multi-Single entry. QSL via K9VV.

CANADIAN SPECIAL PREFIXES. Just a reminder that Industry Canada has authorized the use of "Special Event Prefixes" to celebrate the 50th Anniversary of the National Library of Canada between May 24th and July 27th. This means that the special prefixes will be available for use in the upcoming CQ WPX CW Contest (May 24-25th). The special prefixes are as follows: CK for all VE's, CJ for all VA's, CY for all VO's and CZ for all VY's.

CASTLE ACTIVITY.....
EUROPEAN CASTLES DAY will take place on May 18th. Look for a lot of castle activity on all HF and VHF bands from France, Italy, Belgium, Spain and Portugal. All contacts will count for the National Castles Awards.

(Update to OPDX.609). Members of the "Clube Radioamadores do Entroncamento", who are expected to be active as CS7AL on May 31st from Castel Alcanede, will now be active on 40/20 meters CW/SSB/DIGITAL. QSL via CT1BXE.

Francois, F5JNE, will be active from the French Castle of Maligny. Reference number DFCF 89226 (contacts also count for French Department Yonne - 89 and Province Burgundy). Activity will be on 40 and 20 meters SSB, starting about 0600z. QSL via bureau preferred.

On Sunday, May 18th, members of the Association des Radio Amateurs des Cotes d'Armor (ARACA 22) will be active from the Cap Frehel Lighthouse as F6KBO/p. Activity will be between 0630-1600z on the HF and VHF bands. References numbers are: WAZ 14, ITU 27, French provinces - Brittany, French Departments - Cotes d'Armor/22, and for the Onshore French lighthouses Award (DPLF) - PB087. QSL via F6KBO through the French Bureau.

CU, AZORES. Goran, SM4DHF, will be active as CU2/SM4DHF in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (20m) entry. QSL via SM4DHF.

DAYTON HAMVENTION HAPPENINGS.....
DX FORUM. Moderator Jay, K4ZLE, states, "This should be one of the better DX forums in recent history." The scheduled speakers and presentations are as follows:
Bernie McClenny, W3UR, on the AH3D story
Al Hernandez, K3VN - ZL7C story
Wayne Mills, N7NG - ARRL DXCC update
Tedd Mirgliotta, KB8NW - Northern Ohio DX Association Award presentation (2002 DXpedition of the Year)

The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. This year's Hospitality Suite will be dedicated to the memory of one of NODXA's "Silent Key" club members Jim Hire, W8ZET. Jim loved ham radio and enjoyed meeting his friends from around the world each year at Dayton. He was also a NODXA "Honorary Life Member" and was very involved with NODXA and the Hospitality Suite. This year Jim's wife, Janeen (now a new ham - KC8VRS, not KC8BRS as first reported and soon to be W8ZET ...) has decided to keep the tradition going and will provide some special memorabilia of Jim at the Hospitality Suite. Please stop by and visit. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers and Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

DXCC NEWS.................
Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operations have been approved for DXCC credit:
Afghanistan: YA1BV, YA1CQ and YA1JA -- (November 14, 2002 through March 31, 2003).
Uganda: 5X1CW -- (License renewed through March 1, 2004).
Nepal: 9N7DX -- (April 22, 2003 through June 19, 2003).
Market Reef: OJ0/OE1ZKC, OJ0/JH1ARJ, OJ0/AH7X and OJ0/JR4PMX (July 12-16, 2001)

Looks like the ARRL 2002 DXCC Yearbook is out. Many have begun to receive them. Be watching the mailbox for it (Your editor has not received his yet!). The DXCC yearbook is sent free if you are or were a member of ARRL as of September 30, 2002, and made a DXCC submission between October 1, 2001, and September 30, 2002. If you did not submit anything, you will still get one free if you are on the DXCC Honor Roll. If you are NOT a member of ARRL and would like to have one, we believe details are available on the ARRL Web page on how to order one. Yearbook is 5 USD plus shipping.

INTERESTING NOTE: Gary Stilwell, KI6T, reports: "At the Visalia International DX Convention this past weekend (May 3-4th), the DXCC QSL card checkers processed 85 DXCC applications which included 8,660 QSL cards.

DXING/CONTESTING WEB SITE/NEWLETTER. Zrinko, DL/VE3ZIK (4N1DX), informs OPDX that he is administrator of the Web site at: http://www.contesting.info He states, "We publish fresh DX/Contest news and QSL infos EVERY DAY. Also, at the end of the month we send QSL info bulletin to our subscribers." If one wants to subscribe to their QSL info Bulletin... please send an E-mail to: zik@contesting.info

FS, ST. MARTIN. Look for Craig, AH8DX, will be active as FS/AH8DX during the CQWW SSB Contest as a Single-Op/All Band entry. QSL via CBA.

HC, ECUADOR. Andy, NP3D, will be heading back to HC-Land on May 18th to celebrate his birthday. He will be there until May 26th. Also, he will be joined by Alexandro/HC1AJQ and Taka San/JA2JPA. They will try to activate SA-033 at this time. They will have a generator, ICOM-706MKIIG and dipoles. The schedule is as follows:
May 18th - Celebrating Andy's 44th birthday.
May 19-20th - HC1/NP3D and HC1/JA2JPA QTH on the Mountain at 11,000 ft ASL near Quito.
May 21-23rd - IOTA SA-033 as HC4/Homecalls.
May 24-25th - CQ WPX CW as HC4/NP3D on 80 meters.

IOTA NEWS.................
AF-018. Look for OL5Y to be active from Pantelleria Island during the CQ World Wide DX CW Contest (November 29-30th), either as IH9/OL5Y or IH9P and as a Single-Op/Single Band (40m)/ High Power entry. QSL via OK1MG.

AF-083. Look for Francois, F8DVD, to be active from Djerba Island, Tunisia, using the callsign of the Djerba Scouts Radio Club, 3V8SM, from June 23rd to July 4th. Activity will be on the HF bands, SSB. By special permision of Mustapha, DL1BDF, who's the coordinator for Scout Radio Clubs organization in Tunisia, all the cards for Francois' QSOs will go to him, either direct or via the French Bureau. Please write "via F8DVD/71" on the cards going through the bureau. For direct cards please send a SAE and the correct return postage. All the direct cards with insufficient return postage due will be answered by the bureau. Send direct cards to: Francois Bergez, 6 rue Liberte, 71000 MACON, FRANCE.

AS-024. Operators Kaoru/JA3MCA, Aru/JA0KNM, Jun/JJ1EQW and Kai/JE3NJZ will be active as homecall/JR6 respectively from Hateruma Island, Yaeyama Archipelago, Okinawa, from June 6-9th. Their activity will be on CW/SSB and on 40-2 meters. Please QSL via their home callsigns by the Bureau or direct. Hateruma Island is known as the inhabited island in the south end of JA-land.

AS-073. Tex, 9M2TO will be active as 9M2TO/P from Perhentian Island, May 15-18th. Using an IC-706 plus a G5RV, Tex will be active on 40-10 meters, including the WARC bands. QSL 100% AUTOMATICALLY through the Bureau via JA0DMV.

AS-074. Ian, 9M2/G3TMA, will be operating from Pulau Ketam from May 14-18th. Operations will be on CW and some SSB. Callsign will be 9M2/G3TMA. QSL address is: Ian Buffham, Bekay Court, Lorong Enau, (off Jalan Ampang), 55000 Kuala Lumpur, Malaysia.

AS-107. Champ, E21EIC, will be active as E21EIC/P in the RSGB IOTA Contest in July from Si Chang Island. He will use a dipole antenna and 100 watts. QSL via E21EIC

AS-147. Takeshi, JI3DST, will be active as JI3DST/8 from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) starting at 0700z, July 25th through 0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the Bureau ONLY.

EU-004. Peter, DL8YR, will be active as EA6/DL8YR/p from Mallorca Island, May 14-28th. Activity will be mostly on CW on all bands including an entry in the WPX Contest on CW.

EU-008. Bob/N5ET with XYL Linda/KE5TF and Peter/GM3OFT are expected to be active on May 31st as MM/N5ET/P from Raasay Island (IOSA NH-10, SCOTIA CN-24, Loc. IO67xi). Activity will be for 5 hours starting around 0900z. Activity will be on 40/20/15 meters, following propagation. Send direct QSLs (EU-only) via GM3OFT, all other areas via N5ET or bureau.

EU-080. A multi-national team (CT1APE, CT1CJJ, CT1EEB, CT1ILT, CT2GLO, EA1CA, EA1DKV, EA4ABE, EA4ST, EA5FX and N5KO with the close help of EA1MC) will be active during the IOTA Contest from

Ons Island as ED1ONS. The Team will be on Ons from July
25-27th. A Web page will be set up very soon (online logs
will be available) at: http://www.qsl.net/ed1ons
Also, the team wants to know your needs for EU-080 so they
can set an operating plan for outside of the contest hours.
Send your feedback to: ct1eeb@mail.telepac.pt
QSL via ED4URJ: Seccion Comarcal Ure Jarama, P.O. Box 123,
28700 San Sebastian de los Reyes (MADRID), SPAIN. Cards can
be send Direct or via Bureau. PLEASE NOTE: A station will
also be active on 50, 144 and 432 MHz.

NA-057. Raymound, WQ7R, will be active as HQ9R from Roatan Island,
Honduras, in the CQ World Wide DX SSB Contest (October 25-26th)
as a Single-Op/All Band/Low Power entry. QSL via N6FF.

NA-067. Ken, W8KL, will be active from the North Carolina State East
Group between May 18-22nd. This will be a "Mobile Operating
Position" using a FT-100D/Hamstick Mobile Antenna. Look for
him on SSB on 14260 kHz +/- QRM during the afternoons/evenings
(East Coast Time), if band conditions are good. He will also
try during the mornings for JA/VK stations. Ken states, "If
Bands Are Dead There's A Nice Beach There!!!" QSL via the
Bureau or direct (QRZ.com OK).

NA-144. Tom, WA6WPG, will be active as WA6WPG/P from San Miguel Island,
July 25-27th. Activity will be on 40-10 meters and include
the RSGB IOTA Contest (July 26-27th) as a Single-Op. Tom will
have a solar panel in addition to his battery and plans to be
operating at least 24 hours. QSL via his home callsign.

OC-NEW. Members of the Mediterraneo DX Club (YC3DIK, YC3MM, YC3BDJ
and YC3BCS) and possibly others plan to activate Pisang Island,
a new IOTA in the Sumatra's Coastal Islands South Group. All
operators will sign homecall/5 and activity will start around
1200z May 11th and end May 17th. Activity will be on 80/40/15/10
meters SSB. QSL all callsigns via IZ8CCW, direct or bureau.
Their web page is at: http://www.mdxc.org/southsumatra/

SA-024. Members of the LABRE/SP (Liga Amadoristica Brasileira de Radio
Emissao in Sao Paulo's) will activate Comprida Island (DIB 021),
May 17-18th. Their callsign will be PV2AA. Activity will be
on 160-2 meters CW/SSB/FM. QSL via PY2AA: Caixa Postal 22,
Sao Paulo/SP, CEP 01059-970, Brasil. "The main objective
of the PV2AA Comprida Island Expedition is the educational
approach, with University - Ham integration. Teachers and
students of journalism from UNICID (Universidade Cidade de
Sao Paulo) will be following the expeditionaries, making one
institutional video, interviews, and stay more closed with
basic ham radio DX activitie."

SA-042. UPDATE to OPDX.599. Operators PT7BI/Daniel, PT2GTI/Stuckert,
LU1YU/Helmult, PY8BI/Marcelo, CT1EEN/Samuel and PY8EA/Rocha,

will be active from Mexiana Island, May 21-25th, using the
callsign ZW8M. QSL via CS1GDX. For more details, visit the
Web page at: http://geocities.yahoo.com.br/mexianaisland

SA-082. Pedro, HK3JJH, will be active from Morro Grande from June
3-8th. There was no callsign provided, but activity will be
on all the bands (mostly 20m). He also mentions that there
is a lighthouse (WLH- LH-0404) on the island. QSL cards are
only by direct to: P.O. Box 81119, Bogota, Colombia, SA
(Postage is 2 USD, any help is welcome)

IU3, ITALY. Operator Andy, IV3SKB, informs OPDX that he will use the
special callsign IU3X in the CQ WPX CW Contest as a Single-Op/Single
Band (40m)/High Power entry. His Web page is at: http://www.qsl.net/iv3skb

J75, DOMINICA. George, K5KG, will be active as J75KG between May 20-29th.
Activity is planned for the HF bands CW/SSB and an entry in the CQ WPX
CW Contest (May 24-25th) using the J75A callsign. QSL via KU9C. George
is currently working to help local hams get on the air. A request has
gone out, asking for donations of small rigs or HTs. You can contact
George via E-mail at: k5kg@arrl.net

KH9, WAKE ISLAND. This may be the last week to work Jake on Wake as
N6XIV/KH9. He has been active on most days on 20 meters (around 14265 kHz
between 0730-0915z. His QSL Manager Glenn, K2FF, informed OPDX that Jake
was expected to install a Force-12 tribander C3SS last week which was left
behind by Chuck Brady (N4BQW/KH9) and will be used by both operators when
there.

LIGHTHOUSE ACTIVITY.....
Members of the Michigan DX Association (MDXA) will activate both Grand
Havens South Pierhead Inner (USA-1077) and Outer Lighthouses (USA-1078),
August 16-17th. They will use their club callsign W8DXI. The lighthouses
are located in Ottawa County, Michigan, Loc. EN63ub. More details are
forthcoming.

Members of the Michigan DX Association (MDXA) will activate the Historic
Grand Haven (Main) Lighthouse (USA-327) on the shores of Lake Michigan
(Ottawa County, Loc. EN63ub), August 17-18th. More details are forth-
coming.

Operators Klaus/DF3GL, Gregor/DL1BFE and Uwe/DL3BJ will activate the
offshore Lighthouse "Roter Sand" (red sand), July 10-14th, using the
the club callsign DA0LRS. The lighthouse carries the amateur radio
related numbers FED 019 for the ARLHS, and WLH 0396 for the World
Lighthouse Award and DLD/GLA 44. Activity will be on all bands CW/SSB.

The Tandil Radio Club (LU2EE) announced that the next operations for
commemorating the start of "Mistongo DX Tandil Group (GMDXT)", will
be from the Lighthouses of CLAROMECO and SEGUNDA BARRANCA:
From May 31st to June 1st, they will activate Lighthouse CLAROMECO
(ARG 014), on all bands and modes. Operators are: LU5DIT/D, LW5EE/D,
LU6DLB/D, LU8EXJ/D, LU8ERH/D and LU3DR/D. QSL via direct to LU2EE

with SASE, or via the Bureau operator's home callsign.

Between June 13-16th, they will activate (first time ever) the
Lighthouse SEGUNDA BARRANCA (ARG 067), on all bands and modes.
Operators are: LU5DIT/D , LW5EE/D, LU6DLB/D, LU8EXJ/D, LU8ERH/D,
LU8EGS/D and LU3DR/D. QSL via direct to LU2EE with SASE, or via
the Bureau operator's home callsign.
Visit the following Web sites at:
http://www.qsl.ne/lu2ee
http://usuarios.tripod.es/mistongo

NCDXF PRESS RELEASE. Al Burnham, K6RIM, V.P. Northern California DX
Foundation, reports: Effective immediately, the Northern California DX
Foundation (NCDXF) has a new and greatly improved web site. Check it out
at: http://www.ncdxf.org/index.html

P4, ARUBA. Scott, K0DQ, will be active from Jacky's, P43P, QTH during
the CQ WW WPX CW Contest (May 24-25th) as P41P and as a Single-Op/All
Band/High Power entry. QSL via Mario, I2MQP. Look for some P40Q operations
before/after contest.

POLISH SPECIAL EVENTS.....
Special event station HF6UE will be active now though June 10th. This
station is active to celebrate the signing of the European Community
Accession Agreement by Poland. The suffix UE means UNIA EUROPEJSKA
(European Union in English). This activity is organized by the SP6ZDA
club station. QSL via SP6ZDA, via the bureau (the best) or direct to:
Scouts Radio Club SP6ZDA, P.O. Box 41, 51-673 Wroclaw 9, Poland.

Special memorial operation will be taking place in the coming months
to commemorating Ignacy Lukasiewicz, the Polish petroleum pioneer who
distilled crude oil and designed kerosene lamps to light up the
operating theatre in the hospital in Lvov on 31 July 1853. He is the
founder of the petroleum industry (Award: http://www.ot5.cq.pl).
"This lotion is the future wealth of this country, it's the welfare
and prosperity for its inhabitants, it's a new source of income for
the poor people and a new branch of industry, which shall bear
plentiful fruits." -- Ignacy Lukasiewicz, 1854
Look for the following special event stations:

Now thru June 30th - HF8IL (via SP8PJG) Ignacy Lukasiewicz:
founder of the petroleum industry

July 1st-August 15th - HF150IL (via SP8PJG) Ignacy Lukasiewicz:
distilled kerosene, designed lamps and
illuminated an operating theatre in a
hospital (1853)

July 25th-August 4th - 3Z0IL (via SP8ZBX), SN0IL (via SP9PEE),
EN3WLL (via UR4WXQ) Ignacy Lukasiewicz
memorial stations (Award: www.ot5.cq.pl)

August 20th- September 10th - HF8IL (via SP8PJG) Ignacy Lukasiewicz: founder of the petroleum industry

QSL INFO AND NEWS.....
8TH AREA QSL BUREAU ADDRESS CHANGE: Great Lakes Director Jim Weaver, K8JE, informs OPDX that effective May 1st, the address for the 8th Area Incoming QSL Bureau will be changed to:
W8 QSL Bureau, PO Box 307, W Chester, OH 45071-0307.
Also, Jay Slough, K4ZLE, has been named to replace Ed Gassman, N8HTT, who has managed the 8th Area QSL Bureau for several years and is retiring.

9K2ZZ OPERATIONS. Ray, W8CNL, reports he received the following from Bob, 9K2ZZ. Ray states, "He (Bob) is going to be spending the majority of his time in YI and A9. I ask about logs, cards, etc. He informed me that all requests for confirmations go to the LOTW. This includes the past K4CY/P and K4CY/M operations from Iraq. These are his wishes. I am starting to get cards for K4CY/M. Do not waste your money as I do not have logs or cards. I do have all the 9K2ZZ and 9K9Z logs and plenty of cards. Direct only to me with SASE or SAE and postage. Some countries tell me they can not get IRC's. I accept a ruble, franc, lira, mark, etc." Ray's address is: Raymond H. McClure, 5 McKenzie Circle, North Augusta, S.C. 29841-4319

Memebers of CW-Philippines Club were active from Mindoro Island (OC-244) on May 1-3rd as DX1CW. QSL via VE7DP.

Frank, VE7DP, provides OPDX with the QSL info for the recent IOTA activations from the Philippines:
4G6A OC-125 via VE7DP 4H1LC OC-244 via VE7DP or DX1CW
DX4CN OC-202 via VE7DP
Frank states he has several listed addresses, but the preferred one is: General Delivery, Winfield B.C. Canada V4V 1M6

Special event station EO58G was active from May 5-11th to commemorate the 58th anniversary of the end of World War II. QSL via UR3GM, via the Bureau (Box 56, Kiev 01001, Ukraine) or direct to: Igor Pulin, Box 23, Kherson 73022, Ukraine.

Phil, G4OBK, has recently returned from his GD4OBK/P Isle of Man operation (Saturday, May 3rd) and made 1159 QSOs in 20 hours of operating. A log search and report is available at the following Web page: http://www.qsl.net/g4obk
QSL route is via his home callsign G4OBK. His address is: Phil Catterall, Wayside, Lendales Lane, Pickering, YO18 8EE, England.

K1B QSL STATUS. Dave, K4SV, "K1B North America QSL Administrator", reports: "So far we have processed ~11,000 QSOs and ~2300 cards. Please contact Stephen, K4YL, at < K4YL@arrl.net > if you have any special requests (Please note his new E-mail address). Stephen will do all he can to help in obtaining K1B QSL cards. Please remember Stephen only handles DIRECT requests, NO bureau cards please.
Stephen Grose, K4YL (ex W4SMG)

PO Box 183
Flat Rock, NC 28731-0183
Our goal is to get everyone QSLed for K1B who has not received their cards. Any small donations will be gratefully accepted towards printing cards, printing supplies and postage. Please remember: USA send SASE, DX send SAE, one Green Stamp preferred or one LARGE IRC accepted."

COLLECTION OF OLD QSLS. Jean-Michel, F6AJA, from Les Nouvelles DX informs OPDX that more than 1000 old QSL in five different galleries are waiting your visit on the web site: http://LesNouvellesDX.free.fr

It was announced that Mac, W3HC, will handle the cards for the PT5T operation of November 2001 conducted by CT1BOH. Cards are being designed now.

QSL RA3AR (ex-RV3AKU) via: Dmity K. Darkov, 115211, Moscow, ul. Borisovskie prudy 10-1-108, RUSSIA.

T9 CALLBOOK. Nenad, VE3EXY, reports that a T9 (Bosnia-Herzegovina) callbook is available online at: http://www.t93y.com

June, VK4SJ, has been active as ZK1AYL for about two weeks from the Aitutaki Group (OC-083), Southern Cook Islands, as ZK1AYL. QSL to her home callsign VK4SJ. By the way, she was heard on 10 meters begging for QSOs as this was being typed up Sunday.

XQ6ET UPDATE. George, W8UVZ, provides OPDX with an update mentioned in issue OPDX.609 regarding Bob, XQ6ET, and his becoming his QSL Manager. George has now ordered the QSL cards and expects them in 4-5 weeks. Bob is loading all his QSOs into a logging program which they hope to soon transfer to George. Also, Bob has been without high power on the low bands - particularly 160 meters. A small group in Battle Creek (ala the "Battle Creek Special" guys) are in the process of shipping an amp to XQ6ET. In addition, to the cost of the amp, they will have air freight expense to Chile and will have about 600 USD total into the project when Bob receives the amp. So, if you would like to help out in the cost, any donations are accepted no matter what the amount is with or without QSL requests, to help fund the amp for XQ6ET. W8UVZ would be glad to receive your donations and confirm good QSOs with XQ6ET.

XY1M QSL STATUS. OPDX was asked to find out if anyone has received their QSL cards for Hiroo's operation in Myanmar last November. If you received one let us know.

Wayne Carroll, W4MPY, wants it to be known that he will furnish QSLs at no charge to Military personnel deployed to Kuwait and Iraq if the quantities are reasonable and there is a stateside shipping address. Wayne states, "I feel they have sacrificed a lot for all of us and that is the least I can do to say THANK YOU!"

Z32AF NEW QSL MANAGER. Please note Arthur, N8RKA, is the new QSL Manager for Venci, Z32AF. His address is: Arthur Barbetta,

2395 Liberty Rd, Stow OH 44224, USA. E-mail: n8rka@yahoo.com

RL1, RUSSIA (Special Prefix). Radio amateurs from Sankt Petersburg, Russia, are celebrating the 300th anniverary of their city. Look for 21 stations to be on the air from Sankt Petersburg now through May 31st.
R300SP via RU1AE (RZ1AWT) RL1N via RA1ABC
RL1A via RA1AG RL1O via RZ1AWO
RL1B via RU1AB RL1P via RZ1AP
RL1C via RV1CC RL1Q via RV1AQ
RL1D via OH5ZZ (UA1DJ) RL1R via RA1ALA
RL1F via RU1AS RL1S via UA1AES
RL1G via RA1AR RL1T via RX1CQ
RL1J via RZ1AWF RL1U via RA1AOL
RL1K via UA9KG/1 RL1W via RW1AI
RL1L via RZ1AYA RL1X via RX1AX
RL1M via UA1ANA

S9, SAO TOME AND PRINCIPE. Duarte, CT1CPP, is now active as S92UN. He is now active on 12/15/17/40 meters with dipole antennas. Watch around 7067-7074, 14260-14270, 18126-18130 and 21260-21270 kHz starting around 2100z. Duarte asks to please be patient with his answering of the QSL cards, because he can only answer them when he returns to Portugal. QSL via CT1CPP (QRZ.com): Antonio Duarte Prates Bebiano, Estrada dos 4 Marcos No. 17, Sarilhos Grandes, 2870 Montijo, Portugal. Duarte is expected to be here for about 3 months.

SOMETHING OF INTEREST ON THE WEB. There was a story on NPR's "Talk of the Nation" on April 30th about Ham Radio. Visit the following Web page at: http://discover.npr.org/rundowns/segment.jhtml?wfId=3D1248508

SPECIAL EVENT. Special event station HF25KVW is active until July 31st in commemoration of the 25th anniversary of the SP5KVW Radio Club in Ostroleka. QSL via SP5KVW, either via the bureau or direct to: Radioklub SP5KVW, P.O. Box 56, 07-410 Ostroleka, Poland. Their Web page is at: http://www.sp5kvw.prv.pl/

SPECIAL EVENT. For the next 2003 French Mills Day, on June 15th, look for Andre, F5PEZ, to be active using the callsign TM1JNM. Activity will be on the HF bands, mainly SSB. QSL via Andre, F5PEZ, either direct or via the French Bureau.

SPECIAL EVENT. The year 2003 is the European Disabled Persons Year. Look for operators Domi/F5PTI, Alain/F6ANA and Joel/F8DCZ are now active using the special callsign TM5I until May 17th. On May 18th, they will use the same special callsign TM5I, for the 2nd European Castles Day, from the Oisellerie Castle (JN05BN). Look for them on CW/SSB, 80-10 meters and on 2 meters (144.316 MHz). QSL via F5PTI, either direct or via the French REF Bureau.

SPECIAL EVENT. Look for the special event callsign VC3RCS to be active between June 1-30th to celebrate the 100th anniversary of the formation of the Royal Canadian Signals Corps. QSL via the operator's instructions.

SPECIAL EVENT. The special callsign W2H continues to be active until May 15th. Activity is for the anniversary of the crash of the Airship Hindenburg. This is the 66th anniversary. Operations, hopefully, will take place each year using the same callsign. They plan to be active on as many bands as possible. QSL only direct to W2CE (no bureau cards).

TA, TURKEY. Andy, G3AB (ex-G4ZVJ), will be active as TA3/G3AB in the CQ WPX CW Contest as a Single-Op (possibly Single Band) entry. QSL via G3AB.

TO5, MARTINIQUE. Jack, RW3QC, will be active as TO5AA, in the CQWW WPX CW Contest (May 24-25th) as an All Band/High Power entry. Activity will be from FM5BH's QTH. The QSL Manager has not been chosen yet.

V63, MICRONESIA. Operators Funaki/JA7ZP, Takao/JA7AGO and Sho/VA7HMZ will be active from Pohnpei (OC-010) May 12-15th as V63ZP, V63GO and V63DX respectively. Activity will be on 40-10 meters CW/SSB. QSL via their home callsign (Bureau OK).

VI8, AUSTRALIA (Special Event). The Darwin Amateur Radio Club of the Northern Territory, Australia, will be operating a special event station with the callsign of -- VI8NT -- to celebrate 25 years of self government. The station will be opened officially on the 1st of July 2003 (Northern Territory Day) and run until the 31st December 2003. This special Amateur Radio callsign -- VI8NT -- is allowed to be used by any licenced VK8 Amateur. Only one Amateur will hold the callsign at any one time, meaning only one station on air at a time. They have many VK8's who are interested in operating one week periods on all bands and modes and the Darwin Amateur Radio Club will partake in all major contests with this special callsign. A special QSL card is being made up by the QSL Manager Neil, VK6NE. All QSLs will be accepted directly or via the Bureau.

VP2, MONTSERRAT. Three members of the Florida DXpedition Group are on the "Road Again"! Operators Bill W4WX/VP2MHX, William/N2WB and Bob/K9MDO (both waiting on VP2M callsign) will be here July 22-29th. They will have three Kenwood TS-570D stations and will be active on most bands and modes. This is a "Little warm up for the upcoming San Andres trip in October". QSL via their homecalls, CBA. N2WB via QSL Manager N2OO.

VP9, BERMUDA. Merv, N6NO, will be active as N6NO/VP9 from May 14-21st. His activity will be on 80-10 meters, possibly 160, with a 100w and a focus on CW. His operating times will favor the difficult Asia/Oceania path. QSL via N6NO.

VQ9, CHAGOS ISLAND. Larry, VQ9LA, has been very active on 20 meters RTTY. Watch around 14083-14090 kHz beginning around 2200z. Larry will be there for about year.

XU, CAMBODIA. Jaak, ES1FB, informs OPDX that he will once again return to Shianoukville, and operate as XU7ACE for about 10 days starting May 11th. Activity will be on 40-6 meters, mostly SSB. He plans to activate IOTA AS-133 on May 17-18th, but this depends on the weather condition (It is the rainy season now...). QSL via his home callsign, ES1FB, either by the CBA or by the bureau (but this will take more time). ADDED NOTE:

Previous XU7ACE bureau cards are answered about 70%, direct cards on
a weekly basis..

XW, LAOS. Champ, E21EIC, will be back in Laos around June 3-23rd and will
be active as XW1IC. His activity will be on 160-10 meters, including the
WARC bands using only 100 watts. He states the modes he will use are
CW/SSB/RTTY and 2 meter FM (Maybe 6 meters if possible). Champ will also
be active in the All Asian DX Contest as a Single-Op/All Band/Low Power
entry. QSL via E21EIC.

YO, ROMANIA (ed. I don't mean YAO!). Jean-Michel, F6AJA, will once again
be YO/F6AJA (10th year consecutively) from Suceava (450Km north of Bucarest)
from May 19-28th. He will be on the air when time permit from the Silviu
station YO8FZ.

YV4, VENEZUELA. Dario, YV4GMG, in Santa Cruz, informs OPDX that he is active
on 160 meters and 6 meters (on 50110 kHz), as well as 20/15/10 meters. On
HF, he can also be active on PSK31/SSTV/RTTY/MMT63/AMTOR. QSL via his home
callsign. Also, active from the same station is Hector/YV4GMH and
Maria/YV4GMB.

Z38, MACEDONIA. Lothar/DJ7ZG and Babs/DL7AFS will once again be on tour.
This time they will be active from here using the callsign Z38Z. They
hope to be active starting on May 15th for about 10 days. Activity will
be on 160-6 meters, mainly on RTTY, PSK and SSB. They will travel through
the country to reach Z3-land. They ask you to cross your fingers that
the ride will be without problems. Lot informs/states to OPDX, "Due to
the request of many Hams from America and Japan we want to work these
countries particularly." QSL via DL7AFS. Their homepage and online
log will be at: http://www.qsl.net/dl7afs

ZF, CAYMAN ISLANDS. The team of John/K6AM, Ned/AA7A, Lee/KY7M and Bud/N7CW
will activate ZF1A (IOTA NA-016) in the 2003 CW WPX Contest. This will be
a multi-single operation with limited operation before and after the
contest. Please QSL via W5ASP.

RESCUE RADIO: TORNADOES SWEEP THE NATIONS MID-REGION

Ham radio has again come to the aid of America. This time as a series of killer tornadoes rip across the Central and South-Eastern states. We have the details in this report:

--
Blackouts, water shortages and desperate searches for the missing. This is the situation confronting tornado battered residents of the central United States as the death toll rises to 40 from the most violent weather in four years.

Beginning on Sunday the 4th and continuing through most of the week, swarms of violent thunderstorms and tornadoes crashed through the United States midsection. They caused devastation in three states and are spawning problems in several others.

Kansas, Missouri and Tennessee suffered the worst damage in the initial Sunday onslaught. Kansas listed seven people killed, Missouri had seventeen fatalities and Tennessee sixteen. The storms also disrupted electrical power and telephone service with debris from fallen structures blocking roads in some areas.

One of the hardest hit areas was Madison County, Tennessee where ten people were killed. There, power blackouts were widespread and it was not known when telephone service can be restored. Several of the regions A-R-E-S groups were reported activated as was the Missouri Traffic Net operating near 3 point 960 MHz in the 75 meter band.

In Missouri, ARRL Section Emergency Coordinator, Don Moore, K-M-Zero-R, reports that amateur operators are continuing damage assessment duties. An ARRL bulletin says that the Amateur Radio Emergency Service, Radio Amateur Civil Emergency Service and SKYWARN groups were active across the affected area. Hams are also assisting the American Red Cross and Salvation Army relief operations.

A bit to the West, in Kansas, Section Manager Ron Cowan, K-B-Zero-D-T-I, says that one tornado touched down in Leavenworth County. It remained on the ground before crossing the border into Missouri. There the storm brought havoc to Platte and Clay counties before falling apart just North-East of Kansas City. But during its trek, Wyandotte and Leavenworth Counties sustained severe damage. Cowan says that homes were destroyed and utilities knocked out along the twisters path.

The tornadoes were believed to be a part of a huge weather system that rolled across the Midwest and parts of the South. It also spawned twisters in Arkansas, South Dakota and Nebraska. Storms on Tuesday and Wednesday accounted for funnel cloud sightings in Alabama, Illinois and here in Louisiana. In all, nine states are affected and the National Weather Service credited ham radio operators with dozens of storm related reports over the weekend and they are continuing into the week.

As we go to air, hundreds of people are still being housed in temporary shelters where Amateur Radio volunteers have become an important ingredient in relief efforts.

This is obviously an ongoing story and we will have an update in next week’s Amateur Radio Newsline report.

From New Orleans, Louisiana, I’m Don Wilbanks, AE5DW.

Jim.

--

Thanks Don. (ARNewsline™ from various sources including ARRL bulletins)

**

RESCUE RADIO: TORNADO DESTROYS K0ETC BEACON

There is an ironic side to this story directly affecting ham radio. The K0ETC beacon North of Joplin Missouri in grid square EM27 was aparently destroyed when one of the twisters blew down the building housing it. An Internet posting by the beacons owner Jay Rupar, K0ETC, shortly after the incident said that there were no injuries at the former beacon site but two people were killed by the same storm about 30 miles away. Rupar says that the present location of the beacon itself is unknown but that it will be replaced. (KC6WFS/7)

**

HAM RADIO HEROES: NOAA HONORS “ALERT” VOLUNTEERS

The National Oceanic and Atmospheric Administration has selected ALERT -- the Alabama Emergency Response Team to receive one of this years NOAA Environmental Hero Awards. This award recognizes ALERT for its outstanding efforts in support of the NOAA National Weather Service Forecast Office in Birmingham.

NOAA says that under the leadership of ALERT president Chuck Arthur, KF4SSX, team members have spent hundreds of hours using ham radio to coordinate storm reports throughout the Birminham office’s warning area. The agency goes on

to say that over the years they have proven to be an invaluable resource during such major events as an F 4 tornado that struck Tuscaloolsa County on December 16th of 2000 and the tornado outbreak of November 24th 2001.

NOAA took special note of ALERT's work following last years Veterans Day severe weather outbreak that included to F 3 catagory tornados that killed 12 people. NOAA says that the ALERT volunteers stayed with their Amateur Radio stations relaying critical storm reports to meteorologists and relaying storm information to Emergency Manasers across the central and northern tiers of the state. NOAA says thart the steady flow of reports were crucial to the issuance of new warnings and the office's ability to quickly get the word out to the publiic.

Presented in in conjunction with Earth Day celebrations, the award honors NOAA volunteers for their tireless efforts to preserve and protect our nation's environment. It was presentede to ALERT on Satyrday, May 3rd. More on ALERT is on the web at www.alert-alabama.org. (NOAA)

**

THE VEC SYSTYEM: A PROBABLE E-FILING LICENSING RECORD SET

Before a ham can respond to an emergency, he or she first has to become licensed. And a Wisconsin college may have set a new Amateur Radio record in that area. Would you believe 81 new hams in less than 24 hours? Well its true and Amateur Radio Newsline's Roy Neal, K6DUE, is here with the rest of the story:

--

It happened in Wisconsin. Picture this. 81 students sat for and passed their amateur radio tech class license exams in one day. What's more, they received their license grants within 24 hours! This became the largest test session ever to employ the new technique of on-line submission of test results and applicant data to the FCC. They are the students of Dr. John Weiss, WD8KLO of U W Stouts' College of Technology, Engineering and Management

Weiss gave his students the option of earning their radio licenses in partial fulfillment of class requirements. The examination team was coordinated by John Burningham, WB8PUF, of UW-Stout's communication, Education and Training Department. It included Weiss; Jon Fuller, W9JHF, Student Life Services; and UW-Stout students Andy Wagner, KB9TAC and Scott Littfin, N0EDV.

The University of Wisconsin-Stout has a reputation for firsts. In 2001, the college, which is located in Menomonie, became the first to receive the prestigious Malcolm Baldrige National Quality Award. It was presented by none other than President George W. Bush.

The rapid license grants were made possible by using newly available VE-to-VEC-to-FCC electronic submission technology developed by the W5YI Volunteer Examination Coordinator. Using password-protected electronic forms posted to the W5YI VEC website, John Burningham, WB8PUF began keying in the test results right after the exam session.

All 81 applications were waiting at the VEC Office when it opened the following morning. After routine screening, the applications were electronically retransmitted to the FCC. Within an hour, the FCC issued the licenses and call signs. These were immediately forwarded over the Internet to Burningham who informed the waiting students of the new calls while at the same time probably setting a new electronic licensing record for ham radio in the United States. 81 new hams in one day at one licensing location.

Go Wisconsin Stout!

For the Amateur Radio Newsline, Roy Neal, K6DUE.

--

Weiss is an Associate Professor at UW-Stout specializing in advanced telecommunications technology. Additional information on the school’s telecommunication systems program is available on the web at http://tcs.uwstout.edu. (W5YI)

HAMVENTION 2003®: FCC TO BE A NO-SHOW

Don't look for any major ham radio regulatory announcements at next weeks Dayton Hamvention. That's because the agency will not be there. David Black, KB4KCH, reports from Amateur Radio Newsline’s South-East Bureau on the what and the why:

--

Hamvention producer Garry Matthews, K-B-8-G-O-L says conflicting commitments will keep regular FCC presenters Riley Hollingsworth, K4ZDH, and Bill Cross, W3TN from attending. Matthews says the Hamvention tried to find suitable replacements, but none were available.

Speculation suggested that FCC officials might use the Hamvention's Forum to release news of a so-called omnibus Amateur Radio Notice of Proposed Rule Making expected out in May. The notice would consist primarily of outstanding rules change requests and pending petitions for reconsideration. With the Dayton FCC forum canceled, what venue, if any, the Commission might use for its release is not clear.

And what about the two hours on Saturday morning May 17th the FCC was supposed to fill? Matthews says it's being offered to other session leaders who might not like their current time slots and want to change. He says the FCC hould be back in 2004 with Hollingsworth, Cross and perhaps others representing the

Commission.

From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH.

--

We will have more Hamvention 2003® happenings later on in this weeks Amateur Radio Newsline report. (ARNewsline™)

**

RADIO RULES: FCC TAKING COMMENTS ON PLC NOI

And speaking about the FCC, e have a follow up on last weeks story about the agency releasing its Notice of Inquiry on the deployment of ''Broadband over Power Line'' or B-P-L technology. Now comes word that the complete Notice of Inquirey which was released on April 28th is available on the FCC Web site. Also that the FCC now is accepting electronically filed comments via its Electronic Comment Filing System ECFS Express page.

But what about the actual affect of B-P-L on ham radio. An ARRL Bulletin, explains that ''Broadband over Power Line'' is really a form of carrier-current communication better known around the world as power line carrier or P-L-C.

B-P-L would couple high-frequency RF to parts of the power grid and use existing power lines as the transmission medium to deliver broadband and Internet access. This is the same technology refused for use in Japan becuse tests showed signifigant interference to consumer electronic products including Amateur Radio on the high frequency bands. And in the Notice of Inquirey the FCC does acknowledge the signifigant interference risk from B-P-L.

ARRL Lab Manager and RFI-guru Ed Hare, W1RFI, also has concerns. A noted expert in the field, Hare cautions that deployment of B-P-L could affect every amateur in communities where it's employed. This, by causing a significant increase in noise levels. Obviously, this is one isssue that a lot of hams will be filing comments on with the FCC. (ARRL)

**

ENFORCEMENT: UNAUTHORIZED OPERATION BRINGS $5000 FINE

The FCC has issued a $5000 fine to Blue Ridge Erectors, Inc. of Bangor Pennsylvania. This, for operating radio transmitting equipment on 467.250 MHz without Commission authorization.

According to the FCC, back on August 27, 2002, the agency’s New York Field Office issued the forfeiture notice to Blue Ridge but the company has not filed a response to the N-A-L. After waiting almost three-quarters of a year the FCC has affirmed the fine and has ordered Blue Ridge Erectors to pay the $5000 within 30 days of the release of its Order.

For more information on this one take your web browser over to the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1 (FCC)

ENFORCEMENT: FCC ALLEGES MICHIGAN HAM ENGAGED IN DELIBERATE INTERFERENCE, THREATS

The FCC claims that a ham has engaged in deliberate interference, broadcasting and that he threatened other amateurs. And now the agency is sending Michael Guernsey Sr, ND8V, of Parchment Michigan a tape recording to back up those assertions. Amateur Radio Newsline's Blair Alper, KA9SEQ, has the details:

--

According to the ARRL Letter, since late 1998, Michael Guernsey, Sr., N-D-8-V, has been the recipient of seven letters from FCC Special Counsel Riley Hollingsworth. This includes two warning notices. And in 2000, the FCC threatened to designate Guernsey's license for a revocation and suspension hearing. Guernsey subsequently agreed to a nine-month suspension of his High Frequency operating privileges in 2001.

But on April 7th of this year Hollingsworth again wrote to Guernsey. This time Hollingsworth said that the operation of Guernsey's station over the last several years raises questions about the Michigan hams' qualifications to remain a Commission licensee.

According to Hollingsworth, this time there is audio to support the claims. The recorded transmissions were made this past March 26th, and are said to back up complaints from other amateurs of deliberate interference on 20 meters. In his letter, Hollingsworth noted that some of the interference apparently sprang from on-the-air personal disputes or from what Guernsey perceived as deliberate interference to his transmissions. Even so, Hollingsworth said, Guernsey has apparently ignored the Commission's written and verbal warnings to not retaliate with similar behavior.

Hollingsworth advised Guernsey that the alleged deliberate retaliatory threats and transmissions on top of other QSOs are contrary to FCC rules. He also stated this indicates that the numerous warnings issued to date have little, if any, effect in regarding to bringing Guernsey's operation into compliance with Commission rules, indicating that other, harsher enforcement action may be needed.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ, reporting.

--

Hollingsworth told Guernsey review the tape recording and respond in writing and in detail within 20 days of reciept of its reciept. He said the FCC will use the information Guernsey submits to decide whether to designate ND8V's license for a suspension and revocation proceeding or to lift voice privileges from Guernsey's license for the remainder of his license term, which ends in 2012. (ARRL, FCC)

HAMVENTION 2003®: MEET THE MAN BEHIND QRZ.COM

Want to meet the man who makes possible the famed QRZ.COM website? If you're going to the Dayton Hamvention this year, be sure and make it a point to stop

by the W5YI booth in the main building and say hello to Fred Lloyd, AA7BQ, the founder of QRZ.COM. Fred says that he will be there throughout the show and will have some nice QRZ.COM name badge souvineers to hand out to everyone who stops by along with the latest QRZ Ham Radio CD-ROM at a special show price. (QRZ.COM)

**

HAMVENTION 2003®: THE DX HOSPITALITY SUITE

The Northern Ohio DX Association and WVNO Radio will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. The suite will be open on Friday and Saturday evenings in Suite 1011 of the Crowne Plaza Hotel. The Crown Plaza is the old Stouffers located in downtown Dayton.

And in a tribute to one of the areas best known hams, the association is dedicating this year's Hospitality Suite to "Silent Key" Jim Hire, W8ZET, who was a Northern Ohio DX Association Honorary Life Member.

Hire’s wife, Janeen, KC8BRS, has decided to keep the tradition going. She will be providing some special memorabilia of Jim at the Hospitality Suite. (NODXA)

**

HAMVENTION 2003®: RAIN - NEWSLINE BOOTH

And by the way, if you are one of those planning to attend Hamvention 2003, please be sure to pass by the RAIN, Newsline and WA0RCR combined booth to say hello. Its in the Silver Arena area of the HARA Arena complex in space number 358. We hope to see you there. (ARNewsline™)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org heard on the W7SP repeater in Salt Lake City Utah and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: ED JUGE, W5EJ, - S.K.

Some sad news to report. Word thar well-known amateur Ed Juge, W5EJ, has passed away.

Aaccording to longtime friend and colleague Bob Miller, K2RM, Juge, the former W5TOO, was an executive at RadioShack for many years and one of the people who kept ham radio on the company's radar. Outside the world of ham radio, W5EJ was a well-known and well-respected figure in the computer industry.

Ed Juge also had served on the ARRL No-Code committee in the late 1980s, chaired the ARRL Digital Committee in 1992 and was particularly active in QRP. He is survived by his wife, Jo, KA5ABC, by two children and three grandchildren. (CQ)

**

EMERGING TECHNOLOGY: COGNITIVE RADIO - IT LIVES

Believe it or not there a movement underway at the FCC to increase spectrum efficiency through the use of a new technology being called cognitive radio.

What is cognative radio you ask? This is radio gear and antenna systems that could adapt to their operating environments by automatically identifying vacant spectrum, switching to that spectrum and carrying out a specific communications mission.

Cognitive radio will also be the subject of an upcoming workshop at FCC headquarters. More information is at the http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233615A1.doc (CGC)

**

ON THE WEB: HOW STUFF WORKS

Want to find out how something works? Try taking your web browser over to www.howstuffworks.com. The site is a wealth of information on just about anything in life including ham radio. In fact, if you want a good laymens explanation of our hobby, the direct U-R-L is http://electronics.howstuffworks.com/ham-radio.htm (AE5DW)

**

SPECIAL EVENT: AMATEUR CROSS BAND COMMUNICATIONS TEST

Iin celebration of the 54th anniversary of Armed Forces Day, the United States Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military and Amateur Radio Communication Test for 2003. These tests provide hams and short wave listeners an opportunity to demonstrate their individual technical skills while receiving recognition from the Secretary of Defense along with the appropriate military radio stations.

According to an Internet post by N6DDF, although the actual armed Forces Day is celebrated on Saturday, May 17th the crossband communications test was to be conducted one week earlier on May 10th. This, so that it would not conflict with the Dayton Hamvention

QSL cards will be provided to those stations who made contact with the military stations. Also, a special commemorative certificate will be awarded to anyone who receives and copies the digital message from the Secretary of Defense. (Via Internet)

**

DX

In D-X, members of the Clube Radioamadores do Entroncamento will use the special callsign, CS7AL, and will be active May 31st from Castel Alcanede for the Portuguese Castles Award. Operation will be on 40 and 20 meter SSB. Castel Alcanede is located in the Province of Ribatejo. QSL via CT1BXE, direct or via the bureau. (OPDX)

Also look for W2AZK and KF2HC from the North Jersey DX Association portable on St.Croix from June 12th to the 19th. Operation will be SSB and CW on 160 through 10 meters. QSL direct or via the bureau to the call worked. Confirmed QSOs are good towards the North Jersey D-X Association award. See www.njdxa.org for details. (OPDX)

**

THAT FINAL ITEM: ROYAL HONORS

And finally this week, a radio amateur has received royal honors in the Netherlands. Hans van de Groenendaal, ZS6AKV, of the SARL news service has the story of Lou van de Nadort PA0LOU:

--

Lou van de Nadort PA0LOU, retired Chairman of the International Amateur Radio Union Region 1 was recognised by Queen Beatrix of the Netherlands for his outstanding contribution to Amateur Radio. He was decorated with Member of the “Order of Oranje Nassau”.

Lou was one of the 3594 people who were recognised this year by the queen when the Royal Recognition awards were announced on April 30, in Holland known as “Koningine dag”, the queens birthday .

Lou van de Nadort retired from the IARU Region 1 Executive in October last year after having been almost 28 years at the helm of the organisation. In his farewell editorial in Region 1 News he called it retirement from active duty and wrote “I will always have IARU and its work at heart and will continue to support the cause"

The medal was presented to Lou at his home in Zundert in Holland when the Major and a delegation of civics and members of the VERON Council arrived there on April 30. Lou said it took my totally by surprise, I never expected it.

Hans van de Groenendaal ZS6AKV

--

ZS6AKV adds that the award is an acknowledgement for PA0LOU’s outstanding contribution to the community. (SARL News Service)

816. CORRECTION: New Dates for 2004 Visalia International DX Convention!!

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-12 01:29:06 UTC
From: Herb Rosenberg <kg6ok@pacbell.net>
Message-ID: <CNCva.1029$s_4.802@newssvr17.news.prodigy.com>
Source record: 10450

April 23, 24 & 25 2004
Visalia, Ca

Please Note New Dates
The Southern California DX Club is proud to announce that the 55th Annual International DX Convention will be held at The Holiday Inn Hotel & Conference Center Visalia. The Date Will be April 23, 24 & 25 2004. The Holiday Inn will begin taking reservations May 15, 2003 at 9:00am Pacific Time (1600z). Reservations can be made by calling 1-800-465-4329 (US) or DX stations can call 559-651-5000 or Fax: 559-651-5014. Online reservation information can be found at www.visaliaholidayinn.com.

We have had a lot of e-mails about the change in dates for next years convention. The convention was originally scheduled for the first weekend in April and that is what was announced at the banquet.

After returning from the convention it was brought to the convention committees attention that this would cause a major conflict with another Hamfest that all of the manufactures go to every year. It would have been tantamount to having it the same weekend as Dayton and cause major problems for the vendors and others. Therefore the committee was forced to make the change. The committee apologizes for any confusion or inconvenience but the change was necessary.

If you made reservations at the John Jay you will need to call and change the dates. Their phone number is 559-651-3700.

Again the dates for the convention are April, 23, 24, & 25 2004.

Oh, I'm so exciting. During about 0730-0930 GMT, on 10 May 2003, in the whole FM baud (87-103 MHz), I heard tens of radioes from Japan, Korea and Russia thousands of miles away, I'm living in Nanjing, in the east of China.
At that time I was searching for a local station with a Tecsun 9700DX, a common Dual Conversion receiver. I'd never gotten a distant radio in FM before, so when I heard a pop-song programme at strange frequency, I didn't realize how far it is, until the song ended and a man began speaking in a foreign language, in Korean! How surprised. I turned the wheel excitedly and found out tens of such signals all over the FM band, most of them are Korean, couples of Japan and two Russian, they all are pastime programmes and far more interesting than SW, thought I didn't know a single word of them. And for the same reason, I didn't know any names of them. My receiver is not a digital receiver, so I didn't copy the frequencies of them either. I can remember few only, a KR between 102 and 105M, it taught children English before 0800, then began playing some children's songs after 0800, another JP station at about 87M, with very powerfull signal which I could heard in following aternoons. The signals are very unstable, fading in and out rapidly like SW. But, in the best state, some of them were as good as local station, they could even light stereo up.

It was a overcast afternoon, I was on the top floor of a flat, at the edge of the city. It is not occasional, because I've read another report from the northeast of China, where is close to Korea. What he said is similar with me, but he was more lucky because he heard TW radioes also. I think something must have happend to the space, or it happens in spring constantly? So I post this report here to see if anyone around the world have the same experiences in these days, or someone could explain it.

I think the effect you're hearing is called "ducting". This is where
radio waves in the vhf frequency band get trapped in a band of the
atmosphere between two layers and bounce back and forth until there is
an exit point. Here on the East coast of the United States it happens
quite a bit on the two meter (144-148 mhz) band in the summer.

You've encountered a sporadic-E opening.

This is similar to the F-layer propagation that allows you to hear SW stations from great distances. On occasion, for unknown reasons, the maximum usable frequency increases greatly.

The maximum distance usually covered by a sporadic-E opening is approximately 2,500km. There is also a *minimum* distance, of about 800km. (there is another thing that can cause you to hear stations closer than 800km but further than what you usually hear) (sometimes, two sporadic-E openings can "link up" and allow distances up to 4,000km. At lower frequencies, more than two openings can link but I've never heard of this happening on the FM band.)

Sporadic-E is most common in the spring, from May through early August. There are also usually openings in late December and early January. You are most likely to hear it in late morning (1000-1200 *local* time) and early evening. (1700-2000 local time)

Sporadic-E openings always begin on lower frequencies and move up. Band I TV channels will open first, then FM radio may follow.

Here in Tennessee, during June and July I would expect to see some sporadic-E propagation during 30-50% of the days, and propagation in the FM radio band during 10-15% of days. I understand sporadic-E is much more common in your area, in eastern Asia.

If you have a TV set with an antenna (no cable, no satellite dish) you may also note sporadic-E propagation causing interference to some channels. Unfortunately I believe the technical standards used in China are different from those used in other Asian countries so you probably will not actually receive pictures from foreign TV stations.

2003 has been an unusually good year for sporadic-E propagation. I have received several stations from Texas and Mexico (1,200-1,600km) already, and we still have four months of openings to go.

You may want to visit my website http://www.w9wi.com and the WTFDA website http://www.anarc.org/wtfda for more information on long-distance FM (and TV) reception.

827. W6ELProp for windows ?

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-14 19:40:44 UTC
From: Thierry <lombrytNOSPAM@hotmail.com>
Message-ID: <3ec29bbd_2@news.vo.lu>
Source record: 10361

Hi,

I am using with success W6EL software (from... W6EL) to simulate conditions of propagation on HF bands knowing SFI and K indices.
This software help me to forecast openings, understand why bands seems closed, etc but... this application displays a low VGA resolution like an old DOS application. Hopefully it runs fine on my Windows XP (as it ran fine on NT4 too) with to set the "compatibility mode". Good to know.

Question : does it exist a new version of this famous software, programmed to run on 32 bits platforms in SVGA (1024...), shareware or licensed ?

Thanks in advance

Thierry

830. ADIF and thoughts on economy

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-14 21:55:02 UTC
From: PA0MIR <pa0mir1@dds.nl>
Message-ID: <b9udtj$7l5$1@news.hccnet.nl>
Source record: 10364

Some thoughts on ADIF-fields and Data-exchange.
When thinking on the exchange of award-specific information it seems to me that the direction taken should lead to a compact and consistent choice.
Many awards are based on either a single or a double geographic subdivision; now as there are already fields for these divisions and subdivisions in the <State> and <County> fields it should be clear that these could be used for any country award based on geographic subdivisions.
The intelligence of deciding exactly what the meaning of the data concerned is should be in the programs.
If we name the fields p.e. <Main_division> and <Sub_division> this would result in:
US station main = state, sub = county
DL station main = Land , sub = DOK
F station main = province, sub = department
G station main = county, sub = Area
4X station main = region, sub = square
PA station main = province, sub = regio
RA station main = Oblast
ON station main = province

and so on

It would be up to the programmers of the logging programs if they wish so to either create separate fields for different countries or put enough intelligence in the programs to use the right data for the right country

This scheme would not necessitate any changes to the ADIF specification when new awards would be created, any amateur can enter the data he wishes in his log, giving a much greater flexibility than with most of the actual logging programs which use separate fields for different entities and thus are wasting -not so valuable any more- harddisk space

IMHO the proposed scheme deserves some attention and discussion before decisions for ADIF 2.0 are formalized.

Hi,

It is well the version I am using. All menus are well displayed in 1024
pixels excepting the color and resolution of the map (MUF) which can be
improved... See image on
http://www.astrosurf.com/lombry/Radio/w6el-muf-f200-k2.gif
http://www.astrosurf.com/lombry/Radio/w6el-muf-f200-k7.gif
NB. Colors shofdt is due to the GIF conversion but the resolution remained
unchanged.

According Shelton himself "all work fine on my PC at 1024....". very useful
information :-(
So it seems there is no solution to enhance the map and smooth "stairs" in
the drawing.

Hi,
6 months become long...
QSLing direct, I received it less than 2 months later. Quite fast, in the
average when I QSL direct.

Greetings,

Yes, was also my understanding you were running the latest.

Try the fully-functional trial at previous link.
www.taborsoft.com/wwizard3

MultiNEC program can be found at:
www.qsl.net/ac6la/multiprop.html

Additionally give VOACAP coverage analysis a try:
http://elbert.its.bldrdoc.gov/hf.html

Good Luck,
Jim

Hi,

The second link looks fine.

In the same matter Proplab,
http://www.astrosurf.com/lombry/Radio/propalab.gif
seems also fine but looks more professional.

Here is another URL for spectrum analysis this time, HF bands,
http://194.165.225.6/sfors/spec.html

and one analyzing ionosphere :
http://www.astrosurf.com/lombry/qsl-propa2.htm (first 2 images)

Hope this helps fan of propagation.

Does this net still run?

Any other African nets?

I wish there was a website that focused exclusively on African DX, but I don't think there is such a thing.

TIA. Rich.

Rich All the DX Nets I know of are at URL:
http://ac6v.com/nets.htm#DXN

Don't know if the Africaner Net is still running as I don't work the nets --
just a personal choice. Might tho if the P5 comes on one -- hi hi.

You might also check the best list of nets (IMHO) on the web (Nets 2 U) at
URL:
http://www.worldofradio.com/nets2you.html

URL: http://www2.arrl.org/lotw/#top

Excerpt:
"ARRL's Logbook of the World (LOTW) system is a repository of log records submitted by users from around the world. When both participants in a QSO submit matching QSO records to LOTW, the result is a QSL that can be used for ARRL award credit.

To minimize the chance of fraudulent submissions to LOTW, all QSO records must be digitally signed using a digital certificate obtained from ARRL."

Thierry, you might take a look at the DXLab Suite, in particularly PropView and DXView. PropView provides an easy-to-use "front end" to IONCAP (which it installs an manages) and displays the results in a graphical format. If you add DXView, the two applications automatically interoperate to enable "point and click" predictions on a world map.

PropView will also setup a schedule for monitor IARU/NCDXF beacons of your choice. When run with Commander, DXLab's transceiver control application, PropView will automatically QSY your receiver to track the beacon schedule you've defined. I can also direct DXView to rotate your beam as required, should you wish.

All DXLab applications are free, and available via www.qsl.net/dxlab .

73,

Dave, AA6YQ

Amateur Radio Newsline™ Report 1344 – May 16, 2003

The following is a closed circuit advisory. Amateur Radio Newsline report number 1344 will follow.

Ladies and gentlemen, Amateur Radio Newsline's support fund administrator, Andy Jarema, N6TCQ.

--

I want to begin by saying thank-you to all of those who have contributed so far to keeping these Amateur Radio Newsline reports coming your way. As I said a few weeks ago, to continue bringing you the news and to continue to honor the accomplishments of youthful radio amateurs with the Young Ham of the Year Award, we have to raise about $1000 a month. I am happy to tell you that thanks to your generosity, we are now about 20% of the way to that goal. That's the good news. The bad is that we still have 80% of the way to go and the bills keep coming in.

I know that I have said this before but I have to again. The bottom line is that you, and only you keep all of this going. Its your tax deductible contributions that pay the cost of producing and distributing Amateur Radio Newsline bulletins. Its your generosity that makes possible the honor bestowed on a young ham operator every August.

Without any doubt, you are the most important part of the Amateur Radio Newsline family because it is you who tell us through your contributions that you want us to continue. And for that we are eternally grateful.

Remember, Amateur Radio Newsline is a federal 501 c 3, not for profit corporation, and, as I said earlier, your contributions are tax deductible. Our address is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Thank you for taking the time to listen. Newscast number 1344 follows immediately.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1344 with a release date of Thursday, May 15th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The tornadoes of May continue as ham radio lends a hand and the doors open at Hamvention 2003. Find out the details on Amateur Radio Newsline report number 1344 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE TORNADOES OF MAY CONTINUE

According to statics, May 4th through the 10th, 2003 was the most active week of tornadoes on record. This, as scores of twisters ripped across the nation's midsection, reducing hundreds of homes and businesses to splinters. We have more on the storms and the part ham radio played in the aftermath in this report.

--

It was a busy week for ARES and RACES volunteers across the nations mid-section. Nearly 300 tornadoes have been reported since the beginning of May. That’s nearly 100 more than the most recent comparable outbreak in 1999. And so far, May 4th to the 10th has been the most volatile time of all.

Tornadoes have been everywhere from Oklahoma and Kansas to the West and to Alabama and Tennessee here on the south. And ham radio operators have been on the job as severe weather spotters looking for approaching storms. They have also been part of the clean-up effort after they have hit.

Among the groups using ham radio is the Salvation Army. Its website says that nine emergency disaster vehicles were set up in Kansas and Western Missouri following twisters that hit there. Its communications arm -- the Salvation Army Team Emergency Radio Network was dispatched to each location to assist using Amateur Radio channels.

One twister that struck the Oklahoma City area late Friday the 9th approached the metropolitan area from the southwest, then skipped through the city. This storm snapped utility poles, flipped a light airplane parked at a local airport and ripped apart an elementary school. It also knocked out a lot of telephone communications bringing out emergency trained ham radio operators to fill in.

Not long after this tornado hit, the Federal Communications Commission declared a general communications emergency for the Oklahoma area. United States Amateurs were told that they could not use 3 point 900 MHz, plus or minus 3 kHz, unless they were handling emergency traffic. The FCC said the declaration was in support of ham radio communications by the Salvation Army's tornado relief efforts. The ban was in force for about 24 hours, terminating at 22:30 on Saturday May 10th.

And on Saturday, May 10th, the weather service posted more tornado warnings for parts of Indiana, Missouri and Illinois. And the Storm Prediction Center said severe thunderstorms were likely from eastern Oklahoma to western Ohio. In northeastern Kentucky, at least 17 people were treated at hospitals and more than two dozen homes were damaged Saturday night after a tornado hit in Lewis and Mason counties near Maysville. This put already weary ham radio communicators back on alert once again. Adding to the misery, torrential downpours flooded streets and fields in Indiana put hams there on call as well.

But it was not over yet. Storms with wind speeds of up to 150 mph hit parts of Central Kentucky early Sunday the 11th. Homes were damaged in Hardin, Hart and Mercer counties. Retired ARRL President George Wilson, W4OYI, who lives in

Owensboro Kentucky says that there were two siren alerts indicating severe weather was on its way. He says that local hams involved in storm spotting duties geared up under the leadership of Emergency Coordinator Jake Jennings, KG4EMO. Thankfully, no twisters actually hit but one was spotted around midnight causing one of the alarms.

Severe weather alert systems and ham radio operators involved in ARES and RACES may be in for quite a work out in the days to come. This is because meteoreologists say that the 2003 tornado season is really just beginning.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

President Bush has cleared the way for federal aid by issuing a disaster declaration for ravaged areas of Tennessee, Kansas, and Missouri Oklahoma. The tornadoes combined with straight-line wind, lightning and floods to caused 44 deaths from Kansas to Georgia. (ARNewsline™)

**

HAMVENTION 2003®: HAMVENTION WANTS TO STAY AT HARA!

The 2003 Dayton Hamvention is on and the big news is that it wants to stay where it is. Amateur Radio Newsline’s producer Bill Pasternak, WA6ITF, has that story:

--

The Hamvention wants to stay at the Hara Arena. So says the Dayton Daily News which reports that Hamvention organizers are in negotiations for a two-year contract to comtinue using the Trotwood Ohio facility. My colleague Henry Feinberg, K2SSQ, has that part of the story:

--

The Dayton Daily News article Bill refereed to quotes Hamvention production manager Garry Matthews, KB8GOL. He says that organizers are pleased with Hara Arena and want to keep the show in the area. Also, that no other local venue can comfortably hold Hamvention at its current size. This says Matthews, makes a move unlikely.

A story in the May 2nd ARRL Letter said exhibitors would prefer the show to be held in Columbus if Hara wasn't available. Indianapolis and Cincinnati were also listed as possible sites.

When asked by the Dayton Daily News, Matthews said that the article doesn't mean Hamvention organizers are looking for another site. But says KB8GOL, organizers do have contingency plans that would move the convention elsewhere if Hara couldn't host it.

Will Hamvention 2004 be at the HARA Arena? We should know more by Sunday the 18th when Hamvention 2003 comes to an end.

I’m Henry Feinberg, K2SSQ. Bill.

--

Thanks Henry.

**

HAMVENTION 2003®: SOCIAL HOUR WILL HONOR AWARD WINNERS

Now turning to the social side of Hamvention 2003 -- and after all -- the Hamvention is a major social event -- there is some very good news. Seemingly taking a cue from the highly successful ham radio cocktail hour at the National Association of Broadcasters convention, the Hamvention will host a similar gathering this year. As Hamvention General Chairman Pat Neff, N8IGS, told RAIN's Hap Holly, KC9RP, this gathering is to honor the Hamventions award winners:

--

Neff: "Theres going to a an award winners reception at HARA on Saturday. Its going to start at I believe 6' o'clock and it will be within two of the largest forum rooms that will be converted. But its only going to have a capacity of about 450 people."

--

In addition to drinks and horderves what else can those buying tickets to this gathering expect?

--

The award winners will be giving acceptance speaches there and, like I say, its going to be an informal to-do that will allow the average attendee to be able to possibly get to talk with the award winners as well.

--

Neff says that the decision to hold the reception at the Hara Arena came as the result of feedback from past Hamvention attendees. Many said it was hard to spend the day at the show and then travel across town for a banquet. With the banquet now history and an informal reception at the Hara taking its place, those wanting to attend need only buy a ticket and hang around. We will.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

Amateur Radio Newsline has a team of reporters in Dayton and will provide full covering of Hamvention 2003. (ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Hamvention repeater, W8BI, serving Dayton Ohio.

(5 sec pause here)

**

HAMVENTION 2003®: BIG HAPPENINGS IN DX

Still with Hamvention news, this years D-X forum should be one of the better ones in recent histoey. So says moderator Jay Slough, K4ZLE, who adds that the scheduled speakers are a really impressive line up. For instasnce, Daily D-X Editor Bernie McClenny, W3UR, will be talking on the recent AH3D operation. And Al Hernandez, K3VN on hand with the ZL7C story. The ARRL's Wayne Mills, N7NG with a DXCC update, and if thats not enough, Tedd Mirgliotta, KB8NW, will be on hand to present the Northern Ohio DX Association Award for the 2002 DXpedition of the Year. It looks like there will be something for everyone at Hamvention 2003. (OPDX)

**

RADIO LAW: HR-1478 GETS SUPPORT FROM CQ MAGAZINE

CQ Magazine has joined the ARRL in asking hams to support House Bill HR-1478. This is the measure re-introduced by New York Congressman Steve Israel to expand the limited protections of "PRB-1" to homeowners' associations and restrictive covenants.

According to the ARRL, the 2002 version of the bill died without action. The new bill initially had 13 co-sponsors from both parties including the only two known hams in Congress. They are identified as Representative Greg Walden, WB7OCE, of Oregon and Representative Mike Ross, WD5DVR, of Arkansas.

The ARRL and CQ are both now encouraging amateurs to contact their representatives in Congress to request that they support and even co-sponsor the bill. (CQ)

**

ENFORCEMENT: PIRATE BROADCASTER SENTENCED TO JAIL

A Florida pirate broadcaster will spend the next nine months in a federal prison. This is the sentence handed down by United States Magistrate David A. Baker against Rayon Sherwin "Junior" Payne.

Payne's conviction is the result of an investigation that began in February of 1999. About that time the Commission's Tampa Office began receiving complaints from residents and broadcasters in Orlando of interference to the reception of licensed broadcast stations. The investigation lead them to Payne's unlicensed station after which he was charged with multiple counts of operating an unlicensed FM radio facility.

Payne pleaded guilty to two of the counts before Magistrate Baker who also sentenced him to one year supervised release in addition to the jail time. Once he is released Payne must perform 50 hours of community service and must not violate any Federal, State or Local laws of the Communications Act of 1934.

The FCC announced the sentence on Monday May 12th. The case was prosecuted by the United States Attorney's Office for the Middle District of Florida.

(FCC)

**

ENFORCEMENT: AN EXPENSIVE LESSON FOR MICHIGAN HAM

The FCC has told a ham to pay a $12,000 fine for willful and repeated interference, broadcasting of music and failing to identify with his call sign. Being ordered to pay is Scott E. Kamm, N0UGN, currently of Souix City Iowa but who had his statiion licensed to the town of Waterbury Nebraska when he was first cited.

As previously reported, last December the FCC T-hunted down a strong signal on the input to a local repeater to Kamm's Waterbury Nebraska residence. Agents then performed a station inspection where they found a two meter transciever set to the repeaters frequecy pair. But Kamm denied any knowledge of the jamming, telling the inspectors that he never transmitted on the system and that the radio gear was used for monitoring purposes only.

But the FCC refused to buy Kamm's story. On January 24th of this year the regulatory agency issued Kamm a Notice of Aparenlt Liability in the amount of $12,000. Kamm never responded to it. And so a few days ago on May 7th the FCC affirmed its earlier order and gave Kamm 30 days tio pay up. (FCC)

**

ENFORCEMENT: $2400 FINE FOR UNREGISTERED TOWER

The FCC has also issued a $2400 a monetary forfeiture to Morris Communications, Inc. of Greenville, South Carolina for failing to register an antenna structure. The FCC calls this one a willful violation of Section 17.4(a) of the Commission's Rules.

On July 8, 2002, the Atlanta Office issued Morris a $3,000 forfeiture notice for failing to register its antenna structure in willful violation. In its response, Morris admits that its tower was not registered, but argued that the forfeiture should be rescinded because it did not "willfully" violate the rules.

Morris claims that it made two good faith attempts to register the structure in 1999, but the Commission first rejected its application on erroneous grounds and later returned it without explanation.

But says the FCC, the Rules provides that, effective July 1, 1996, the owner of any proposed or existing antenna structure that requires notification to the Federal Aviation Administration must register the structure with the Commission. Abother section of the Rules provides that the owner of an antenna structure that had been assigned painting or lighting requirements prior to July 1, 1996 must have registered the structure prior to July 1, 1998.

Morris admits that its Adrian tower was not registered at the time of the inspection on May 7, 2002. Accordingly, the FCC says that that Morris violated the Rules and has ordered it to pay the fine. The entire fionding is on-line at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1.doc (FCC)

**

RADIO RULES: FCC RESOLVES COMMERCIAL BROADCAST SPECTRUM ISSUE

The FCC has released new procedures to allocate and license the commercial F-M broadcast band. This, where conflicting commercial and noncommercial uses are proposed. Since most new F-M and T-V channels can be used for commercial purposes and would be affected by non-commercial proposals, the CGC Communicator says that this decision may have widespread implications. (CGC)

**

RADIO RULES: FAA TO SEND CLEARANCE DATA TO FCC ELECTRONICALLY

According to a Primedia trade publication, the Federal Communications Commission and the Federal Aviation Administration have announced that tower and antenna airspace clearance data from the FAA will now be transferred electronically to the FCC. This will enable the Commission to process antenna structure registration applications faster and more accurately, and will save staff time at both ends. The electronic transfer of data is also expected to reduce the time it takes to get this information into the FCC's database from one to two weeks to only one day. More information is opn the web at http://beradio.com/ar/radio_currents_24/index.htm#tower1 (CGC)

**

HAM RADIO PUBLICITY: NPR FEATURES “HELLO WORLD - A LIFE IN HAM RADIO”

Tom Walsh, K1TW, reports over the Internet that National Public Radio featured ham radio in a recent Talk of the Nation segment. Walsh says that the final 15 minutes of the two hour program on April 30th was devoted to the new book "Hello World - A life in Ham Radio” and even featured callers including someone who is a QSL manager.

Tom says that you can still hear the program. Just taker your web browser to the National Public Radio archives and bring up the April 30 version of Talk of the Nation. Go to the second hour, find the last 15 minutes, turn your speakers up and enjoy. The URL is www.npr.org/programs/totn/index.html>http://www.npr.org/programs/totn/index.html (K1TW, K1KI, others)

**

NAMES IN THE NEWS: W9GIG TO DEPART THE IRA

ARRL Central Division Director Dick Isely, W9GIG, says that he will not stand for re-election to an official position within the Illinois Repeater Association. Isley has been a guising force within the repeater council for years.

It was Isley’s guidence that helped to create the National Frequency Coordinators Committee several years ago. He has also served with ther Illinois Repeater Associuation for many years and has become a main stay in the repeater coordination community.

According to his departure announcement, the decision to stand-down has nothing directly to do with his position within the ARRL but he says that does want to put more of his time toward League matters. Isley says that he has thoroughly enjoyed working for the Illinois Repeater Association but feels that it is time that new people step up to leadership positions. He also wished the group continued success in its work of providing efficient and fair Amateur Radio repeater frequency coordination to the hams of Illinois. (Via E-Mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE IRAQ WAR: WHO IS ACCEPTING WHAT POST-CONFLICT OPERATIONS

With the war in Iraq now just about over, both CQ and the ARRL are accepting certain operations from that nation for their DX award programs. But there are some differences. Amateur Radio Newsline's Bruce Tennant, K6PZW, has that part of the story:

--
PKG HERE
--

Most observers believe that the situation regarding ham radio in Iraq is very fluid and criteria for operations will change. (ARRL, CQ, others)

**

INTERNATIONAL - AUSTRALIA: NEW 23 CM BEACON

VK4RTL experimental 23 centimeter beacon on air neat Townsville Australia. It weent on the air on 21st April on 1296.444 MHz at Mount Stuart for a trial run. Q-News reports that this mighty little beacon puts out a massive 2.5watts and can be heard on most modern tri-band handhelds around Townsville and Thuringowa. Reception and range reports go to vk4wit@wia.org.au (Q-News)

**

INTERNATIONAL - CANADA: CANADIAN SPECIAL PREFIXES.

Industry Canada has authorized the use of "Special Event Prefixes" between May 24th and July 27th to celebrate the 50th Anniversary of the National Library of Canada. The special prefixes are C-K for all V-E's, C-J for all V-A's, C-Y for all V-Oh's and C-Z for all V-Y's. The special prefixes will therefore be available for use in the upcoming C-Q W-P-X C-W Contest on May 24 and 25th.

**

INTERNATIONAL - ITALY: WOULD YOU LIKE TO FLY IN MY BALLOON

Remember the 1970’s song Up-up and Away by the 5th Dimension? Well a ham radio group in Italy has come up with a 21st century Amateur Radio version of just such an event.

The Milan Chapter of the Italian Amateur Radio Society says that its planning a manned Amateur Radio Balloning Experiment to take to the sky on Saturday, May 17th from Mantova Airport. Operating on 144.330 Mhz upper sideband, the in-flight operation is slated to begin between 08:00 to 09:00 U-T-C and last between 1 and 3 hours. A-P-R-S will be used to track the balloon during the time its aloft.

More information on the flight is the groups wesite. That information appears on the groups website at www.arimi.it/rubriche/arbe.html (IT2SAI)

**

ON THE AIR: GRID CIRCLEING ROVERS WANTED

N9REP says over the VHF Reflector that the K9RN VHF Contest Group is now accepting applications for captive rovers during the June VHF/UHF contest. Wendell says that the terrain in and around grid square EN52 is very rugged and harsh and that the first requirement for rovers is a vehicle capable of handling any on-or-off road QSO task, particularly regarding grid circling.

Any team wishing to be a captive rover must supply their own approved vehicle. A list of vehicle manufacturers that appear to meet all of the demanding Rover specifications is at www.maximog.com (VHF Relector)

**

DX

In DX, word that the make-up of the CY9 DXpedition team is now complete and the operation will take place from July 24th to August 2nd. The team members are N0RN, N5VL, W0IZ, KO4RR, K5AAH, K5AB and VE7SV. They will be taking with them a Battle Creek Special and will operate on the low bands during all openings. Callsign will be given either at the beginning of the operation or shortly before. QSL via N5VL. (OPDX)

**

THAT FINAL ITEM: ITS T-HUNT TIME

And finally this wee, do you like hidden transmitter hunting? If you do then this one is for you. Here’s Joe Moell, K0OV, has the latest information on the World Amateur Radio Direction Finding Championship games that are coming up.

--

Who are the best transmitter hunters in the country? That's what we'll find out when the Third USA ARDF Championships get under way near Cincinnati, Ohio on July 30. The sponsors, OH-KY-IN ARC and the Cincinnati Orienteering Club, promise two challenging radio-orienteering courses. One will be on two meters,

and the other on 80 meters. This is a test of individuals, and it's all on foot. You'll have five transmitters to find each day, negotiating your way through the forest with your map, compass and direction-finding gear. If you can walk or jog a 10 km racecourse, you have the stamina to complete an ARDF event. If you're a senior citizen, don't worry about being trounced by teenagers, because there are a total of nine age categories, five for men and boys, four for women and girls.

This year, the USA Championships are an international event, combined with the International Amateur Radio Union (IARU) Region 2 ARDF Championships. If past events are any indication, there will be plenty of international experts in the sport on hand, so you'll have a chance to learn foxtailing tips and techniques from the very best. Positions on ARDF Team USA to next year's World Championships in the Czech Republic are open, so perhaps you can earn a spot for yourself. We're looking for good candidates in all age/gender categories, so encourage your kids and grandkids to give it a try.

For the most intense experience, stay in the dorms at Miami University of Ohio, in close contact with the other competitors. But space is limited, so now is the time to make plans. You can stay elsewhere nearby if you like. In either case, time is getting short, so get registered at the Championships Web site: www.ardfusa.com That's ardfusa.com

For lots more on foxhunting, including equipment ideas and techniques, go to www.homingin.com. Read about past USA Championships and get a link to this year's. That's one word "homingin" --- homingin.com.

From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, Kay-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Don’t worry if you missed those websites Joe mentioned. You will find them I the print edition of this weeks Amateur Radio Newsline report. (K0OV, ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, a reminder that the nominating period for the 2003 amateur Radio Newsline Young Ham of the Year closes May 30th. Nominees must be 18 or younger. Full rules and a fill-in-the-blank electronic application are at our new special website at www.yhoty.org.

For now, with Bill Pasternak, WA6ITF, at the Editors Desk, I’m Norm Seeley, KI7UP, saying 73 and we thank you for listening. Amateur Radio Newsline is copyright 2003 and all rights are reserved.

Hi Folks ....

Can anyone tell me if the 3 element tri-band (10/15/20) version G4MH mini-beam is any good? I am thinking of trying one here as i dont have the room for a full size beam. Its mainly for use on 20mtrs as i only have a half size G5RV multi band wire dipole so i am hoping that this beam will give me better performance than the G5RV. If anyone can give me any info, good or bad, on the G4MH mini-beam it would be greatly appreciated. Thanks for reading this.

Dom (MOASR / 2E0CIA).

In August 1997 I worked CY0NCD. I've never received a QSL for it--and it's the only Sable Island QSO I've got so I really would like to confirm it.

The most recent info I've found is that this is via:
VA3NCD Jaroslaw Pawlega
3 HAYWARD LANE
AJAX, ON L1S 4A1
CANADA

A try at QSLing via that call/address just came back to me as "moved / unknown." Does anybody have any new info on VA3NCD? (I also found an email address for him but that bounced as undeliverable as well.) TIA!

Amateur Radio Newsline™ Report 1345 - May 23, 2003

Amateur Radio Newsline report number 1345 with a release date of Friday, May 23 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hello and welcome to a very special Amateur Radio Newsline being recorded live in the closing hours of Hamvention 2003. I'm Don Wilbanks, AE5DW at the combined RAIN, Amateur Radio Newsline and WA0RCR booth in Hara Arena in Trotwood Ohio. Trotwood is a suburb of Dayton for those of you not familiar with the area. With me are Newsline's Producer Bill Pasternak, WA6ITF, RAIN Producer Hap Holly -- and a host of other people -- most probably wondering what we are up to.

Its now just a bit after 10 a.m. on Sunday May 18th. Bill has been out in the crowd with his tape recorder. So tell me, what have you been seeing and hearing.

--

(This is an audio only report at http://www.arnewsline.org)

--

I guess we all agree that its been a fun weekend and we will have more on Hamvention 2003 next week. But there lots of other news including a new ham radio allocation at 5 MHz and a proposed New Jersey law that could bring a ban on operating a two way radio -- or even changing a station on a car radio. We will have that and more, after this. (ARNewsline™)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Southern California Amateur Radio Transmitting Society net in San Dimas California

(5 sec pause here)

**
RADIO RULES: FCC SAYS PARTIAL YES AT 5 MHZ

The FCC has granted hams five discrete 2.8-kHz-wide channels in the vicinity of 5 Mhz. This, in a Report and Order issued on Wednesday May 14th. But, says an ARRL Bulletin, the Commission has has declined to grant amateurs any allocation at 136 kHz at this time.

In its Notice of Proposed Rule Making a year ago, the FCC appeared inclined to go along with both requests which had come from the American Radio Relay

League. But opposition arose along the way with power companies fearful of interference to their operations at 136 kHz. The National Telecommunications and Information Administration filed against the 5 Mhz grant based on a possible need for the requested band by federal government users. The five channels granted the Amateur Service are seen as a compromise.

The FCC did agree to elevate the Amateur Service, but not the Amateur-Satellite Service, to primary status at 2400 to 2402 MHz. The changes to the Part 97 go into effect 30 days after publication in The Federal Register. (FCC, ARRL)

**

RADIO LAW: N.J. MAY BAN “EVERYTHING” WHILE DRIVING

New Jersey state lawmakers are proposing a wide ranging law that would not only ban the use of cellular telephones in motion, it might also ban just about anything else a person might do while driving a car including sipping coffee or changing a radio station.

According to the May 11th Ocean County Observer, the state Assembly Transportation Committee has released a bill to better define what is and what is not considered to be reckless driving. Proponents of the measure call it an effort to reduce motor vehicle accidents caused by driver distraction.

The proposed legislation says distracting behavior includes the use of communication technology such as cellular telephones, pagers, fax machines, locating devices, video players, two-way dispatch and citizen band radios. Also on the list is the normal AM/FM radios found in most vehicles along with compact disc and tape players.

The bill also defines a variety of things that have been labeled as distracting behavior. On this list are such activities as personal grooming, consuming food or beverages, reading and tending to unsecure pets. All would be considered as reckless driving.

State Representative John Wisniewski of Middlesex is chairman of the Transportation Committee and the primary sponsor of the bill. He says that giving the police a clear mandate to stop motorists who drive inattentively is logical way to stem the tide of roadway crashes and fatalities. And while Amateur Radio is not specifically mentioned it could easily fall under the two-way radio portion of the measure if it becomes state law. (W2CE)

**

RESCUE RADIO: NHC TO PERFORM 2003 HURRICANE TEST

Mark June 1st for the National Hurricane Center's Amateur Radio station WX4NHC to conduct its 2003 hurricane season on-the-air station test. According to an ARRL bulletin the station will take to the airwaves on Sunday, June 1st from 13:00 to 22:00 U-T-C.

Coordinator John McHugh, KU4GY, says the purpose of the annual test is to check out all of the WX4NHC radios, computers and antennas using as many modes and frequencies as possible. Some R-F-I monitoring also will be done.

Listen for WX4NHC on HF worldwide and VHF and UHF in South Florida. Anyone making contact is asked to provide a signal report, location and brief weather report. QSL cards are available via W4VBQ. Please be sure to include a self addressed stamped envelope with any QSL requests.

The event will mark the first time the National Hurricane Center will use its new call sign for this event. In years past it operated as W4EHW. (ARRL)

**

RESCUE RADIO: HAM RADIO RESPONSIBLE FOR TORNADIO WARNING SYSTEM

An interesting side note to our coverage of this years tornado season and the role that ham radio is playing in storm spotting and relief efforts. We recently learned that one Kentucky city has ham radio to thank for its early warning system.

The ham responsible is retired ARRL president George Wilson, W4OYI. Wilson suggested the installation of the system following a twister that hit Brandenburg, Kentucky in April of 1974. Wilson learned that it had taken more than 40 minutes for severe weather alerts to reach Owensboro from the National Weather Service in Evansville Indiana, about 40 miles away. Thanks to the efforts of W4OYI, a month later local warnings were coming from a NOAA weather radio monitoring system installed in Owensboro. (ARNewslime™)

**

NAMES IN THE NEWS: KB2GSD BACKS AWAY FROM WJMK

Former CBS News anchor Walter Cronkite, KB2GSD, has severed his agreement with a Florida production company. This, after having signed to host for a series of corporate-sponsored videos, resembling news reports, that are broadcast on public television stations.

The New York Times reports that a production company called WJMK had recently hired Cronkite and Cable News Network anchorman Aaron Brown to replace Morley Safer of "60 Minutes" as hosts of a series called “American Medical Review.” After it was learned that pharmasutical manufacturers and other health care companies pay WJMK about $15,000 each to have their products featured in the videos the high profile hosts began to drop away. Brown backed out of his agreement with WJMK on Wednesday May 7th with Cronkite following on Thursday May 8th.

Marlene Adler who is Walter Cronkite's chief of staff, said that the retired newsman had agreed to become a host after being assured that the videos would be educational. She said he had now concluded that WJMK was using the videos, at least in part, for commercial promotion, adding that "Mr. Cronkite does not do product endorsements, and will not."

This is not the first time Cronkite has had a a problem with others using his voice or likeness. Back in January Cronkite's Attorney, Ronald S. Konecky, demanded that Glenn Baxter, K1MAN, immediately cease using a previously recorded station ID made by Cronkite several years ago. He also told Baxter to desist from the use of Cronkite's name and likeness, in any medium, and on any basis whatsoever. (ARNewsline™ and published news reports)

**

NAMES IN THE NEWS: N1SS ON W4BW

Peter Hurd, N1SS, says over the QCWA remailer that he is writing an article for publication as a tribute to the late A. Prose Walker, W4BW and is asking for your help. If you have any recallections about the A. Prose Walker that you are willing to share, please contact Hurd by e-mail to n1ss@ ainop.com or write him at PO Box 1005 Houlton Maine 04730. (QCWA Remailer)

**

HAM RADIO ON THE WEB: THE NCG REFLECTOR

Do you own an NCG radio. Looking for the latest information? Then listen up. KU4QD says that there is now an Internet a reflector for folks who have, or are just curious about, NCG gear. It also covers National brand transceivers sold in Japan that weren't imported to the U-S-A. The new group is on Yahoogroups. Go to www.yahoogroups.com and search for NCG. (VHF Reflector)

**

CONVENTIONS AND HAMFESTS: LIMARC - NEW YORK - IN JUNE

The Long Island Mobile Amateur Radio Club annual hamfest will be held Sunday, June 8 th. The venue is at Briarcliffe College in Bethpage New York from 9 a.m to 1 p.m. local Eastern time. Briarcliffe College is located at 1055 Stewart Avenue in Bethpage. For more information please visit www.limarc.org on the World Wide Web.
(K2EPM)

**

CONVENTIONS AND MEETINGS: DCC IN AUGUST

Technical papers are solicited for presentation at the 22nd Annual ARRL and Tucson Amateur Packet Radio Digital Communications Conference. The event is slated for September 19th to the 21st in Hartford, Connecticut. Conference proceedings are published by the ARRL. Presentation at the conference is not required for publication. Information on paper submission guidelines is available on-line at www.tapr.org/dcc Submissions are due by August 5th and should be sent to Maty Weinberg, ARRL, 225 Main Street, Newington, Connecticut , 06111. They can also be e-mailed to maty@arrl.org (TAPR, ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ON SAFARI: A DX’PEDITION WITH A NEW TWIST

A major Dxpedition is coming up but this one is rather different. Amateur Radio Nerwsline’s Norm Seeley, KI7UP, has the details on this rather unique operation:

--
IN3QBR, IN3ZNR and AA4NN are teaming up to go on the air as the "African Double Jump Dxpedition from South Africa, Lesotho and Botswana starting at the end of June. According to their Web page, the team will meet with ZS6WPX, who will become their tour guide. Between June 28th and July 1st, the team will go on a Safari. There is a possibility they may do some operating using callsigns portable Zed S, but on July 2nd, they head to Gaborone City Botswana where they plan to erect their antennas and operate from their hotel that day. Callsigns mentioned so far are A25NN and A25ZNR.

They will leave for the town of Rustenburg on July 5th, and will travel to Sun City, South Africa. There "MAY" be some activity portable Zed S and early July 7th, they will leave for Lesotho and expect to be there late afternoon. Expected callsigns will be 7P8JB and 7P8NR. Activity will last until July 11th. They depart for Johannesburg on July 12th and expect to leave for home July 13th.
--

Please visit their Web page for updates at www.qsl.net/xu7aay/africa. More DX news later on in this weeks newscast. (via e-mail)

**

EMERGING TECHNOLOGY: INTERNET LINKING BREAKS 2000

Ian Abel, G3ZHI, reports that the total number of amateur radio repeater and simplex internet gateways now exceeds 2,000. This includes nodes on the three major linking systems, IRLP, EchoLink and eQSO. (G3ZHI)

**

INTERNATIONAL-AUSTRALIA: NEW IRLP LINKED REPEATER

And speaking about Internet based repeater linking, Q-News reports that the VK4RXG repeater on 438.500 Mhz is now up and running from a new location. This Australian repeater is linked to the IRLP network giving its users world-wide access, and the rest of the world’s hams access to VK. (Q-News)

**

EMERGING TECHNOLOGY: EUROPEAN TV LOVES SMS

Unforeseen by most media analysts, European TV networks started using short message services as an interactive channel in the late 90's. Today, many of them have embraced SMS text messaging-interactivity as a revenue-generating feature in some form, whether it be chats, voting, comments, reminders, and many other things. And believe it or not, hardly an hour of the broadcast day goes by without some channel encouraging the viewer to send messages. (Media Network)

**

INTERNATIONAL - CANADA: VE3CDM TO CANADIAN AMATEUR RADIO HALL OF FAME

Tom Atkins, VE3CDM, has been elected to the Canadian Amateur Radio Hall of Fame. This, for his extensive contribution over many years to Canadian and International Amateur Radio activities through his active involvement in numerous organizations including Radio Amateurs of Canada and the CNIB Amateur Radio Society for blind radio amateurs.

Atkins retired as President of IARU Region 2 in 2001 after having served in all of its Executive positions for eighteen years. And during this time was a member of the IARU Administrative Council and is currently serving as an IARU Expert Consultant. (RAC)
**

INTERNATIONAL - U.K.: PROPAGATION BEACONS OFF THE AIR

GB2RS reports that the two GB3BUX beacons located near the city of Buxton in the U-K are temporarilly off the ait. One operates on on 50.00 MHz and the other on 70.00 MHz in the U.K. only 4 meter band. Both have been switched off due to intermittent problems and it is believed that the repairs will take some time to complete. (GB2RS)

**

INTERNATIONAL - EUROPE: INTERNATIONAL MUSEUMS WEEKEND

The third annual International Museums Weekend will take place on the 14th and 15th of June. The event begins at midnight UTC Friday and ends at midnight UTC Sunday. Those wishing to take part should please insure they have registered via the form on the International Museums Weekend website nat www.ukradioamateur.org/imw (GB2RS)

**

ON THE AIR: W8RMR FROM THE UNSINKABLE AIRCRAFT CARRIER

The Motor City Radio Club will sponsor the 4th annual Grosse Ile Islandfest special event station from U.S. Island MI005R. Located 20 miles south of Detroit, the island was named "The Unsinkable Aircraft Carrier" back when the Naval base was active.

Listen for W8MRM operating from the hanger of the old Naval station from 14:00 UTC on May 31st to 21:00 UTC on June 1st on 28.375, 21.375, 14.244 and 7.244 MHz SSB. There may also be some CW operation, and AM with vintage gear. For a commemorative certificate send a QSL with an SASE to MCRC PO Box 337, Wyandotte, Michigan, 48192. Any question? Please e-mail K8CBS@arrl.net or visit this web site: www.w8mrm.org/k8cbs Again the call sign to be used is W8MRM. (Via press release)

**

DX

In D-X, word that G3LIV, will be active stroke 9M2 from Penang Island through the 30th of May and from Langkawi Island from May 30th to the 9th of June. He will mainly be on CW with some PSK31. (GB2RS)

And RSGB reports that K4VUD is active from Thailand again as HS0ZCW. He will be there until the middle of June. QSL as directed on the air. (RSGB)

Lastly word that MM0OKG will be on a trekking holiday in Peru and Bolivia through the 25th of May and plans to be active on 20 meter S-S-B using a Yaesu FT-817 and dipole antenna. He will operate portable from locations higher than 3500 meters above sea level. Look for him calling on 14.280 MHz, plus or minus about 10 kHz. (GB2RS)

**

THAT FINAL ITEM: THE EVER CHANGING BRAIN

Finally this week, if you have ever taken a taxi in a major city you may have wondered how the taxi drivers know how to reach even the most obscure destination without a street map or a hint from their passengers. Well, a new study indicates cabbies are working their brains so hard that they become enlarged in the zone associated with navigation.

According to the study published in the journal Proceedings of the National Academy of Sciences, the drivers' brains adapted to help them store a detailed mental map of the city. This, by shrinking in one area to allow growth in another called the rear hippocampus.

In the latest study, researchers at University College, London University compared the brains of 16 male taxi drivers with those of 50 other men of a similar age. They found that among the cabbies, the back of the hippocampus, the part of the brain associated with spatial memory, was larger than it was in the comparison group.

Scientists had previously reported differences in the structure of the brain between musicians and non-musicians. Researchers say that evidence that the brain is physically able to change according to the way it is used could be important in understanding human development. (Science Today)

This is odd. I went to have a peek at the site out of
curiosity. There's an annoying pop-up asking for donations,
with an unclear background. But the actual message areas
were, at least on my system, perfectly clear text on white
or lightly shaded backgrounds. The message areas were clean
and easy to read and follow. So what *I* saw was perfectly
unobjectionable and well-laid-out.

DX Bulletin No. 611
BID: $OPDX.611
May 26, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL W1AW Bulletins, K1XN & GoList, NC1L, K2FF, K2PF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4CD, N4GN, W5BOS, WW5L, AE6Y, N6NBB, W6ZIP, AC7DX, KL7JR, K8CX, K8YSE, W9KNI, W0YG, CO8LY, CO8TW, DF4SA, DL1EK/DL7VOA & DX Newsletter, DL2VFR & IOTA-POST, DL4MEH, E21EIC, F5NQL & UFT, F5ASD, F5NOD, FJ5DX & La Gazette du DX, G3SWH, I1JQJ & IK1ADH - 425 DX NEWS, I2YSB, IK2QPR, JI3DST, JI6KVR & JA-IOTA Islands News, JJ1BDX/3, LA3OHA, LA7VK, OK1KT, OM3JW, OZ1HPS, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PA5ET, PP5SZ, PY2YU, RW6CW, SM0DTK, VE6JY, VA3RJ & ICPO, VE3EXY, Z33AA and for ZS5WI the following DX information.

** NOTE FROM THE EDITOR, TEDD, KB8NW (Dayton Wrap Up and Mentionables): HamVention 2003 is in the books. Eventhough the weather was not the greatest, the annual event was still great. I enjoy meeting and greeting my friend throughout world every year. However, it was on everyone's mind whether there would be another "HamVention" (as we know it!). The talk of it being moved was everywhere. Hopefully, this will not happen. Anyway, I think the Southwest Ohio DX Association's DX Forum and Dinner were particularly interesting for DXers this year. The talk by Vice Admiral Scott Redd U.S. Navy (retired), K0DQ, during the Friday night DX Dinner Banquet was interesting and enlightening. However, the turn out for the DX Forum was amazing (the largest I have ever seen). Your editor started off the forum presenting the "Northern Ohio DX Association's 2002 DXpedition of the Year" to the VP6DI group. Mike McGirr, K9AJ, accepted the award on behalf of the group. Wayne Mills, N7NG, followed with an interesting presentation of the ARRL's "Logbook of The World" (LOTW). The LOTW is still in the testing stage (possibly for 60 days), however, individuals can upload their logs now after downloading some software on the ARRL Web page. For more details, go to: http://www.arrl.org/lotw
Next on the agenda was a presentation by Al Hernandex, K3VN, on the "ZL7C" operation, and then Bernie McClenny, W3UR, on the "AH3D" operation. The DX Forum ended with an interesting talk (no slides/video) by Don Miller,

AE6IY. Don talked about some of his activities, as well as his views on the DXCC program and some public apologies. He also mentioned he knows of a new DXCC entity, and he plans to go there and activate it. No other details were given. STAY TUNED. For some great pictures of the Dayton HamVention, visit Tom's, K8CX, "Dayton 2003 Photo Gallery" at: http://hamgallery.com/dayton2003/

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th/May, through Sunday, 25th/May, there were 222 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND. Rad/ZS6RAD, Ron/ZS5ABD, Cliff/ZS6BOX and Willie/ZS5WI will be operating from Ezulwini, Swaziland (Callsign awaiting), from July 29th to August 3rd. They will be joined by Willie/3DA0BD, Andy/3DA0TM and Nigel/3DA0NG as time permits. Activity will be on all HF bands and on VHF using all modes including WSJT, between 0300-0700z and from 1400-2200z daily. They will also be participating in the SARL Phone Contest as a Multi-Operator station. Activity will end on Sunday afternoon, August 3rd. QSL via the SARL QSL Bureau (or direct) to ZS5WI: PO Box 1064, Eshowe, 3815, KZN, South Africa (enclosing a Self Addressed Envelope; South African stations to enclose a SASE). It will be appreciated if the cost of postage can be covered as they have not secured any sponsorship. Queries can be directed to: zs5wi@iafrica.com

4W, EAST TIMOR. Stu Greene, WA2MOE, sent out the following press release on May 22nd, about the Democratic Republic of Timor Leste:
"4W1BK (JA1BK) and 4W2DN (JR2KDN) will be QRV from Timor Leste from May 24 to May 29, 2003. QSL information is 4W1BK via WA2MOE and 4W1DN via JR2KDN. This is a WFWL operation.

The United Nations no longer is in control and independence was won by the East Timorese on May 20, 2002. An application for new entity status will be filed together with an application to delete the former 4W territory as an entity under DXCC rules.

Article 5 of the treaty between Portugal and Indonesia of May 5, 1999, removed East Timor from the list of Non-Self-Governing Territories of the General Assembly and the deletion of the question of East Timor from the agendas of the Security Council and the General Assembly. The treaty, witnessed by the Secretary General of the United Nations, did not make the United Nations the administrator of East Timor but did provide for UN humanitarian assistance. Article 7 requested 'the Secretary-General to maintain an adequate United Nations presence in East Timor.'

The DX Advisory and Awards Committees quite possibly misinterpreted the language of the treaty as conferring status of East Timor as a UN administered territory which in fact was not the case. Only when the referendum authorized by the treaty was held and the East Timorese people declared themselves independent was there a new entity.

The role of UNTAET (UN Transitional Administration in East Timor) was humanitarian and peacekeeping and was not a quasi-government authorized to issue amateur radio licenses. UNTAET did not have the authority to issue amateur radio licenses; it was a peacekeeping mission and only after the referendum was there a Ministry of Communications which does have that authority. The text of the treaty for those interested is at: http://www.un.org/peace/etimor99/agreement/agreeFrame_Eng01.html

If ARRL agrees, the UN sanctioned operations in East Timor would be deleted on the ground that East Timor was not an entity under the rules and a new entity would be created effective 20 May 2002, the date of the creation of the East Timorese state. Democratic Republic of Timor Leste became a UN state on 27 September, 2002. ITU has reassigned 4WA-4WZ to the Democratic Republic of Timor Leste on 23 April, 2003."

ADDED NOTES: Since this press release, there seems to be another operator other than the team of Kan/JA1BK (4W1BK) and Yuu/JR2KDN (4W2DN) who has been active. A station signing 4W3CW has been active on 30/20/15/10 meters CW and was active in the CQ WPX Contest this past weekend. The operator was heard sending QSL via QRZ.com. It seems that the operator is Peter, G3WQU. His length of stay is unknown. Also, no comments or announcements have been made from the DXCC Desk. Hopefully, something may be said by Wayne Mills, N7NG, after the holiday on Monday. Stay tuned.

4W, EAST TIMOR. Thor, TF3MM, is also currently active from here as 4W3DX and is expected to be there for another week. He is using a rhombic antenna (leg lengths are 115 meters, up 50 meters beaming EU). Most of his activity has been on 15 and 20 meters CW. Watch 21008 kHz after 2115z and 14002-14003 kHz between 1130-1800z. QSL via TF3MM. Thor states that he will QSL when he gets back to TF-land (should be done before Christmas).

5W & KH8, AMERICAN SAMOA AND SAMOA (Update). Ulli, DL2AH, is heading to the Pacific Ocean for a holiday between July 2-29th. He plans to be active as 5W0AH from Samoa, July 3-15th and July 25-29th. He will also be active from Ofu Island (OC-077), American Samoa (callsign not known yet), July 17-23rd. Activity will be on 40-10 meter SSB only using a FT897 + a GAP TITAN antenna. He will also be active ib the IOTA Contest.

ANTARCTICA NET. There is a new Antarctica Net every Saturday on 14300 kHz around 1900z. Net Control is LU4DXU. He is in touch with LU1Z stations. Last Saturday LU1ZV, the Esperanza Base, was on the air. They expect DP1POL for next Saturday.

C5, THE GAMBIA. Juha, OH9MM, reports that an international group of operators will be active as C53M during the CQWW CW Contest as a Multi-2 entry in November. QSL via OH9MM. Look for C56R to be active outside of the contest.

CANADIAN PREFIXES. Nenad, VE3EXY, informs OPDX to look for a lot of different Canadian prefixes in the year 2003. He states, "This will be like PX paradise for PX hunters." For more details, please visit the following Web site at: http://www.rac.ca/specialcalls.htm

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via W7EJ. Jim will be active one week before the contest.

DIB NUMBER CHANGED! Pedro, PP5SZ, informs OPDX that all operations from "Cotijuba Island" (IOTA SA-060) with a DIB-43 reference number have been changed to DIB-80! Please make the correction in your DIB List Numbers. A new "Diploma das Ilhas Brasileiras" (DIB) List is available at: http://geocities.yahoo.com.br/pp5sz/diblist.htm

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operations from Iraq are approved for DXCC credit:
YI/EK6KB YI/ON4WW YI/S57CQ
YI/EK6DO YI/ON6TT YI/SM7PKK
YI/F5ORF YI/S53R YI/VK4KMT
YI/ON5NT

HAM COM. The 25th anniversary of Ham Com in Arlington, TX, between Dallas and Fort Worth, is the southwest's largest ham convention. Ham Com is also this year's ARRL National Convention and will be held June 20-22th. Listen for W1AW/5 (the convention's commemorative station) to be active. Also, the Lone Star DX Association (LSDXA) is presenting a world class DX program this year. For the DX program, please visit the following Web page at: http://www.dxer.org/lsdxa/agenda.html
For Ham Com registration and information, please visit the following Web at: http://www.hamcom.org/

HS0, THAILAND. John, W6ZIP, informs OPDX that he will be active as HS0ZEH from May 31st to June 17th from several locations. Activity will be mainly on CW on 40-10 meters. There will be some SSB towards the end of his tour (last 2 days or so). QSL via home callsign.

INTERNATIONAL DX CONVENTION 2004 (Visalia). The Southern California DX Club has announced that the 55th Annual International DX Convention will be held in 2004 at the Holiday Inn Hotel/Conference Center in Visalia on April 23-25th. For online reservation and information, go to the following Web page at: http://www.visaliaholidayinn.com

IOTA NEWS.....
AF-NEW. Ivan/OM3CGN, Afif/7X2RO and possibly three other local operators
will activate the Algerian Habbibas Island (a new IOTA in
the Mediterranean Sea Coast West Group) as 7W4HI, June 1-5th.
They will be active on CW/SSB on the usual IOTA frequencies.
QSL info will be announced later.

AF-019. Look for operators ON6VP, ON4CAQ and ON1AEO to be active as
IG9/ON4DST from Calla Madonna, Lampedusa Island, now through
May 29th. Activity will be on 80/40/20/15/10 meters SSB only.
QSL to ON4DST via the bureau, or direct via ON4AMM:
Mary Lou Moons, Oudestraat 9, B-3560 Lummen, Belgium.

AS-155. BV DX Group headed up by Paul, BV4FH, will be back on Liuchiu Yu
Island, June 6-8th. Activity will be on CW/SSB, 40-10 meters
and the WARC bands. They will use most IOTA frequencies. QSL
via BV4YB directly, and a SASE will be much appreciated. They
expect to start at 0800z on June 6th and go QRT at 0400z on
June 8th.

EU-020. Martin, SM0DTK, will be active from Gotland Island as SM0DTK/1
from now through May 31st. Skeds can be arranged via E-mail at:
sm0dtk@passagen.se
More info and a Web Cam is available at the following URL:
http://hem.passagen.se/sm0dtk/ (Click on "Losgodis"!)

EU-041. Marco, IK1YED, is expected to be active as IM0/IK1YED/p from
Maddalena Island (IIA SS-001) now through May 31st. Activity
will be on all HF bands and 6 meter SSB. He also plans to
operate from Caprera (also EU-041, SS-005) during the same
time frame.

EU-063. Terje's, LA3OHA (and JW3OHA), plans are confirmed for activivty
from Prins Karls Forland Island, July 11-25th. Four operators
have signed on. However, Terje states that they are still
looking for one more operator. More details are forthcoming.

EU-120. The South Bristol ARC will be active as GB2BLE from Lundy
Island (WAB SS14 - IO71) during June 28th through July 5th.
Activity will be on HF SSB only, 6 meters SSB/FM and 2 meters
FM. More details can be found on the Web page at:
http://www.draxium.com/gb2ble

EU-125. Operators Karl/LA8DW and Lars/OZ1HPS will activate Fanoe Island
(DIA NS-002) from June 5-7th, using the callsign OZ4DI. QSL
via OZ1HPS direct or bureau. ADDED NOTE: This callsign will
also be used for some other Danish Islands and Lighthouses
operations in the future.

EU-125. Siggi, DL1AZZ, will be active as OZ/DL1AZZ from Fanoe Island
(DIA NS-02 for the Danish Islands Award), June 7-14th. Activity
will be on all HF bands CW/SSB. QSL 100% via bureau.

EU-170. Siggi/DL1AZZ, Lutz/DL3ARK, Mario/DL5ASE and Heiko/DG0OGM plan to visit the Island of Dugi Otok (IOCA CI-018) and the Light-house Veli Rat (CRO-183) between now and May 31st. QSL via their home callsigns, direct or bureau.

NA-121. Lanny/W5BOS and Don/N5XG will activate Walrus Isls, Alaska. Operation is scheduled for July 15th (starting at 0200z) until July 17th (ending at 1500z). Activity will be on CW and SSB. Callsigns will be W5BOS/AL5 and N5XG/KL6. QSL via their home callsign. Visit their web site at: http://www.geocities.com/buzzsimm/NA121.html

J3, GRENADA. Paul, W4/G4BKI, has moved to Grenada and is now J3/G4BKI. He will be active for 1 year under that callsign until he receives his J38** callsign. His activity is mainly on 20/15 meters CW (between 2000-2330z) right now. QSL information can be found on the Web page at: http://stcgrenada.com/amateurradio.htm

JW7, SVALBARD. Look for Tormod "Tom", LA7VK, to operate from Svalbard (EU-026) as JW7VK between May 29th and June 1st. QSL via LA7VK. Tom states, "For those who send and require a QSL card via mail, please remember to include a self-adressed envelope with one IRC or two green stamps. Otherwise, the return card will be sent via bureau." For more details, please visit the Web page at: http://www.dxpedition.org/dxjwpk

LIGHTHOUSE ACTIVITY. Operators Alex/RW6CW, Andy/RK6ABM, Slava/RZ6AER, Alex/RA6AFB, Vit/RK6ALP and Serge/RK6ADS will be active from the Lighthouse "Sazalniksky", ERU-174 for ARLHS and RLE-026 for RLHA (Russian Lighthouse Award), June 6-7th, using the the club callsign RW6AWW/p. Activity is planned for the HF bands CW/SSB. QSL via RW6CW.

NATIONAL HURRICANE CENTER'S STATION (Special Activity). W1AW reports that the National Hurricane Center's Amateur Radio station WX4NHC (formerly W4EHW) will conduct its 2003 hurricane season on-the-air station test Sunday, June 1, 1300-2200 UTC. The event will mark the first time the NHC uses its new WX4NHC callsign. The purpose of the annual station test is to check out all of the WX4NHC radio, computer and antenna equipment using as many modes and frequencies as possible. Look for WX4NHC to operate on HF, VHF and UHF. Operation will follow this schedule:
1300 UTC--3.911 and 7.268 SSB and VHF/UHF FM
1400 UTC--14.325 MHz SSB, VHF 147.000 repeater/UHF 442.350 repeater
1500 UTC--144.200 MHz SSB, 14.070 MHz PSK31
1700 UTC--14.325 and 21.325 MHz SSB, VHF/UHF IRLP Node 9210
1800 UTC--21.325 and 28.525 MHz SSB
2000 UTC--14.325 and 144.200 MHz SSB. CW operation will be on 14.035, 21.035 and 28.035 MHz (times will vary).
Stations working WX4NHC are asked to provide a signal report, location and brief weather report. QSL cards are available via W4VBQ. Include a SASE with QSL requests.

NEW DX BOOKS FOR DXERS. Idiom Press is pleased and proud to announce the following new publication for DXers. For details on how to purchase these

books, please visit the Web page at: http://www.idiompress.com
* The long awaited third edition of "The Complete DX'er" by Bob Locher, W9KNI. This is the most popular DX book ever written, "The Complete DX'er" is both the highly entertaining and fascinating diary of a serious DX chaser, and at the same time a tutorial sure to make the reader a more successful DX'er. This new edition brings the work up to date, yet retains the author's warm, personal style that made the earlier editions so popular. This is a work that the owner is sure to read again and again. It very much respects and honors the traditions of DX'ing, brings a sense of excitement to the chase, and leaves the reader eager to turn on the rig and start tuning the bands looking for the ever elusive "new one". With over 26,000 copies in print (but just try to find a used copy) this is surely the return of a classic! (228 pages at 19.95 USD)

* Idiom Press is pleased and proud to announce publication of "Up Two -- Adventures of a DXpeditioner" by well known contester, DX'er and world traveler Roger Western, G3SXW. "Up Two" is a fascinating account of operations by Roger from 22 different countries, many of them quite rare, all reached by commercial transportation, and most of them "microlite" expeditions taken long before others invented the term. Roger entertains the reader with his accounts of sea voyages, bus journeys across Africa, of far flung islands and sun-blasted deserts, all with rig in hand. Some of Roger's trips were keyed to major contests, others were purely DX'peditions. All were made without support from the major foundations. This book is both an entertaining travelog and a roadmap for others interested in mounting similar operations. It is sure to fascinate both the armchair DXpeditioner and the ham plotting his own adventure. (256 pages at 19.95 USD)

NEW OFFICERS FOR 2003-2004. The French National CW Society and The Union Francaise des Telegraphistes (UFT) has elected new officers for 2003-2004.
President : Raymond TALAZAC, F6BQV
Vice President : Norbert LAURENT, F6AXX
Treasurer : Pierre GALLO, F6FXS
Secretary : Jean Pierre AUXENTIDES, F5TFP.
The Board include also the following assistant members:
Ghislain, F6CEL Bernard, F5HEW Andre, F5AKL
Alain, F6ENO Vincent, F5MJV
Alain, F6EQV Maurice, F5NQL
Gerard, F6ICG Martial, F5SIE.
The President has appointed, Jean Claude Perrotey, F9IQ, Honorary Past President, to be the UFT's CW consultant for the IARU French Society, RESEAU des EMETTEURS FRANCAIS (REF), whose UFT is associated.

QSL INFO AND NEWS.....
Phil Whitchurch, G3SWH, informs OPDX that all direct requests for 8Q7ZZ QSLs have now been mailed.

AH3D QSL CARDS WERE AVAILABLE AT THE HAMVENTION. Vertex Standard (Yaesu) hosted the distribution of the full-color AH3D folded-QSLs at their booth during the Dayton Hamvention. Veteran DXpeditioner Martti Laine, OH2BH, 22-year old severe contester Toni Linden, OH2JTE, and Daily DX Editor, Bernie McClenny, W3UR, were passing out the QSLs during the three day event. If you were not there and sent for your card, you should be receiving your QSL via the snail mail shortly.

Andy, DL4MEH, informs OPDX that he is permanently moving to Trinidad and Tobago, West Indies. PLEASE DO NOT SEND QSLS TO HIS GERMAN CALLBOOK ADDRESS ANYMORE!! Wolfgang Utz, DL4MDO, will now handle all of Andy's DX and Contest operations. This includes the following:
9Y4TBG: CQWW CW 1999, CQWW SSB 2001, CQWW SSB 2002, ARRL DX CW/SSB 2003
9Y4/DL4MEH: All operations from 1999 and on.
There will be extended activity from his contest and DX QTH on Tobago Island. Since he did not obtain a permanent resident license or a "contest station callsign" yet, listen for the callsign and QSL informations given by the operator. All QSLs for 9Y4/DL4MEH for future activities go via DL4MDO, bureau submission preferred. If somebody really wants to QSL directly to Andy (please only stamp collectors, hi), his address will be as follows (do not send earlier than August 2003):
Andreas Kretzschmar, #5 Estate Ave., Cassleton Gardens, Trincity, Trinidad, W.I., Republic of Trinidad and Tobago.

The Magnolia DX Association (MDXA) reports that the K5C QSL cards for their April 4-6th, IOTA Expedition to Cat Island (NA-082) have arrived from the printer, and they look wonderful! You can check out the K5C web site to see the QSL card and also the photos, the story, and other expedition stats at: http://www.mdxa.org/k5c_03.html
QSLs should be in the mail.

Ron, AC7DX, reports, "I apologize to all that were awaiting LT1F and/or L71F cards. I have been waiting about 3 months for printed cards paid for and purchased from UA3AA. No cards have arrived. In the meantime, I ordered cards from UX5UO which arrived in 2 weeks and all request for L71F and LT1F have been answered. Still awaiting LQ7D cards from UA3AA."

OD5/OK1MU QSL CARDS DELAY. Vrata, OK1KT, reports that on behalf of the operator and his QSL Manager OK1TN, he would like to ask the HAM community for patience with the QSL cards managed via OK QSL bureau. They just received 25,000 QSL cards from printer. Pavel will finish his activities from Lebanon at the end of June, and they will send all QSL cards they get via the bureau after his return. Do not worry please, all QSOs will be confirmed for sure!

Rob, PA5ET, reports that all direct QSLs of the last LLDXT trip to OY have been mailed as of May 17th. He currently has no backlog of direct cards. Rob states he is still receiving direct cards without contribution and/or SASE. These QSLs will be sent via the Bureau. Registered letters with QSLs are NOT collected at the Post Office so contact him by E-mail IN ADVANCE (pa5et@muurkrant.com) so he can give you another address. All QSL rules can be found on their Web site at: http://www.qsl.net/lldxt

T9 ONLINE CALLBOOK UPDATE. Nenad, VE3EXY, informs OPDX that there is an international version of the T9 callbook at: http://www.t93y.com/english

Silvano, I2YSB, reports that the complete logs for the recent TX4PG operation (12607 CW, 8901 SSB and 1029 RTTY QSOs) from the Marquesas Islands are now available at: http://digilander.libero.it/i2ysb If there are any discrepancies in QSO data, you should report them to Silvano, I2YSB, at: i2ysb@libero.it

VA2BY and K8DD/VE2 were active from Zone 2, Waskaganish, James Bay, last week. QSL via K8DD. Also, visit: http://www.qsl.net/teamzone2/

XY1M QSL STATUS (Update). OPDX was asked two weeks ago to find out if anyone has received their QSL cards for Hiroo's operation in Myanmar last November. The answer is "YES", and they received their cards within a couple of weeks. The direct mailing address is: Hiroo Yonezuka, P.O. BOX 2659, Vientiane, Laos. Hiroo warns that no Greenstamps are allowed to be sent to Laos. He only accepts IRCs.

Ralph, K2PF, informs OPDX that he is now the QSL Manager for YI/S53R. By the way, YI/S53R was active on 40 meters CW during the CQ WPX Contest this past weekend.

QSL ZW8M from the Island of Mexiana (IOTA SA-042 and DIB69) should be QSLed via CS1GDX, POB 1156, 2736-996, Agualva, Portugal (or bureau).

SILENT KEY. Reports over the past weekend indicate that the ZK1AYL and ZK1SIM operation from Rarotonga (OC-013) by June/VK4SJ and Doug/VK4BP has ended in tragedy. Details are sketchy at this time, but it seems Doug was was killed when a truck hit his motorcycle while still in the South Cook Islands. OPDX and its readers would like to send out our deepest sympathy to June, and her family and friends.

SPECIAL EVENTS (French Activity to Commemorate WWI).....
* Once again, the Departement de la Manche REF Hams will be using the special callsign TM6JUN from June 1-9th. Look for several stations to be active from Utah Beach, one station active from an old bunker (which was used as the first Allied Signal Corps Center in Normandy as early as June 8th in 1944), and another from the Landing Museum. Suggested frequencies are as follows:
CW - 3526, 7026, 14026, 18070, 21026, 24900 and 28026
SSB - 3644, 7074, 14174, 18160, 21174, 24940 and 28574 kHz.
QSL via F5RJM, either direct to CBA (SASE+postage) or via the bureau, but every contact will be confirmed. Suggested Web pages to look/refer to are:
- Utah Beach Museum Web site at: http://www.utah-beach.org/
- Le "Roosevelt Restaurant", Historical house and common wall with the bunker liberated by the General Roosevelt's GI's. at: http://www.le-roosevelt.com/
- Caen Peace Memorial at: http://www.memorial-caen.fr/

* Michel, F6IPS, will be active as TM6SME from June 6-20th. Activity will be from his home in the Sainte Mere Eglise area, which was the

first French village liberated in Normandy during the night of June 5th and 6th of 1944, by the American 82nd (American General Gavin and Brigway) and 101st Airborne Paratroopers (Screaming Eagles, General Taylor). Activity will be on all HF bands using either CW or SSB. Michel will begin each operating session on 40 meters CW, and then he will QSY (bands and/or modes) according to propagation conditions and requests. Also, Michel will monitor the 6 and 2 meters bands CW/SSB. Michel's E-mail address for skeds is: f6ips@wanadoo.fr
QSL via F6IPS, either direct to the CBA (SASE + postage) or via the French REF Bureau. Suggested Web pages to look/refer to are:
- 82nd Airborne Vets Web site at:
http://www.fayettevillenc.com/airborne82dassn/
- 101st Airborne Vets Web site at: http://www.screamingeagle.org/
- St. Mere Eglise Airborne Museum (both in English and the French languages Web Site at:
http:///www.airbornemuseum.org/uk/htm/presentation.htm

- F6IPSs' Web site at: http://perso.wanadoo.fr/michel.f6ips

* During the same period as above, a special VHF, UHF and SHF station will be active using the callsign TM6JDD, and will also entry the French VHF Championship on June 3-4th. QSL via F4OOQ.

* ADDED NOTE: Other activities are planned around this same commemoration time, especially from Sword, Gold, Omaha and Juno Beaches areas.

SPECIAL EVENT. Members of the North Country DX Association (K7ICE) and U.S. Islands Awards program (KL7USI) will host special event operations from the Yukon Territory and Alaska starting November 17th. Look for VY1/K7ICE to be on before and during ARRL's November Sweepstakes Phone Contest from near Watson Lake, Yukon. KL7USI will be on from Hyder Island, Alaska, in celebration of the USI's upcoming 10th anniversary starting around November 25th (14260 kHz). Look for mobile/portable SSB and PSK-31 operations from KL7JR's motor home (the "Icemobile"- WA license K7ICE) by WB7RBN and KL7JR (they will be fine tuning their prototype "Ice Stix" vertical antennas which they hope to market soon)! Listen for them also on the 3905 Century Club nets on 40 and 75 meters. QSL with SASE to KL7JR CBA.

SPECIAL EVENT. The members of the Belgium South Flanders DX Group (SF-DX-AG) will once again activate the callsign F/ON6JUN/P during the festivities in Ranville to celebrate the 59th anniversary of Europe being liberated (D-Day). This special event station will be on the air on all major HAM bands from Wednesday, June 4th to Saturday evening, June 7th. Their QTH will be from the garden of the "Memorial Pegasus Museum" in Ranville. Operators will be ON4AFU, ON4LBV, ON4CJV, ON4CLC, ON5SD and ON6BV. QSL via Victor, ON6BV.

SPECIAL EVENT. Jerome, F5ASD, will be active with the special callsign and special prefix, "TM5SC", to commemorate the last commercial flight of the Concorde Aircraft between PARIS and NEW YORK, May 25th through June 8th. Activity will be on 80-10 meters, satellites (UO-14, AO-27,SO-50 and others)

PSK31 on HF, VHF and UHF. Here are the following suggested frequencies for TM5SC (+/- 5 kHz or QRM): 3777, 7077, 14140, 18140, 21240, 24940, 28440 and 29330 kHz FM. VHF: 144.277 MHz. UHF: 432.200 MHz. QSL via Manager F5ASD. QSL via French Bureau or QSL direct to F5ASD: Mr. Aoutin Jerome, 14 rue Neuve, F-77410 Villeroy, France (Only 1 USD is needed for direct QSL). You could see the special QSL card on Jerome's Web site at: http://fr.groups.yahoo.com/group/f5asd-dx-news/

T33, BANABA. Bob Voss, N4CD, Public Relation Manager Banaba 2004 DXpedition, reports the following: "In March or April 2004 an International team of about 15 well known operators, including most of the award winning Cocos Island, TI9M, group, will be active from Banaba (T33) for a period of about 12 days. The main emphasis of this DXpedition will be to work Europe on all bands; especially on the low-bands. The team will use 5 stations around the clock. When the DX window to Europe is not open, the team will focus on all other areas of the world. Antennas systems with extreme low radiation angles have been specially designed by some of the world's foremost antenna experts to ensure optimum signals into Europe. We will be active from 6-160m in the modes CW, SSB, RTTY, PSK and some SSTV with linear amplifiers available, when needed. We have arranged a suitable vessel to bring us and the equipment safely to and from Banaba, a 2 day trip from Tarawa, Kiribati. It will be a completely self supporting DXpedition since little of the infrastructure of Banaba is left. All food, water, medical support, radios, antennas and electrical power equipment must be brought in by boat. A T33C license has been issued for the team and the required landing permission on this private owned island has been granted by the responsible Council of Leaders which includes an exclusively permit to stay for the purpose of radio operation to our team between now and the time the DXpedition will take place. In the company of the other islands of Kiribati, Banaba has its own complex history, as well as a unique and beautiful culture that has evolved over many generations. Where it stands apart results from its geographical location and the discovery of phosphate on the Island in the late 19th century. A web-site has been opened, and will be updated as frequently as things progress at: http://www.dx-pedition.de/banaba2004 On the web-site you can also find information about the rich history of Banaba. The QSL manager will be announced at a later date."

TK, CORSICA (Castle, Fort and Mill Op). Operators Pierre/F2WS (TK/F2WS) and Tony/TK5XN plan to activate from Corsica a Fort, a French Castle and a Mill starting June 7th and the week following. Activity will be on 40 and 20 meters SSB. QSL via F2WS, direct (envelope + postage) or via the French REF Bureau. Look for the following to be activate (reference numbers are provided for awards programs).
Mattei Mill - References numbers are: DMF 2B.001, IOTA EU-014, DIFM TK-001 and DDCF 2B-08 Canton de Capobianco.
It will be the first Mill activity in Corsica.

Centuri Castle - References numbers are: DFCF 2B-014, JN42QX, IOTA EU-014, DIFM TK-001 and DDCF 2B-08 Canton de Capobianco.

Fort Lacroix - References numbers are: 2B-015, JN42RQ, IOTA EU014,
DIFM TK-001 and DDCF 2B-01 Canton de Bastia.

VK9X, CHRISTMAS ISLAND. Your Editor met Charlie Summers, W0YG, at the
Dayton HamVention, and he told us that he will be active as VK9XG from
October 26th to November 8th this year. Charlie states that he will be
mainly concentrating on the low bands and RTTY. Also, Force 12 is sponsoring
the antennas and Lance Johnson Engineering has supplied the necessary preamp
and terminating resisters to phase a pair of pennants for the USA. He will
not be on 24 hours a day but will do his best to make 160 and 80 meters a
real possibility for Stateside hams. QSL via W0YG, please direct.

VP5, TURKS AND CAICOS ISLANDS. Paolo, IK2QPR, informs OPDX that he will
be active from Providenciales Island (IOTA NA-002) as VP5/IK2QPR from
August 16-23rd. QSL via his home callsign.

XU, CAMBODIA. Danny/M0GMT (aged 19) and Oliver/DJ9AO (aged 21) who are both
members of the WWYC (World Wide Young Contesters Club, http://www.wwyc.net),
will be operating from Cambodia, from August 4-18th. Their callsigns are
yet to be confirmed. QSL is via G3SWH, bureau or direct (QTHR). They will
be operational on all bands 160-6 meters, CW and SSB only. For further
information and updates, please visit the DXpedition Web page at:
http://www.geocities.com/dxpedition2003

XW, LAOS. Champ, E21EIC (aka XW1IC), informs OPDX that he may be on 6
meters very soon from here. Hide, JR5XPG, is shipping a 6 meter 5 element
yagi to Champ's address in Laos. Operating on 6 meters will be new for
Champ because he is not allow to be active on that band in Thailand. He
is expected to be there June 3-23rd (possibly to the 30th).

ZA, ALBANIA. Remember that the Italian team of operators will be active
this week (May 29th through June 3rd) signing ZA3/home call. QSL via
their home callsign.

Late Announcements for the CQ WPX CW Contest
(Mainly for QSL Routes and added Interesting Facts)

4L8A - Vakhtang/4L8A was active from Georgia as a SOSB (20m) HP entry.
QSL via OZ1HPS.
8P1A - Tom/W2SC was active (from Barbados) as a SOAB entry. QSL
via NT1N.
8S5A - Ingo, SM5AJV, was active from Sweden as a SOAB entry. QSL
via SM5AJV.
9K9X - Al-Ajmi/9K2RR was active from Kuwait as a SOSB (40m) entry.
QSL via 9K2HN.
A61AJ - Sejo/T97C was active from U.A.E as a SOAB HP entry. QSL
via N4QB.
C8A - Vlado, ZS6MG, was active from Mozambique as SOAB HP entry.
QSL via ZS6MG: Vladimir Karamitrov, P.O. Box 1788, Bramley 2018,
South Africa.
CO8LY - Eduardo/CO8LY and Juan/CO8TW was active (from Cuba) as a
Multi-2 entry. QSL is via EA7ADH.

CT3EE - Cornelius "Con"/DF4SA, was active from Madeira Island as
a SOABLP entry. All QSOs will be confirmed via the bureau
automatically. Return QSLs are not necessary. If anyone still
wants a direct QSL, send it to: JOSE LUIS PINTO CAMACHO,
CAMINHO DO MONTE; 66 - Madeira Island, FUNCHAL 9050-084,
PORTUGAL.
CT9A - Sampola/OH6RX was active from Madeira Island as a SOAB HP
entry. QSL via OH6RX. He will be here until May 27th.
E21CJN - Thamrougsan/E21CJN was active from Thailand as a SOSB(15m) HP
entry. QSL via W3PP.
E21EIC - Champ/E21EIC was active from Thailand as a SOSB (15m) entry.
QSL via E21EIC.
HS0GBI/2 Cy/HS0GBI was active from Thailand as a SOSB(40m) LP entry.
QSL via home callsign.
HS4BPQ/9- Yong/HS4BPQ was active from Thailand as a SOSB (20m) entry.
QSL via E21EIC.
LU5FF - Javi/LU5FF was active as a SOAB LP entry. QSL via EA7JX.
OD5/OK1MU-Pavel/OK1MU was active from Beirut as a SO HP entry. This
will be his last contest from Lebanon. He will go QRT about
August 1st. QSL via the Bureau or direct via OKDX Foundation
or OK1TN.
PX2W - Hamilton/PY2YU was active from Brazil as a SOSB (15m) entry.
QSL via: Hamilton Oliveira Martins, Rua Rui Coelho de Oliveira
Filho, 131, Jd. Panorama, 18030-020 Sorocaba, SP, Brazil.
R300SP - Operators RW1AC, RV1AW, RA1AIP and UA1ARX were active from
Russia as a Multi/2 entry. Also, celebrating 300 years of
Saint-Petersburg. QSL via RU1AE.
SI9AM - Operators SM3CER, SM3CVM, SM3EAE and SM3FJF were active from
Sweden as a Multi-Single entry. QSL via SM3CVM, direct to CBA
or via the bureau.
TI5N - Bill/W8QZA was active from Costa Rica as a SOAB QRP entry.
QSL via W3HNK.
TK/S52A - Franc/S59AA was active from Corsica as a SOAB LP entry. QSL via
S59AA.
TM7A - Laurent/F8BBL is authorized to use this callsign from France
between May 24th and June 7th, and during the contest. After
the contest, look for activity on HF + WARC and 6m. (CW/SSB/
RTTY/FM). QSL via F8BBL (Bureau or direct).
TO5AA - Activity is from FM5BH's QTH on Martinique as a SOAB HP entry.
QSL via RW3RN. QSL direct by E-mail request if worked 3 or
more QSO in the contest. E-mail address is: RW3RN@tmb.ru
VC1R - Andy/AE6Y was active from VE1JF's QTH in Nova Scotia during
the WPX CW Contest. QSL to VE1JF.
VC6A - Gary/VA7RR was active from the VE6JY station as a SOSB (20m)
entry. QSL via VA7RR.
VC6X - Bill/VE6BF was active from the VE6JY station as a SOSB (15m)
entry. QSL via VE6BF.
YM2ZF - TA2ZF (ex-M0SDX) and UA9CLB were active from Istanbul,
Asiatic Turkey, as a Multi-Single entry. QSL via UT2UB.
ZM1A - Operators ZL3CW, ZL1GO and ZL1GO(JA4EKO) were active on all

bands. QSL via ZL1AMO.

*** ADDED NOTES ***
Visit Bill's, NG3K, "Announced DX Operations" Web page for QSL and upcoming DX/Contest activity at: http://www.ng3k.com

Zrinko, DL/VE3ZIL, informs OPDX to look for fresh QSL info from the CQ WPX CW Contest to be published on the following Web page on Tuesday, only two days after the end of the contest. Please visit: http://www.contesting.info

Hi,

I am trying to send to Thom, WI8W, manager for the "1000 miles per watt" award my log and documents but his email wi8w@arrl.net has permanent fatal errors.

On QRZ there is a link to Big rapids Area Amateur Radio Club but no valid email.

Can someone give me the valid email of Thom ?

Thanks in advance

The front page and the message boards are fine, but some of the
content and gallery pages have a background image on them that kind of
makes it hard to read the text on the pages. For some of the older
crowd I can see it being a big problem.

Not really a problem with your broadband, lots of animations and other
doodads make it very CPU intensive on your machine.

874. LOTW & RedHat 8?

Newsgroup: rec.radio.amateur.dx
Date: 2003-05-29 12:11:00 UTC
From: Doug Smith W9WI <w9wi@invalid.invalid>
Message-ID: <3ED5F8B4.1020302@invalid.invalid>
Source record: 10158

Hopefully this is at least somewhat on-topic<grin>...

Has anyone succeeded in installing the ARRL Logbook of the World beta on
RedHat 8.0?

I tried last night, using the latest stable version of wxWindows, but
the TrustedQSL installation couldn't find wxGTK. TQSL is asking for
wxGTK 2.2.9 "or better" - figuring there was something wrong with 2.4.0
I tried installing 2.2.9 instead but at that version the wxGTK RPM
refuses to compile, showing fatal errors in the "make" process.

Bourges (Center France) will be on the air on Friday, May, 30th between
09h30TU and 12h30 TU for special musical event : EUROPA Bourges.

We will try to make some QSO with the cities "linked" to Bourges as :
AUGSBOURG (Germany
PETERBORGOUGH (UK)
AVEIRO (Portugal)
PALENCIA (Spain)
FORLI (Italy)
KOSZALIN (Poland)
IOCHKAR-OLA (Russia)

If your are located on other cities or countries, you are also welcome.

The frequencies : On Friday (May, 30th) from 9h30 TU to 12h30 TU on 7080 kHz
and 14140 kHz in SSB mode.

Call : F5IAE/P

More informations on : http://www.ref-union.org/ed18/index.html and check
EUROPA Bourges Events"

Best regards

Hello Everyone,

Do you know how much you loose each time on
DX?

Look at my coax table, so you can compare many
coax cables (also at different frequencies!!!).
There is also calculation software to see the end
results.
Also we have links to many antenne factories.
Many new software for amateur radio (also
soundcard).
Satellite tracking software, and frequencie chart.
Kenwood information page for reset code's, and
microphone wiring information.
Power output problems?, we have many datasheets
for power modules.

I tried both 2.2.9 and 2.4.0 on my Debian "sarge" system and found that
2.4.0 wouldn't work, but 2.2.9 did. With 2.2.9, I had to create some
symbolic links, since the file names didn't provide quite what it was
looking for.

I believe the band was open from here to South Dakota all night. (61MHz TV from southwestern Kansas was in when I went to bed at midnight; when I woke up again at 6am, I promptly saw Pierre, South Dakota on 83MHz.)

The *FIRST EVER* reception of digital TV via Es happened at 7:20 (Eastern time) this morning, when a Lexington, Kentucky DXer decoded enough of a Rapid City, South Dakota digital station's signal to identify it. KOTA-DT is on channel A2, 54-60MHz. http://www.dxfm.com for pictures.

Most observers think last Sunday afternoon's opening was better though. I heard Toronto for the first time ever on FM BCB (CBC Radio One, 99.1MHz); contacted W4TYU, Knoxville (300km/180mi.) on 15 meters by Es; and worked six Europeans on 10 meters via multihop Es. (Slovakia and bordering countries)

2003 has already been a far better Es year than 2002, and the season has only just started...

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th/May, through Sunday, 1st/June there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, A2, A3, A4, A6, A7, A9, AP, BV, BY, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP5, VP6, VP8, VP8/h, VP8/o, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS. On June 9th, Fritz, N6UK/DL4TT, will be in New York and plans his next operating session at the club station 4U1UN. The band choice will depend on shortwave conditions and the status of the roof/antenna work going on at the moment. Mode will be CW. As usual, QSL

only via Box 3873, Grand Central Station New York, NY 10163 USA.

4W, DEMOCRATIC REPUBLIC OF TIMOR LESTE. Thor, 4W3DX, continues to be active on 21002 kHz after 1330z and 14002 kHz between 1300-1800z. Also, watch around 7005 kHz after 0945z. Peter, 4W3CW, has also been active at various times on 40/30/20/15/10 meters. Watch cluster spots for him.

5B, CYPRUS. Alan, G3PMR, is expected to be active as 5B4AHJ until June 22nd. QSL direct to home call.

5X, UGANDA. Christian, 5X1CW, was heard this past week on 21005 kHz around 1930z. He can sometimes be found on 14005 kHz around the same time. QSL via his home callsign F6GQK (See notes under QSL INFO AND NEWS).

7P8, LESOTHO (DXpedition Update - Also 3DA callsigns announced!). Team Leader Charles Frost, K5LBU/7P8TA, announced this past week that the "July 18-25th Lesotho 7P8 DXpedition" sponsored by the Lone Star DX Association and the Texas DX Society has added an amateur satellite mode to its planned operations. The operation will be on the AO-40 satellite. "The uplink will be U--band (70cm) uplink on U-band 435.550 to 435.800 MHz CW/LSB and S2 (2.4GHz) downlink 2401.225 - 2401.475 MHz CW/USB", Frost said. Equipment including antennas and a down converter were donated by Wayne Estes, W9AE, and a spare down converter was donated by Bruce Paige, KK5DO. The list of operators are:
Charles Frost, K5LBU/7P8TA Madison Jones W5MJ/7P8MJ
Igor Zdorov, W0IZ/7P8IZ Neil King VA7DX/7P8NK
Dave Anderson K4SV/7P8DA Tom Anderson WW5L/7P8TA
The 7P8 operation will be an all mode, all band operation. They hope to have at least one station on the air 24 hours a day. QSLs will be handled by each operator separately via their home callsigns as each will have their own 7P8 call. ADDED NOTES: Dave/K4SV and Neil/VA7DX will also be operating from Swaziland (3DA) after 7P8. Their callsigns will be 3DA0SV for Dave/K4SV and 3DA0WC for Neil/VA7DX. QSL via their home callsigns. THE COMPLETE UPDATED PRESS RELEASE will be sent to all OPDX InterNet Subscribers as an additional bulletin.

9A, CROATIA (Islands Activated). Tibor, 9A/HA3HP, plans to activate some of Croatian islands as:
June 7-11th: The Island of Ugljan (CI-134, EU-170)
June 12th : The Island of Pasman (CI-085, EU-170)
June 13th : The Island of Murter (CI-074, not IOTA)
June 14-15th: - Gubavci (CI-487, EU-170)
- Maslinjak (CI-256, EU-170)
- Prisnjak (CI-374, not IOTA)
- Prisnjak Mali (CI-488, EU-170)
- Skoljic V/M (CI-404, EU-170)
- Tegina (CI-413, not IOTA)
- Vinik V/M (CI-375, not IOTA)
- Visovac (CI-486, EU-170)

CQ0, PORTUGAL. The "Association of Radioamadores da Vila de Moscavide" (ARVM) will be active with the special callsign CQ0FY during their Field

Day (June 14-15th) to celebrate the 15th anniversary of the A.R.V.M. QSL via CT1RVM, direct or by the bureau.

DA, GERMANY (Special Event/Field Day Activity). On the first weekend of June (7th/8th), the European CW-Field Day-Contest will take place. Helmut, DL7MAE, reports that "this is one of the biggest events for German hams during the entire DX-year. Many can learn how to build up a Contest or emergency station and to learn how to set up a station for a DXpedition. Our club this year will have more antennas up then ever." The reason is, that the city of Erding (next to Munich) is celebrating its 775th anniversary with festivities and amateur radio activity. The Erding Radio Club wants to give as many DXers and Award hunters as possible the chance to work their "775 Years City of Erding" award. DX stations need to only work them on three bands to qualify for the award, while EU stations need only four bands. The award is "FREE" of charge, only postal-fee is required. Their callsign will be DA0ED/p and a QSL will be sent through the bureau for each contact automatically. Details of their QSL card and award (now rules are also in English) and much other information about their local Erding club can be found on the Web page at: http://www.ov-erding.de

EN720, UKRAINE (Special Event). Look for special event callsign, EN720K, to be active from now through July 15th to celebrate the 720th Anniversary of the Rivne City. Stations will be operated by members of Rivne DX Club: Paul/UT1KY (ex-EM1KY), Igor/UR5KCE and Taras/UR5KDX. QSL Manager is IK1GPG: Massimo Balsamo, Strada Statale 28 Nord # 7, I-12084 Mondov=EC (Cuneo), ITALY. All QSLs will be sent automatically via the Bureau.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS (IOTA Op). Look for operators Barry/G4MFW (ZS1FJ and ZL1MFW) and Phil/G3SWH to be on Mangareva Island in the Gambier Islands of French Polynesia (IOTA OC-063) and from Rurutu Island in the Austral Islands (IOTA OC-050) between July 10-22nd. The actual dates of each operation are to be decided, but they hope to be on each island for at least five days. Propagation permitting, they will be active on all bands from 40-10 meters on SSB and CW. They hope to work as many European, North American and ROTW stations as possible. Special callsigns have been applied for and will be announced as soon as they are known. The QSL route(s) will also be announced later. Donations towards the high cost of this expedition are invited and may be sent to G3SWH.

FH, MAYOTTEE. John Warburton, G4IRN, will be active as FH/G4IRN from Mayotte Island (AF-027), September 16-23rd. Activity will be on 40-10 meters mainly on CW using only 100 watts into a vertical antenna. QSL via G4IRN (QRZ.com).

HS0, THAILAND. Charles Harpole, K4VUD, is now active as HS0ZCW until June 15th. He is expected to be active on 80/160 meters, but was heard on 15 and 20 meters CW. Watch around 21025 and 14024 kHz between 1100-1500z.

IOTA NEWS.....
AF-NEW. (UPDATE FROM OPDX.611) Steve, OM3JW, spoke with Ivan/OM3CGN last week and he was told that in spite of the earthquake several days ago, everything is OK and the IOTA expedition to

Habbibas Island will be starting with one day delay (June 2nd)
as 7W4HI. Operators will be on island until June 5th. They
will be on the air a minimum of 12 hours daily, it will depend
on the local power. However, they will also have gas for 3
full days of operations. The crew consists of Ivan/OM3CGN,
Afif/7X2RO, three other 7Xs (we don't know their callsigns)
and members of the Coast guard. Steve, OM3JW, will have a
regular daily sked with OM3CGN, so he will be as a pilot
station (E-mail: om3jw@konektel.sk).

AF-019. Fabio/IT9GSF and a team of operators will activate Lampedusa
Island as IG9A during a few upcoming contests. Look for future
activity as scheduled:
CQ/RJ Worldwide DX RTTY Contest (September 27-28th) Multi-Op
CQ World Wide DX SSB Contest (October 25-26th) Multi/2
CQ World Wide DX CW Contest (November 29-30th) M/S or SOAB

AS-024. Operators Kaoru/JA3MCA, Aru/JA0KNM, Jun/JJ1EQW and Kai/JE3NJZ
will be active as homecall/JR6 from Hateruma Island, Yaeyama
Archipelago, Okinawa, June 6-9th. Activity will be on 40-2
meters SSB and CW. QSL via their home callsigns, direct or
bureau.

AS-058. Johnny, G3LIV, will be active as 9M2/G3LIV from Langkawi
Island until June 9th. Activity will be mainly on CW with
some PSK31. QSL via his home callsign.

AS-073. Tex, 9M2TO, will once again be active from Perhentian Island
from a resort, June 7-8th. Activity will be CW on 80-10 meters
including the WARC bands. He will use an IC-706 w/100w into
a G5RV antenna. QSL via JA0DMV (All QSL cards will be sent
out automatically).

AS-147. Taka/JR3TVH and Natsue/JJ3NAW will be on Rebun Island and
Rishiri Island from July 25-30th, signing homecall/8. Look
for them on 40/20/17/15/10/6 meters CW/SSB. QSL via JR3TVH
either direct or via the bureau.

EU-083. Operators Giovanni/IZ2DPX, Michele/IK2GPQ, Antonello/IK2DUW
and Lorenzo/IK5MDF, who were active this past week as IP1TIN
from Tino Island (IIA SP-002), will be active again July
26-27th. Activity will be on 40-10 meters CW/SSB/RTTY/PSK31.

EU-115. Berthold, DF5WA, who was active last week as EJ/DF5WA from
the Aran Islands (EU-006), will be active this week as EI/DF5WA
from the Irish Coast (EU-115) until June 7th. His activity
will be mainly on CW. QSL via bureau.

EU-125. Helmut, DL7VOX, is expected to be active as SP1/DL7VOX/p from
Wolin Island until June 14th. Activity will be on all HF bands
including the WARC bands. QSL via bureau.

EU-171. Alan, G0RCI, and other operators from the Grantham Amateur Radio Club will be active from Fur Island between June 2-6th as OZ/G0GRC. Activity will be on all bands CW, SSB and maybe SSTV and other modes. QSL cards are not required because all QSOs will be acknowledged within 28 days of the operators' return.

EU-174. Emil, SV8/DJ4PI/p, will be active from Thassos Island, June 5-18th. QSL 100% via his home callsign and Bureau.

OC-140. The "VK6 DX Chasers Club" will travel to Thevenard Island (Mackerel Island group) and be active for 1 week starting June 15th. The Mackerel Islands group, comprising of 10 islands, is situated 22km offshore from the town of Onslow, 1400km north of Perth, on the coast of the spectacular and ancient Pilbara region of Western Australia. The callsign for the DXpedition will be a special one, VI6TI, to commemorate the naming of the island by the French Captain Baudine who led an expedition in 1801-1804 in the ship "Casuarina". Captain Baudine named the island after the Vice Admiral and Minister 1732-1815 - Antoine John Mary France Thevenard. The 8 member team will leave Perth on Friday, June 13th and hopes to be active from the island on Sunday, June 15th, around 0700 or 0800z. Activity will be on or near the usual IOTA HF frequencies. There will also be activity on 6 meters with a 3 elment beam for this band. They will monitor 50.110 MHz. The group's previous DXpedition in November 2000 to nearby Direction Island netted 550 contacts on 6 meters with many contacts into Europe. The group is hoping for similar conditions this time around. For all the satellite enthusiasts, the group will also be bringing along a portable satellite station looking for contacts on AO-40. They will have a Yaesu FT-847 and will operate Mode U/S with a 8 element yagi on the 70cms uplink and 65cms offset dish with K5GNA AIDC 3731AA 2.4GHz down converter. The grid locator is OG77mm. The QSL Manager is VK6NE: Neil Penfold, 2 Moss Ct, Kingsley, WA 6026, Australia. All direct and bureau cards will be answered, and the group hopes to have a full color card available shortly after the trip. For more info, visit the following Web page at:
http://www.qrz.com/callsign/vi6ti
For more info about the beautiful Mackerel Islands go to the following web site at: http://www.mackerelislands.com.au

KH3, JOHNSTON ISLAND. John, KH3/KT6E, continues to be active almost daily on 20 meters SSB. Watch between 14245-14248 or around 14222 kHz between 0500-0800z.

KH9, WAKE ISLAND. "QRZ DX" reports that Kimo, KH7U, informs them that Chuck Brady, N4BQW, left Honolulu Friday, May 30th for Wake Island. He will be there for the next six weeks standing in for the island's doctor who is going on vacation. He will be joining Jake, N6XIV, who has been active on the island recently. Please keep in mind that Chuck is there to work, and he will only be able to operate when he is not doing the job

he was sent there to do. While there Chuck is going to re-position the Force 12 C3SS yagi in a better location and install an inverted L with elevated radials for 80/75/40. On 40 meters, he may be operating below 7.1 MHz, listening up for U.S. calls. He also has a modified military vertical that can cover 160/80/40 and 30 meters. He is taking two 6 meter yagis antennas - one of them is a long-yagi from M2. There will be NO 6 meter beacon. He has an Alpha 99 amp, and will use it IF he has access to 240VAC. It may take him at least a few days to get all of the antennas raised with the help of Jake and island base personnel. Chuck usually works SSB, but has been known to work some CW on his SSB frequency when asked and the pileups aren't too bad. Depending on demand, he may QSY to the CW portions of the bands, but that depends on the antenna situation. Kimo says, "I am NOT acting as a pilot station NOR am I offering to schedule QSOs for Chuck." Kimo will be in E-mail and some telephone contact with Chuck and can provide a route for some FEEDBACK to him. Constructive comments or reports on reception are welcome via Kimo's E-mail address at: kh7u@arrl.net
QSLs for KH9/N4BQW should be sent to his Wake QSL Manager, Dianna Killeen, KB6NAN. An SAE with sufficient U.S. postage; IRCs or the proverbial "green stamps" are requested. Donations are always appreciated. Direct QSLs are always preferred. DO NOT send requests for Jake, N6XIV, to KB6NAN. Follow Jake's instructions for his QSL routing. There will be NO web page nor posted logs for this operation.

KH0, MARIANA ISLANDS. Ikuko, JA5GSG, will operate from Saipan (OC-086) between June 5-11th. His callsign was not provided. Activity will be on HF and 6 meters. QSL via his home callsign.

L28, ARGENTINA (Special Prefix). Radio Club Salta, LU4OC, will be operating as L28OO from June 2-9th from Iruya. It is a little town located at the very northern part of Argentina close to the Bolivian border, and 2800 meters above sea level. Ariel, LU4OO, reports that it is very difficult to get to this town located right on the mountains. The team will operate on all HF bands, SSB, CW and the Digital Modes. QSL via LU4OC. Please visit the following Web page for more information about this operation at: http://www.qsl.net/lu4oc

NEW AWARD AVAILABLE. Kresimir, 9A7K, informs OPDX that the members of the Amateur Radio Club "Koprivnica" are issuing "The Pope John Paul II in Croatia Award" in celebration of the third visit of Pope John Paul II to Croatia. The rules for this award can be found on the following web site at: http://www.qsl.net/9a7k
The rules are translated into Croatian, English, Spanish, German and French. The Award Manager is Kresimir Juratovic, 9A7K.

NEW OFFICERS FOR 2003-2004. The Patriot DX Association (PDXA), sponsors of the DX Dinner at the New England ARRL Convention, have elected officers for the 2003-2004 year:
President - W1AAX, Harry Wilson
Vice President - W1HH, Bob Wallace
Secretary - W1FJ, Al Rousseau

Treasurer - WZ1Q, Mel Cole
Directors - W1ZT, George Johnson; W1TE, Charley Schwartz;
K1TW, Tom Walsh
The PDXA Web page is at: http://www.qsl.net/patriot_dx_club

QSL INFO AND NEWS.....
5X1CW QSLS. Tommy, WE7K, has been asked by Christian, 5X1CW, to pass along information that he only sends out QSL cards while he is at home in France once every six months. He asks for everyone's patience. His next home visit will be this summer. He does not use the bureau but accepts direct cards to his home callsign F6GQK.

Special event station CQ5AA was active over the past weekend to celebrate the 15th anniversary of ARVM (Association of Radioamadores da Vila de Moscavide). QSL via CT1RVM, direct or by the bureau.

Pascual Guardiola, EA5EYJ, informs OPDX that more QSL routes for the CQ WPX CW 2003 Contest are now available at:
http://www.arrakis.es/~ea5eyj/wpxcw03.htm

Terry, KJ6OW, informs OPDX that he has been doing a mail drop service for Vit, EZ8CW, for quite a while now. Starting on June 15th, he will be adding Alex, EZ8CQ, for U.S. hams ONLY to the service. The same mail requirements will apply (2 USD and a SASE) to get the card.

Gil, F5NOD, announced this past week that all FR/F6KDF/T QSLs received direct from F6KDF have now been answered. The last batch of QSLs should be in the mail or be mailed this week (for QSLs received during last month). Gil hopes everybody will have their QSO confirmed. If you didn't receive a QSL or if you need a second QSL or have a QSO problem, you can still send your request to F6KDF or direct to Gil's address (F5NOD address OK on QRZ.com).

Lutz/DL5KUA and Steve/DJ7AO were active this past weekend from Lighthouse Staberhuk on Fehmarn Island (EU-128). Visit their Web page for more information at: http://e09.de

II1D active over the past week was a special callsign for "2003 - The European Year of People with Disabilities". Activity was a demonstration of solidarity with the school for disabled boys of Giaveno (Turin) by IZ1CCE and G.RA.D. (Gruppo RadioAmatori Disabili - Italy Handi Ham). A special QSL card is available. QSL via the bureau or direct to IZ1CCE: Carlo Sobrito, Via I Maggio n. 9, I-10051 AVIGLIANA, (TO) ITALY.

Phil Whitchurch, G3SWH, reports that he is pleased to announce that all direct QSL requests for ZS1RBN received to date have been mailed.

SILENT KEY. "MR. HAMVENTION", Frank, W8OK, became a Silent Key Thursday night, May 29th. For several years, W8OK has been battling cancer. Then, just days prior to the gates opening for Hamvention 2003, Schwab suffered a heart attack. He was also dealing with pneumonia and congestive heart failure. Frank Schwab, W8OK, is credited with getting the Dayton Hamvention started 52 years ago. Also, he was involved with the founding of SWODXA and

several contest expeditions to J6DX. He will be surely missed by his many friends in the Dayton area. OPDX and its readers would like to send out our deepest sympathy to his family and friends.

VK, AUSTRALIA (Camerons Corner DX-Expedition). Several members of the Blue Mountain ARC will be "heading into the outback" on the Queens Birthday weekend starting Friday, June 6th and returning Monday, June 9th. They will be heading to the corner of New South Wales (VK2), Queensland (VK4) and South Australia (VK5). They would like to make contact with as many people as possible, so if you hear them calling "CQ-DX from Camerons Corner", you know they are smack in the middle of nowhere. Their suggested frequencies and times can be found on their Web page at:
http://www.bmarc.oz-hams.org/camerons.html
They request that "If you do make contact, can you take the time to post to our DX forum and let people know when and on what freq you heard us.." Please post in the DX-Expedition forum on: http://www.radiocorner.net

VK9C & VK9X, COCOS KEELING AND CHRISTMAS ISLANDS (Update). Gwen Tilson, VK3DYL, informs OPDX that due to circumstances beyond their control (world conditions, flight schedule cancellations etc.), the YLs going to VK9C and VK9X later this year have had to change their itinerary. They will now operate from Christmas Island as VK9XYL, October 13-27th, and from Cocos Keeling as VK9CYL, October 27th-November 10th. VK3DYL still remains as QSL Manager - more details later.

XW, LAOS. Kamfan, XW1FAN, continues to be active on most days on 14220 or 14225 kHz between 1430-1530z.

YA, AFGHANISTAN. Masa, JG1OWV, informs OPDX that he is helping someone called Sada (a Japanese operator who is staying in Kabul for one year) to get on the air. He is now preparing some low band equipment, and he hopes Sada will get his license this month. The callsign and operation start date will be announced at a later date. Masa states, "This is not a DXpedition, but most weekends we may hear an Afghanistan signal."

YV, VENEZUELA. Operators Dario/YV4GMG, Maria/YV4GMB, Hector/YV4GMH, Jose/YV4FUE and Maria C/YV4FUF are expected to be active on June 10th. Look for them on the following bands/modes: 10/15/20/160 meters and 6 meters. Modes will be PSK31/RTTY/SSTV/CW/SSB. QSL via operator's CBA.

Does anybody know where I can get a copy of the 1989 movie called "High Frequency?"
It's an Italian thriller starring Vicent Spano.
A great murder mystery that any ham buff would enjoy.

I've tried Blockbuster, Hollywood Video, and Amazon; all with no luck.
It seems to be out of print, but I would love to see it again.

Thanks...

Mike

Hello All,

I just received nice antenna information from
VE7BQH.

Now you can easely compare the gain of the
antenna's in the chart!
Nice to see what the boom size does with the
gain!
Many antennas to compare, tonna, flexa, m2, and
many more!!!!!

Just go to http://www.qsl.net/pd0rkc

Click on teh technics button.

Hi,

I try to contact the Amateur Achievement, 99 Oregon Hill Road, Lisle, NY 13797 , but unsuccessfully up to now to get their "200 US prefixes and possessions award" (or more) in the form of a plaque ($50 for DX).

He doe not answer my mails (by post) for months. Do you know if this award is always valid and managed by this association ?
It is well listed in K1BV directory but there is no information about is validity, etc.

I prefer to not loose $50 (I can always sent it registered of course in case of doubt).

Thanks in advance.

Well, I'm sorry that I can't help you with regard to the award and its
activity, but if I can offer any consolation, it is this: You have heard
or worked all those stations, your logbook shows it, and you probably
have the QSL cards in addition to prove it. Let this suffice for the
moment, and what's more, a visitor would probably be more impressed by
the pile of QSL cards ("Wow, so many different stations out there!")
than by a single plaque or certificate hanging at the wall :-)

As for awards and their costs, just my 2 c worth: I'd rather give some
money to a charity than for some wall decoration, as pretty as it may be.
Therefore, if I submit an award application, I prefer those which support
a charity (the Red Cross, for instance).
Maybe a thought for the award managers ...

Hello All,

I've got a verry nice link on my website about
tropo conditions activity in your earia.
You will see 5 nice maps (europe, world.....) it
is the prospection for 5 day's.

Also information about Tropo-scatter, verry
intresting to learn more about Tropo conditions.

Also we have a link to OH2AQ DX-cluster, so
you can see were the DX stations are (freq).

A chart with many tested coax cable's, compare
your loss against other cable's.

VE7BQH send me a chart with information about 100 antenna's.
FLEXA, M-square, Tonna, DJ9BV, and many more.......
See the chart on my page, and compare the gain, intresting to
see what the boom size does with the gain.

Also many software, and kenwood information (connector, and reset info!).

The best place to register your site is at http://www.dmoz.org

Submit your site there, and over the course of the next few months it is automatically added to AOL Search, Google, and many other directories. As far as I know there are no HUGE ham radio web sites where you could get a free listing that would drive any more traffic to your site than a good search engine listing.

Make sure that your entry page has some sort of description in it on what the site actually is and what it pertains to. Then when it gets indexed by the robots you will have links directly to your home page, where you want visitors going first, rather than an interior page.

Hello Everyone,

Do you know how much you loose each time on
DX?

MANY ANTENNAS COMPARED!!!!!!

Look at my coax table, so you can compare many
coax cables (also at different frequencies!!!).
There is also calculation software to see the end
results.
Also we have links to many antenne factories.
Many new software for amateur radio (also
soundcard).
Satellite tracking software, and frequencie chart.
Kenwood information page for reset code's, and
microphone wiring information.
Power output problems?, we have many datasheets
for power modules.

Go to: http://www.qsl.net/pd0rkc

910. QSL adress for KB9FLM/VP6BX (was VR6BX)?

Newsgroup: rec.radio.amateur.dx

Hi

For years I have been trying to find a QSL mgr for VR6BX (now VP6BX, Brian Yound, Pitcairn Isl) for a QSo back in Dec '91. However with no luck so far... Since this is a goodie for my QSL collection I keept searching.

Now I may have a potential mgr; KB9FLM (at least he should positively have been mgr for VR6BX back in 93). I would like to get in contact with him in order to find out if he actually was mgr back in 91 as well.

However I can not find any e-mail adress or snail mail adress on KB9FLM. Can anybody help me on this?

Best 73's
oz5abo, Per

Hello Per,
Buckmaster shows KB9FLM no longer in FCC database.
KB9FLM and VP6BX are both Brian Young,so,best bet might be direct to VP6BX.
Joe

Hi Joe,

Thanks for your response. Funny I ended up looking for the same gay again
when I was searching for KB9FLM.

I guess I am going to give it yet another try directly to Pitcairn.

Thanks for your help,

73/Per

Yes, at least I can tell you of some of them. Have a look at
http://www.qsl.net/ig-fih/gutzweck.html - there you'll find some
examples from Germany, Austria, and Australia. There are surely
more in other countries.

Anyone experienced problems receiving direct QSL from OD5NH?
I have been waiting about a year.

Why is it that you always can tell in advance who you won't receive
any card from?

Ed

I got a card direct from him in 1997 after 57 days. Maybe
a follow-up is in order, if it's been a year. When I send
a direct QSL request to anywhere I need, I usually include
a note saying that "via buro" is OK if direct is a problem,
on the theory that a slow card is better than no card. GL!

I have 2 cards from him. I note that in his QRZ.com listing he states that IRC's are not good in Lebanon and it costs $1.5 for a airmail letter. So two things could of happened, one you sent IRC's or not enough greenstamps, second the mail was stolen before he received it. Stealing mail is common in some countries. My advice is to try again. Send greenstamps, put nothing on the envelopes that shows anything about ham radio. Use security envelopes and put a piece of blank paper inside with your return envelope that hides the fact there is anything inside other than a letter. There is no sure way to always get a card but these things help.

What Martha is accused of doing is:

1 Insider Trading - which is illegal.

2 Obstruction of Justice - which is illegal.

Martha is NOT being "railroaded", she is being investigated.

You say:
>the stock proceeds were approximately two hundred thousand dollars - a tiny
>faction of her wealth. (She didn't get rich off of this)

Do you mean to say the rich should be treated differently from the
rest of us?

Carlos:

You might do better if the site supported "alternative" browsers. With Netscape 4.75, your navigation bar doesn't display at all, so the site is essentially dead for most purposes with users that happen to use Netscape. It probably is also a problem for any of the other "alternative" browsers as used by PC and Linux users....

The Javascript you have coded for the menu.html frame is disfunctional, and if you really want people to visit your site, you should consider dropping the "rightclickprotected.js" you are currently using.

By the way, anyone with a decent amount of expertise can save anything from your site anyway, even if you have a right-click-protector in place... They are really only effective for the novice user.

Thanks
--Rick

Rick,

Not to start WWIIII, and being slightly familiar with browser
compatability issues since I've done a few web sites, I have a
quick question.

Why, since Netscape 4.xx is vintage 1998, and since Netscape 7 is
a free download, would anybody want to even THINK about using
Netscape 4 for a browser ?

His stuff displays perfectly with the current version of Netscape.

How long do auto parts stores have to stock model T parts ?
Netscape is FREE. Internet Explorer is FREE. Seems to me that
if you chose to use BooBooBrowser Version 0.98 Beta and things
don't work, that's your problem.

But I agree. Anybody that's using BooBooBrowser Version 0.98
Beta DEFINITLY has a problem.

I know we're hams, and we hate to get too modern too quickly,
but let's get real for a change.......

He also would do better if he has his stuff hosted someplace where
it didn't take half an hour to download an HTML page and was up
more than 75% of the time, but that's another discussion.

73, Jim KH2D

i found netscape 4.7x to be the best of the 4.xx and netscape 6
(really 5) to be a crock of __________ in comparison.

netscape 7 may well be out but because of netscape 6, some poeple
might like to stay with what they know works.

can someone tell me what the relationship/links are between
mozilla and netscape ?

Netscape 7.0 had some pretty nasty problems but most of them seem
to have been fixed in 7.02.

Hmmm... strange...

Win XP Home (fully updated) works just fine here with ~all sorts~ of older, pre-XP software (suitably patched and updated as required). I mean dozens and dozens and dozens and dozens of old, pre-XP programs. Only a very small handful of really old (typically Win95) junk won't work at all. Hardware is the same - the only hardware that I can't make work is the JamStudio Tablet. Everything else (90%) is fine.

The key thing is to find the required SW patches and generally stay up to date (some MS updates contain 'compatibility updates' that help). For example, it only took one free download Disney XP-patch to make a whole slew of Disney software to spring to life - that patch also opened the floodgates for bargain $10 SW for my little boy. Many companies provide updates by either free downloads or free CD mailings.

Excuse the O/T, but I hate to see people having troubles with XP... Managed appropriately, it works great even with most older software (suitably patched). But do your own research before you plunge into it because there are, of course, some older programs that just won't work.

>Why is it that you always can tell in advance who you won't receive
>any card from?

>Ed

Usually best to include an IRC or green stamp (I don't know if you did originally) - these get priority service as far as the dx station is concerned.

Put yourself in the Dx'ers shoes Ed, he may have been doing a few contests and your card arrived with several hundred others at the same time and may possibly be mislaid.

Don't be so hasty to knock him down on the newsgroup Ed, if he reads your posting in a negative way you could be correct about never receiving a card ;-)

Believe me, it is hard work writing out 85,000 QSL cards + unknown thousands of SWL cards !!!
Mailing each one individually and card/printing/envelope costs taken into consideration you are looking at upwards of $90,000 US. That is an awful lot of dosh - especially with no sponsor, wife, 2 kids, a dawg, pond full of fish, 75 gallon aquarium and a new rig to support <grin !>

Steve ZC4BS

ps I am still getting direct cards for QSO's of over 12 years ago - logs still kept and of course QSL's being issued - still amazing though !!!

"Richard Clark"
> Not everyone wants to be their own SysAdmin.

Since doing a clean install of a new OS is the recommended process (as opposed to trying to do an 'upgrade'), you need to reinstall all of your old SW anyway. The whole process is huge if you have a large number of programs. Finding, downloading and installing patches is just part of the overall effort. If you can handle installing a new OS (like XP), then you can handle finding and installing the requisite patches for your existing SW. If you can't - don't.

My main point is that such patches do, in many cases, exist. Being "XP Patches", they obviously help... If people are complaining about the compatibility of XP, then they might not be aware of these patches (or maybe they're trying to run DOS programs...).

One company even couriered (overnight) me a new version of the SW on a CD simply by completing an on-line form. This for a $25 bit of pre-XP hardware.

Excuse the O/T...

"MattD.." <troubles snip>

Sorry that you're eXPeriencing so many problems. I can only relate my eXPerience which is obviously vastly less troublesome than yours. It certainly isn't lack of trying different programs - we are regular 'dumpster divers' for bargain pre-XP SW - we don't have 100 old titles yet, but we're getting close. We certainly spare no expense to procure unusual and interesting PC hardware - we've got dozens (USB microscope, USB music mixer, USB video editing control, unusual joystick and controllers, etc. etc. - all pre-XP).

Perhaps there's something about my approach that is different than yours? Which approach recommends itself ?

Good luck.

Soon, Netscape-like browsers such as Mozilla will only run under
Linux, now that MS is distributing IE with AOHell (AOL owns Netscape,
for those not in the know).

Source record: 10319

Hey!

So, I'v got a Sony 7600GR which is a nice radio indeed.
I live in an apartment building in the middle of the city,
however when on the balcony i can hear stations from all over.
In fact yesterday received some voice transmissions from stations
all over us (los angeles, seattle, atlanta and boston) talking to
a guy in Russia (and i could, though barely, hear him too) - on the
14Mhz range. I am in NOVA, so it ain't bad.

However, I am trying to get some RTTY reception going and it seems that
whenever i connect line output of the radio to my sound card line in,
i get enormous amount of noise. It drowns all reception completely.

I found an article saying that i should disconnect the ground between
the radio and computer by using a 1:1 transformer in the line. Done
that, the wire is physically disjoint (tested with multimeter) and
the audio works but the horrible noise is still there.

So what else can i do? How do people cope with this? It seems that
the noise is created by CPU itself, i turned off monitor, speakers and
DSL/wireless but it is still there.

Help!! I'd really like to get RTTY working!!

The Computer Operator is the lowest-of-the-low in the world
of computing, much lower than the M3 in the CB hierarchy.

Nowadays, they call themselves, "sysadmin", but they're still
computer operators, the turnip-brained of the computing world.

For what it's worth, my 2 pence / cents / currency of your choice..

We don't have much WinXP at work, but obviously we have to evaluate because
of MS's propensity to allow older OS's to fall by the wayside.

In the department that I'm responsible for, we currently have 14 P2.4GHz /
512Mb / 80Gb boxes running XP Pro and Office XP Pro. User authentication and
applications are served by Novell Netware 5. whatever and ZenWorks.
These are used by secretarial staff and are in constant use.
With one exception, all of the old peripherals (printers scanners etc.)
were absolutely no problem.
The exception was a Mustek 1200USB scanner and despite having XP drivers
available for download, I found they didn't work. So I used the Win2000
drivers instead.. works faultlessly.

I have had a number of discussions with tech support people, and the universal advice seems to be that if you can't find a WinXP driver, find a Win2000 driver instead.. so far this has worked fine for me.
We also have all sorts of weird kit to plug in to computers as well.. electronic whiteboards, microscopes, data collection and logging kit, a scanning tunnelling electron microscope, digital cameras etc etc.

The rest of the computers in the department (approx 200) are a mixture.
In the open access rooms, we use Win2000 Pro.. again apps and authentication handled by Novell.
The staff computers are a mix of Win95 / 98. I never upgrade an old OS, just too much trouble afterwards. I suspect that quite a few people see an upgrade as a way to fix existing problems, this is wrong. All issues should be sorted before upgrading, if you must upgrade, but by far the best way is to zap the HD and start afresh.
Then we have the roaming laptops, most are new and run XP Pro, there are a few older ones running Win98.

The server farm runs all manner of OS.. Linux, Unix, SunOS, HPUX, Windows 2000 Server and Novell Netware. Most email is handled by MS Exchange.
I finally removed the last Netware 3.1 server a couple of years ago.

On balance, most problems with desktop machines are caused by the user doing silly things.
This has not changed either, they did the same things when we only had DOS or WFW3.11!
User brainstorms are definitely the main cause of problems these days for us.

So I'm quite happy with WinXP so far and use it here at home as well where I haven't had to reinstall it yet either.. used to find that Win98 needed reinstalling after 18 months or so at home. I don't have XP on this box as you can see from the headers.. it's only a P233 with 64Mb RAM, but happily runs all the radio software etc. under Win98.
I think XP would actually be OK on this box, but it would be slow so I'm not going to bother.

Has anyone else noticed that some of the new fancy cases with pretty moulded fronts cause physical floppy disk problems.. had to have all of the new XP boxes' cases changed from the ASUSTek cases to something else because 9 times out of ten the floppy disk would not go into the drive properly. Fiddling around with the physical mounting of the drives did nothing to help!

Now I'm off for a free feed!

Paul MW0CDO.

> Walt Davidson Email: g3nyy @freeuk.com

OK then.. I'll get back on topic in a moment but..

128Mb RAM.. LUXURY :-)!! I can't fit any more SIMM in this box, all the slots are full.

This box also has a Mitsumi 32x CDRW in it, works faultlessly as does a 32x CDR.
Both run in UDMA thanks to a BIOS update found on the mobo makers' site.

Likewise, I usually apply the legitimate MS patches once in a while.

Now to get back on topic, it also has a D-Link DWL-520 WiFi card installed.
Much to my surprise, it works faultlessly, despite the PC being way below the guideline specs supplied.
If anyone is thinking of WLAN kit, the D-Link stuff works well.
They have firmware downloads at the web site to allow the 11Mb kit to work at 4x speed.
At the price, it's cheaper than buying 54Mb kit and only a tad slower.
The units I have are DI-614+ access point and DWL-520+ PCI cards.

And I can leave the thing running for days with Mix or whatever watching PSK with the waterfall running at maximum speed without it falling over.

There be life in these old dogs yet..

Paul MW0CDO.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS (Possible Change/Update). Fritz, N6UK/DL4TT, informed OPDX that he would be active as 4U1UN on June 9th, however, some bulletins are reporting that he will be active on the 10th. We have been trying to contact Fritz over the weekend to confirm the change. It is

recommended to watch on both days for his activity. Remember, his band choice will depend on shortwave conditions and the status of the roof/ antenna work going on at the moment. Mode will be mainly CW. As usual, QSL only via Box 3873, Grand Central Station New York, NY 10163 USA.

5J0, SAN ANDRES ISLAND (Update to OPDX.606). Eight members of the Florida DXPedition Group will be operating from San Andres Island during the period of October 20-28th. They will run four to five stations before and after the CQWW SSB Contest. They have been assigned 5J0J as their contest callsign. The group is still looking for any assistance and is asking for donations to help offset the cost. If you are interested in donating, you may send it via credit card through PayPal (Paypal ID: w4wx@bellsouth.net) or mail to: Bill Gallier, FDXPG, 2694 North Camel Ave., Middleburg, FL 32068
For information on their team and activities, visit their two web pages at:
http://www.geocities.com/hk02003
http://www.geocities.com/w4wx1/upcoming

9A0, CROATIA (Special Event). As announced last week, Pope John Paul II, visited Croatia over the past weekend. Amateur radio stations from some Croatian towns have activated the special callsign 9A0PAX. This callsign will be in use from now until June 30th. QSL Manager for this station is Kresimir Juratovic, 9A7K, P.O.Box - 88, HR-48001 Koprivnica, Croatia.
The special event station's callsign 9A0PAX is valid for the "The Pope John Paul II in Croatia Award". The rules for this award can be found at:
http://www.qsl.net/9a7k

9A, CROATIA (Lighthouses and Islands). A DXpedition is being organized by the President of CIHG and WLH checkpoint Kresimir/9A7K, WLH Manager Phil/F5OGG and Branko/9A6BND, who are all members of Croatian IOTA Hunters Group - 9A0LH. They will be active from many Croatian lighthouses and islands between June 21-30th. During this activity they will use the following callsigns: 9A7K, 9A6BND, 9A/F5OGG/p and 9A0LH. QSLs are via their individual home callsigns; 9A0LH via 9A7K. The list of all Croatian lighthouses and islands that they are going to activate are:
Barjak Mali (EU-016, LH1219, CLH 008, CI399)
Bisevo (EU-016, LH901, CLHG050, CI007)
Daksa (EU-016, LH 0111, CLH 017, CI 165)
Grebeni (EU-016, LH 0483, CLH 036, CI 174)
Host (EU 016, LH0938, CLH039, CI174)
Sveti Andrija (EU-016, LH 0388, CLH 143, CI 216)
Vis Island (EU-016, CI142)
Palagruza (EU-090, LH0057, CLH100, CI084)
Cres (EU-136, CI 12)
Losinj (EU-136, CI 058)
Susac (EU-136, LH 1430, CLH047, CI109)
Susak (EU-136, LH 0444, CLH 031, CI108)
Babac (EU-170, LH 831, CLH 004, CI 005)
Pasman (EU-170, CI085)
Ugljan (EU-170, CI134)
Blitvenica (No IOTA, LH0913, CLH014, CI156)
Prisnjak (No IOTA, LH 1492, CLH 110, CI 374)

Mulo (No IOTA, LH 0137, CLH 085, CI 458)
Murvica (No IOTA, LH 0806, CLH 091, CI 457)
Murter (No IOTA, CI 074)

You can also visit the following Web page for more details and updates at: http://www.qsl.net/9a7k

A2 & 7P8, BOTSWANA AND LESOTHO (African Double Jump DXpedition - Update). Fabrizio, IN3ZNR, reports that they have lost a member of their team. Mauro, IN3QBR, will not be joining the team on this DXpedition (no reason given). He reports everything is ready for this African effort. Operators are: Joe/AA4NN, Aldo/IK2ANI and Fabrizio/IN3ZNR. Activity will take place between June 28th- July 13th. In June, they will be traveling to South Africa, so it is possible for some operations using ZS/home calls. The operation in Botswana will take place starting on July 2nd through the 6th. The operation in Lesotho will take place starting on July 7th through 11th. The plan is to run both CW and SSB with two stations on the air. In spite of the summer season, the CW guys will make a great effort on 80 and 160 meters. The Phone operators will be monitoring 50.110 MHz for checking the 6 meter band. They will also pay attention to the frequencies of USA General Class band plan, 10-15-20 meters. The callsigns are already assigned:
Lesotho - 7P8NR (IN3ZNR), 7P8NN (AA4NN) and 7P8NI (IK2ANI)
Botswana - A25FV (IN3ZNR), A25NN (AA4NN) and A25NI (IK2ANI)
Send QSLs via their home callsign. For further information, check their dedicated web pages at: http://www.AfricanJump.org

HB0, LIECHTENSTEIN. Members from the Hungarian Pannon DX Club and the P.V.R.Klub Puspokladany will operate from here again this year. The operation will take place between June 22-27th from a rented house at Masescha 1350m ASL. Activity is planned for the HF bands (40-10 meters, including the WARC bands) CW/SSB and RTTY. There will be 3 stations active 24 hours a day by the following operators:
HB0/HA0HW/p Op Laci
HB0/HA0KHW/p Op Feri HG0ETA, QSL via HA0HW
HB0/HA4DX/p Op Tomi
HB0/HA4XG/p Op Geza
HB0/HG4LGN/p Op Boti
HB0/HA5BWW/p Op Ed
HB0/HA7VK/p Op Sanyi
They will be using a FT-840, a FT-890 and a FT-990 with monoband yagis for 24 and 21 MHz, and groundplanes and wire antennas for all the other bands sponsored by DunaX (http://www.pannondxc.hu/dunax).
Cards can be sent to their home callsigns direct or via HA bureau.
For more details, please visit the following Web pages:
Pannon DX Club -- http://www.pannondxc.hu/
P.V.R.Klub Puspokladany -- http://www.c3.hu/~ha0khw/
Liechtenstein -- http://www.odci.gov/cia/publications/factbook/geos/ls.html

INDIAN OCEAN OPERATION. John Warburton, G4IRN, informs OPDX that he will be active as follows:

Seychelles (S7) -- (AF-024) from September 13-16th.
Mayotte (FH) -- (AF-027) signing FH/G4IRN from September 16-23rd.
Seychelles (S7) -- (AF-024) from September 23-27th.
All operations will be mainly CW with 100 watts, on 40-10 meters, into a vertical antenna. QSL via G4IRN (See QRZ.com for details).

IOTA NEWS.....
AS-023. Yoshitake, JJ8DEN, will be active as JJ8DEN/6 from Amami Island June 21-23rd. Look for activity on HF on CW and RTTY. He will be using an IC-706 and HX52A. QSL via JJ8DEN either via the bureau or direct to: Yoshitake Izumi, Minami-24-7, Nishi-1, Obihiro-City, Hokkaido, 080-0011 JAPAN.

AS-032. Yoshitake, JJ8DEN, will be active as JJ8DEN/6 from Yaku Shima Island July 12-14th. Look for activity on HF on CW and RTTY. He will be using an IC-706 and HX52A. QSL via JJ8DEN either via the bureau or direct to: Yoshitake Izumi, Minami-24-7, Nishi-1, Obihiro-City, Hokkaido, 080-0011 JAPAN.

AS-117. Kenji, JA4GXS, will be active as JA4GXS/4 in the IOTA contest from Yashiro Island, July 26th (1000z) to the 27th until 2300z. Activity will be on 40/30/20/15/10 meters SSB and CW. QSL via the bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cho, Yamaguchi, 753-0038 Japan.

EU-023. Andrea, IK1PMR, who was recently active as TX4PG from Marquesas Island, should be active from Gozo Island June 12-19th. This will mainly be a vacation trip for him this time, not a full DXpedition like his TX4PG operation. His callsign is not known yet (probably something like 9H3**). He will operate on 80-10 meters with 100w, vertical antenna + 40m dipole + wires, mainly on CW with some SSB and RTTY/PSK. QSL via IK1PMR (Bureau or direct using the address on QRZ.com).

EU-070. Jacques/F6HMJ and Andre/F6AOI will be active as TM3OR from Ile d'Or from June 13-15th. QSL via F6HMJ.

NA-066. Members of the Escondido (CA) ARS hopes to mount a mini-expedition to Santa Catalina Island for the IOTA contest. Hopefully, more details will be forthcoming.

NA-067. Randy, KD8JN, informs OPDX that he will be active from Hatteras Island (USI NC-005S), North Carolina, from July 19-26th using the callsign KD8JN/4. Activity will be on all bands, primarily on SSB. Suggested frequencies will be the usual IOTA frequencies +/- QRM. Randy states, "This again, is a Vacation/DXpedition, which includes the family. I will be on the air as much as possible, and as propagation and the wife permits! NOTICE!!!! 'IF' the fish are biting, I'll be using my fishing rod more than the radio!! Please be patient. I pay close attention for QRP stations, Kids, and YL's/XYL's. I REALLY listen for the weak signals too! I try to get everyone in the log that wants

to be there!" Direct QSLs to KD8JN: Randall Phelps,
1226 Delverne Ave SW, Canton, Ohio 44710-1306 USA. QSLs 100%
via the Bureau also! SWL's welcome too!

NA-125. Nenad, VE3EXY, informs OPDX that he is too busy to travel to
Zone 2 at this time. So, he has decided to visit Orleans Island
(Zone 4) for a weekend operation. He will sign CK2/VE3EXY/P
from June 13th (Fri. about 2200z) to June 15th (Sun. 2000z).
His activity will be on the following modes: CW, RTTY, and
SSB (but mostly RTTY during the ANARTS contest). His sunrise
and sunset: 0845 and 0035z. QSL via his home callsign VE3EXY.
His suggested frequencies: IOTA or RTTY frequencies. No low
bands. Nenad objectives are:
Outside Contest - DX stations (CONDX permitting)
During ANARTS Contest - 20, 15 and 10 meters
Around Greyline times he will be either on 20 or 30 meters.
His resting periods are: 0400-0830z and 1600-1800z subject
to change if CONDX are good. Nenad requests/states, "I'll have
no access to the cluster. Please post me as much as possible."

NA-NEW and NA-007 (possibly NA-009 and NA-047). Mike/K9AJ and Jim/K9PPY
will activate Somerset Island (a new IOTA, in the Nunavut region
of Northern Canada) from July 13-20th. They may have two stations
on the air, depending on conditions. As there will be no sunset
(less than 500 miles north of Arctic Circle), they plan no
activity below 40 meters on this trip. Their callsigns will be
K9AJ/VY0 and K9PPY/VY0. Susan, K9XYL/VY0, might also be active.
After their Somerset Island operation, K9AJ/VY0 will be active
from Southampton Island (NA-007) from July 22-24th. It is also
possible that some activity might occur from Cornwallis Island
(NA-009) and/or Baffin Island (NA-047) during the time period
July 11-26th, so pay attention to the QTH info given by the
operator. The usual IOTA frequencies will be used on CW and
SSB. QSL to operator's home callsign.

LIGHTHOUSE ACTIVITY.....
Jim/W5AZN (ARLHS #484) and Patty/W5AZO (ARLHS #485) will be activating
several lighthouses on Lake Superior signing with the special callsign,
N8L, between July 16-30th. Activity will mostly be on 20 meters SSB.
Frequencies and operating times will vary from different lighthouses
each day. QSL direct to W5AZN, #10 SASE PSE.

Operators Albert/RV3GW, Vlad/RA3GD, Valery/RW3GU and possibly others
are planning to visit some lighthouses and islands in the Onega Lake
June 12-15th. Their goal is to activate the following three new LHs
for the WLHA and RLHA (RRA) programs: LH 0530 - Vasilisin, LH 0441 -
Sosnovo-Shal'skiy and LH 0407 - Mihaylovets. Their callsigns will be
RV3GW/1, RA3GD/1, RW3GU/1 and possibly others. Their activity will be
limited to 20 and 40 meters CW/SSB and one day (about 5 hours from
morning of a local time) per island. The possible activity will depend
on the weather.

QSL INFO AND NEWS.....
FRENCH POSTAL INCREASE. Gil, F5NOD, informs OPDX that there has been a new postage increase for mailing from France to abroad:
(Reference 1 USD = 0.8 Euro)

F to West Europe (DL, OE, ON, OZ, EA, OH, G, SV, EI, TF, I, HB0, LX, LA, PA, CT, HV, SM and HB9) = 0.5 Euro (0.625 USD)

F to Europe (other than listed) and AFRICA = 0.75 Euro (0.93 USD)

F to OC, AS, NA, SA = 0.9 Euro (1.125 USD)
(Remark: 1 USD will not cover any more postage expense to OC, AS, NA, SA)

Jean-Michel, F6AJA, informs OPDX that the Les Nouvelles DX historical QSL gallery Web site continues to grow. This site contains, more than 1400 QSLs in five different galleries. The Web page is at:
http://LesNouvellesDX.free.fr
Some cards are still needed, and your participation is welcome. Please visit their Web site and send them your comments by E-mail to:
LesNouvellesDX@free.fr

To celebrate, Pope John Paul II visit to the City of Rijeka, his 100th pastoral visit outside Vatican, and his third trip to the Republic of Croatia, members of radio club "Rika" activated the special callsign, 9A100IP. "IP" means John Paul in Croatian language. QSL via 9A1RKA: Radioclub "Rika", P.O.Box 262, HR-51000 Rijeka, CROATIA.

Toni, EA5RM, reports that the S05X QSLs have arrived on June 6th from the printer, so confirmations will start Monday, June 9th.

XQ6ET QSL UPDATE. George, W8UVZ (QSL Manager for XQ6ET), reports that cards for XQ6ET have begun to flow as a large batch goes into Monday's (June 9th) mail from Battle Creek. Verification process is slow with Bob's handwritten logs - as the process takes place over the air when propagation cooperates. Also, Bob reports he has many cards that are ready for QSLing, but he had no blank cards. These (QSLs) are being sent to him this week, so the deserving should QRX sending duplicate requests until mid July as their cards may be in the works! One final reminder for those seeking QSLs. Older style IRCs (smaller size) are not redeemable in George's area. He has gotten several QSL requests, particularly from JA and UA with these older IRCs. Those requesting QSLs should use the newer style CN01 (large size with bar coding on rear) IRCs, US Dollars in their envelopes or US postage on their return envelopes.

T32, EASTERN KIRIBATI. Members of the Western Wireless CC will be active from here between November 23rd and December 7th and participate in the CQ World Wide DX CW Contest (November 29-30th) as a Multi/2 entry. Operators will be Barry/N0KV (T32KV), Bill/K0MP (T32MP), Valeriy/N2WW, Gregory/W0ZA, Paul/NO0T and Tim/N0ZM. All T32 callsigns have not been received yet. They will be active on 160-10 meters including the WARC bands. Modes will be CW, SSB, RTTY and PSK-31. QSLs will be via operators' home callsigns.

T33, BANABA ISLAND (Looking for SUPPORT!). In OPDX.611, an announcement was made that an international team of about 15 well known operators were going to activate Banaba Island for a period of about 12 days in March or April of 2004. Because of the long ocean voyage and the lack of facilities on this devastated island, this will be an expensive undertaking. Each member will be contributing to travel expenses. However, even with this, they will fall far short of their needs. They hope organizations will be able to provide some help. Any amount is appreciated, and they will put your club logo on their QSL card, and it will be included in the credits for the video and articles for all significant donantions. For more information please visit their web site at: http://www.dx-pedition.de/banaba2004
You can send your contribution to:
F5CWU - Florent Moudar, 25 Rue du Castel Salis, 37100 TOURS, FRANCE
-- or --
N4CD - Robert A. Voss, 3133 Charring Cross, Plano, Texas 75025 USA
All contributors will be acknowledged by letter and by a listing on the web site when received. If you have any questions, please feel free to contact Flo at: f5cwu@qsl.net

V2, ANTIGUA. Kevin, WB8XX, will be on holiday from here June 10-16th. He plans to be active (callsign not mentioned) and will try to catch a few European openings on 6 meters during this time. QSL via WB8XX.

VK9C, COCOS-KEELING ISLANDS. Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/DM5TI and Andree/DL8LAS will be active as VK9CT and VK9D from here October 11-23rd. Activity will be on all modes, 160-6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on. QSL via DL2RMC.

VK9X, CHRISTMAS ISLAND. Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/ DM5TI and Andree/DL8LAS will be active as VK9XW, VK9XM, VK9XT and VK9XA, respectively, from October 4-11th. Activity will be on all modes, 160-6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on. QSL via DL2RMC.

XW, LAOS. Son, HS6NDK (XW1N), informs OPDX that Champ, E21EIC, will continue to be active as XW1IC until the morning of June 27th. He has been active on 6 meters (on 50.110 and 50.115 MHz around 1000-1700z). He will mainly be pointing to Japan, Asia stations and sometime to Europe. He was heard this past week/weekend on 17 meters RTTY (18104 kHz around 1330z) and 20 meters CW/SSB (between 1530-2030z or later). QSL via E21EIC.

YA, AFGHANISTAN (Update). Masa, JG1OWV, has informed OPDX that Sada has joined Hiro/JA1CQT (YA1CQ) and the group on June 5th. He was invited to use their club station, YA1JA, on 6th. Sada will temporarily go to U.A.E. where he will pick up his FT-857 that Masa has sent him. Sada will be back to Kabul around June 12th with the equipment. Masa states, thet we can expect Hiro's operation to continue for a few more days until he leaves for the southern area next week.

YB35, INDONESIA (Attention Prefix Hunters). To celebrate the 35th anniversary of ORARI (ORganisasi Amatir Radio Indonesia), 1968-2003, the special prefix callsign YB35AR will be on the air from Jakarta City,

July 6-13th by a lot of YB0 call area operators. Activity will be on all HF bands including WARC Bands, VHF 6m and AO-40 Satelite. Modes are: CW, SSB, RTTY, SSTV and PSK31. QSL via YB Bureau, or P.O. BOX 8000, Jakarta 11000 Indonesia. On July 11th, 12th and 13th, the ORARI in the Jakarta area will organize Jakarta HAMfest. YB35AR will be on 40 and 80 meters for local HAM, if everthing is running well. On July 12-13th, look for YE0HQ (ORARI HQ Station) to participate in the IARU World Radio Championship 2003.

ZK1, SOUTH COOK ISLANDS. Dave/W6AQ and Don/K6IPV are going on the road again. Don states, "This time, we'll stay away from the CW, which neither of us has a great familiarity with, and will travel to the South Cook Islands for the CQ WW SSB Contest the end of October." Don also states, "Licenses have been applied for and a decision is about to be made as to just which delightful place we will stay, but we know it will be next door to Victor, ZK1CG/ZK1USA, who has been a tremendous help in coordinating our trip and promises to help whenever he can. We believe that help will probably be in the form of constructive criticism and the supply of tools and duct tape when necessary. We plan to arrive on Rarotonga the evening, local time, of October 20th and will be leaving on October 29th. We anticipate antennas for all HF bands, 160 through 10 meters, and will attempt to get in a little bit of CW along with a lot of SSB. We understand that South Cooks is the most wanted country, in Europe, on RTTY, so, Don will be attempting to patch together some gear to be able to operate the other digital modes while Dave will be checking out the local dining and wine establishments. We have our wives along, this time, so will not, obviously, 'have at least one transmitter on the air 24 hours a day'. We'll do as much as we can." QSL Manager is to be named later and callsigns will be announced as soon as granted.

And XP runs much slower than Win98SE. I built an AMD XP1800+ system
with 256Mb RAM a while back for a relative and to try it out I installed
Win98SE. The thing flew. Then the person insisted on having WinXP no
matter how much I tried to persuade them otherwise. The hit in
performance had to be seen to be believed. Stick to Win98SE (especially
if you need serial ports for radios).

I upgraded from 4.77 to 7.02 a month ago. Haven't had any more
javascript hangs or other
crashes. Also no more email crashes. Only downside is that I can't
change pages if I have
a "file, save as" window open. Can happen if I go to a link, decide to
grab an image, and
then want to go back to the previous page to find out a model number or
whatever so I
can give the saved image a sensible name.

You've got that right. Anybody who thinks otherwise might want to
Google down and read the journals of the BOFH (Bastard Operator from
Hell).

Some sysadmins / operators are turnip-brained, no doubt... every niche
has some idiots. On the other hand, I've known some sysadmins,
operators, etc. who were highly skilled, very productive, and could
have taught some badly-needed lessons in usability and performance to
some of the programmers who designed the software being run on the
mainframes.

Six has been open just about every day here on the West Coast -- spotty but from So Cal have worked XE, OR, WA, MI, IL, ND, CO, and lots of western states -- tune in to 50.125 or check the telenet packet clusters --- URL: http://www.k6pbt.net/pbt/telnet.html

Best to log and collect Grid Squares --there is a VUCC award for working 100 Grid Squares -- URL:
http://www.arrl.org/awards/vucc/
Also WAS 6M is a real challenge.

Free Grid Square Map At the ICOM site URL:
http://www.icomamerica.com/amateur/index.html
About half way down the page
U.S. Grid Square Map (461 KB PDF)

If you know your long/lat -- ur grid square can be found at URL:
http://www.amsat.org/amsat/toys/gridconv.html
Or you can find it at Buckmaster URL:
http://www.buck.com/cgi-bin/do_hamcall
Or QRZ .com http://www.qrz.com/

And if you make a shaky contact and miss or need to verify a grid square check Buckmaster or QRZ.com and hope the guy/gal didn't move !!!!

Also Artsci sells a Repeater map and this has nice maps by state of the grid squares in detail with an easy way to determine where some one is and easy to determine the US state
URL: http://www.artscipub.com/mapbook/

Since activity can be sparse -- try tuning to 50.125 MHz (National USB Calling Freq) and you can use the squelch (barely) to keep the noise from driving you goofy. When activity occurs, the squelch will open and alert you.

And a contest is coming up ARRL June VHF QSO Party--1800Z Jun 14-0300Z Jun 16 (see May QST, p 101). Should be lots of stations on if the band cooperates. http://www.arrl.org/contests/months/jun.html

**

FEDERAL LAW VS. HAM RADIO: THE CONFUSION OVER HIPPA

A new federal healthier law with the acronym HIPPA is affecting Amateur Radio. Bruce Tennant, K6PZW, takes a look at the recent implementation of the Health Insurance Portability and Accountability Act and its impact on the hobby.

--

If you are a ham with a disability and are a member of a group any other organization that has knowlege of your problem, then listen up. In order to continue receiving most benefits from such a group you are now required under Federal law to fill out and return the new Health Insurance Portability and Accountability Act privacy guidelines forms that you may have already recieved or will recieved from each group.

Its the Federal government that requires the paperwork, and signing it will allow groups that must disclose disability information in the course of routine business to continue to serve you. For hams with disabilities it means that groups like the Handi Hams can continue to provided direct assistance with license renewal or license changes, publish news of individual license upgrades, and even send a birthday greeting by the ham radio's National Traffic System.

What about individuals who do not sign the forms? They will still be able to receive some services offered by these groups, but limited to those which do not involve releasing information about their physical condition. However, in the case of the Handi Hams, a disabled ham could no longer be connected with the groups assistance community of other members and volunteers because of the new federal privacy regulations.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

Full information on the Health Insurance Portability and Accountability Act is on-line at http://aspe.hhs.gov/admnsimp/ (Tnx HandiHams, others)

**

INTERNATIONAL: 40 METER CHANGE LOOKS GOOD

ARRL Executive Vice President Dave Sumner, K1ZZ, says that prospects for a harmonized worldwide 40 meter ham band are starting to look good. Speaking at a recent Dayton Hamvention forum, Sumner says it may all hang on what the United States proposes for the upcoming World Radio Communications conference later this year:

--

Sumner Here

--

Even if a large number of delegations come up with similar proposals, Sumner says that caution is still the by-word until all the voting has been done:

--
Sumner Here
--

You can hear more of what Dave Sumner has to say regarding 40 meters and other issues on this weeks RAIN report. Its in streaming audio at www.rainreport.com. Those without web access can her it by dialing up 847-827-RAIN. Thats 847-827-7246 (RAIN, ARNewsline™)

**

HAM SPECTRUM: 5 MHZ SPOT FREQUENCIES AVAILABLE MIDNIGHT JULY 3

LOOKING FOR SOMETHING NEW IN HAM RADIO? WELL, HERE'S NEWS JUST IN FROM THE FCC AND THE ARRL. I'M ROY NEAL, K6DUE, WITH A LATE BREAKING STORY THAT HAMS HAVE BEEN WAITING A LONG TIME TO HEAR. 60 METERS. 5 MEGAHERTZ …SOON WILL BE AVAILABLE WITH

5 CHANNELS FOR YOUR PLEASURE AND INVESTIGATION. A SECONDARY FIVE CHANNEL DOMESTIC HAM RADIO ALLOCATION WILL BECOME AVAILABLE STARTING AT MIDNIGHT, THURSDAY THE THIRD OF JULY.

FEDERAL GOVERNMENT USERS ARE PRIMARY IN THE 5 MHZ BAND. AMATEURS GET FIVE CHANNELS, 2.8 KHZ WIDE, WITH CENTER FREQUENCIES OF 5332, 5348, 5368, 5373, AND 5405 KILOHERTZ.

GENERAL AND HIGHER CLASS LICENSE HOLDERS WILL BE PERMITTED TO OPERATE UPPER SIDEBAND PHONE, WITH A MAXIMUM OF 50 WATTS EFFECTIVE RADIATED POWER.

USERS ARE BEING ADVISED TO SET THEIR CARRIER FREQUENCY ONE AND A HALF KILOHERTZ LOWER THAN THE CHANNEL CENTER FREQUENCY. THE ARRL ALSO SUGGESTS RESTRICTING AUDIO BANDWIDTH TO 200 HERTZ ON THE LOW SIDE AND 2800 HERTZ ON THE HIGH END TO KEEP THE TOTAL BANDWIDTH WITHIN THE 2.8 KHZ IMPOSED BY THE FCC.

THE REPORT AND ORDER GRANTING THE NEW SPOT FREQUENCY ALLOCATION AT 5 MEGS WAS PUBLISHED IN THE FEDERAL REGISTER ON JUNE THIRD. LOOK FOR LOTS MORE ON THE SUBJECT IN THE NEAR FUTURE HERE ON THE AMATEUR RADIO NEWSLINE.

NORM. (ARRL, FCC)

**

INTERNATIONAL - SOLOMON ISLANDS: LICENSING CONFUSION

Meantime, in the Southern Hemisphere, some questions and some possible answers regarding the confused state of ham radio licensing in the Solomon Islands. Q-News Graham Kemp, VK4BB, has the details:

--

Sam Voron, VK2BVS, spoke to QNEWS from an Internet kiosk at Dubai airport. Sam was en route to Somalia, but paused just long enough to answer a few rumors regarding the Solomon Island H44 prefix licenses.

According to Voron, there had been no way for people to get a license in the Solomons because there are no exams there. So in 2002 the H44 national radio regulatory body called Spectrum printed 21 novice licenses with the call signs chosen by students at a radio school. These are people took the Unrestricted level license class of ham radio training.

But Spectrum said that it first wanted to issue Novice licenses because it felt new operators should start with an entry level ticket before moving on to a full license. But Voron admits that at least two of these licenses may have been issued with Unrestricted privileges.

According to Voron, the Secretary of the H44 national ham society has now drawn up an Unrestricted exam. Students not happy being forced into the novice license when they spent 6 months studying for the Unrestricted will be able to take the exam. If they pass, they will go directly to the Unrestricted instead of the Novice class operating privileges.

In further news just in and unsubstianted as yet, the real exam is ready. Spectrum has directed the candidates to sit for it. The school and candidates are said to be dealying because they are frightened that it may be to hard.

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News, down-under, in Brisbane, Australia.

--

No matter when that first upgrade test is held, it appears as if a method is at least now in place for native born Solomon Islanders to take an Amateur Radio exam. (Q-News)

FCC: KILLS RULES FOR LIGHTING DEVICE EMISSION LIMITS AT 2400-2500 MHZ

Remember a few years back when hams became very worried about degradation to the 2 point 4 Gigahertz band? This, after the FCC adopted a First Report and Order that relaxed the emission limits for R F lighting devices.

That was on June 9th of 1999 and at that time the Commission deferred to a future date action on changes to the rules to permit such devices to operate from 2400 to 2500 MHZ.

Now, with no apparent remaining interest by the lighting industry to produce RF lighting devices in that spectrum, the FCC has decided to forego any further rule change. Well, at least for the moment it has.

The whole story is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-123A1.doc on the World Wide Web. (CGC)

**

RADIO LAW: FCC ACTS TO EASE MEDIA OWNERSHIP RESTRICTIONS

Federal regulators have acted to relax rules that restrict media ownership. The change will permit companies to buy more broadcast properties and own a newspaper as well as a radio or television station in the same city.

On Monday, June 2nd the Federal Communications Commission announced that it voted 3 to 2 to adopt a series of changes favored by media companies. It now says that a single company can now own TV stations that reach 45 percent of United States households instead of the previous 35 percent limit. The agency also eased rules governing local TV ownership so one media conglomerate can own two television stations in more markets and up to three stations in the largest markets like New York or Los Angeles.

More controversial was a decision to end an age-old ban on joint ownership of a newspapers and broadcast stations in the same city. The revised rule lifts all 'cross-ownership' restrictions in markets with nine or more TV stations. Smaller markets still face some limits and cross-ownership is still banned in city’s and towns with three or fewer television outlets.

And even these rule changes are expected to face court challenges. Some media companies already indicate wanting more wide spread deregulation. Meantime consumer advocates will be seeking to reverse the deregulatory trend in favor of more local control over the print and broadcast media.

Not approached in this latest round of broadcast deregulation was the subject of direct foreign ownership of U-S broadcast properties. Currently foreign entaties and governments are banned from such ownership. But over the years there has been intensive lobbying by foreign interest groups to do away with

this ban which requires an act of Congress to lift. Most annylists say its not likely to happen in the near future. (Published news reports)

**

ENFORCEMENT: LOCAL CHARGES FILED AGAINST OHIO CB OPERATOR

Complaints from a group of neighbors experiencing interference on household appliances from phones and TV sets to baby monitors have resulted in a court case against a citizens band radio operator. Amateur Radio Newsline’s David Black, KB4KCH, takes a look at a most interesting case:

--

On the CB airwaves, he's said to go by the name Sugar Bear. James A Disbennet, of Lancaster, Ohio, faces first degree misdemeanor charges of operating a CB radio exceeding 4 watts. He also faces two counts of operating a CB radio without certification. The Lancaster Eagle Gazette says Disbennet was released on bond after answering a summons in Fairfield County Municipal Court May 20th.

The Lancaster City Council was the first such group in the U-S to pass an ordinance allowing the City to enforce rules set by the FCC governing the strength of CB radios. On April 10th, an assistant superintendent of the City's Electrical, Communications and Signals Department went on a transmitter hunt. The interfering signals were traced to Disbennet's home. The City then obtained a search warrant, with Lancaster police serving the warrant the following day. Officers seized four pieces of CB radio equipment worth more than a thousand dollars.

A trial date has yet to be set. If convicted, Disbennet could be hit with a 1,000 dollar fine and 180 days in jail.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to the law under which Disbennet was charged, the definition of CB radio "includes all private, two-way, short-distance voice communications service for personal or business activities of the general public. Citizens filing complaints must keep an accurate log of the interference for a minimum of four weeks and there has to be more than one complainant in order to file charges. The only exclusions to the law are for emergency communications services like police, fire and FCC licensed radio amateurs.

The complete story is in cyberspace at http://www.lancastereaglegazette.com/news/stories/20030521/localnews/339596.html. (N6RU)

**

ENFORCEMENT: FCC WITHDRAWS LETTER IN ENHANCED SSB OPERATION

Remember a stir created on April 3rd the FCC sent advisory letters several hams who run enhanced or so-called high fidelity single sideband? The FCC told

those operating the mode that the agency had received complaints from other radio amateurs alleging that the enhanced mode transmissions were using bandwidth wider than necessary. The FCC termed this as being contrary to good engineering practice.

One of those hams receiving such a notice was Anthony G. Latin, W4NSG, of Ocala Florida. Now, a month later the FCC has withdrawn its original letter to Latin, stating that it was issued to him in error. The regulatory agency also apologized to W4NSG for whatever inconvenience that letter may have caused him. No specific reason for the withdrawal of the letter was given. (FCC)

**

ENFORCEMENT: FCC ISSUES ANOTHER ENHANCED SSB WARNING

But its not over yet. This is because the FCC has issued another ham a similar warning regarding the use of enhanced SSB on the Amateur Service bands.

The May 12th letter went to Tyler Stampfli, KA0KA. Like those issued back in April, it tells the La Grange, North Carolina ham that use of enhanced Single Sideband emission with a bandwidth wider than necessary is contrary to good engineering practice. It also notes that no spectrum in the Amateur Service is designated specifically as “wideband audio” frequencies, either by Commission rule or in any informal band plans.

The FCC did not cite Stampfli. It did however request that he fully review the relevant Amateur Service rules and to make certain his station conforms to them. Also that he operate in the best interests of the Amateur Radio Service as a whole. (FCC)

**

ENFORCEMENT: BIG CELLULAR FINE

The FCC has issued Western Wireless Corporation and WWC Holdings two Notices of Apparent Liability to Monetary Forfeiture in the amount of $200,000 each. The companies are the licensee of Cellular Radio Station KNKN343 in North Dakota. The FCC says that the the companies are operating radio transmitting equipment from an unauthorized location resulting in the first fine.

The second $200,000 is the result of what the FCC says was Western Wireless for operating radio transmitting equipment from another unauthorized location. The two NAL’s wewre issued on May 5th and the companies were given the customary time to appeal.

More is on the web at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-109A1.doc and
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-234290A1.doc (FCC)

**

HAM RADIO AND THE LAW: CA HAM FILES FOR COURT COSTS

Mark Abrams, WA6DPB, the ham who recently triumphed over the city of Rancho Palos Verdes California in an antenna zoning case is headed back to court. In

an e-mail to Amateur Radio Newsline, Abrams says that his attorneys have recently completed our briefing in the 9th Circuit Court of Appeals on the issue of damages. Abrams says that he is now waiting for a court date which he expects will be around the end of August or early September. After the hearing, Abrams says that he expects to wait another 60 days for a written decision from the Court. If the Court decides in his favor he wins the right to have another trial on the amount of attorney's fees, court costs and damages. If he looses Abrams says that it will be unlikely that he will take the matter of reimbursement for his legal fees any further. (WA6DPB)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: FRANK SCHWAB, W8OK, - S.K.

Some sad news to report. The changing of the guard in ham radio continues. This with word that Frank Schwab, W8OK, has passed away.

As we reported last week, Schwab, who helped to craft the Dayton Hamvention over a half century ago suffered a heart attack a few hours prior to this years event. At the time, the 77 year old Schwab was also fighting cancer and several other ailments.

While best known for his work in creating the Hamvention, W8OK was also a world-class D-X’er and heavily involved in public service activities. Services were held Monday June 2nd at St. Christopher's Church in Vandalia, Ohio. A page long tribute to Schwab appeared recently in the Dayton Daily News. (W8ILC)

**

TIME TO RETIRE: WISCONSIN SCHOOL CLUB GOING QRT

After over 25 years in operation, Andrew Martin, KB9ZLL, reports over qrz.com website that the Fond du Lac, Wisconsin High School's ham radio club is dissolving. This, due to the retirement of it's trustee Jeffry Hoeft, K9NC.

The club had its beginnings in the old high school building in 1972. Back then it consisted of a wire antenna and CW transciver. Today the group has operations on the high frequency bands as well as two meters and 440 Mhz. More important, the Fond du Lac club has been responcible for the licensing of nearly two dozen new hams over the years it has operated. (KB9ZKK, QRZ.COM)

**

NET NEWS: NEW ECHOLINK VHF CONFERENCE

Ron Pastterson, W6FM, reports the creation of a new conference on Echolink devoted to the discussion of all aspects of VHF and UHF weak signal operating. The name of the on-line gathering is *VHF_TALK* and it was created to assist in coordinating skeds, discussing band openings and anything else related to operations in the world above 50 Mhz.

For those who aren't familiar, Echolink is a voice over I P system available to licensed amateurs. For more information on it and the new conference take your web browser over to www.echolink.org. Ron adds that the conference will hopefully soon be avail over the world wide Internet Repeater linking Project as well. Information on IRLP is in cyberspace at www.irlp.net . (VHF Reflector)

**

ON THE WEB: AMATEUR REPEATER BUILDERS HOME PAGE GOES QRT

The Amateur Repeater Builders Home Page appears to have gone QRT and its owner is blaming the attitudes of some hams for its demise. In a posting to the website, its administrator says in part that due to an unfortunate series of events resulting from this groups actions the Amateur Repeater Builders Page page will no longer be maintained.

Whats involved appears to be a dispute over universal recognition and acceptance of the the Northern California Amateur Radio band plan and what the board administrator terms as intentional interference to coordinated 420 links with an ATV transmitter. He says that the FCC's lack of time and/or interest in addressing the issue has caused him to become thoroughly disgusted and that he is -- quote -- ‘Gone fishing!’

But all might not be lost. Kevin Custer, W3KKC, says that he plans to contact the Amateur Repeater Builders Home Page owner to try to obtain the rights to the website and host it himself. He says he will let everyone know what happens over the Yahoogroups based Repeater Owners remailer. (W3KKC, VHF Reflector)

**

RADIO PICTURES FROM SPACE: THE EARTH FROM NEAR MARS

NASA's Mars Global Surveyor spacecraft turned away from the red planet for a while on May 8th and took a unique picture of Earth from Mars-orbit. This first-ever image of its kind not only shows our home planet as a tiny alien world in the vast darkness of space, but also includes Earth's moon and a view of the giant planet Jupiter. Go see http://science.nasa.gov/headlines/y2003/22may_alienearth.htm?list913324 for more. (NASA)

**

INTERNATIONAL - CUBA: FIRHAV 2004

Oscar Moroles, CO2OJ, says that the Federation of Radioamateurs of Cuba is organizing an international gathering of hams to be held next March. Called FIRHAV 2004, it will include sessions on all aspect of operation used on the bands above 50 Mhz including the new digital techniques. More information about FIRHAV 2004 and how to participate is on the web at http://frc.co.cu (CO2OJ)

**

ON THE AIR: COOKEN IN JUNE

Turning to on-the-air operations, the Central Ohio Operators Klub Extra - Novice is sponsoring special event station WW8OH June 21st 1200 to 2000 UTC. This, to coincide with the Ohio Department of Natural Resources Cranberry Bog open house.

Look for WW8OH in the General portion of the 40m band and QSL as directed on the airr. More inforrmation is at www.cooken.org and the word Klub is spelled with a “K.” (E-mail)

**

DX

In D-X, word that a group of five Greek operators will sign SX9G from Gavdos Island through the 15th of June. QSL via SV2DGH. (GB2RS)

**

THAT FINAL ITEM: THE OWLS ARE BACK

And finally this week, its time to get ready to T-Hunt down those ever elusive Burrowing Owls. And this year there’s another creature to look for -- bats. Heres Joe Moell, K0OV, with all the details:

--

For five years, ham operators and scanner listeners in western states have monitored VHF frequencies to help researchers in Saskatchewan and Washington state study the migratory behavior of Western Burrowing Owls, a species of concern. Now three more monitoring projects are beginning, and this time we need volunteers in south-central and southeastern states.

A biologist at the University of South Florida at Tampa (USF) is studying Florida Burrowing Owls. That's a slightly different subspecies from the Western Burrowing Owl. It is thought that their range is limited to Florida and the Keys, but there is one 40-year-old report of a sighting in North Carolina. Researchers have banded the legs of these birds in the past, but none of the banded owls have been recovered after leaving their Florida homes.

For the new study, some Florida Burrowing Owl chicks are being radio-tagged right now. Local researchers are tracking them as they leave their nests, learning to forage. In the summer, the young owls are expected to take off for parts unknown. USF wants volunteers throughout the southeast to listen for the VHF radio tags in an attempt to determine their routes and final destinations.

That's project #1. Number two involves Mexican Long-nosed Bats. For about a month beginning in mid-June, Bat Conservation International wants volunteers to join a team that will track their movements in and around Big Bend National Park in Texas as they pollinate century cactus plants. Physically fit hikers are especially wanted, but a few vehicle-based monitors will also be helpful. And there may be opportunities for some home monitors. Hams with VHF radio direction finding equipment are particularly needed.

Project #3 is a study of orphaned Great Horned Owls. It's being done by the Heard Natural Science Museum and Wildlife Sanctuary in McKinney, Texas, along with the University of North Texas. After being raised at the sanctuary, up to two dozen of these owls will be released into the wild this summer, with radio tags attached to help determine their dispersal patterns and survival rates. Volunteers are needed to monitor for the radio tags, especially in the Denton and Collin County areas. Great Horned Owls are territorial and do not migrate long distances.

My Web site on radio direction finding carries the latest details, frequencies, and contact information for all three projects. Point your browser to www.homingin.com HomingIn is one word --- homingin.com

Thanks in advance for your help! From southern California, where Burrowing Owls are diminishing but still can be seen in the farmlands, this is Joe Moell, Kay-zero-oscar-victor, for Amateur Radio Newsline.

--

Again, that website is www.homingin.com. (K0OV, ARNewsline™)

952. Comparisation of 115 antenna's (144Mhz) in a collourd chart!

Newsgroup: rec.radio.amateur.dx
Date: 2003-06-09 20:45:32 UTC
From: carlos Mendoza <no@spam.com>
Message-ID: <3ee4f30e$0$76746$1b62eedf@news.wanadoo.nl>

Hello All,

I received nice antenna information from VE7BQH.
It is the comparisation of 115 antenna's:

cue-dee, flexa, m2, dj9bv, f9ft, hygain, flexa, vargarda, cushcraft, many more....

I made a nice chart (table) so you can easy compare!

http://www.qsl.net/pd0rkc (click on the technic button).

73's Cor

In my other mail (in the news-group) people complain that they could not see my menu bar on the left (netscape users, and others?).
I used shockwave flash buttons, I asume that was the problem.
I have now the buttons in gif pictures.
I hope it work now for those who does not use the microsoft-browser (let me know!!!!).

Today you have to be if you choose anything out of Redmond. Patches, hotfixes, etc, are a necessary evil. If you choose to ignore this reality then do so at your own risk and to the detriment of your own functionality and security. You DO download the latest virus definintion files, don't you? You DO have a functional firewall if you're on broadband, don't you? If not, you're likely part of the problem of boxen getting hacked and part of the zombie-like DDoS plagues out there -- you just don't know it because you don't like to be your own sysadmin.

As to XP, you'd have to pay me to use it. I've been using Win2K professional since it came out, on every box in my network, and I couldn't be happier. It's configged to automagically dl and install critical patches and hotfixes and I've never had so much as one serious compatability issue with anything I run. Virus defs are DL'd daily to each box automatically as well, and I regularly test my own defenses with nmap from outside my network.

That said, I'm not trying to run 10-year-old software on it either...I run 32-bit software only (I refuse to run anything else) and I generally keep up with the latest versions of everything I like to use. Yes, it's a bit of a chore (read an hour a week), but the result is a network of 100% functional hardware and software and a perfectly integrated computer:amateur station.

From: Thierry <lombrytNOSPAM@hotmail.com>
Message-ID: <3ee61a15$1_1@news.vo.lu>
Source record: 10339

Hi hams,

Does someone know the QSL mgr for VP9CQ and XW1AC ?
Nothing on QRZ or buck or msg on DX summit.

Do you confirm that Oleg UA9ZZ is well QSLing via EA5OL (see in QRZ and buck) but seems strange ?

At last is TF3A well via buro with such a special callsign ?

Thanks in advance

Thierry

It's all the drivers that take the time. Some of them have ranking that
determines when they should be installed :-(
And I can never remember :-(

> What are you trying to install it into ... a Sinclair Spectrum?

No, but it as slow as loading a prog into one of those :-)
By the way, I have two of them under the stairs. Do you think they might
come back into fashion?

> A re-install of 98se, should take about 20-30 mins tops, unless you've

Agreed, but I have taken the chance of a part time job recently and this is
where the time to do the recovery comes from :-)

> Less if you've got a recent backup.

Unfortunately, the back-up is now out of date :-(

> p.s. And there's n'owt wrong with bleedin' Preston!

All together now.

OH YES THERE IS.

It's a jumped up town that thinks it is a city.

ARRL June VHF QSO Party--1800Z Jun 14-0300Z Jun 16 (see May QST, p 101).

Yesterday 6M was open all over the USA.
50.125 thru 50.200 sounded like an HF DXpedition split frequency range.
From the west coast we were hearing 100's of stations back to the east
coast, midwest and western states.

Single and double E-Hop a bunch.

Hopefully will open for the June VHF contest. Tune in.

See URL:
http://www.arrl.org/contests/rules/2003/june-vhf.html

Amazing what an opposing thumb will do for you. :)
Perhaps that is why of all the animals, only man masturbates.

Gary7SLL, I'll get to grips with this one day.

A friend K6LLL has a beacon on 10M at 28.2035 MHz and has received QSL's
from all states except Nevada, Idaho, and Wyoming.

Give a listen and help him complete his WAS Beacon project.
With sporadic E maybe those states can hear his beacon.

His URL:
http://www.tlg.uci.edu/~ted/radio_page.html

His map is out of date but he needs only 3 to complete.

Thanks for any help

Dirty old man. :) Still it makes a change from watching sheep.

Haven't Monkeys an opposing thumb?

Actually I've watched the monkeys pick their nose,
examine it, sniff it, and then eat it, obviously enjoying the salt.

Very interesting comment from someone who don't know jack about
operations !

Sure, we don't use punch cards any longer (well I am sure one shop has them !)

Operations is there, keeping the systems running.
Even the most complex shop has software tools to help run and schedule,
operators and systems programmers will always be needed to supervise the
system(s)

UPS systems, standby gensets, fire suppression systems, vital records and data
storage.

Operations is the guardian of the data center and YOUR DATA !

I've been a button pusher for 27 years and nothing runs on my shop unless I say
so !

regards

Airy R Bean a troll.....

hi,

i want to check the output power of an fm transmitter, and i don't have a wattmeter. most of the wattmeters available in market here have a range of
0-50watt or 0-100 watt.
i want to design one, with a range of 0-2 watt approx, using the components available with me - digital multimeter(V,A,ohm), diodes, transistors, resistors and capacitors. someone please suggest me a design or point me to a schematic.

i am very much interested in designing a low power fm transmitter, yet all that i hit upon while searching the net are readymade schematics, which ofcourse work, yet i do not get the real idea of how it was designed. is there any good document about how to design an fm transmitter from scratch, given that "i need to transmitt an fm signal at 90Mhz with an output power of 2 watt". i would like to know how to design circuits for oscillators, pll, power booster, amplifier etc. and how to tweak them for getting the desired output.

please don't worry about the output power(2 watt as i mentioned). i know it's illegal, and i am not going to cause any damage. i just want to learn how to design. let me mention that i am very new to this subject.

thanks.
anand saha.

978. 6M Ops -- A Great Grid Square Finder

Newsgroup: rec.radio.amateur.dx
Date: 2003-06-15 19:49:10 UTC
From: AMHAM73 <amham73@connectnet.net>
Message-ID: <s54Ha.56414$Pc5.21644@fed1read01>
Source record: 10262

After trying several on line maps, it was always difficult to find what state a grid square was in. The maps obliterated the state outlines.

So I bought DX Atlas By VE3NEA URL: http://www.dxatlas.com/

Wow is this slick.

First you bring up the map for North America, it shows the districts and state outlines.

Then to locate a grid square -- press CNTRL G, type in the grid square and it puts a pointer right on the map so you can see the state and the grid square location.

Use zoom to enlarge the whole state and GS location.

Right on the map it gives UTC time, distance, and more.
Also great for HF Dxers -- gives prefixes, bearings. islands, more more.

Highly recommended.

No pecuniary interest here -- just a great program.

979. Echolink : why you don't like it ?

Hi,

I think that the next question will raise tons of objections, maybe. But
this is really not my objective. :-))
I sincerely believe it will not and that most hams will share my opinion...

I didn't know ECHOLINK (see www.echolink.org) excepting that I have heard
the name here and there, until my friend Gunter, alias LX2MG does a
demonstration of its possibilities this afternoon from his shack.

For the novice, here is in short what is ECHOLINK :
I think that the product appeared a few years ago but not many and was
programmed by an US OM who shared it freely with the communauty of hams.
- You are a licensed OM ? Even limited to VHF ? You do not have a good
antenna, no powerful RTX ? Or no ham equipment at all due to space
limitations or/and financial or other reasons ? But you want to work DX
stations or ragchewing in local QSO for years, doesn'it ?
But of course you own a personal computer and a connexion to the Internet ?
Right ! Then, there is no problem !...
(I already hear the first reactions : "What ? How that ?...")

With ECHOLINK, a freeware software that you can download from Internet (2MB
that you can install and setup in some minutes), if you are listed in the
callbook (or licensed this year) and have a valid email because the software
requests these information to valid your access, you can contact people
located on the other side of the earth on the clic of the mouse ! This,
without QRM, without be disturbed by the propagation or near stations
arriving 59++ 1.5 Khz away. All stations arrive 59++ as if they worked you
in the adjacent room ! I do not exaggerate.

The demo I participate to cannot be more convincing, and was a complete
success that convinced me fully of the utility and the power of this new
tool, what I repeated to my correspondant who was very happy of my reaction.
Let's imagine...

Using a sort of Explorer ‘ la "User manager" showing standby/connected users
or relays, from his XP station Gunter selected one user listed in the
"Europe", "Monaco", "3A..-L." container with the hope to find a french
speaking ham. Clic, space bar to emit (similar to PTT button) and a TX
appeared in red at the bottom of the screen. He was on the air... I didn't
really beleive him yet...
Gunter spoke as usual at good distance of his mic : "Here is LX2MG calling
in company of ON1SKY. Do you hear me ?". Some secondes of expectations...
Then as surprise I could be we get a prompt answer, very loud - that
surprised me first - and clear in our speakers connected to Gunter's

computer : "Hi OM, this is JS1....from Chiba, Japan. Do you speak French,
parlez-vous fran&#65533;ais ?".

Imagine my surprise, as was Gunter to hear a JA speaking french !! In the morning I have tried to hear VK and JA stations on the 20, 15 and 10m using Gunter's Yaesu 1000PM. It was quasi impossible to get out a JA station although Gunter used a beam and a 2 kW amplifier at 50%... So the comparison was easy to do and I realize with some secondes of delay how powerful was this tool... Is this really a JA station, an OM calling from Japan that answered us by voice via Internet ??? I didn't believe what I was living... But I knew very well computers, clusters, packet radio and the idea was quickly accepted as possible, hi !

Whaow ! What a demonstration !... The QSO continues for about 15 min or more. At last we enter the callsign of our friend Ryu on our Alert log in order that his callsign be highlighted and bip when it will reappear on screen a next time.

Do you have well understood what I am trying to explain you ?
No yet ? OK. Without ham radio equipement other than a computer connected to the Internet, a mic and HP connected to this PC - that works also fine on wireless portable connected to a "air" ADSL router - we can contact the WORLD in a couple of secondes, loud and clear at all moment ! At the time of the QSO there was about 2000 licensed hams connected to ECHOLINK, Pfff (that means unbeleivable) !
No need to invest 4000$ in an high-end RTX and a 7 bander Titanex beam placed 30 ft high. The OMs are online, you can even make conferences with hams in VK and JA simultaneously, or sending each of them a picture without QRM (not as can be SSTV..., hi) or any other document by email as his coordinates are listed in a small window in the program with other useful data.

But a sad question that can anger some of us arises : will the old fashion amateur radio survive this true revolution ? Because it is ! Check by yourself and work only once with ECHOLINK... then answer me.

With the objective to publish a review of this new way of working DX stations for novices, besides clusters and other packet modes that I listed on my website, I would like to know the point of vue of amateur radio who do NOT like this system for any reason (technical or not). I do not find many, excepting two :
- you need to be in contact with your correspondant to hear it (excepting with a DL university named "Germany" to which you can also hear others hams in QSO, but they installed a special software in that goal)
- QSL are not valid for the DXCC.
- ??? difficult to find other args.

I do not want to create a huge controversial about this subject, pro or con ECHOLINK vs activity using an RTX.
Of course with ECHOLINK I could never work EME or by satellite, etc. OK.
So I really think that both techniques have their place. ECHOLINK can also be linked to your 2m RTX as is the usual packet radio (also accessible to

Internet users).
But ECHOLINK is really fantastic from a pure technical point of vue : accessible to ALL licensed hams, contact easy, it uses the power of your computer if necesary (for sendings mails, etc), no QRM, no propagation problems, no dedicated material required, low cost, etc, etc.

But why shouldn't you like this mode ? OK, the fact to not be able to hear OM in QSO (like when you switch on your TX and listen bands) can be one (as many OM continue to listen bands, sometime 70% of their time behind their RTX), but are there other minus sides ?
Be objective please, give me your opinion after have used this tool as I would like to extract some of your comments to complete my report in preparation (without naming you, in the form of a continuous article if possible, with examples, dumps, recordings, etc).

And please do not say me this is no more a ham radio activity as say some. Because I will answer you immediately : do no more work in SSB because in the first time of ham radio all OM worked only CW with a dipole or so.... So where have you to place your technical approbation ? In that case what technology or accessory do you "accept" or not to work QSO... ?
In my mind ECHOLINK is only a new mode, nothink else, but an easy mode that every licensed OM, even VHF can use freely and that gives to ham radio a new breath through the use of new technologies. IMHO you cannot ignore this fact.

In fact I think that you will not find many arguments valid "against" this marvelous tool... find me some if you can ! ;-)
I should be very happy to insert them in my future article.

NB. Don't afraid, you will continue to hear me on bands for long through my RTX ;-)

Thanks for comments

Do you have any schematics for an RF probe? There are schematics out there for an RF probe which you can use on a VOM. You read the RF voltage on the output and use the formula P=E - squared / R (which should (in most cases) be 50 ohms - a standard dummy load). It will give you a ball park idea. Accuracy? Well, I've found it close enough for my uses and experiments with Wattmeters also have shown a close proximity.

Start out with a higher scale, say 40-50 VDC so as not to overload the meter. Can work down a level or two depending on voltage measured. I have an RF probe in my tool box to use on my VOM just in case I need to measure the RF voltage to get an idea of output, should I not have a wattmeter or dummy load with me. Even checking with the existing antenna, will give you an idea

of output.

An RF probe utilizes a diode, a cap or so and resistance. It may be frequency limited, so you have to watch that. The schematic will usually give the range limit, usually to 500 MHz. I've made a few with RG 58 cable, perf board cut to size, and a piece of aluminum tubing cut to size and drilled as needed. About $7 in parts and 1/2 hours work. Most of the parts may be in your junk box or found at Radio Shack.

Right, this is just a "design experiment." Except that you have a
particular frequency and power in mind, and you know it's illegal.

Why didn't you make the subject line, "Help me build an illegal
transmitter"?

I hope no one else aids and abets this activity, I sure won't.

Hi Anand,

Your first problem is one of available voltage. Available from the transmitter, across the load, for the diode to then rectify and present to a meter for display. At 2W into 50Ohms you can at best develop:
P = E² / R
2 = E² / 50
E² = 2 * 50
E = 10V
This is far and away more than enough voltage to make the diode sing, as long as you use this meter AS the load. Trying to design a Wattmeter like an Amateur SWR meter (which is more versatile) would

lead to a design that attempts to use as little power going to the load as possible. You don't ask for that, so the Meter, AS load is appropriate, but then you need to ask yourself how much your real load appears to be like your Meter AS load (frequently not much at all).

Very few antennas offer a load of 50Ohms, which is simply the conventional value engineered into a system (your simple transmitter barely qualifies, and yet at some point it does have an output impedance and is driving a load of some input impedance - a system).

You should then build your Meter AS load with a value you can trust to be close to the actual value. For a ground plane style antenna this varies between 35 Ohms (with a flat radial design with around four spokes at 90° to the radiator, or 0° to the horizontal) and 50 Ohms (those same four spokes drooping at roughly 45° to the horizontal); or 70 Ohms for a dipole (vertical or horizontal) as long as they have been tuned to resonance (and now we return to the flexibility of the SWR meter which would allow you to determine this, but would be starved for power with only 2W available). Simple formulas for frequency and wire required to design these variations abound and you probably could trust them to be close enough. Download the free version of EZNEC and you will find them all and certainly within the means of the limitations imposed (for being free software) to determine those lengths for your self, to the materials at hand.

As for the detection portion of this we start with a 35/50/70 Ohm resistor. Connect this across the output of the transmitter (its antenna output connection and the chassis/ground or power supply common which is frequently the negative pole of the battery or lead of the supply).

Some cheap transmitters expect you to simply connect a whip to it and ignore that this point is also hot with supply voltage. As a precaution, insert a capacitor (one of the small disk types with a value of 0.001µF to 0.1µF) between that connector and the resistor. This capacitor will be invisible to the transmitter and the load (it won't matter).

I presume your meter is a solid state model from Radio Shack, but it could as easily be one with a needle that moves with input (probably found in a receding glacier). Either way, connect the negative lead to the common/chassis/ground described above.

Parallel connect an 1000 Ohm resistor (not critical - could be 620 or 2200) and another disk capacitor (not critical - like the one already described above) across the resistor. One side of this combination should go to the common/chassis/ground described above. The other side should go to the meter's free lead (the positive one).

You now have a lot of connections to common/chassis/ground and you have the 35/50/70 Ohm resistor being fed through a cap on one side (make sure the resistor can take 2W) and the meter with its circuitry

(specifically the +lead) isolated from it. Add a diode between these two points and you are complete: Resistor Load - Diode - +lead.

Apply power, measure voltage, apply Ohm's Law.

Let's see, now, he wants to learn how to design an illegal transmitter, and
the existing readymade designs are no good to him. He wants a fairly
sophisticated design (pll). He wants us not to worry about his power level.

He's posting from a free account.

Anyone else hearing alarm bells ringing?

Assuming you know the value of the transmitter load resistance.

With the diode (preferably germanium or other low-forward-voltage diode) rectify the RF voltage across the load, bypass the RF component of the DC volts down to transmitter ground with a 10,000 pF capacitor. Connect a 2M-ohm 1/4-watt resistor across the capacitor.

With the high resistance digital voltmeter measure the DC volts across the capacitor. The measured DC voltage + diode forward volts will be equal to the PEAK RF voltage across the load.

Transmitter power output in watts = Squared(Peak RF Volts)/2/Load resistance.

The above circuit will work up to a measured DC voltage not more than the rated reverse voltage of the diode.

Hi.

You posted this in the wrong newsgroup. You should repost it in:

rec.radio.amateur.shitwebeenarguingaboutforthelasttwoyears

Go to http://www.qrz.com to read all the recurring arguments.

Personally, I don't don't like it. Because I do like it. I can talk to
my friends who are thousands of miles away with a 300mw HT
thru another radio and my computer. Which I can't do right now
on HF cuz conditions suck as do my HF antennas.

EchoLink is like gun control. There are two views. And no matter
how much the two sides try and discuss it, the discussion always
turns into a yelling and cussing contest, and nobody every changes
sides.

So if you like it, go use it. But don't bother looking for converts,
cuz you won't find any.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, W1RQ, K2FF, N2OO, N2WB, WA2MOE, WA2VUY, K3PD, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N6UK/DL4TT, K8YSE, KG8DP, N8PR, W8CNL, W9DC, K0BCN, 9A6AA, CT1END, DL1EK/DL7VOA & DX Newsletter, DL6UAA, F5NQL & UFT, FJ5DX & La Gazette du DX, GM0CLN, I1JQJ & IK1ADH - 425 DX NEWS, JA1ELY, JI6KVR & JA-IOTA Islands News, LX1NO, MM0DFV, OZ4ACK, SM3CVM, TA3YJ, VA3RJ & ICPO and VE3EXY for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/June, through Sunday, 15th/June there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9V, 9Y, A4, A6, A7, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VP2E, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS (Wrap up). Fritz, N6UK/DL4TT, informed OPDX that he was active as 4U1UN on June 10th, a day later than first announced because his trip back from Europe was delayed. However, Fritz provided OPDX with the following report on the 4U1UN station: "Access to the station is quite limited right now, as is the equipment/antennas that

are available. The only antenna I could use was a folded dipole for the HF bands. The power was 100 watts."
QSO breakdown:
Band No. of QSOs Comments
50 MHz 111 Sporadic E to eastcoast, midwest a very
few W6 and VE
24 MHz 27 US: W0 and east coast
14 MHz 71 20% US and 80% EU/AS
7 MHz 1 no condx

Total 210
"There is currently activity improving the antenna situation (for 6m and shortwave). We hope future operations will be less limited. QSL only via Box 3873, Grand Central Station New York, NY 10163 USA. (Be patient with QSLing. Currently there is a backlog due to limited capacity of the QSL Manager.)"

4W, TIMOR LESTE. Thor, 4W3DX, continues to be very active on 20 meters CW/SSB/RTTY, as well as some activity on 40/15 meters. Most of his activity takes place between 1000-1430z, however, he has been heard on after 0230z. Watch around (+/- 5 kHz) 14025, 14195, 21083 and 7005 kHz. ADDED NOTE: Stu, WA2MOE, announced this week, "A petition was filed with the Chief Executive Officer of ARRL today seeking removal of UNTAET (United Nations Transitional Administration in East Timor) from the DXCC entities list and for the addition of Timor Leste as an entity." The petition states that DXCC rule under "Section II. DXCC List Criteria -- Criteria: (b): The entity has been assigned a call sign prefix bloc by the ITU. A provisional prefix bloc assignment may be made by the Secretary General of ITU. Should such provisional assignments not be ratified later by the full ITU, the Entity will be removed from the DXCC List."
and should be applied. Stu states, "The assignment was not ratified and UNTAET returned it to ITU which has reissued the block 4WA-4WZ to Timor Leste. It is the position of JA1BK and WA2MOE that the addition of 4W to the DXCC entities list was premature and that a mistake was made."

C6, BAHAMAS. Pete, N8PR, will be operating as C6AHR from Andros Island (IOTA NA-001) from June 21-23rd. Activity will be on SSB and CW with operations on 80-10 meters including the WARC bands are planned. QSL via N8PR.

CU2, AZORES. Lars, SM3CVM, plans to be active as CU2/SM3CVM/P from Sao Miguel (EU-003), June 24th- July 6th. Activity will be mainly CW on 80-10 meters. This will be a holiday operation, so he will mostly be active late evenings local time. QSL to his home callsign via the bureau or direct to CBA.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operation is approved for DXCC credit:
S05X - Western Sahara -- April 15th through 21st, 2003

IOTA NEWS.....................
AS-081. Operators DS5AAQ, DS5ACV, DS5ARL, DS5DNO, DS5DYM, DS5KJR
and DS5MNO will be active from Ch'angson Island during the
RSGB IOTA Contest (July 26-27th) as a Single-Op/12 hour
entry. Contest callsign will be DS5AAQ/p or HomeCall/p...etc.
QSL via their home callsign by the Bureau.

EU-008. The Cockenzie and Port Seton Amateur Radio Club (CPSARC), GM2T,
will once again operate from the Isle of Tiree (IOSA NH04, WAB
NM04), the most westerly of Scotland's Inner Hebridean Islands,
during the RSGB IOTA (Islands on the Air) Contest which runs
from 1200z, July 26th until 1200z, July 27th, using the clubs
special contest callsign GM2T. The team will consist of:
Cambell/MM0DXC, Bob/GM4UYZ, John/MM0JXI, BrianM0RNR, Landles/
GM4XZZ, Ron/GM4IKU, Innes/GM4VJV, Stevie/MM3SRU, Isa/MM3ISA,
and Iain/MM1CPP/MM3IDM. In addition to operation during the
contest, a small group of the team (Cambell, Brian, Iain, Stevie
and Isa) will be travelling to Tiree over the weekend of July
19th to set up the station in preparation for the contest and
will be operational from Tiree on all HF bands during the week
before the contest from around Monday, July 21st, using the
club callsign MM0CPS/P. QSL's for both callsigns via GM4UYZ.

EU-010. A team from the Forth Valley Contest Group will operate from
Benbecula (IOSA OH04 and WAB NF75), one of Scotland's Outer
Hebridean Islands, during the RSGB IOTA (Islands on the Air)
Contest. During the contest (which runs from 1200z, July 26th
until 1200z, July 27th), they will be using the special contest
callsign GM4V. At present, the team consists of John/MM0CCC,
Robert/MM0ANT, Colin/GM0CLN, Ian/GM4ZRR and Keith/GM0FZM. The
QSL Manager for all GM4V's operations is MM0ANT (his QSL details
are avaliable at QRZ.com). They hope to post updates on their
Web page at: http://www.gm4v.co.uk/
If you would like to contact the group, you can E-mail them
at: gm4v@mm0fvc.co.uk
They look forward to working you in the contest.

EU-017. Antonello, IK2DUW, will be active as ID9/IK2DUW from Filicudi
Island now through June 23rd. Activity will be on CW/SSB/RTTY
and PSK.

EU-020. Martin, SM0DTK, will be active from Gotland Island as SM0DTK/1
from June 19th through July 18th. Any sked can be arranged by
E-mail via: sm0dtk@passagen.se
Look at QTH at: http://hem.passagen.se/sm0dtk/
(Click "Losgodis")

EU-123. Look for Ed, G3SQX, to be active as GM7X from the Isle of
Arran during the RSGB IOTA Contest (July 26-27th) as a 100w
CW entry. QSL via G3SQX.

EU-170. (IOCA 2003 Tour!) Look for operators Eugene (9A/RZ3EC), Sergey
(9A/UA3NAN) and Emir/9A6AA (also as 9A0CI) to go on a 7 day

expedition (July 12-19th) to activate rare Croatian islands
and lighthouses in the Dalmatia North Group. More information
is available at: http://www.inet.hr/9a6aa
Some islands/LH they are going to activate are:
Karantunic : CI-421, CRO-065, LH-0674
Kosara : CI-043, CRO-071, LH-0749
Babac : CI-005, CRO-024, LH-0831
Mrtovnjak : CI-195, LH-1296
Ravan : CI-422, LH-0908
Blitvenica : CI-156, LH-0913

NA-046. Brad, W1RQ, will be going to Martha's Vineyard, Dukes County,
MA, using the callsign W1RQ/NA046, from June 21st through
July 12th. Operation will be SSB only, using the typical IOTA
frequencies. QSL via his home callsign W1RQ.

NA-128. CORRECTION. Nenad's, VE3EXY, activity as CK2/VE3EXY/P from
Orleans Island (Zone 4) is IOTA NA-128, not NA-125 as mentioned
in last week's bulletin. QSL via his home callsign VE3EXY.

OC-019. Now through July 3rd, look for Tom, KH6/W4MDL, to be active
during the weekends from various islands around Oahu. He plans
to activate Ford Island (USI HI-022S, Honolulu county), Konoehe
Island (USI HI-new) and Sand Island (HI-021S, Honolulu county).
Activity will be on 20-10 meters, including the WARC bands.
QSL via his home callsign, direct or bureau.

OC-140. By the time you read this, the VK6 DX Chasers Club should be
active from Thevenard Island as VI6TI. Look for them on or
near the usual IOTA frequencies, 40-6 meters plus AO-40, SSB
and CW. The 8 member team will be active through June 22nd.
INTERESTING NOTE: Alek, VK6APK, states that for a sked, if
you need them real bad, call on the Phone at +61 4 28925406.

OC-241. A group of operators are expected to operate as 8A9R from
Rote Island (WW Loc: PH19) in the middle of June for about
10 days. This will be a multi-band operation. Kadek, YC9BU,
will be one of the operators and also the QSL Manager. The
team will be operating near an old lighthouse on Rote Island,
which will be submitted for World Lighthouse Award acceptance.
Further information is forthcoming.

JD1, OGASAWARA (Commemorative Station of The Ogasawara Islands 35th
Anniversary of the Reversion). Toshi, JA1ELY, reports the following:
"Ogawawara Islands are located approximately 1000km south of Tokyo, and it
is distinguished from the mainland on the DXCC program as JD1. The Village
of Ogasawara organized the commemorative amateur radio station to celebrate
the 35th Anniversary of the reversion from June 10th through August 31st
this year. This radio station is the club station and is employed including
many newcomers who are from among the 2400 residents of Ogasawara Islands.
For this purpose, we trained the people of the village for purposes of
allowing them to obtain the license. The same callsign 'JD1YAB' is the

JARL commemorative station of reversion employed 34 years ago, i.e., one year after return, is used for this radio station under the recognition of the JARL!! We will operate all bands, all modes including 80-2 meters band and SSB, CW, RTTY, SSTV, Satellite(AO-10, UO-14) etc up to 200W output depending on each operators privileges. All QSLs will be sent to the world via the bureau automatically without any requests. Also, if you want it directly, it will be issued by the QSL Manager/JA1MRM. Send SAE (Self Addressed Envelope) and 1 IRC or sufficient return postage. JA1MRM: Saburo Asano, 3-26-8, Toyotama-Kita, Nerima, Tokyo, 176-0012 Japan."
73 ..... JD1YAB Operation Manager: Toshi/JA1ELY and Aki/JD1AMA

KH9, WAKE ISLAND. By the time you read this Jake, N6XIV/KH9, is expected (June 14th) or has left Wake Island after having added approximately over 1,500 additional QSOs to the log on his second trip. However, Chuck, N4BQW/KH9, will be remaining on the island for about 4 to 5 more weeks. Both operators were working 20 meters between 0600z and 1100z this past week giving the beam and amplifier a nice workout. Chuck, N4BQW, took time out to work Glenn/K2FF and Frank/W6FRH on 30 meters last weekend with solid signals reported both ways on the wire antenna. An additional antenna for 40/80/160 meters was installed this past week and Jake was working 40 meters, so Wake Island should now be active on multiple bands. Just as a reminder, Chuck will operate whenever he has spare time outside of his work requirements. And remember, QSLs for N6XIV/KH9 go via K2FF, while QSLs for N4BQW/KH9 go via KB6NAN.

LIGHTHOUSE ACTIVITY.....
Wade, AA8LL, plans to activate the Beaver Island, Michigan, Lighthouse on Friday, June 19th through Saturday, June 20th. It is reference number LH-1527 for the WLA and USA-046 for the ARLHS. Wade will be on the usual lighthouse frequencies 40-10 meters (if the propagation cooperates) and mostly SSB. The call and QSL route will be AA8LL.

The Old Barney Amateur Radio Club will be operating N2OB from the Barnegat Lighthouse (ARLHS Lighthouse USA-039), Long Beach Island, NJ (IOTA NA-111) (USI NJ001S) on August 2nd, (rain date August 3rd) from 1300-2300z. Operation will be primarily on or around 7240 and 14240 kHz SSB and 146.835 MHz (-600 FM rpt). A special photo QSL is via N2OB, PO Box 345, Tuckerton, NJ 08087 USA.

OD, LEBANON. Pavel, OD5/OK1MU, in Beirut informs/reminds OPDX and its readers that his stay in Lebanon is coming to an end and he will be going back to the Czech Republic at the end of July. He was heard on 20 and 17 meters CW last week. He is preparing a special color double-sized QSL cards (with the support of OKDXF) which will be sent to everyone who worked Pavel on all 9 HF bands 160-10 meters. A list of stations which have already worked OD5/OK1MU on 9 bands is available at: http://www.qsl.net/ok1mu
There is some 40 days left for those who need to work Pavel on certain bands and are interested to get his special QSL card. For a sked, send and E-mail to: ok1mu@yahoo.com
On behalf of the operator and his QSL manager OK1TN, they are requesting the HAM community for patience with the QSL cards (which are managed via

the OK QSL Bureau). They just received 25,000 QSL cards from the printers, and since Pavel will finish his activities from Lebanon at the end of July, they will send all QSL cards they get via the bureau after his return. "PLEASE, be patient, all QSOs will be confirmed!"

PIRATE STATION. Mogens, OZ4ACK, informs OPDX that a PIRATE station has been active from Copenhagen using the callsign OZ9TR.

QSL INFO AND NEWS.....
QSL CORRECTION. OPDX has been notified by Norby, LX1NO, that Phil, F5OGG, does NOT QSL through his home callsign. All QSLs for F5OGG/p activities (in this case 9A/F5OGG/p mentioned in last week's OPDX.613) must be requested through LX1NO. Phil will not answer these requests, and it would not make sense to send direct or bureau requests to him since it will cause a huge delay.

3B9FR QSLING ROUTE. Mart, DL6UAA, informs OPDX that over the past few months he has been reading about problems with QSLing to Robert, 3B9FR. Mart states he is in contact with Robert, and he does a good job! The only problem he sees is some WRONG details about Robert's address being published. Here is the correct QSL adresss (and please, send it only like this ... NO VIA MAURITIUS OR other via in the address field. Also, NO callsign on on the envelope):
Robert Felicite,
P.O.Box 31
Citronelle
Rodrigues Isl.
REPUBLIC OF MAURITIUS.
If possible, don't use envlopes larger then 17cm x 12cm. In that style Mart states he has NO problems with his mailings to Robert.

9K2ZZ QRT. Ray, W8CNL, reports to OPDX: "Bob Furzer, 9K2ZZ, has informed me this morning (June 13th) that he will be QRT from Kuwait next weekend. The tower and antennas should be coming down the 20th or so. He is not sure of the next callsign he might use. I would really like to wrap up the QSLing by the end of the year. I have about 3000 cards left and quite sure no more will ever be ordered. SASE or SAE and postage is a must. I will except postage from your country, ie: dollars, pounds, rubles, lire, francs, etc. I am all caught up on the QSLing, so if you didn't get a card, better try again. If you're after 10 band/mode contacts, just send 1 card and a note with the other contacts your after. Please don't send 10 separate cards!!! Any comments or questions, send to me direct. Don't tie up the reflectors. If you're not sure if you're in the log, write me before sending a card. Thanks for reading. 73 and Gud DX.... Raymond H. McClure - W8CNL, 5 McKenzie Circle, North Augusta, S.C. 29841-4319"

Special Event Field Day Station, CQ0QXL, was activated by CT2IGX/Bruno, CT2IEL/Filipe and CT2FUQ/Joao. QSL via CT4IS.

QSL JR8XXQ/JD1 (activity from Minami-Torishima) via: Kouichi Saito, 505-11, 3-15-111, Musa, Kushiro, Hokkaido 085-0806 Japan.

Jurij, MM0DFV, was active as MM0DFV/p this past week from (June 11-12th) from Isle of Arran (Western Scotland). Co-ordinates of the island are: 55,43 N and 5,11 W, QRA-Locator is IO75KK. QSL cards for QSOs can be sent through RSGB QSL Bureau or via his home address (QRZ.com).
The info for the islands diplomas:
IOTA: EU-123 -- URL: http://www.rsgbiota.org/
IOSA: CL-01 -- URL: http://www.gmdx.org.uk/
SCOTIA: CS-14 -- URL: http://www.iosa.co.uk/
WAB Area should be NS02 (Unitary Authority: North Ayrshire).
WAB URL: http://www.users.zetnet.co.uk/g1ntw/wab.htm
You can read about Arran Island and see photos on the Web site at: http://www.scotland-info.co.uk/arran.htm

Nilay, TA3YJ, reports that she has sent out QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to QSL Bureaus of Monaco, Tunisia, Cyprus, Algeria, Malta, Kuwait, Oman, Qatar, Bahrain, China, Andorra, Chile, Cuba, Morocco, Portugal, Philippines, Ireland, Moldova, Estonia, Ecuador, Colombia, South Korea, Panama, Jordan, Argentina, Luxembourg, Bulgaria, Faroe Islands, Aruba, Brazil, Bosnia & Herzegovina, Iceland, Australia (VK2, VK3, VK4), India, Mexio, Indonesia, Iraq, Latvia, Venezuela, Former Yugoslav Republic of Macedonia, Albania, New Zealand, South Africa, Armenia, Iran, Kyrgyzstan and Kazakhstan direct on June 14th.

SPECIAL EVENT. Look for special event station to as sign, W1T (W 1oo TourdeFrance). Activity will be on all bands during the Tour de France bicycle race, July 5-27th, to commemorate the 100th anniversary of the Tour de France (TdF) and USA's Lance Armstong's attempt to win his 5th consecutive TdF. The operators are: Angel/WA2VUY and Rudolf/K2MVW. QSL via WA2VUY. The QSL card will have a unique photograph of the 21 of the 22 living Tour Champions taken October 24, 2002, in Paris, France, at a special reunion.

T32, EAST KIRIBATI. Pete, K3PD, informs OPDX that La Marr is returning to Kiritimati (Christmas) Island (CQ Zone 31, GRID - BJ11) using the callsign T32Z licensed for E. Kiribati (Line Islands). He expects to arrive on June 30th, and will operate as time permits for several weeks. La Marr will be active on 50 MHz, and the HF bands, SSB, CW, and some digital modes. The QSL Manager for T32Z is K3PD. Any prior requests for QSLs that have been sent to N7YL are no longer available. Logs prior to 2002 may not be available. The preferred method is to send SASE direct to his QSL Manager K3PD. SASE without adequate postage will be returned via the Bureau. You may request a QSL via the Bureau by marking your cards: T32Z via K3PD. QSLs are being printed, and logs will need to be copied, please do not expect instant return on your QSL requests until the QSLs and Logs are ready. The direct QSLs will be answered first. Direct any questions about the operation or QSLs to the QSL Manager Pete, K3PD, via E-mail at: k3pd@arrl.net

USI ACTIVITY (Field Day Operation). Members of the Rusty Zipper HF and DX Contest Club will once again activate, NA8KD, from South Bass Island (U.S. Islands Award OH-USI-007L, Ottawa County) during Field Day. Operators mentioned are Mark/KG8DP and possibly one other to be named later. It will be a limited operation, but when on the air, they will sure to be heard. The group is expected to also activate Kelly's Island (OH-USI-001L, Erie County) and North Bass Island (OH-USI-006, Ottawa County). North Bass Island has not yet been activated. More info to follow in the next few weeks. All QSL should go to KG8DP (OK via address at QRZ.com).

V3, BELIZE. Jay/K0BCN/V31MX and Cal/V31MF will be active from Caye Caulker (IOTA NA-073) from July 23rd until noon of July 29th. They will operate on 80-10 meters SSB with some CW activity. Look for V31MF to be active in the RSGB IOTA Contest (July 26-27th). Jay states he will be sitting this one out. QSL both callsign via K0BCN, either direct or via the bureau.

VP2, MONTSERRAT. Three members of the Florida DXpedition Group are on the "Road Again"! Operators Bill/W4WX/VP2MHX, William N2WB/VP2MWB and Bob/K9MDO/VP2MDO will be here July 22-29th. They will have three Kenwood stations and will be active on most bands and modes. QSL via their home callsigns, CBA. N2WB via QSL Manager N2OO.

i'm a shortwave radio fan. I like communicating via shortwave. I like the propagation and all the noise ect that comes with commuicating via shortwave. If I want to talk to someone over my computer then I'll just hook up a mike and talk over the internet, but that don't interest me in the least. I guess the best way of communicating without any hassle is via the phone, but it aint shortwave radio. So have fun with the echolink, it's not for me though.

Is for me. Seventh button down the left side and the second line on the
next page that comes up. (In two browsers)

On the left side, third button from the bottom, OR try this:
http://www.qsl.net/pd0rkc/technical.html

I tested the link. I will work.

Works fine for me using three out of four browsers -- iCab 2.9.5b158 (beta
version; 2.9.1 is latest full release version), Mozilla 1.2.1 (much nicer
than Netscape 7.x), and Opera 5.0. Doesn't work with Netscape 4.8 (which I
keep around since there are some websites which do things wrong in ways
that Netscape 4.8 tolerates, but standards-compliant browsers don't
tolerate). All this is on a Digital Audio G4 Macintosh (about two years
old).

Before he made the changes, it didn't work with any of the four browsers
-- presumably he was then using a Micro$loth corruption of JavaScript
intended only to work with IE on Windows machines, rather than the real
thing which works fine at all my bank sites.

Sorry, but it just is not amateur radio! It should be called amateur computer! It takes all the thrill out of working a new one. Turning on the PC and just digging up a contact out of fishbowl just will never compare to working with a low power rig and nominal antenna system, fighting through a pileup or lousy conditions. Now using a Ft-817 with 5 watts and a balcony mount whip and a lot of dedication is what I consider amateur radio. I go back to the old definition of amateur radio as a method of testing and improving wireless communication(please don't tell me that Y-FI communication could be considered amateur wireless communcation as 99.999% of the users have absolutely how it works, they are appliance operators.)

Alarm bells OMG

Do you really think if he was going to design something really illegal he would be looking in here for help.

Come on guys give your head a shake.
The illegal stuff is available online, already built and tested for pocket change....

Not sure about alarm bells at 2W., although I concede there's still a
possibility for mischieve-making at that low power. What's actually on
90Mhz? Might give us a clue...

Wes

Lighten up a little, have you never had a class assignment in your life.
Lets at least cut the guy a little slack.
With a little help in the subject this novice may go on to become a great
engineer, at least he's interested at this point.
Why are you so afaid that someone might give him information that is readily
available online??

There are worse things he could be doing with his time !!!

Regarding EchoLink, IRLP, Wires II, (or VoIP), three things can be said:

1. Anything that allows Hams to communicate with other Hams is a good thing -- in fact a great thing.

2. One must keep in mind with VoIP it is the internet that is the main vehicle, not radio as in Ham Radio.

3. VoIp should not deter one from upgrading and experiencing the thrill and pride of building ones own station and antennas and working the world via "Radio". Not having room for antennas or an HOA situation is no excuse. Many have worked DX with indoor antennas, flagpoles and mobile installations and many with QRP - 5 watts. Working VoIP is like picking up the telephone, working South Africa from your mobile with 5 Watts is an experience you will never forget.

Mm...
Thanks OM. I appreciated your reactions... Not always agree with one or
another, but I understand well your opinions, positive or negative about
echolink.
I do not want to create a controversy, so if you have other args pro or con
please continue to post them. I will see how to use them, i.e.to gather
similar opinions in a same paragrah, etc, in order to make my page about
the subject as complete as possible for novices (and trhe others maybe, hi).
NB. In Belgium, the next CQ-QSO magazine (probably july) will discuss about
echolink too.

Paul, 88-108 MHz is the U.S. FM broadcast band.

HOWEVER, he also said he wanted a PLL design. You don't use a PLL design
for a single-channel transmitter. You use a PLL design for a synthesized
transmitter, that can go ANYWHERE in the band.

I can think of a few interesting things I could do with a 2W synthesized
transmitter. Running a pirate radio station is only one of them.

The space between 89.9MHz and 90.1MHz on the commercial FM broadcast
band.

I don't think anybody is complaining about it Bobby, but someone brought
it up and we are expressing our views. I personally don't have any bone
to pick with other hams who want to use it, that is their choice, as for
me I will stick with shortwave and write emails on the NGs.

Enjoy Echolink if you want.

Right. And that is one of the reasons I don't think much of it. The reason I don't consider it Ham radio is that what is the difference between say using your HT to access a repeater that is on Voip or using a an FRS radio (dunno if that is legal or not) Or you can just use your computer microphone. It's just a big audio chatroom in which the weak link is the part where the radio connects to the net. This is why I just don't think its all that big a deal.

I agree there. If a person wants to use Voip, then that's cool. But to me, it is tons more fun to do what you described in your last paragraph.

Hi,

I would like to open a parenthesis to complete my first post because one paragraph seems have been jumped by most readers who do not like Echolink.

Without entering the controvery, to all readers speaking about experimentation, RTX, etc I would like to remind you that Echolink can be connected to an 2m RTX too, to its VHF antenna, and a simplex VOX linked to a computer, Ya !

I use a portable PC at home connected to a "air-router" for my ADSL connexion. The other side can be connected to a 2m RTX and a 2m antenna to work with Echolink.
Better, in Germany the HAM guardianship ministery accepted that Echolink use relays (as it is in the U.S.A.), so recognizing by this fact that echolink is a HAM tool, like many others (SSTV, etc).
So, now where is the difference with packet radio ?
On the contrary in Austria, a stupid man questionned so much his ministry that they decided to forbid all access to relay via Echolink..
I close my parenthesis.

If you want my opinion, I got my ham license because I like talking on RADIO, not a computer. If I want to slap on a headset and talk thru my computer, I use one of the thousands of chat programs. As far as I am concerned, if more hams start using echolink and not their radios, it just shows the governing agencies that the frequencies they have already given us are too much. As far as the airwaves are concerned, it's "use em' or lose em'"

Hi,

As I told in two posts, echolink is better that a big chat room as someone
told here.
It uses also a "sysop" mode in which you can connect your VHF RTX and
antennas to a VOX simplex interface connected to the Internet computer. You
can works also remotely, on /P or /M too.
Thus you can experiment on VHF or building the interface.
This is as ham radio as packet radio is.

This is even more similar to ham radio than i.e.SSTV that all hams recognize
as "pure ham radio activity". However in SSTV you only send images, no more,
where echolink allow you in some modes to experiment too.
good to know

Good point, Max. Echolink could be a linchpin in an effort to remove us from the spectrum, except for maybe two meters. No need for that spectrum if we can put 'em all on the net, eh? Then again, maybe thet could work the thing in so we would access Voip using FRS radios! 8^)

Hi,

Be accurate. In single-user mode, the usual one, you are working with a PC connected to Internet using the VoIP protocol. You do not need an RTX or antenna. Right.
But in sysop mode you can use your favorite 2m RTX and antenna to work in conjunction with Echolink. You only need an additionnal VOX simplex interface than can be the well-known RigBlaster II too. In such a mode you works like in packet radio. So it is ham radio !
See some links to manufacturers at the end of page
http://www.astrosurf.com/lombry/qsl-echolink.htm

I spoke to Ryu in Chiba, Japan, too!

And yes, EchoLink is great. Especially for techs and the money-challenged like me.

Any ham who is using his computer to access echolink is not on the air.
He (or she) could better spend that time on air instead.

Simple, isn't it?

Who cares if echolink is "good" or "bad" or "silly" or "stupid".
It *is* a way to avoid using ham radio, when ham radio could be used.

Followups to alt.braindead.ex.hams please.

I agree. It is probably more like tens of thousands.

At one time writing a chat program was *the thing* every
young hacker attempted. Much of the resulting code still
lives in places like simtel.

Because you can end up transmitting over the air waves on the other end.
That's why. So you must be licensed to do so.

Honk. Wrong answer. The radio that is used to transmit on the other
side of the a VoIP connection thru the internet is the sole
responsiblity of the owner of the radio. HE needs a license. And HE
is responsible for what gets transmitted, irregardless of who creates
the audio.

Which is why it's a very good idea to control who uses a VoIP link
connected to your radio. But don't feel bad. Very few hams today
understand the rules.......

Think of it this way. A DJ at an FM rock and roll station could be
transmitted on a VHF ham frequency thru the internet if the owner
of the computer/radio decided to lash things up that way. Would the
DJ then have to go take a ham test because Billy Bob is replaying
him on two meters ?

To some of us hams, there is more thrill in talking to an OLD one
(friend) then there is "working" a new one.

UR 59, QSL via Derek is about as "thrilling" as hemorroid surgery
to some us.

Computers, and the internet, are tools. But for some strange
reason, hams want to crack concrete with their heads instead
of using a hammer.

On 16 Jun 2003 01:16:41 -0700, ablight@alphalink.com.au (Andrew VK3BFA) wrote:

>Wheres the radio in this comms mode?

Well, there are a bunch of radios. First there's a 300mw HT I carry around the house, then there's a 40 watts VHF radio in my truck. There's another 50 watt VHF radio hooked to a sound card an a COM port on my computer.

In Hawaii (I'm in Florida) there's another VHF radio that's on a repeater frequency and is also hooked to a sound card and a COM port on a computer. That radio is on the frequency of a KH6 repeater, which is actually two radios, a receiver and a transmitter.

My friend in Las Vegas has a two meter HT, and a 50 watt VHF radio hooked to a computer.

We both connect to the repeater in Hawaii, so we can talk to each other.

So lets see how many radios that takes:

1. My HT (or the radio in my truck).
2. My VHF radio hooked to my computer.
3. A VHF radio in Hawaii hooked to a computer.
4. A repeater receiver in Hawaii.
5. A repeater transmitter in Hawaii.
6. A VHF radio in Las Vegas hooked to a computer.
7. An HT in Hawaii.

So for me to talk to a friend in Las Vegas it takes 7 radios. I guess we could assume that there's a lot more 'radio' in Echolink then there would be if I talked to you in VK land on 20 meters - seems to me that would only take 2 radios. So them Echolink guys must be 3.5 times the 'hams' that the post card collectors are, cuz they use 3.5 as many radios to talk to each other, right ?

No it is not the "wrong answer" but merely a short one. Anyone transmitting over the ham bands, regardless of whether it is simplex, the local repeater, or a repeater accessed over Echolink, must either be licensed for the frequency or operating under the direct supervision (i.e. in the same room) of a duly licensed amateur operator or they are in violation of the FCC rules. If the control operator of the repeater (whether your local repeater or an Echolink repeater) discovers someone operating illegally on the system, he/she is required to take the steps to get them off the system. But the person using the system is still responsible for their own illegal operation and can be fined by the FCC independently of the responsibilities of the control operator of the repeater or link.

And working 80,000 screaming monkeys on HF, all of whom want a
post card, is an experience you will never forget either :-) Been
there, done that. No fun anymore.

One of the BEST things about Echolink is that when the squelch opens
on my HT, I always know it's somebody that I WANT to talk to and they
NEVER want a QSL card.

One of the things I have never really understood about ham radio is
that we seem to have a dedicated group of geeks who are NEVER willing
to use the tools avialable to get the job done. Take the six meter
guys for example. Why get on 40 meters and talk to somebody two states
away EVERY DAY, ALL DAY, when you can listen to six meters for six
months until it opens and then you get 15 minutes until it's gone for
six months again.

Most hams would not hesitate to increase their communications range by
talking to someone on a VHF repeater (even though the majority of them
have no clue how a repeater works), but anybody who uses VoIP to
increase their communications range is committing a ham radio felony.
Makes sense to me :-)

By your logic, if both of you happen to be at home using your computers directly, that's Zero radios making you Zero times the ham. I'd choose a different way of making your point.

Eh what? "after" ??? You are confused. Most of my QSLs
are from the days when the only digital mode was 45 baud ;-)

My wife collects post cards.

I've been on HF (and VHF and UHF) working DX, ragchewing,
and contesting a WHOLE lot longer than I've operated the digital
modes. Of course I QSL when asked, don't you?

Did have one G station ask me for a QSL for our "10 meter"
IRLP contact. He was on his computer, I was on 10 meters working
him via K2***. Sent a card to the K2*** who I actually worked :-)

IRLP and EchoLink are cute, simple and obvious technologies
that allow lazy hams to pretend to play radio. Guess it would be
too hard to put something on HF to work KH6, right?

>Dee D. Flint, N8UZE
>

I think it is the wrong answer. Long version is wrong too. For several
reasons.....

1. The FCC has made no decisions on rules regarding VoIP - so there
are no FCC rules that apply. They haven't made any yet.

2. The closest thing to the scenario of Echolink (internet sound card
audio being transmitted via a radio) that we are now currently allowed
to do would be a telephone patch. In the event that you are doing a
phone patch for Cousin Freddy, who is on the phone, you are the ONLY
one reponsible for what gets transmitted over your radio. Cousin
Freddy can in NO WAY be held responsible for any violations regarding
FCC rules - he isn't "transmitting over the ham bands" - he's talking
on the telephone.

In your example you fail to realize that:

On simplex, I would be transmitting on a radio.
On the local repeater, I would be transmitting on a radio.
In both cases, I would be responsible for my transmissions.

BUT......

On an Echolink link to your local repeater (or simplex radio) I MIGHT
be talking into a six dollar plastic microphone hooked to the sound
card on my computer.

There FCC has NO jurisdiction of what I can transmit on a VoIP link over the internet. For example:

I can transmit music.
I can use profane language.
I can conduct communications relating to my business.

None of which I can do on ham radio frequencies......

Yes, you are correct. In the case that I was transmitting with a RADIO on your repeater, and violating the law, the control operator is responsible for getting rid of me and we both could go to radio prison.

BUT.......

In the case that I am using a six dollar plastic sound card mic, and my audio is leaving my computer via the internet, the control operator of your repeater is going to jail all by himself. There are NO FCC RULES regarding what I can say into a plastic microphone hooked to my computer. I didn't hook YOUR computer to a RADIO - YOU did.

So how can you possibly IMAGINE that the FCC could "fine" me for what comes out of YOUR radio ?

As I said before, there are no FCC rules regarding VoIP. And until somebody screws up big time or raises holy hell about what somebody else is doing (as happened in years past regarding packet messages), there is no way of telling exactly who will shoulder the majority of the blame. Sooner or later that will happen and we will have a clear definition of what we can and can't do - maybe no VoIP/Radio links will be allowed at all.

If you are running an Echolink/Radio connection, you'd best be able to cope with whatever comes out of YOUR radio, because YOU hooked it to the internet and there are no FCC rules about internet VoIP communications.

If I happen to be sitting in front of my computer using Echolink, I
still have to use two radios - I don't have the option of using a
plastic microphone.

Point is, the weak point about Echolink is that it works with no
radios. But just because it does, doesn't mean we all have to toss the
radios and get a plastic microphone. After all, this is Ham Radio, not
Ham Plastic Microphone.......

That's nothing new. That's just Clueless Newbie Syndrome. It's been
around for years. How many Clueless Newbies have you heard get
excited about "working DX" when two meters opens and guys from
the next state show up on the local repeater ? If you have your facts
right (which I doubt because I don't think you can access an IRLP node
with a computer, you need a radio) then the guy was simply a Clueless
Newbie. No harm in being one of them, that's how we all started out in
ham radio.

>Eh what? "after" ??? You are confused. Most of my QSLs
>are from the days when the only digital mode was 45 baud ;-)

Gee, Hank, I didn't know you were a Deee-X'er. I always thought you
were one of them digital geeks.

>IRLP and EchoLink are cute, simple and obvious technologies
>that allow lazy hams to pretend to play radio. Guess it would be
>too hard to put something on HF to work KH6, right?

Just like packet BBS's are cute, simple, obvious technologies that
allow lazy hams to be 'SYSOPS' and pretend to play email, right ?
Guess it would be too hard to hook up a modem to a phone line,
and run AOL setup, right ?

HF depends on propagation, Hank. I thought a Deeee-X'er like you would
know that. Propagation between Florida and KH6 (when it happens)
usually happens on 20 meters at 2 or 3 AM EST. Which isn't a good
time to talk to guys in Honolulu who are getting ready for bed. As the
sunspot cycle slowly sinks into the west, won't be too long until
it'll be years until we hear KH6 on the east coast again.

Actually, IRLP is more 'hammy' than Echolink, cuz if you wanna play
IRLP, you have to have a radio - no plastic sound card mics allowed.
The guy who wrote Echolink feels that the plastic sound card mic
option is a good, but also a bad, idea. It's good from the standpoint
that it gives new hams the option of learning to communicate with
other hams before they have a station, but it's bad from the
standpoint that it may keep a few of them from ever doing anything
else. I think I kind of agree with him, almost. I think we'll lose

more than we gain to the plastic microphones, but that's another discussion.

Ham radio to me has always been about COMMUNICATIONS - not about "new ones" and shoe boxes full of post cards - so I don't worry about how much Deee-X I can work, I just like to talk to people that I have things in common with.

I got an idea. Since VoIP depends on the internet, and the internet is evil when it comes to ham radio, let's can this discussion in the news groups and all of us can get on 20 meters and discuss it in real time. How's that sound ?

Dee, that's the short version. The long version is over here:

Oh yeah, I forgot, IF he is using a dummy load or an antenna short of required length such as for a low power "Carrier Current" type Radio station of an FM variety, he would be completely legal. He didn't really specify his end result other than learning. For all we know, he could end up on a frequency where no license is needed anyhow.. And if so, what is the big deal? Two watts max FM, isn't going to do a hell of a lot. L.

You can say that again! The flood gates have been opened long before this guy happened by. At least he admits to his actions and seems to understand any consequences. If he is using it to learn as he says, and isn't planning to cause RF interference, more power to him. At least he is honest about it.

This end of the FM band is traditionally set aside for Schools. The
FCC explicitly describes some transmission modes as being dormitory
oriented (although not at 2W). I am a longtime listener of KEXP/KCMU
90.3MHz. The KEXP is a vanity call linking it to Paul Allen's EMP
music pavilion (more than a shrine to Jimmy Hendrix). KEXP is one of
the leading internet broadcasters with community volunteer DJ's and
nearly 30% of their operating revenues covered through internet
pledges. In fact, the Seattle area consistently shows in the top 10
of popular internet broadcasters (3. KING classical, 6. KPLU jazz).

Ok, I sure shot myself in the foot on THAT comment - and to be honest,
I thought echolink was exclusively PC to PC comms. Thought IRLP was

the HT to repeater thing you describe. Ah well, live and learn - thank you for the information.

Still dont like the concept.

Max,

Don't think of this as a computer only type of communications. You can connect Echolink in many ways:

- My local node is on a 440 repeater. Find your local Echolink repeater node, and link it to my node. Now both repeaters are linked together.

- Say your traveling to Dayton, and want to keep in touch with the local boys back home. You link the Dayton repeater (or link) to your local repeater and rag chew all you want.

- So you traveled to London, and want to brag back to the guys at home, and all you brought was your laptop. You log in at the local Internet cafe, and bring up Echolink. you click on your repeater and talk to the guys back home, just like your there.

The last time I checked, this newsgroup was called "rec.radio.amateur.dx
". I think you'll find that most of the people that subscribe to this
newsgroup ARE "postcard collectors" and VERY interested getting the "new
ones." Take a look through the previous postings in this newsgroup and
see how many DX bulletins, QSL route info/requests, and other info
related to postcard collecting there have been (other than the "group of
four" that seem to find fault with so many of the posts here and are the
first to jump on someone.)

But once in a while, people do subscribe to a newsgroup by mistake until
they figure out that it's not what they thought it originally was.....

Jim I knew an old US Navy Chief and he had the answer to those imponderable
questions starting with
Why do people ______ ?? His answer -- people are different.
Trite or profound -- but sure bangs the ol nail on the head.

So to each his own, chase DX fer QSL's or ragchew wid em -- choice is yours.

Work 6M or 40M ?? Cause its there.

As I sed "Anything or any band or any mode that allows Hams to communicate
with other Hams is a great thing." VoIP included.

Gotta go -- working all grid squares via VoIP :-). Now whats the grid
square for Guam ? Oh you are in Florida now -- Hmm Grid Square EM90 - listen
for me !

More nonsense replies below.

Jim,
I understand you but I am not completely agree... :-)
Not many hams speak and underline the fact that there can have a link between EchoLink and your favorite 2m transceiver (or forget to speak about...) and your favorite ground plane VHF antenna.

Please look at the list of stations on the EchoLink program; those callsigns with a -R are running the software connected to a radio and repeater; those with the -L are running simplex links using a radio, proof this is a HAM activity. This Echolink can use repeaters, and is recognized as such by many national associations (excepting France and some others wo refuse to interconnect networks, i.e. Radio to Internet) !

So Echolink is able to work together with a 2m RTX, like is packet radio.
To use the EchoLink software you can use a simple one transistor soundcard interface used with many packet and PSK software programs. There are also interface boards available, see the Interface link on the EchoLink web site or links on my webpage http://www.astrosurf.com/lombry/qsl-echolink.htm

NB. For novices, a packet TNC is not a suitable interface; a one transistor PSK / Soundcard interface is all that is required. DTMF, Timing and other controls all built into the software. Other use a RigBlaster II.

1043. Re: homebrew wattmeter for measuring transmitter output power

Newsgroup: rec.radio.amateur.dx
Date: 2003-06-17 20:03:22 UTC
From: "L." <Tech@DP.NET>
Message-ID: <bcns6a$q5$1@xuxa.iecc.com>

Cross-posted to:
rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.broadcasting,sci.electronics.design

In my haste, I improperly stated a thought. It should have read "or a short antenna (required length or less) such as for a low power "Carrier Current" type radio station......."

Any one familiar with CC stations should know the antenna has to be kept a certain maximum length to limit radiation of the signal. IF that requirement is met, then they are in compliance - with no license needed. If memory serves me correct, I believe it to be 10' maximum. Seems to me too, that the figure also included the feed line.

One more thing, what is the big deal if he was posting from a "free account". Big deal! Sorry, but that party said or appears to have done - nothing - to warrant a federal case or spark a major concern. As Gerry pointed out, illegal amps and radios are a dime a dozen. You can find them most anywhere - hamfest, internet, you name it. This person's research is peanuts compared to the real situation.
